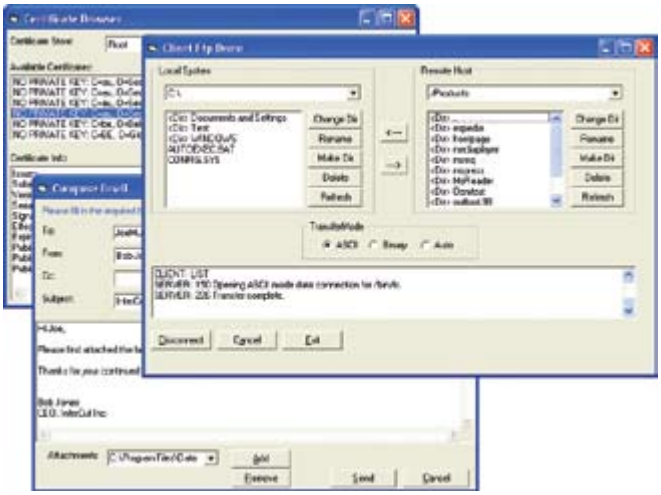
/n software

/n software IP*Works! .NET Edition V8.0

Write powerful asynchronously connected internet applications

- Includes more than 42 components implementing: HTTP, FTP, SOAP, SMTP, POP, IMAP, SNMP, NNTP, XML, MIME, Telnet and other protocols
- No Runtime fees, small in size and no external dependencies



/n software IP*Works!

Simple email client
You can use the SMTP and POP components in order to access post office (POP3) and mail servers (SMTP).

SOAP component
You can use the Soap object to access Web Services.

Client FTP
The FTP component can be used to build an FTP client. It allows browsing of directories, uploads and downloads of files, and more.

Webserver monitor
Checks how responsive a Web Server is by periodically requesting a page (URL).

Information download
Access the most up-to-date information from Web sites.

Get URL
You can download the content of a URL from a Web server.

Internet-enable your applications.

/n software IP*Works! is a comprehensive framework for Internet development. It eliminates the complexity of Internet development providing easy-to-use, programmable components that facilitate tasks such as sending email, transferring files, managing networks, browsing the Web and consuming Web Services, etc. /n software IP*Works! includes components for - FTP, HTTP, SMTP, POP, IMAP, LDAP, DNS, RSS, SMS, NetClock, Ping, RSS, SMPP, DNS, LDAP, Jabber, SOAP, WebDav, RAS, XML and more. /n software IP*Works! uses common component interfaces across platforms & technologies and is based on an optimized asynchronous socket architecture that has been actively refined for more than a decade. It also comes with extensive documentation, hundreds of sample applications and is royalty free to distribute.

/n software IP*Works! includes: FTP/TFTP - upload/download files to/from memory without writing to disk. HTTP/WebUpload - upload and download files to/from memory without writing to disk. DNS - Naming Authority Pointer (NAPTR) support and support for Reverse DNS lookups. IMAP - easy access to corporate mail servers such as Microsoft Exchange. SMPP - Short Message Peer-to-Peer client component, used to send SMS cellular text messaging. SMTP - used to send Internet (SMTP) mail, standards-based and extensible. SOAP - generic SOAP client supporting SOAP 1.1. Telnet - Telnet client component, easy to use, standards-based, flexible and powerful. TFTP - The TFTPClient control is used to exchange files with TFTP servers via the TFTP protocol. Plus many more communication components.

The /n software IP*Works! components represent a substantial leap forward in design, performance and functionality. Enterprise features like IPv6 addressing and support for 64-bit architectures have been enabled to make your connectivity application compatible with current and future technologies. In addition, the new highly-evolved core has been extended, updated and optimized for each individual supported development technology. Internet communications code can often be complicated, sometimes producing solutions which can be difficult to update and maintain. /n software provides design features that greatly simplify development, requiring far less code and increasing overall maintainability.

/n software IP*Works! .NET Edition includes fully-managed .NET components based on a 100% C# codebase, with no dependencies on outside native code. Includes individual .NET libraries optimized for .NET, ASP.NET and .NET CF development.

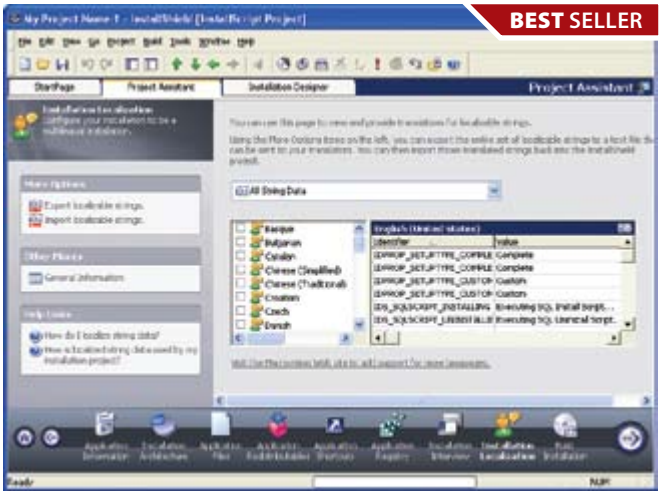
Acresso Software

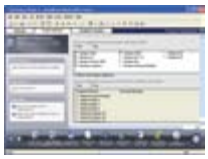
InstallShield Premier 2009

Create high-quality Windows Installer, server and mobile installations.

- Choose from 35 runtime languages to customize your installation.
- Includes new InstallShield MSI troubleshooting Tools: InstallShield MSI Diff, InstallShield MSI Query, InstallShield MSI Sleuth and InstallShield MSI Grep.



InstallShield



Enhanced Windows Vista support
Includes support for UAC, Restart Manager, the ability to specifically target Windows Vista.

Try and Die
This type of trialware enables your prospective customers to evaluate your product before buying it.

IDialog themes
Dialog themes are predefined sets of images that give your end user dialogs a unified and distinctive look.

Setup prerequisites
Easily handle base applications or components that must be installed on the target machine before your application can be installed.

Install project types
Create many different project types including MSI, InstallScript, Smart Device, .NET Wizard, Web project and more.

Localization
InstallShield Premier includes 35 runtime languages.

Easily create reliable Windows Installer (MSI) packages and InstallScript installations for Windows platforms, including Vista.

InstallShield Premier is an industry standard tool for ensuring that your Windows software products are correctly installed, configured, updated and eventually uninstalled on your customers' systems. With support for the latest technologies, significant performance and quality improvements, and functionality that lets you fully leverage the capabilities of Windows Vista, InstallShield Premier is the most robust edition ever. Whether your installations are MSI-based, InstallScript-based, or any other project type, InstallShield Premier has the tools you need to author professional installations optimized for Windows Vista. InstallShield Premier includes robust support for Windows Vista and related technologies such as UAC, Restart Manager and much more.

InstallShield Premier helps you avoid common installation issues by using the included InstallShield Best Practices Validation Suite. This alerts you if your installation violates any best practices guidelines. InstallShield Premier can also helps you maintain a clean build system by using the stand alone build engine, which means you only need to use the part of InstallShield that compiles installations.

Your end user's experience can be improved with refreshed end user dialog designs and localization features. InstallShield Premier's multilingual support lets you create installations for 35 runtime languages from one installation project. InstallShield Premier also lets you easily convert legacy installations into MSI packages with the included InstallShield Repackager.

InstallShield Premier lets you associate prerequisites with features so you can chain multiple MSIs together in a single installation. It ensures that when your end users install a feature, the prerequisite is also installed (if it wasn't already on their machine). Feature prerequisites are useful for applications or components that are used by only some configurations of the installed product and are not used during the installation itself.

You can easily create trial versions of your products without modifying code. With simple configuration changes, you can easily offer potential customers a fully functional trial version of your product (after the predetermined trial limit has been reached on an end user's machine, the trial version automatically expires).

InstallShield Premier is the ultimate setup solution for .NET software developers with full support for Visual Studio, including Visual Studio 2008 and 2005. InstallShield Premier lets you create your installations within the same Visual Studio interface where you create your products, making .NET install authoring more efficient. All InstallShield Premier's views are presented within the Visual Studio .NET Solution Explorer in a separate window, so no scrolling is necessary and side-by-side viewing options are available.

InstallShield makes it easy for software developers to create reliable software patches and upgrades that can modify all aspects of a previously deployed package. Whether you wish to distribute your InstallScript and MSI upgrades via the Internet, CD-ROM, Acresso's FLEXnet Connect, or any other method, InstallShield makes it happen.

Acresso SOFTWARE
Powering the business of software

If Software Installations or Deployments Are Your Job, Acresso Software Has Your Solution

NEW! InstallShield® 2009

How the World Installs Software on Microsoft Windows

InstallShield makes it easy to author reliable MSI and InstallScript installations for Windows platforms, keeping your customers happy and your support costs down.

Optimise Installations for Windows Vista™ SP1
Easily create Vista Logo Certified setups using tools that support the Restart Manager, UAC, Vista validation testing, and more.

Support the Latest Microsoft Technologies
Including .NET Framework 3.5, IIS 7.0, SQL Server 2005, Windows Server 2008, and Direct X 9.0c.

Install Software on Any Device
Extend installations to configure database servers, Web services, mobile devices, and more.

What's New in InstallShield 2009
Includes new support for MSI 4.5, Visual Studio 2008, managed-code custom actions, installation chaining, Hebrew and Arabic text, and much more!

NEW! InstallAnywhere™ 2009

Install Software on Multiple Platforms with One Installation Project

InstallAnywhere gives software developers a quick and easy way to author professional installations for Solaris, HP-UX, AIX, Linux, i5/OS, Mac OS X, Windows, and more.

One Project Covers Every Platform
Simplify development by creating a single installation project that works for multiple platforms.

Cut Software Development Time
Get products to market faster by creating reliable installations in minutes.

Impress End Users with Customised Installations
Impress your end users with a professional, branded installation experience.

Lower QA and Support Costs
Cut end-user support costs by significantly improving installation success rates.

One Installation for 31 Languages
Create a single installation that automatically translates setup text into 31 languages.

NEW! AdminStudio® 9.0

How IT Prepares Reliable MSI and Virtual Packages for Error-Free Deployment

AdminStudio makes it easy for IT to prepare reliable MSI and virtual packages for deployment. It has automated tools that speed software through the packaging process.

Cut Packaging Time by 70%
Automated tools help you get applications to end users up to 70% faster.

Cut Deployment Costs with Virtual Applications
AdminStudio automatically converts your MSIs to virtual Citrix® XenApp™, VMware® ThinApp™*, or Microsoft® App-V packages. No repackaging needed.

Migrate MSIs to Windows Vista Automatically
AdminStudio can proactively determine which applications are good candidates for migrating to Windows Vista without a second round of repackaging.

Works with Any Deployment Solution
AdminStudio supports leading deployment tools such as Microsoft® Configuration Manager, Novell® ZENworks®, LANDesk®, and much more.

* Requires separate purchase of VMware ThinApp

ComponentOne

ComponentOne Studio Enterprise 2008 v3

Over 210 components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices.

- Full suite of rich and flexible .NET Windows Forms components
- Rapid development of innovative & demanding Web applications
- Now includes over 30 innovative Silverlight controls

ComponentOne Studio Enterprise

Schedule for .NET
Studio Enterprise includes Schedule for .NET, for developing Outlook-style desktop scheduling applications.

Dynamic Charts AJAX
Any chart can take advantage of the built-in AJAX support to dynamically render its image without postback.

Silverlight chart types
Use Chart for Silverlight to create all popular chart types, including line, bar, column, area, and pie.

Carousel-like effects in Silverlight
Image Rotator for Silverlight can adjust its dimensions as the image rotates, providing a carousel-like dynamic effect.

WebGrid for ASP.NET
Includes advanced functionality like horizontal scrolling and fixed columns.

ComponentOne Dynamic Help
Enables end-users to view Help files in WinForms applications.

Create rich user interfaces for Silverlight, WPF, ASP.NET, Windows Forms, Mobile and ActiveX applications.

ComponentOne Studio Enterprise includes over 210 components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices. It offers a complete solution that targets all runtime environments and all application layers (data, presentation, reporting and transformation).

ComponentOne Studio Enterprise now includes 30 feature packed Silverlight components (grid, chart, menu, treeview, file uploader, layout, data input, gauges, maps, image rotator, navigation and more). You can use expression blend to fully style the Silverlight controls which allows developers to easily create rich graphical interfaces for their Rich Internet Applications. Built with XAML, the Silverlight controls promote collaboration in your team and fit seamlessly into your developer & designer workflow. Furthermore, you can take XAML from Silverlight and use it in your WPF application.

The WPF toolset includes: Schedule for WPF - a suite of tools delivering Scheduling, Month Calendar and Multi-Month Calendar components for the WPF platform. Chart for WPF - visually stunning 2D/3D bar, area, line, pie and column charts that will bring your WPF application's data to life. Grid for WPF - a set of controls that allow you to integrate grid functionality into your WPF applications. Reports for WPF - includes a flexible and powerful set of WPF reporting tools: the C1Report, C1PrintDocument, and C1DocumentViewer components as well as the C1ReportDesigner stand-alone application. Use Reports for WPF to strengthen your WPF applications with powerful report and document generating capabilities.

The ASP.NET toolset includes eCommerce (PayPal), file format management (PDF, Flash, XLS, ZIP), calendars, charting (2D and 3D), rich text editing, grids, input and mask controls, menus and toolbars, reporting, scheduling and spelling features. The components are AJAX-ready and fully interoperate with the ASP.NET AJAX Framework, so you can AJAX-enable your Web application without the need to understand the concepts of AJAX. The WebEditor component is a WYSIWYG rich-text editor for ASP.NET. It allows you to edit text in design, source (HTML) and split modes. It replaces any TextBox with an intuitive Microsoft Word like editor, which enables even non-technical users to easily author and manage HTML content. The customizable toolbar, built-in spell checker and complete JavaScript client-side object model allow you to easily manipulate your text - with or without code.

The .NET Windows Forms toolset includes barcodes, charting (2D/3D), grids, input controls, labels, editors, lists & combos, menus & toolbars, print & preview features, reporting, ribbon UI features, scheduling, file format managment (PDF, Flash, XLS, ZIP) sizing, spelling and tooltips. Smart designers are included in select Windows Forms components to allow you to set their most popular properties without leaving the design surface.

BUILD THE AMAZING WEB with Studio Enterprise

NEW Studio for ASP.NET
COMPLETELY RE-ENGINEERED

- Fully exploits the AJAX Framework
- Rich client-side object model
- 3x smaller footprint
- 10x faster performance
- Cross-browser support
- Built-in visual styles and animation effects

NEW Studio for Silverlight
NOW INCLUDES 30+ SILVERLIGHT CONTROLS

- Display rich, interactive geographical information using C1Maps
- Create full-featured, animated data visuals with C1Chart
- Develop complex dashboards easily with C1LinearGauge and C1RadialGauge
- Cross-browser support
- Incorporate powerful, data-bound grids to your applications with C1DataGrid

Coming Q4 2008 Studio for iPhone
FIRST SUITE OF IPHONE-ENHANCED WEB CONTROLS

- Combine the power and ease-of-use of ASP.NET to create cutting-edge, iPhone-styled applications
- Includes design elements for menus, UI buttons, content controls, sliders, and more

It's here and supercharged for the Web: **Studio Enterprise 2008 v3**. This new release delivers exactly what you need to produce next-generation UIs for the Web.

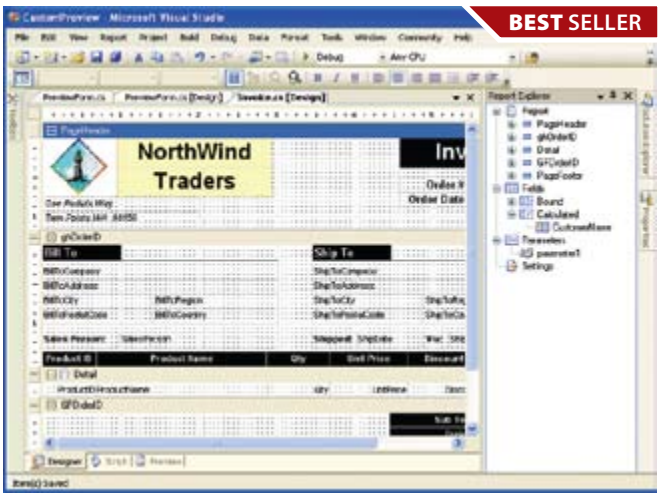
Data Dynamics

ActiveReports for .NET V3.0

The best selling report writer with no runtimes or royalties.

- ActiveReports Designer now includes design-time preview tab
- Viewer control now supports annotations
- ActiveReports engine features seven new chart types



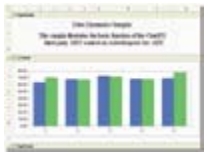
ActiveReports for .NET

Viewer annotations
Annotations can be placed on the report to pass notes and special instructions on to users and developers.

End-User Report Designer editing
Allow end users to edit their reports and save new reports or load old ones.

Viewing Web reports
The WebViewer control provided in the Professional Edition allows you to write less code and view reports more quickly.

OLEDB data sources
ActiveReports for .NET supports any .NET OLEDB data source.



3rd Party controls
ActiveReports for .NET supports the use of Windows Forms-based 3rd party controls with the report designer.

Subreports
With ActiveReports, reports may contain any number of child reports by using the Subreport control.

Generate a wide variety of reports from your .NET applications (Now includes Visual Studio 2008 support).

ActiveReports for .NET lets you easily create reports via the fully integrated designer. It has a familiar user interface and supports C# and Visual Basic .NET. It includes a report creation API with complete runtime access to report objects and members and a fully exposed object model.

ActiveReports for .NET has the ability to host 3rd party .NET controls and user controls within your reports and includes export filters for Adobe PDF, Microsoft Excel, RTF, HTML, text and TIFF formats. It can be used in both Windows based and Web based applications.

ActiveReports for .NET also includes a Windows Viewer control that supports split and multi-page views, has a "Table of Contents" pane with a thumbnail view tab and can perform text searches of reports. It also allows you to customize the viewer's toolbar.

The Professional Edition of ActiveReports for .NET features an end-user report designer control that allows you to host the report designer in your own applications to provide end users with the ability to create and modify reports. It supports zooming to magnify the design surface of the report for more precise placement and viewing of report controls. It also includes a server-side Web Viewer control that takes advantage of ASP.NET's HTTP handlers to allow you to display reports without having to write custom code.

Reports can be previewed at design time by clicking the preview tab at the bottom of the designer and .NET data components can be dropped directly onto the design surface of a report, resulting in a visual representation of the data component in the new report component tray. This makes it easy to add custom datasets to an ActiveReport at design time.

Other features in ActiveReports for .NET include a chart control (3D area, 3D bar, 3D clustered bar, 3D doughnut, 3D line, area, bar, Bezier, bubble, candle, doughnut, funnel, Gantt, HiLo OpenClose, Kagi, line, plotXY, point and figure, pyramid, renko, scatter etc.), updated memory management features, a rich text control that is capable of rendering HTML and RTF tables, and an integrated script window with syntax highlighting.

Data access in ActiveReports for .NET is via OLEDB and SqlClient report data sources. It binds to Dataset, DataView, DataTable, any RowCollection and any class that implements the iList interface. The DataSource property can be modified at runtime to create ad hoc (dynamic) reports or reports can be unbound. ASP.NET integration allows quick viewing of reports on the Web with the Web Viewer control. ActiveReports for .NET provides printing capabilities with an ActiveX viewer and Acrobat Reader viewerType properties. It also provides an RPX file HTTP handler to allow you to place a report on your Web server and make it available via a hyperlink to your Internet users in HTML or PDF. A compiled report HTTP handler is also provided to allow direct access via a hyperlink to a report compiled in an assembly on your server. The product is easy to deploy, the reporting engine is a single, managed, strongnamed assembly. Assemblies can be distributed using XCopy or the global assembly cache (GAC).

ActiveReports for .NET comes with a report wizard and a Microsoft Access report conversion wizard so you can start creating reports quickly. It is written in managed C# and provides integration with the Visual Studio .NET IDE. This allows Visual Studio .NET programmers to leverage their current programming language (C# or Visual Basic .NET) when programming with ActiveReports for .NET. The product is based on a per developer licensing scheme, and it is royalty-free to distribute.

Data Dynamics

ActiveReports for .net

Need the ability to create serious reports for your company?

Look no further.

HARDCORE REPORTS

ActiveReports for .NET helps you deliver hardcore reports on time, on budget, and with your sanity intact. You couldn't ask for more.

- Complete integration with Visual Studio .NET makes it a snap to create reports in a familiar environment.
- Flexible report controls like the chart, barcode, rich text box, and subreport controls provide the look needed.
- Versatile data binding makes it possible to use a variety of data sources in one report.
- Powerful exporting capability allows you to provide reports in the format needed.
- Royalty-free deployment eliminates extra costs for you and your customers.
- End-user report designer allows you to provide your end users with the reporting tools they need (Professional edition).
- HTTP handlers and the Web report server control make it easy to deploy and view server-based reports on the Web (Professional edition).

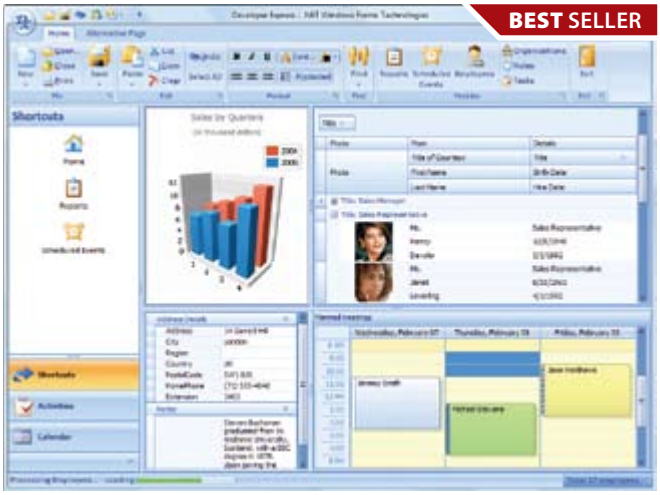
Developer Express
DXperience v2008 vol 3

All Developer Express ASP.NET, WinForms, WPF components and tools in one package.

- Provides reporting, toolbar, treelist, grid and sidebar functionality
- Now includes XtraGauges - with nearly 100 ready-to-use customizable gauge presets



DXperience

XtraBars Suite Ribbon Control and Tabbed MDI interface
With the XtraBars Suite you can easily build Ribbons from scratch.

XtraBars Suite
You can create application menu, galleries and contextual tabs in ribbons.

XtraGrid Suite
The XtraGrid Suite not only allows flexible data presentation, it offers you one of the fastest grids on the market.

XtraGrid Suite Master-Detail
The XtraGrid has true support for Master-Detail data presentation. You can use a View of any type as a detail - even a Card View.

XtraReports End-User Designer
The XtraReports Suite features a fully functional End-User Designer.

XtraReports Master-Detail Report
With the XtraReports Suite, you can easily build banded reports and even Master-Detail reports.

All the Visual Studio .NET component suites, libraries and IDE tools produced by Developer Express in one package.

DXperience includes all Developer Express products engineered for Visual Studio and the .NET Framework. With this subscription, you receive all key technologies by Developer Express including IDE productivity tools, business application frameworks, and components for Windows Forms, ASP.NET and ActiveX. In addition to individual tools, you receive complete source code for Windows Forms and ASP.NET components.

With the Universal subscription, you also receive eXpressApp Framework which is an instrument for creating business applications quickly and easily.

Windows Forms products include: XtraGrid Suite - a grid control with four data layout options from a simple table to banded multi-line row layout and card views, XtraBars Suite - a complete range of navigation and window layout management tools, XtraScheduler Suite - enables you to incorporate the UI found in Microsoft Office Calendar within your applications, XtraPivotGrid Suite - a data analysis, data mining and visual reporting solution, XtraTreeList Suite - a hybrid tree-view and grid control that has both bound and unbound data access options, XtraVerticalGrid Suite - a 90 degrees rotated grid where records are arranged one after another from right to left, XtraGauges - provides you with linear, circular, digital and state indicator gauge types, XtraEditors a library of over 20 editors that can be used both standalone or embedded, XtraWizard - easily generate multi-step wizard dialogs that fully conform to Wizard 97 or Wizard Aero standards, XtraPrinting Library - a data rendering and visualization system allowing you to construct any printed pages from scratch or print Windows Forms controls like the XtraGrid and more.

ASP.NET products include: ASPxGridView and Editors Library - a robust grid and data editors library for ASP.NET, ASPxPivotGrid Suite - a multi-dimensional analysis component, ASPxNavBar Suite - Web navigation bar with full AJAX support, ASPxMenu Suite - an extremely lightweight, customizable main and context menu and more.

Windows Forms and ASP.NET products include: XtraReports Suite - a reporting tool that features an extremely easy to use report designer and XtraCharts Suite - a 2D/3D charting solution.

Also included in Universal and Enterprise Editions: CodeRush, Refactor! Pro, eXpress Persistent Objects and six ActiveX products (grids, trees, navigation, bars, editors, printing etc.). Priority technical support is also included with updates and upgrades for 1 year.

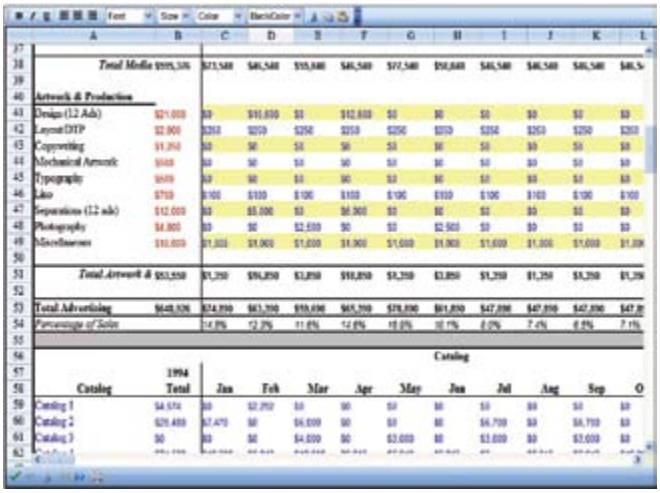
FarPoint Technologies

FarPoint Spread for ASP.NET V4.0

High-performance, fully-customizable ASP.NET spreadsheet component.

- Outlook style grouping allows users to sort data as required
- Conditional formatting enables styling based on cell contents
- Now supports "Load on Demand" paging (virtual mode)



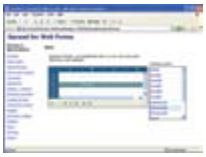
FarPoint Spread for ASP.NET

Hierarchy
Display multiple levels of data.

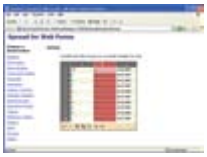
Formulas
Add calculations quickly to your Web applications by using any of over 200 predefined algorithms or add your own custom functions.

Import/export
Import/export Microsoft Excel 97 and higher files and text files. You can also export to Spread XML.

Retrieving data
Retrieve data from bound and unbound sources easily.



Skins
Use any of the 13 predefined skins or save and load your own design. Customized skins can easily be shared within your dev team.



Sorting
Automatically sort any column in ascending or descending order by double clicking on the header.

Easily present, edit and update your ASP.NET data.

FarPoint Spread for ASP.NET is a spreadsheet component that offers intuitive customer usability along with a wealth of grid functionality. With Spread for ASP.NET you have exceptional client-side validation to alert your user of invalid data immediately and simple client-side keyboard navigation. Written from the ground up in C#, Spread for ASP.NET will provide your user with an easy and reliable, feature-rich, user-friendly online experience.

FarPoint Spread for ASP.NET offers excellent design time support for rapid development using the innovative Spread Designer and supports in-cell editing and validation. It supports bound or unbound modes (no dataset needed), AJAX, native Microsoft Excel import/export, in-cell editing, multiple edits on multiple rows without server round trips, client-side column/row resizing, multiple sheets, searching, filtering, multiple cell types, validations, cell spans, multiple headers, sorting, complete customization at the cell level, over 300 built-in calculation functions, hierarchical display and much more.

The main features of FarPoint Spread for ASP.NET include:

AJAX Support - AJAX allows the component to refresh without refreshing the entire page. This affects several features including expanding and collapsing child sheets in a hierarchical display, column sorting, inserting rows, searching, filtering, paging and formulas.

Grouping - You can set up the display to allow Outlook-style grouping of rows. For large amounts of data, this is helpful to display the data in the order the user needs. The user selects columns by which to sort and the component then organizes and displays the data in a hierarchy with rows organized accordingly.

Searching - You can search for data in any of the cells in the workbook by specifying the sheet and the string of data for which to search. You also have several searching options you can choose from.

Row Filtering- With row filtering, you can allow the user to filter the data in columns on a sheet and display only the rows of data which meet criteria from a drop-down list or change the appearance of rows based on that filtering.

Frozen Rows and Columns - You can freeze columns and rows and keep them displayed regardless of where the user navigates in the sheet. Frozen rows and frozen columns do not scroll when the user uses the scroll bar or navigation keys in the component.

"Load on Demand" - You can allow the Web page to load on demand - as the user scrolls further down the spreadsheet, the FarPoint Spread component on the client loads another page of rows from the server as needed. This is similar to what was called "virtual mode" in the COM version of the product.

Publish Excel Workbooks Online - You can easily publish your existing or new Excel and higher workbooks online by using Spread's Excel import and export feature.

Finds where you're
weakest before
anyone else does.

Protect your applications with a complete, affordable and adaptable security solution for your business.

In today's business world, companies rely on an increasing number of web applications to collect and exchange sensitive data. More applications mean more places where you're vulnerable and knowing where your weaknesses are can be like finding a needle in a haystack. Unless you have IBM Appscan.

IBM Appscan is an automated solution that tests your web application security and then pinpoints your vulnerabilities. It can also help you manage the process of fixing them. With the threat of hackers always growing, IBM Appscan is designed to readily adapt to these ever-changing dangers - so you can be confident that you're totally secure and completely compliant.

IBM Appscan forms part of the IBM Rational range, which can provide you with complete, end-to-end lifecycle development solutions for all of your software. It makes your life easier and the development process run smoother than ever.

Protect your business. Don't let others find your weakness first.

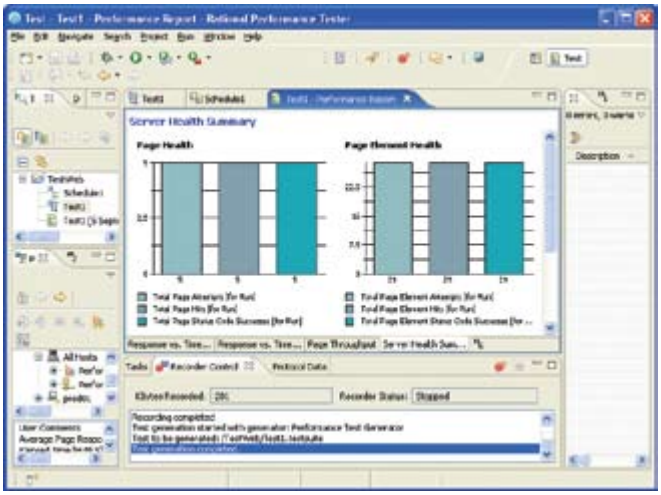
IBM **Rational.** software

IBM Rational Software

IBM Rational Performance Tester V8.0

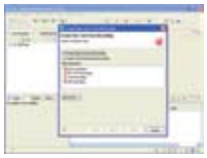
Identify the presence and cause of system performance bottlenecks.

- Create code free tests quickly without programming knowledge
- Provides testers with automated testing capabilities for functional testing, regression testing, GUI testing and data-driven testing



IBM Rational Performance Tester

Test Projects
Test projects contain performance tests, or you can simply record a test, which creates the project automatically.



Creating New Tests
With IBM Rational Performance Tester you can choose from a number of types of recording, Citrix, RPT HTTP, HTTP and SAP recording.

Creating a Schedule
Create a schedule that describes the behavior for your system and then run this schedule on successive builds of the application.

Datapools
Datapools provide tests with variable data during a run.

Performance Reports
Summarizes the validity of the run, shows the response trend of the slowest 10 pages in the test, and graphs the results of each page.

Server Health Summary
Gives an overall indication of how well the server is responding to the load including page attempts, page hits, and status code successes.

A multi-user load testing and performance testing tool for validating Web application scalability.

IBM Rational Performance Tester creates, executes and analyzes tests to validate the reliability of complex e-business applications. Use it to improve application performance, perform better capacity planning, and develop more scalable applications. No programming knowledge is necessary to create, comprehend, edit or execute a performance test. Tests are displayed as hierarchical lists of the Web pages that will be visited during execution. While test complexity is masked by default, advanced testers have access to all transactional information such as underlying page elements and server responses.

IBM Rational Performance Tester goes beyond problem identification to problem diagnosis. Using Root Cause Analysis features, you can identify both the source code and physical application tier that is causing the bottleneck. With the generated UML sequence diagrams you can trace all activity that occurred just prior to the bottleneck to truly enable you to address the root cause of your performance problem.

IBM Rational Performance Tester generates performance and throughput reports in real time, enabling you to detect performance problems at any time during a test run. These reports provide multiple filtering and configuration options that can be set before, during, and after a test run. Users can also review performance trends from one build to another. Additional reports are available at the conclusion of the test run to perform deeper analysis on items such as response time percentile distributions.

To ensure that your performance testing accurately mirrors your user population, IBM Rational Performance Tester provides a flexible graphical test scheduler where load is specified by proportional user groups. IBM Rational Performance Tester also provides synchronization points to create real world scenarios and allows for scheduling of those points for improved control of workflows and simulated conditions (stress points) on the Web server. This enables you to create a workload on your server that is truly representative of your user mix.

For accurate load emulation, often individual users must submit unique data to the server. IBM Rational Performance Tester provides an automated "data pooling" capability that varies the test data set used by each emulated user. A spreadsheet interface is provided to enter this unique data, or pre-existing data can be imported from any text based external source.

IBM Rational Performance Tester Supports load testing against a broad range of applications such as HTTP, SAP, Siebel, SIP, TCP Socket and Citrix.

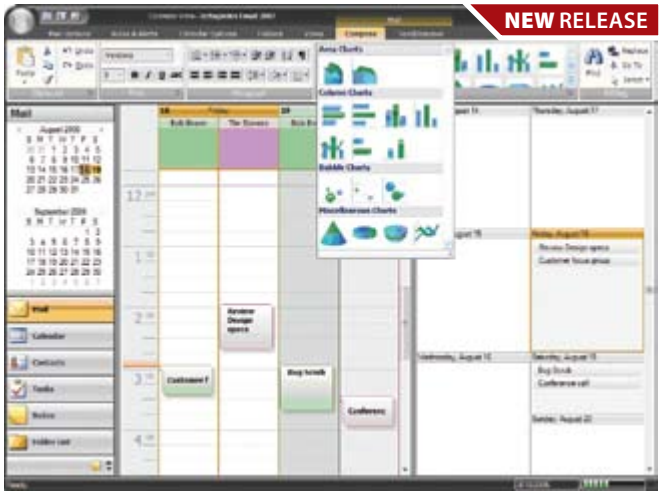
Infragistics

NetAdvantage for .NET 2008 Volume 3

Create commercial class UI for Winforms, ASP.NET, WPF & Silverlight applications.

- Includes ASP.NET, Silverlight, WPF and Windows Forms editions
- The new xamCalendar and xamCalendarDropDown WPF controls bring Vista-experience to navigating through dates.



NetAdvantage for .NET

NetAdvantage for ASP.NET
Gauges and Chart controls let you create an executive dashboard.

NetAdvantage for Windows Forms
Create Outlook style applications with integrated NetAdvantage for Windows Forms controls.

Create applications with Office 2007 Ribbon styling
Also includes grids with conditional formatting, trees, 3D charts, menus, etc.

PDF Export
You can export reports to PDF document displaying Gauges to visually summarize data.

xamDataGrid
NetAdvantage for .NET showing WPF controls xamDataGrid, xamCarouselListBox xamCarouselPanel.

Ribbon
Use NetAdvantage for .NET to create WPF applications with Ribbon interfaces.

Includes every essential User Interface control for Windows Forms, WPF, Silverlight and ASP.NET, plus application styling.

NetAdvantage for .NET is a presentation layer toolset for quickly and easily building and styling polished application UIs and delivering a great user experience, for WPF, Silverlight, Windows Forms, ASP.NET and Tablet PC. You can deliver user experiences consistent with Microsoft Office and Windows Vista, produce high performance Web applications and create hi-fidelity, cross-platform charts and gauges that instantly provide your audience with a clear understanding of key performance indicators. You can use the version of Visual Studio that's right for you – Whether it is Visual Studio 2005 or Visual Studio 2008, either choice enjoys full NetAdvantage for .NET tools support. Designed with the user experience in mind, NetAdvantage for .NET user interface controls give you the ability to focus on business logic while it takes care of the presentation. Use the modern look and feel of Windows Vista styles and navigation or emulate the Office 2003 and Office 2007 user experiences with predefined color tables and ribbon controls.

NetAdvantage for .NET has what you need to add no-touch AJAX to your Web site with a professionally polished UI. The product includes many Windows Forms and ASP.NET components: grids, charts, combos, desktop alerts, button calculator, dropdown, progress bar, scroll bar, tooltips, editors, gauge, listbar, listview, printing, scheduling, spell checker, tabs, toolbars and trees. NetAdvantage for .NET also includes a Document Export Engine for PDF and XPS formats and provides Web crawler optimization, AJAX support and SharePoint integration.

NetAdvantage for .NET includes Silverlight Controls for Line of Business (LOB) Applications which enable you to include islands of richness into your existing Web-based applications, giving end-users an experience that goes beyond what can be accomplished with mere HTML. These controls are built from the ground-up for the Silverlight 2 platform and take full advantage of its incredible capabilities and help you to produce compelling and impactful Web 2.0 applications.

NetAdvantage for .NET includes next generation WPF controls which were designed from the start with an uncompromising attitude toward leveraging its cinematic graphics, rich styling, animation capabilities, and integrated UI virtualization. Embracing templates and exposing numerous styling points gives you complete command over the controls' appearance. A logical, friendly object model makes it easy to take advantage of the WPF platform's potential, whether you choose to do so through declarative UI (XAML) or code.

Software FX
Chart FX 7

Add interactive charts and images to your Web and Windows applications.

- Totally rewritten to take advantage of Visual Studio enhancements
- Smart Tag Wizard provides a powerful yet familiar interface
- Redesigned UI integrates into Smart Client and ASP.NET applications

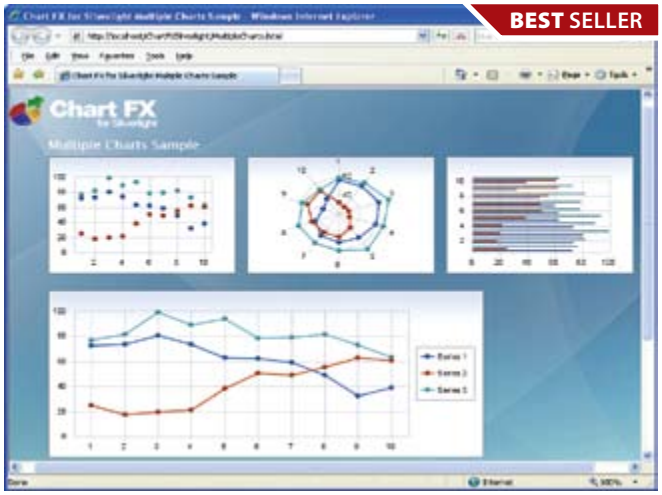

Chart FX 7

Chart types
Choose from over 20 different chart types including 3D bar, area, bar, bubble, financial, Gantt, line, pareto, pie, radar polar, etc.

Printing
Using the Printer Object, you will have control over margins, paper orientation, color or pattern printing, amongst others.

End User experience
The ChartFX toolbar, context sensitive menus and dialogs provide an easy way for the end user to change visual attributes.

Passing data
Chart FX supports passing data from databases and text files such as XML.

Multiple axes
Advanced features such as logarithmic scales, multiple axes as well as axis sections and panes are all included.

Selecting the chart's output
Chart FX supports a method called RenderToStream that allows the developer to select the type of desired output for your charts.

Chart FX integrates seamlessly into Visual Studio to provide developers with Enterprise level data visualization capabilities.

Chart FX takes full advantage of the .NET Framework and cutting-edge technologies such as AJAX to create visually-rich, lightweight and secure charts that will enhance your Enterprise application's display layer. Chart FX is compatible with Visual Studio Themes. Any changes that you make to a Theme are extended to the Chart FX controls on the page. A Silverlight add-on is also available to Chart FX users to allow developers to add Chart FX functionality to their Silverlight-based Web applications.

Chart FX can bit-stream directly to a browser and includes a DHTML rendering engine that uses AJAX (Asynchronous JavaScript and XML) to produce chart images that allow full interactivity in Web applications. The DHTML rendering engine automatically updates the chart with the new data without a complete page refresh, only updating the portion of the chart that changed. The charts are fully secure as there are no binary files to download. This allows end users to interact with charts in any browser on any platform, making your application available to a wider audience.

Chart FX supports a variety of data population methods including: passing data directly through the API, resultset binding, XML files, collections, arrays, arrays of arrays, text files and crosstab. It supports over 20 different chart types (bar, Gantt, area, line, step, curve, bubble, pie, doughnut, pyramid, combination, scatter, financial, surface, contour, radar, polar, statistical, etc.) and includes customizable legends, ready-to-use color palettes, multiple and customizable axes, per-marker attributes, gridlines, background images and border objects.

Chart FX provides run-time data analysis tools for your end users; these include drill downs, tooltips, drag and drop axis configuration and highlighting. Among all these tools, highlighting is a feature that allows end users to position the mouse in any chart element allowing Chart FX to instantly dim out other elements in the chart. This feature allows end users to quickly detect trends and other important elements in the chart.

Chart FX provides developers advanced charting features with minimal integration effort. Helpful tools like the Chart Wizard, tutorial & samples and a programmer's guide will assist you in creating visually impressive data visualization solutions with little time invested. Chart FX includes a comprehensive API and properties list allowing you to access complex functionality. It also makes full use of Visual Studio Smart Tags, and takes advantage of this infrastructure to build a fully functional Wizard that allows developers to quickly access Chart FX main features. This Smart Tag Wizard provides the basic datasource configuration option available to other controls in Visual Studio, so you can quickly create and/or connect to an existing database or dataset in your project.

A great new technology is nothing without the right tools

Telerik RadControls for WPF

A new perception for user interface

WPF is a fantastic new technology that will change the world, but… well, it's new. So you have to get back to the books and do some learning, before starting your next business application project.
Alternatively, you could cut some corners by using Telerik components for WPF and get tons of functionality out-of-the-box. Plus you get code reusability with Silverlight – another great technology made easier by the Telerik tools.

www.componentsource.com/telerik

telerik
deliver more than expected

Telerik

Telerik RadControls for ASP.NET AJAX Q3 2008

The market leading UI suite for ASP.NET AJAX.

- Includes AJAX Datagrid, charts, calendars & navigation controls
- Built on top of Microsoft ASP.NET AJAX
- Backed by industry leading technical support

Telerik RadControls for ASP.NET AJAX

RadControls for ASP.NET AJAX
Telerik RadControls for ASP.NET AJAX is an innovative and comprehensive toolset for professional web development.

RadEditor for ASP.NET AJAX
RadEditor is a fast WYSISYG web editor, designed upon ASP.NET AJAX, utilizing its common client-side framework and programming.

RadGrid for ASP.NET AJAX
A fast client-rich Datagrid for ASP.NET, designed to provide desktop-like user experience with minimum HTML.

RadGrid Filtering
By defining custom row template you "tell" the control to render each item in it in the way you specify.

RadMenu for ASP.NET AJAX
RadMenu is a navigation control for ASP.NET allowing you to build lightweight and search-engine friendly menu systems.

RadTreeView for ASP.NET AJAX
RadTreeView combines highly efficient rendering and AJAX Load on Demand support for superior performance.

A professional toolset designed to help ASP.NET developers deliver feature-rich, standards-compliant and cross-browser compatible Web applications on budget and on time.

Telerik RadControls for ASP.NET AJAX is a complete toolset for building Web solutions with the UI richness and responsiveness of desktop applications. It was built on top of the Microsoft ASP.NET AJAX framework and is a new development model, not mere AJAX functionality.

What's included: RadAjax - uses the Microsoft ASP.NET AJAX engine to make selected controls on the page perform AJAX callbacks instead of traditional postbacks. The AJAX-enabled controls are not merely rendered with callbacks, but preserve their interaction with the server and relations with the other controls on the page. In fact, ajaxified controls do not really know that they are working with callbacks instead of postbacks.

RadCalendar - is shipped with a composite DatePicker control which combines Calendar, DateInput, and PopupButton controls to enable developers to quickly implement the most widely used date selection interface for Web applications. Developers have complete control over the appearance of the day matrix, as it is not hardcoded to the usual 7 x 6 mode. Other features include: multiple selection options, template support, horizontal and vertical orientation, scrolling, navigation, support for System.Globalization Namespace and more.

RadChart – which includes a comprehensive chart wizard, secondary Y axis, numerical X Axis, drill down support, image maps, the ability to display different chart types on a single chart, automatic scaling of axes, gradient fills, hatch fills, image fills, negative values and more.

RadEditor - outputs XHTML-compliant content across all major browsers. It also provides real-time XHTML validation by sending HTML content for validation to the W3C service, and returning a compliancy report right within the editor interface. RadEditor puts an end to the "functionality vs speed" trade-off. The unique "load as needed" processes will only load the code on client browsers for the features that are being used. This minimalist script size results in tremendously swifter page loading. In addition, the editor's CSS Sprites-based semantic rendering leads to even more optimized loading speed and customization through simple CSS.

RadControls for ASP.NET AJAX also includes: RadColorPicker (a lightweight UI component that allows users to select colors from the RGB or HEX color spaces), RadCombobox (a drop-down list AJAX-based control), RadDock (a content placeholder, which can be moved, docked, resized, pinned etc), RadGrid (a fast and feature-rich Datagrid), RadInput (an enhanced data entry control), RadMenu (an advanced navigation control), RadScheduler (a lightweight scheduling component), RadSlider (allows users to select a value from a defined range using a smooth or step-based slider), RadSpell (multilingual spellchecking component), RadSplitter (resizable areas and sliding, dockable panels), RadTooltip (context-sensitive tool for displaying rich content as tooltips), RadTreeview (highly efficient treeview component), RadUpload (file-upload component) and RadWindow (component that can replace the standard browser dialogs and alert/prompt/confirm boxes).

The Telerik tools work without license keys and can be freely deployed on any server.

Actipro SyntaxEditor for WinForms

The ultimate syntax-highlighting editor control for .NET

- Mimics the Visual Studio code editor
- Create custom language definitions
- Code outlining and word wrap
- Indicators (breakpoints, squiggle lines)
- IntelliPrompt member lists, code snippets, parameter & quick info tips
- Over 100 stock editing commands

Optional Language Add-ons

- Advanced C#, VB and XML languages
- Automated IntelliPrompt & validation
- Document outlining & auto-complete

Actipro WPF Studio

Jumpstart your WPF application's UI with over 45 controls

Bundled suite includes all Actipro WPF controls at one low price:

- **Ribbon** - Office 2007-like UI that meets all Microsoft requirements
- **Docking & MDI** - Docking windows, multiple document interface
- **Navigation** - Navigation and explorer bars, breadcrumbs
- **PropertyGrid** - Blend and VS-like property grid
- **Wizard** - Aero wizard and wizard 97 dialogs
- **Gauge** - Circular, linear, and digital gauges
- **Bar Code** - Vector bar codes with many symbologies
- **Shared Library** - Date/time pickers, transitions, misc. controls
- 1 year of support & free upgrades

NEW VERSION 4.5

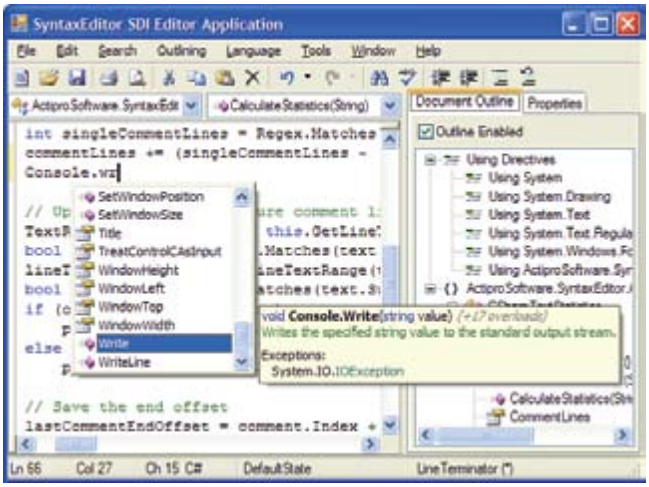
actipro

Actipro Software

Actipro SyntaxEditor V4.0

Powerful code editing control with VS.NET style productivity enhancements.



Actipro SyntaxEditor

Editing C# code
Edit C# code using automated IntelliPrompt for parameter info.

Editing VB code
Edit VB code using automated IntelliPrompt for member lists.

Editing an XML SyntaxEditor language definition file
SyntaxEditor can edit an XML SyntaxEditor language definition file based on an XSD.

- Develop and distribute custom language definitions with your applications
- Supports language merging e.g. HTML calling CSS, VBScript, etc.
- Perform semantic parsing operations in a separate worker thread

Actipro SyntaxEditor is designed from the ground up to handle advanced language parsing and processing, with phases for performing lexical parsing, semantic parsing (in a worker thread), and automatic outlining. Custom language definitions can be developed and distributed with your applications. SyntaxEditor includes a complete parser generator that helps build semantic parsers and construct ASTs (abstract syntax trees). Major code editing features of the control include code outlining, undo redo, word wrap, split views, current line and bracket highlights, virtual space, block selection, macro recording/playback, indicators, extensible rendering, IntelliPrompt code snippets, member lists, smart tags and more.

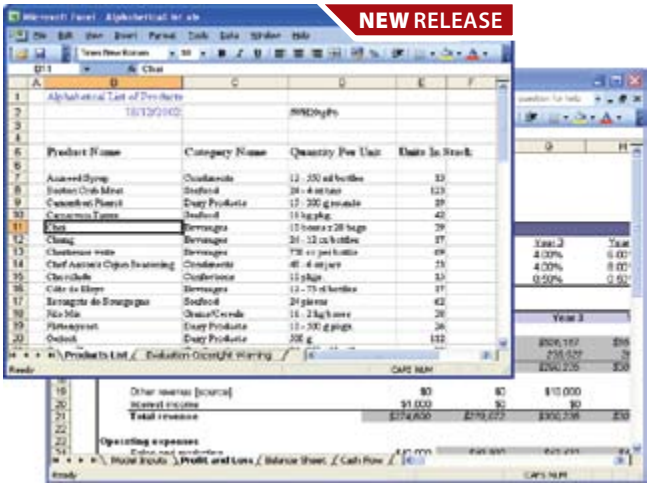
Aspose

Aspose.Total Q4 2008

Create, manage and convert many popular document formats.



Aspose.Total

Aspose.Cells
Includes Aspose.Cells which lets you create and manage Excel spreadsheets without requiring Microsoft Excel.

Aspose.Words
Includes Aspose.Words which lets you read, modify and write Word documents without utilizing Microsoft Word.

Aspose.Pdf
Includes Aspose.Pdf to create PDF documents without utilizing Adobe Acrobat.

- Supports Word, Excel, PowerPoint, Project, PDF and Flash file formats
- Demos written in C#, VB.NET and Java highlight the best practices for implementing many common tasks

Aspose.Total offers every component that Aspose has available as well as all new components released during the annual subscription. Aspose.Total is available in two editions: .NET and Java. Aspose.Total includes a set of components that support the most common document formats like MS Word, MS Excel, MS PowerPoint, MS Project, PDF, RTF, CSV and tab delimited documents allowing developers to create, manage and convert one format to another.

Aspose.Total also contains components for charting, email, spell checking, barcode creation, ad hoc query generation, recurrence patterns and workflow.

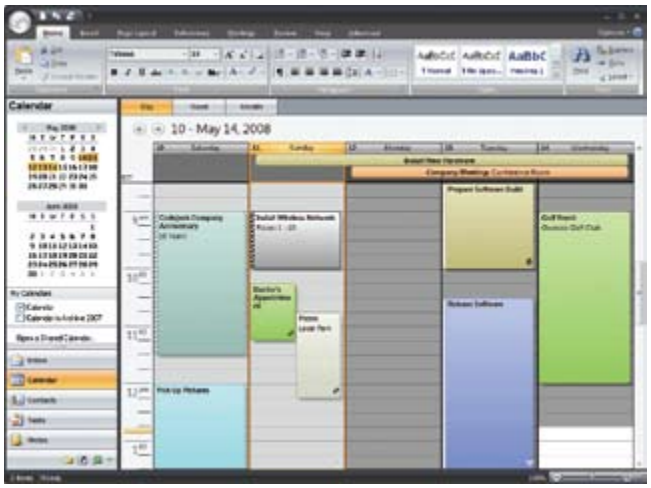
Codejock Software

Codejock Xtreme Suite Professional 2009

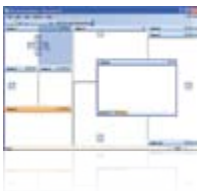
Create Office XP - 2007 and Visual Studio .NET style GUI elements.



Codejock Xtreme Suite Professional

Office style controls
Complete set of Office controls including shortcut bar and report grid.

Visual Studio .NET docking
Popular design and visual styles are available including Visual Studio .NET style docking stickers.



Enhanced docking logic
Sophisticated docking algorithms provide endless layouts and possibilities for presenting data and organizing desktops.

- Xtreme Command Bars features an Office 2007 style ribbon bar
- Easily theme your application with SkinFramework for .NET
- Now includes Vista style task dialogs

Codejock Xtreme Suite Professional provides Windows developers with a sophisticated set of components to give your application a professional, modern appearance. Codejock Xtreme Suite Professional combines seven components, Xtreme CommandBars, Xtreme Docking Pane, Xtreme Property Grid, Xtreme Report Control, Xtreme Calendar, Xtreme ShortcutBar and Xtreme Task Panel. With Xtreme Suite Professional you can create enterprise class applications that incorporate a full set of highly customizable user interface components that include Microsoft Office style toolbars and menus. Several popular visual styles are included such as Microsoft Office XP, Office 2003, Office 2007 and Visual Studio .NET.

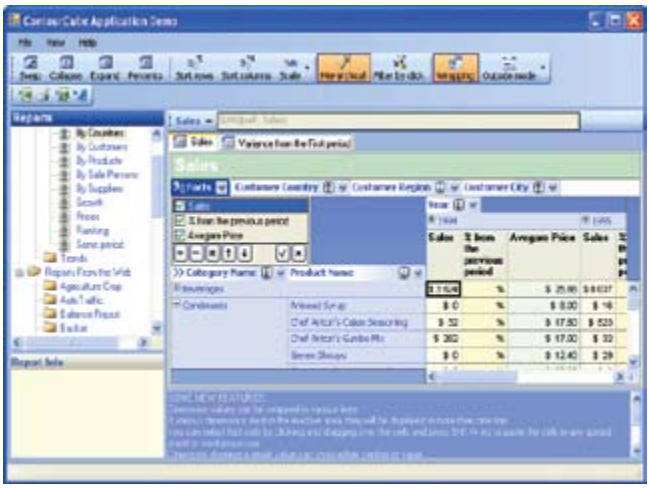
Contour Components

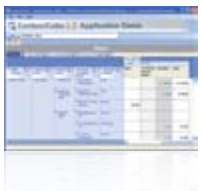
ContourCube V4.0

Interactive reporting, data analysis and reports distribution.



ContourCube

Embedded business functions
A rich library of business functions and statistical algorithms is included like trends, time variance, weighted averages.



Wrapping long strings
Text wrapping mode makes reports more visible and valuable for users who work with reports containing long strings.

Dynamic captions and filter area wrapping
Shows the selected value, so filters behave just like dropdown lists.

- Comprises many popular business and statistical algorithms
- Supports fast direct data loading from multiple sources
- Includes XP, Classic and Flat appearance styles with text wrapping

ContourCube is a high-performance OLAP component for rapid development of Internet, client-server and desktop business intelligence applications. It provides a highly dynamic interface for interactive data analysis, sophisticated analytical, statistical, reporting and graphing features. ContourCube can get data from any data source via ADO, BDE, ODBC or an unbound data source; just drop it onto a form within your project, link it to your data and get the benefits of OLAP. ContourCube performs OLAP operations on hundreds of thousands of records without an OLAP server. It allows end users to perform OLAP and statistical analyses using current data from any relational database. You can build and print reports interactively - simply with a click and drag & drop (with sub-second response times), dynamically interact with data: move rows and columns, filter data, drill-down, roll-up, pivot table and get all possible reports from one dataset. ContourCube makes millions of calculations simultaneously and shows new subtotals and totals instantly.

Contour Business Intelligence

Query | Interactive Reporting | Data Analysis | Information Delivery

ContourCube

"Add Business Intelligence functionality to your applications"

ContourCube brings embeddable interactive reporting, data analysis and information delivery technology to Windows and Web based business and statistical solutions. It lets user interact with data; slice and dice, pivot, drill down and roll up; with sub-second response times and without additional OLAP server.

ContourCube offers a rich palette of business-oriented functions, powerful and easy formula language, and a range of new reporting techniques with innovative approach to report distribution.

Contour Publisher

"A powerful and easy-to-use tool for automatic refreshing and delivery of reports"

Contour Publisher is designed to help engineers and managers save time on running queries and updating reports. It can instantly load pre-built reports, feeding these with recent data from your database.

Contour Publisher automatically accesses databases, builds new or updates existing reports in Microcube, HTML, Excel, or Word formats, according to the scripts or templates.

Contour Reporter

"An easy-to-use application for interactive reporting and data analysis"

Contour Reporter allows executives and managers quick access to business intelligence reports and increases productivity through interactive sales reports, stock, marketing, budget, and accounting analysis. Enterprises and banks easily access corporate reports with **Contour** Reporter.

Governmental organizations, statistical agencies, consulting companies use **Contour** Reporter for publishing corporate performance indicators for their departments and the general public.

Serious Components for Software Professionals

powerTCP for ActiveX and .NET

PowerTCP components are used by thousands of developers and companies throughout the world to increase productivity and shorten time-to-market.

PowerTCP for .NET components are compatible with all .NET Framework versions 1.x, 2.0, and 3.5. PowerTCP for ActiveX components provide legacy platform support, stability and longevity.

With detailed documentation, hundreds of comprehensive sample applications for Windows, ASP, and ASP.NET, and an expert in-house support staff, Dart provides professional assistance from concept to completion.

Email Validation, Secure FTP, Secure Mail, SSH, SFTP, Telnet, Emulation, SSL Sockets, Server Tool, Web Tool, Winsock, Ping, and Zip Compression

powerSNMP for ActiveX and .NET

powerSNMP for .NET

Create custom SNMP Manager, Trap and Agent applications with a set of native .NET classes. Full support for SNMPv1, SNMPv2, SNMPv3 and ASN.1 standards.

powerSNMP for ActiveX

Create custom SNMP Manager, Trap and Agent applications for monitoring and controlling network devices. Full support for SNMPv1, SNMPv2 and ASN.1 standards.

powerWEB for ASP.NET

powerWEB File Upload

Interactive, browser-based file upload with progress bars, stream integration, UI customization, multi-file uploads, low server overhead, and more!

powerWEB LiveControls

An advanced and efficient platform for developing responsive, AJAX-enabled ASP.NET applications. Rapidly develop interfaces with 20 server controls or take advantage of rich client and server APIs for custom client-server communications.

powerWEB Zoom

Provides cross-browser image panning and zooming without plug-ins! Place high-resolution, interactive images in your website and Zoom handles image delivery on-demand.

powerWEB TextBox

Incredibly flexible and customizable WYSIWYG HTML editor. Perfect for content management and distributed editing.

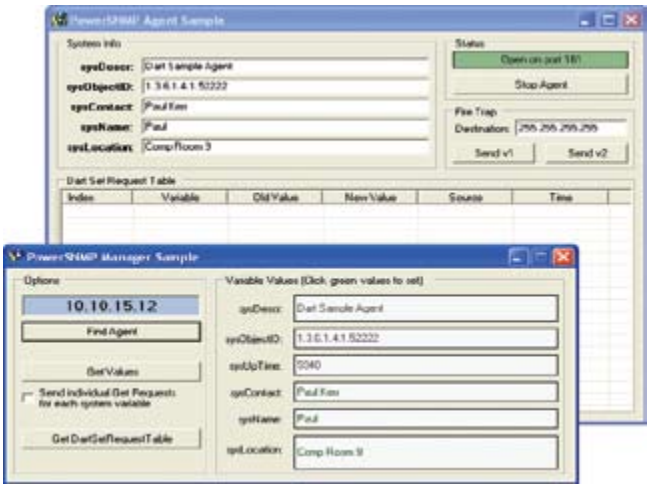
Microsoft Visual Studio PARTNER

Dart Communications

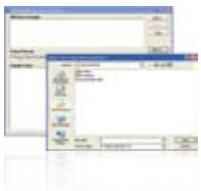
PowerSNMP for .NET V1.2.1

Manage, monitor and control network devices from your .NET applications.



PowerSNMP for .NET

Agent
You can create an application with common SNMP agent functions such as responding to SNMP queries.



Generate MIB classes
You can generate class code for MIBs. This functionality is also built into the Manager and Agent components.

Trap catching
Create NT services and contol them via the Windows services control panel.

- Messages can be constructed using no security, authentication only, or authentication and privacy with SNMPv3
- A MIB compiler dynamically loads MIB files at runtime

PowerSNMP for .NET is a family of .NET classes and components used to manage network devices and remote management information. Full support for SNMPv1, SNMPv2, SNMPv3 and ASN.1 standards provide interoperability with enterprise devices. The Manager and Agent components provide for message transport and a suite of supporting classes provide MIB information, encoding & decoding and encryption & decryption. MIB files can be parsed and imported into C# and Visual Basic projects to provide full intellisense support.

A MIB compiler dynamically loads MIB files at runtime to generate new classes and objects on demand.

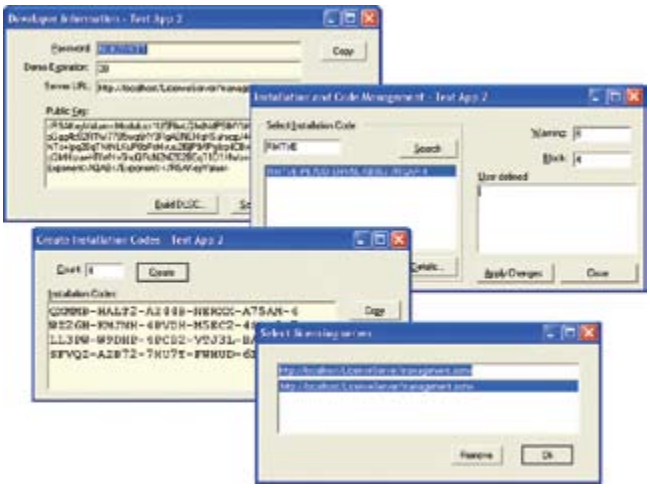
Desaware

Desaware Licensing System V1.5

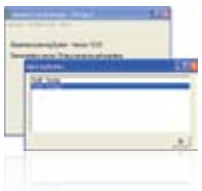
Add a cryptographic licensing system to your .NET applications.



Desaware Licensing System

Create istallation codes
You can create one or more installation codes. You can copy the codes to the clipboard or save them to disk.

Assemblies
Different types of assemblies across different products, can all be licensed with a single licensing certificate.



Application select
You can select and work on any application from a list of applications defined on the current server.

- Supports timed demo installations and server activation
- No hidden files, registry entries or background services needed
- License an unlimited number of applications at no extra cost

Desaware Licensing System is a cryptographic based licensing system for .NET. It is designed for component licensing per server/machine and is extremely easy to use. It can be configured for both moderate and high security scenarios. Using unique security features in the .NET Framework such as strong named assemblies and XML signatures, the Desaware Licensing System relies on end to end 128 bit cryptographic techniques, avoiding the use of hidden files, registry entries and other traditional licensing schemes.

Desaware Licensing System also includes an activation Web service, with a management application (with source).

How Flexible is Your Licensing Solution?

The licensing solution you choose should adapt to your licensing needs - you should not have to adapt your needs to the licensing solution.

It should integrate easily into your backend systems and infrastructure, and be flexible enough to allow for changes to the licensing model as your market grows.

The Desaware Licensing System

- Supports demos, time trials and subscriptions.
- Ties into the database of your choice, or use the automatic defaults.
- No royalty or additional fees. License two products or two hundred.
- Detailed instructions on hosting the server software at your site or a low cost hosting service. You are always in control.
- Fully customize system identification and comparison.
- Use the standard .NET component licensing framework or bypass it completely.
- Uses no secret or hidden files.
- Implement tight activation based security or less stringent security scenarios.
- Watch our website for Windows Mobile and concurrent licensing extensions.

Achieve A Higher State Of Data Visualization

To master the art of data visualization, you must seek out the leader. For almost two decades, Software FX has risen above all others by bringing top-of-the-line data visualization tools to enterprise developers working with diverse markets, platforms and environments. This wisdom has evolved into a vast body of products, including a data presentation tool that provides a best-of-breed solution for Windows developers seeking enterprise quality and performance, as well as a professional IT monitoring solution offering incredible features for reporting and monitoring data. For a world of data visualization products that can raise your work to a higher level, depend on the source that's clearly on top.

Our most popular product, ***Chart FX*** *provides charts, gauges and maps with additional vertical visualization functionality for business intelligence (OLAP), geographic data, financial technical analysis, and statistical studies and formulas. Recognized as the innovator and leader of the charting component category for the past 15 years, Chart FX delivers incomparable gallery options, aesthetics and data analysis features.*

Grid FX *was specifically designed for visual studio developers to take advantage of a powerful design-time experience, integrated Chart FX functionality right in the box, and AJAX to provide robust, run-time functionality in ASP.net applications. The dynamic aesthetic features for data presentation and analysis allow simple adaptation to an existing application or to specific corporate branding guidelines.*

PowerGadgets *puts powerful IT monitoring on your desktop and in your data sidebar. IT professionals can now create gadgets that consume data from WMI, Exchange, SQL Server and even the Windows Registry. PowerGadgets does not require any development environments, servers or browsers to run real-time gadget components such as charts, gauges and maps.*

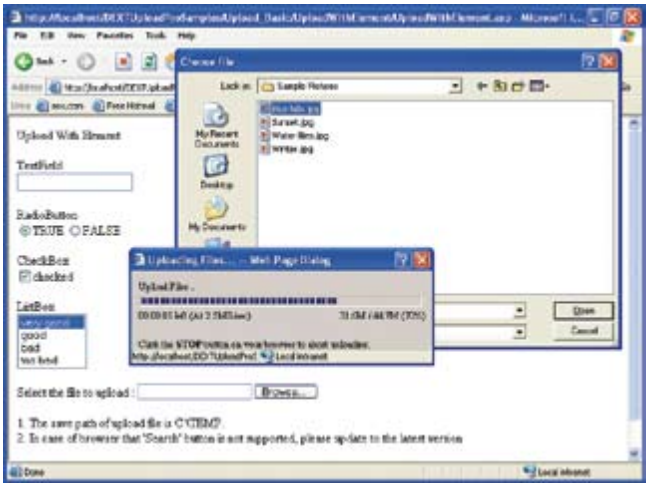
DEVPIA

DEXTUpload .NET Pro V3.6

Add the ability to upload files to your Web applications.



DEXTUpload .NET Pro

Single and Multiple Uploads
DEXTUpload.NET allows you to upload single and multiple files.

Upload Progress
You can display a custom progress bar during the upload process.

Watermarking and Image Format
You can upload and watermark images and change image formats on the fly.

- Allows uploads of upto 2GB files
- Use of optimized parsing algorithm makes uploading speed even faster
- Able to upload files to a database via a BLOB (Binary Large Object)

DEXTUpload.NET Pro is a component that supports file downloads and uploads between a Web browser and an IIS Web server. It observes Internet standards (RFC 1867) and can be used in Microsoft ASP.NET.

DEXTUpload .NET Pro is HTTP-based and uploads files from Web browsers to a Web server quickly and efficiently. DEXTUpload .NET Pro overcomes the limitations of ASP.NET uploading (inconsistency for high capacity file uploads, server overloads and safety, etc.). It is written in C# and provides you with improved upload speeds and stability. During upload and download you can invoke a progress window automatically without installing any other software. The pop-up progress window shows you uploading speed, file size, uploaded file size and time remaining. It can also be customized by using progress objects.

DEXTUpload .NET Pro also allows you to watermark uploaded images and convert uploaded images to thumbnails. It supports various file conversion formats (BMP, JPG, GIF etc.) and it provides detailed information about image files.

Dundas Software

Dundas Chart for Reporting Services V2.2

Enhance your reports in SQL Reporting Services.

Dundas Chart for Reporting Services

Visual Appearance
Every chart area can be customized to suit your needs.

Enhanced Formula Support
You can quickly and easily create sophisticated financial and statistical charts.

Custom Labels
Apply custom angles, fonts and colors to labels to achieve added levels of customization to charts.

- Chart types include 2D and 3D line, Spline, step line, bar, stacked bar, area, pie, range, polar, Gantt, funnel, etc.
- Scripting ability lets you write C# or VB.NET code against the charts object model

Dundas Chart for Reporting Services is based on the Dundas Chart for .NET engine, it gives IT professionals working with Reporting Services access to an arsenal of new features and chart types. You can instantly enhance reports with advanced charting visualizations, analysis capabilities and more.

Dundas Chart for Reporting Services is also very easy to incorporate into reports and easy to use. Like any other reporting control, it is integrated directly within the Visual Studio Toolbox, side by side with the native controls. It has interfaces that are familiar and easy to navigate to make the learning curve very minimal.

FusionCharts V3.0

Create real-time animated Flash-based charts for the Web.

FusionCharts

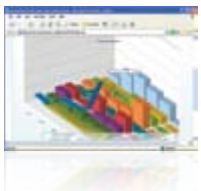

Chart interaction
FusionCharts features a true 3D chart that supports dynamic rotation, scaling, camera angles and lighting angles.

Dragable chart + JavaScript
You can visually modify figures on the chart and then submit data to local JavaScript functions present on the same page.

Integration
Seamlessly bind with JavaScript/ AJAX to let you update charts on the client side, without invoking any page refreshes.

- Works with any scripting language and runs on all major browsers
- No external ActiveX control or component required to render charts
- AutoFit allows charts to be easily resized to any width and height

FusionCharts is a Flash charting component that can be used to render data-driven & animated charts for your Web applications. FusionCharts allows you to create interactive and professional looking charts quickly and easily. It includes the following chart types: column 3D/2D, pie, dougnhut, line, area, stacked, combination charts, bubble, XY Plot and scroll charts. With FusionCharts, you can update charts on client side, invoke JavaScript functions as hotspot links or make dynamic calls for XML data to server without involving any page refreshes.

All the charts are rendered at client side using the widely installed Adobe Flash Platform. The server is just responsible for streaming the pre-built SWF files and your XML data files to the end viewers.
It can be used with any Web scripting languages like .NET, ASP, JSP, PHP, ColdFusion, Ruby on Rails, to deliver interactive and eye catching Flash charts. You do not need to know anything about Flash to use FusionCharts and since it uses XML as its data source, it works with any database.

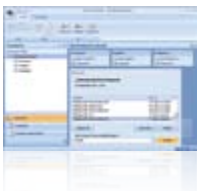
Janus Systems

Janus WinForms Controls Suite V3.5

Add Outlook style interfaces to your .NET applications.

Janus WinForms Controls Suite



Office 2007
Janus WinForms Controls Suite offers Office 2007 visual style for all controls included in the suite.

Janus Schedule Control for .NET
Present appointments and related owners in different views, representing Days, WorkWeeks, Weeks and Months.

Ribbon Component
Janus WinForms Controls Suite includes a Ribbon control.

- Includes Outlook style grid, calendar view, journal, Ribbon and shortcut bar
- Supports snap lines, base lines, ImageList keys and more
- Unbound mode in GridEX allows you to populate rows using AddItem method

Janus WinForms Controls Suite consists of 100% .NET managed code components that are designed to provide user interfaces for Microsoft .NET Smart Client applications patterned after Microsoft Outlook. Janus WinForms Controls Suite contains Janus GridEX for .NET (Outlook Grid), Janus Schedule for .NET (Outlook Calendar View), Janus Timeline Control for .NET (Outlook Journal), Janus ButtonBar Control for .NET and ExplorerBar Controls for .NET (Outlook Shortcut Bar), Janus CommandManager (Menus and Toolbars), Janus PanelManager (Outlook / VS.NET panes), Janus TabControl (tab control) and Janus Ribbon for .NET (Office 2007 style Ribbon bar). Janus GridEX for .NET is a data-aware, fully editable grid component that can be bound to any table in a dataset or to any other data source that supports IList, ITypedList or IBindingList interfaces. Janus GridEX for .NET does not sacrifice any group, sort or filter capabilities, when it is bound.

Janus WinForms Controls Suite

Add powerful Outlook style interfaces to your applications

Janus GridEX for .NET

Janus GridEX is a control capable of working in bound fashion with ADO.NET or IList data sources. The control supports hierarchical display of data and permits you to create effective user interfaces similar to Microsoft Outlook®, while easing development and maintenance time. The functionality provided by the control allows you to display, format, edit, sort, group, filter, manipulate, summarize, preview and print your data. Standalone MaskEdit, MultiColumn Combo, and UpDown controls are also included.

Janus Ribbon & Command Manager Controls

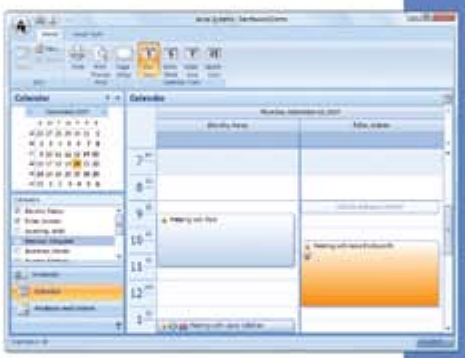
Janus Command Manager and new Ribbon controls are also included in the suite. These controls provide Windows developers with stylish menus and toolbars. The components permit advanced customization of the menus and toolbars of your applications. Use the built in VisualStyles in the controls to easily provide your applications with a look similar to Windows XP, Office 2000, Office XP, Office 2003 or 2007.

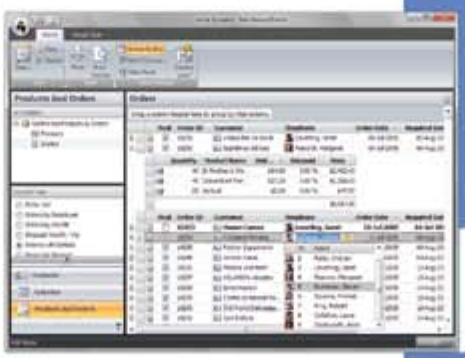
Janus Timeline Control for .NET

The Janus Timeline Control is ideal for displaying items in relation to time. Items in the control are arranged in chronological order from left to right on a time scale that can be divided from seconds to years. You can easily load, display, format, group, filter, edit and manipulate items with the functionality available in the control in both bound and unbound modes.

Janus Schedule for .NET

The Janus Schedule control can present appointments and related owners in different Views, representing Days, WorkWeeks, Weeks, and Months. The control also supports working with recurrent appointments. You can easily load, display, format, filter, edit, manipulate, preview, and print appointments with the functionality available in the control in both bound and unbound modes. A stand-alone Janus Calendar Combo Control, used to edit date and time values, is also included.





Windows Forms Controls

A suite of controls designed to provide powerful user interfaces for Microsoft .NET Smart Client applications patterned after Microsoft Outlook®. All of the controls in the suite are 100% C# managed controls designed to be used with Visual Studio® 2005.

Janus WinForms Controls Suite includes the following controls:

Janus GridEx for .NET
(Outlook Grid)

Janus Schedule for .NET
(Outlook Calendar View)

Janus Timeline for .NET
(Outlook Journal)

Janus ButtonBar for .NET
(Outlook Shortcut Bar)

Janus ExplorerBar for .NET
(Outlook Shortcut Bar)

Janus UI CommandManager
(Menus and Toolbars)

Janus PanelManager
(Outlook / Visual Studio .NET panes)

Janus TabControl
(Tab Control)

NEW!

All controls now feature Office 2007 look & feel plus Ribbon Bar

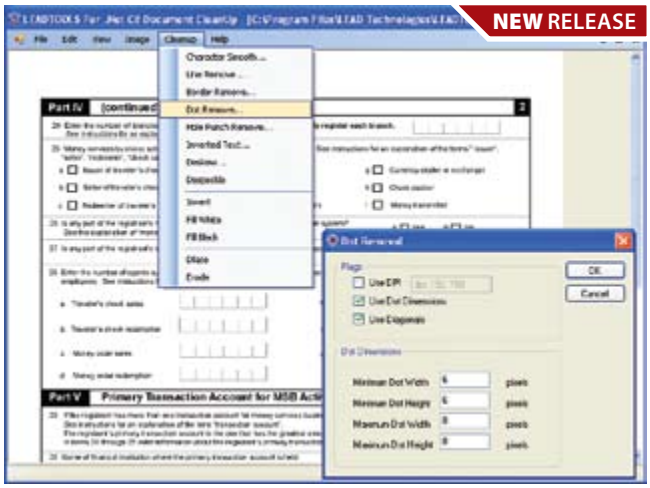
LEAD Technologies

LEADTOOLS Document Imaging SDK V16.0

Build powerful document imaging into your applications.



LEADTOOLS Document Imaging SDK

Annotation Stamps
Stamp documents to indicate status.

Document Cleanup
Remove erronious marks from scanned documents .

Clickable Events
Add buttons to the document, which trigger events (e.g. play .wav files).

- Features include image processing, scanning, color conversion, display, compression, multi-format import/export, printing and database imaging
- Now features improved performance, 64-bit support and more

LEADTOOLS Document Imaging SDK lets you develop powerful document imaging applications. Features include comprehensive annotations (text, highlights, sticky notes, stamps & more) and specialized bitonal image display & processing such as scale-to-gray and favor-black. Other features include performance and memory optimizations for bitonal images, document image clean-up including hole-punch, line removal, high speed TWAIN scanning and JBIG, JBIG2 and ABIC compression.

Additional features can be added to LEADTOOLS Document Imaging SDK including: ICR, OCR, OMR, Forms processing & recognition, raster PDF, JPIP and barocdes.

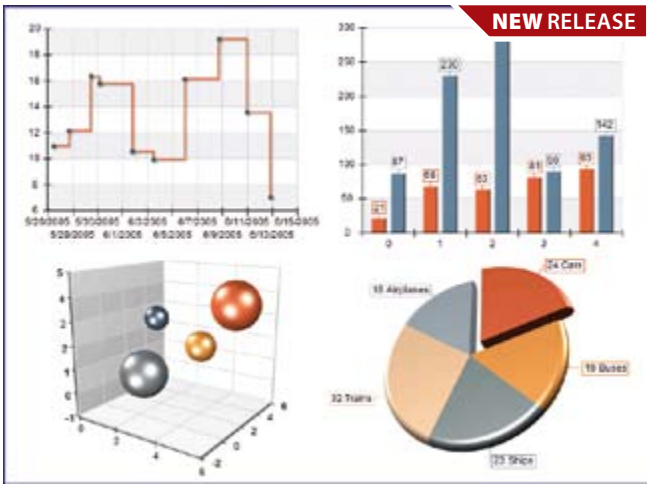
Nevron

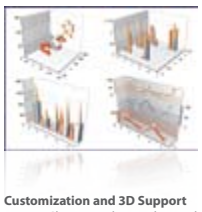
Nevron Chart for .NET Enterprise Q2 2008

A powerful, flexible and extensible charting component for Windows Forms and ASP.NET.



Nevron Chart for .NET (Windows Forms and ASP.NET)

Professional Quality
Nevron Chart for .NET will allow you to produce professional presentation quality with stunning visual effects.



Customization and 3D Support
Nevron Chart introduces advanced customization and 3D Charting support.

Nevron Financial Charting
Nevron has introduced Statistical and Financial functions to allow better understanding of the data with presentation quality.

- Includes many chart types and circular/radial/linear gauges
- Includes scrollable axes, integrated legend, chart annotations, watermarks and a extensible chart layout manager

Nevron Chart for .NET has been designed from the ground up to be extensible, efficient and feature rich. This allows it to wrap a vast amount of features in an intuitive and straightforward programming model.

Nevron Chart for .NET can display virtually any 2D or 3D chart including: bar, line, step line, area, pie, point, bubble, stock, floating bar, radar, polar, high low, mesh surface, grid surface, shape, smooth line, floating bar, Venn and error with many variations (like scatter XY and XYZ line, stacked bars etc.). The component features full Visual Studio design time support with many advanced features like style editors, allowing you to quickly modify the chart only using its visual interface.

LEADTOOLS®

VERSION 16

The World Leader in Imaging Development SDKs

LEADTOOLS v.16 – .NET, WPF, C API, C++ Class Lib, COM & more!

Develop your application with the same robust imaging API used by **Microsoft, HP, Kodak, GE, Siemens,** the **US Air Force** and the **US Department of Veterans Affairs Hospitals.**

LEADTOOLS provides developers easy access to decades of expertise in developing color, grayscale, document, medical, vector and multimedia imaging code. Install LEADTOOLS to eliminate months of research and development time while maintaining high levels of quality, performance and functionality.

- **WPF (XAML) Controls:** Viewer, Image List & more.
- **AJAX** Web Form Image controls.
- **JPIP** Client and Server.
- **Image Formats:** 150+ including TIFF, JPEG/ JPEG2000 (lossy and lossless - up to 16-bit grayscale), PDF, XPS, DWG.
- **Display Controls:** Scroll, zoom, pan, brightness, window level.
- **Scanning:** TWAIN and WIA (32 and 64-bit), autodetect optimum driver settings for fastest scanning.
- **Image Processing:** 200+ fi lters, transforms and color conversion functions with extended grayscale support.
- **Document Cleanup/Preprocessing:** Deskew, despeckle, registration & more.
- **OCR/ICR/OMR:** Full page or zonal multi-threaded recognition with formatted output including PDF, DOC and TXT for Win32 and x64.
- **Barcode:** Create, detect, recognize and print linear and 2D barcodes.
- **Forms Recognition and Processing:** Automate forms recognition & processing.
- **Bitonal Compression:** JBIG, JBIG2, ABIC, CCITT G4 and more.
- **Annotations:** Interactive UI for image mark-up and measurement including an interface for DICOM graphic and text annotation.
- **Grayscale Imaging:** Display and process signed/ unsigned 12-16 bit, 32 bit data.
- **Medical Web Viewer Framework:** A plug-in enabled framework to quickly build high-quality, full-featured, web-based medical image delivery and viewer applications.
- **Medical Image Viewer:** A high level display container with built-in tools for image mark-up, window/level, measurements, zoom/pan, cine, and LUT manipulation.
- **DICOM:** Full support for all IOD classes and modalities defined in the 2008 DICOM base standard (including Encapsulated PDF/CDA and Raw Data).
- **DICOM Communications:** Full support for DICOM messaging and secure communication enabling quick implementation of any DICOM SCU and SCP services.
- **Multimedia:** Capture, play, stream and convert DVD, MPEG, AVI, WMV, MP4, MP3, OGG, ISO and more.
- **PDF and PDF/A:** Read/write raster and text searchable PDF files.
- **DVD:** Create and burn DVD images.

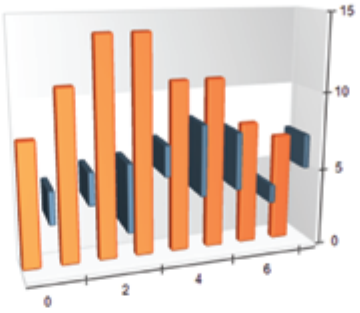
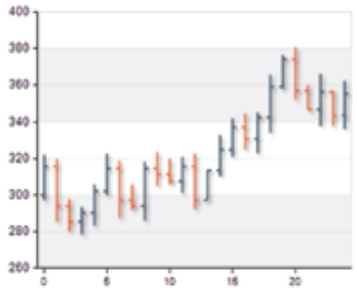
NEVRON
visualize your success

There is only one component...

...which can display 2D & 3D charts with presentation quality, without sacrificing speed.

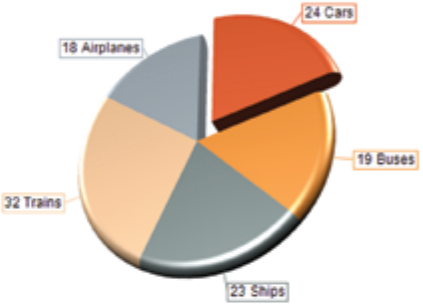
Our state-of-the-art rendering engine will surpass any other, when it comes to speed and looks combined. Tweak lights, materials, 2D image filters, 3D jittering and more, to achieve the best look for your charts!





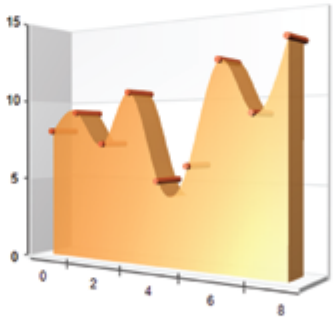
...which contains a complete set of charting and gauge types, designed to meet even the most compelling data visualization tasks.

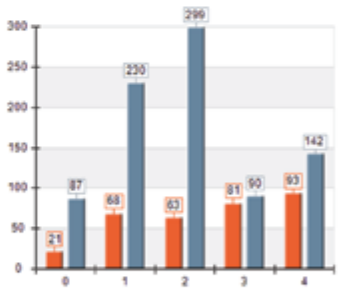
With so many different charts and gauges at your fingertips, you will never find yourself at a stalemate. If there is any chart or gauge you need - we've got it.



...which has a well designed and polished object model, allowing you to extend and customize it.

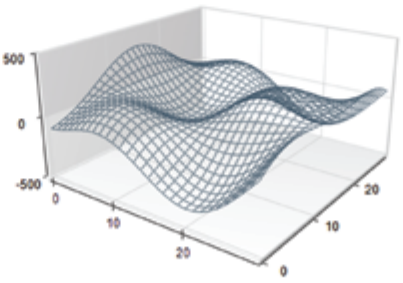
Scalability is what you need. We guarantee it! Just as we guarantee, that our API is as versatile as they come.

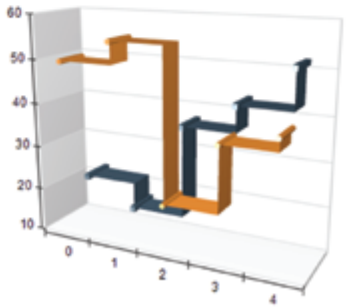




...which contains an unmatched set of examples, with source code, that will help you get started quickly in both ASP.NET and Windows Forms.

Sometimes it's beginner's luck, sometimes it's having the best help around. Scroll through our examples, check out the source code, and you're already halfway done!





There is only one Nevron Chart for .NET

Syncfusion

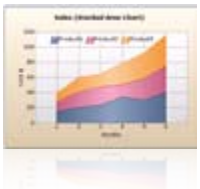
Syncfusion Essential Studio Enterprise 2009

Accelerate WinForms, WPF and ASP.NET development with 150+ components.

Syncfusion Essential Studio

Outlook 2007 UI
Create applications with the latest UI patterns and paradigms in both Windows Forms and ASP.NET.

Word 2007 UI
Create a Windows Forms application recreating the Office 2007 look and feel using the Ribbon controls.



Numerous chart types
Includes support for Enterprise quality chart creation capabilities with all the chart types you can think of.

- Includes grids, docking, charting, diagramming, PDF & Office reporting and scheduling
- 1 year of support and updates; no royalties, runtimes, or server fees

Syncfusion Essential Studio Enterprise is a dynamic and feature rich suite that has everything developers need to create Enterprise-class applications. It includes Essential Tools (a collection of user interface controls including Vista style controls, docking windows, etc), Essential Grid (fully customizable grid with extensive Excel like feature set), Essential Grouping (a high performance grouping engine that can group any list of data), Essential XlsIO (a component that can read and write Microsoft Excel files), Essential Diagram (develop Visio like interactive 2D graphics & diagramming applications), Essential Chart (business chart component with a unique point based styles architecture) and much more.

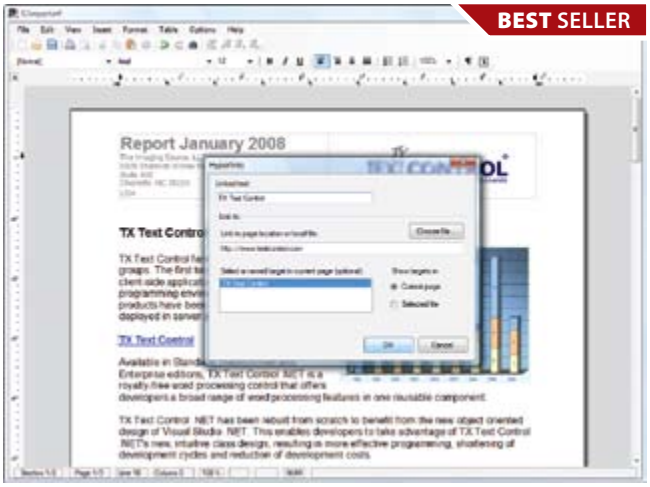
The Imaging Source

TX Text Control .NET Enterprise Edition V14.0

Read, edit and create documents in formats like MS Word DOCX, DOC, RTF, PDF, HTML and XML.



TX Text Control .NET

Character and paragraph formatting
Supports both paragraph and character based styles, as well as multiple style inheritance.

Bullets and numbered lists
Provides comprehensive support for bullets and numbered lists.

Headers and footers
End-users can use the same header and footer throughout a document.

- Standardized WYSIWYG interface supports drag and drop
- Supported formats include DOC, DOCX, RTF, TXT, HTML, CSS, XML and PDF
- Provides full integration with Visual Studio 2005/2008

TX Text Control .NET is available in Standard, Professional and Enterprise editions and is a royalty-free word processing control that offers developers a broad range of word processing features in one reusable component. TX Text Control .NET includes the ability to export all documents to print-ready Adobe PDF documents without any third-party software. The fully programmable component supports nested tables, document sections, images, text frames, drag and drop, headers and footers, bulleted and numbered lists and MS Word compatible mail merge fields for database applications. Typical applications include mail merge, PDF creation, document conversion or WYSIWYG word processing.

Xceed Software

Xceed DataGrid for WPF V3.0

Widely adopted, mature, powerful and fast WPF datagrid.

Xceed DataGrid for WPF

Table view
Create groups, reorder colums, edit, resize, sort, filter and more.

Card view
In Card view, data records are presented as individual 2D cards.

Printing
Built-in printing and XPS exporting capabilities are provided.

- Includes: hierarchical master-detail; 12 flexible editors; column stretching; custom sorting; automatic Excel-like end-user filtering and fixed columns
- Complete source code is available in the Blueprint Edition

Xceed DataGrid for WPF (Windows Presentation Foundation) is a grid control that in addition to traditional table and card views like Vista, XP, Media Center, or classic styles, allows you to present and edit data in 3D layouts. Features include: hierarchical master-detail; 12 flexible, themed/themable editors; an interactive Cardflow 3D view; column stretching and column widths supporting star values; custom sorting; statistics rows and functions; automatic Excel-like end-user filtering; and fixed columns.

Xceed DataGrid for WPF supports UI virtualization, even when grouping data, so only elements currently in view are created and kept, meaning faster loading time, uses less memory.

.NETXPERT

InfoScope V2.5

Easily post InfoPath forms to a Web server.

- Interoperable with all kinds of .NET based Enterprise solutions
- Windows SharePoint Services (WSS) Support

InfoScope

InfoScope is an InfoPath run time engine that enables users who don't have InfoPath to use InfoPath forms through a Web browser. InfoScope enables inputs and updates of data within InfoPath, and makes the entire process interoperable with a back end system via a Web browser. InfoScope provides Service Oriented Architecture (SOA) which meets various different types of complicated business requirements through .NET technology. This enables customers and/or partners to integrate into your business processes via online electronic forms.

InfoScope also provides an InfoScope SharePoint Web Part Control. It's a real InfoPath form not a Web page. No roundtrip and no modification. Just publish and you are ready to use InfoPath. Since InfoScope is auto-installed to clients, you won't meet deployment issues.

InfoScope also enables Web pages to catch events so that you can develop Web applications using InfoPath forms.

Abstraction Systems

ToolTipsFactory for .NET V1.2

Advanced, single/multi-line text, image and animated image tooltips.

- Includes four types of tooltip controls; SingleLine, MultiLine, Image and Animation
- All layout elements are fully customizable in code or through Visual Studio

ToolTipsFactory for .NET

ToolTipsFactory for .NET is a set of components designed to add visually and functionally sophisticated ToolTips to Windows Forms applications. These components give application developers the possibility to add really dynamic tooltips to their applications, with single or multi-line text, images or even animations as content. They also give programmers full control over size and layout of the ToolTip's background, border and behavior.

If you are creating multi-line tooltips the number of lines is only limited by the size of the selected font and the vertical screen resolution. If you prefer images in your tooltip, ToolTips Factory for .NET provides icons, photographs, dynamically created drawings etc. The images can be assigned at design time in Visual Studio .NET, loaded or dynamically created at runtime by the application.

ToolTipsFactory for .NET is 100% managed code and includes full Visual Studio integration and designer support. Plus it can also be integrated with other third party .NET controls.

MULTI-TALENTED COMPONENTS

ActsOne
BlueOne Components V2.0

Add diverse Adobe Flex UI functionality to your Web site.

- Includes grid, grouping, tree, totaling, calculation, input, menus, navigation features and more
- Extends Flex component functions

BlueOne Components

BlueOne Components are custom UI components, developed by ActsOne using Action Script 3.0, with rich functions to make Adobe Flex applications more useful. BlueOne Components showcases many effective, easy-to-use, rich components such as BlueDataGrid, Blue MDI Window and BluePanel. BlueDataGrid in particular has many functions including multi header, data merging, tree datagrid, OLAP grid, Excel export, totaling and sub totaling features. BlueOne Components includes support for Flex based PDF, Word and Flash reporting and supports an integrated Web UI as well as an easy-to-use editing environment.

Other features include: skin and interface generation an extended textbox, easy data grid cell extending, performance implementation, automatic cell calculation, cell drill-down functions, column splits, MDI (Multiple Document Interface Window) and an extended tree & button control.

AG-TECH
Btrieve Classes for .NET V3.0

Fast, easy to program access to Pervasive.SQL databases from .NET.

- Provides direct access to Pervasive's transactional interface from within .NET
- Extended class enables maximum performance when searching Pervasive data

Btrieve Classes for .NET

Btrieve Classes for .NET is a set of .NET database access support classes that enable fast, easy to program access from .NET programs to Pervasive.SQL databases via the Btrieve API. As such they greatly help developers looking to write .NET programs accessing data in Pervasive.SQL databases or those looking to migrate existing pre-.NET Btrieve/Pervasive applications to .NET.

Btrieve Classes for .NET performs with greater efficiency and hence is faster than ADO.NET or Pervasive's OLE DB provider.

This product includes two types of class library the first (DDF Class) is specifically designed for the .NET Framework and is composed of classes that enable smart and efficient access to column data and definition of data type conversion code. The second type of class (Native Class) provides Btrieve API level access from .NET managed code.

Btrieve Classes for .NET includes full support for Pervasive PSQL v9 and Visual Studio 2005/2008.

Antenna House
Rainbow PDF Server Based Converter V2.0

Convert Office 2007 and many other formats to PDF on a Server.

- Supports streaming input/output for easy system integration
- MS Office documents and PDF documents can be converted into PEG, PNG, XPS, PDF, SVG, INX formats

Rainbow PDF Server Based Converter

Rainbow PDF Server Based Converter is a high-speed file converter that can create standard forms such as PDF or SVG from Microsoft Office documents. You can convert to JPEG, PNG, XPS, PDF, SVG, INX from Word, Excel and PowerPoint files.

By using Rainbow PDF Server Based Converter in a groupware or Web mail system for example, Microsoft Office documents can be displayed and converted even in environments where Microsoft Office is not installed or operating.

As all file conversions are performed entirely within Antenna House's direct creation engine, there is no need for Adobe or Microsoft licenses.

Aurigma
Aurigma Image Uploader ActiveX V5.5

An easy and convenient way to add Image uploading functionality to your site.

- Ideal for digital photo print ordering sites
- Memory friendly even for huge numbers of uploaded files and can allow both multiple and single file selection

Aurigma Image Uploader

Aurigma Image Uploader is an ActiveX control for IE which lets you upload images and other files in a very user friendly way. It is a client-side ActiveX control which allows you to upload and navigate through the images on a client computer, perform basic image processing (generate thumbnails, rotate), edit descriptions of images and then upload them to a server. It dramatically increases the efficiency of uploading images to a server compared to standard input type='file' elements. Non-image files can also be uploaded. It retrieves data from the server in standard multipart/form-data format, so files can be handled by any script or platform: ASP, ASP.NET, Perl, PHP, ColdFusion, JSP, etc.

Bennet-Tec Information Systems

MetaDraw ActiveX V3.1

Give your application support for the creation, editing, and displaying of Metafiles.

- Full support for Object Oriented editing: moving objects, sizing, change colors and other attributes
- Save/Load pictures to/from database fields

MetaDraw

MetaDraw is a special purpose picturebox/image editing component. It is an Object Oriented image component for multimedia, image editing/annotation, etc. MetaDraw allows you to create, edit, display and save pictures built from a set of graphic objects. To your application, it looks like a standard picturebox, but it offers unique support for metafiles - a graphical format well suited to the drawing and/or moving of graphical objects - including the ability to tag individual graphic objects for HyperGraphic/HotSpot applications.

You can also use MetaDraw as a metafile viewer with support for zoom, scroll and even selective display of individual elements.

Change Vision

JUDE V5.4

Business process UML modeling tool.

- Edit model information directly, without opening dialog boxes
- Supported diagram types include Class, UseCase, Sequence, Collaboration, StateChart, Activity, Component and Deployment

JUDE

JUDE includes basic features to make modeling simple and user friendly. JUDE is suitable for business use, handling large-sized models and document creation. It includes enriched features, such as the ability to change your view freely using a map view, zoom by dragging, unlimited undo/redo, the ability to output project information to a CSV file, automatic generation of class diagrams with model information, diagram creation guidance and more. JUDE supports basic UML 1.4 diagrams including: UseCase, Sequence, Collaboration, Statechart, Activity and Class (Object/Package/Robustness).

You can lock project files from other users, set the font for the whole project file and configure print setting for each diagram. JUDE also lets you display multilingual aliases (e.g. English and Japanese) on diagrams, export diagrams to RTF and HTML documents and generate Class diagrams from Class files.

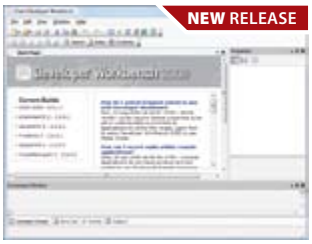
Chant

Chant Developer Workbench 2008

Comprehensive development and testing environment for working with speech.

- Generate word pronunciation phonemes
- Create and edit lexicon using XML
- Invoke speaker training



Chant Developer Workbench

Chant Developer Workbench is comprised of tools and components for developing software that speaks and listens. As an interactive toolset, it provides a development and testing environment for working with the component libraries and the speech technology objects they manage. Within the Chant Developer Workbench interactive environment, you can: create and edit grammars in native grammar syntax, generate word pronunciation phonemes, compile and debug grammars, manage lexicons, create and edit lexicon using XML, generate and edit word pronunciation phonemes, import and export lexicon word pronunciations, manage speaker profiles, enumerate speaker profiles for selection and more.

ComponentArt

ComponentArt Web.UI for ASP.NET AJAX 2008.2

Advanced user interface suite of ASP.NET AJAX controls.

- Delivers fast, lightweight and feature-rich user interfaces
- Powerful client-side API featuring Microsoft AJAX library syntax allows for total control over structure and data, with persistence to the server

ComponentArt Web.UI for ASP.NET AJAX

ComponentArt Web.UI for ASP.NET includes 22 user interface controls for the development of sophisticated Web applications. It includes the following AJAX controls: Calendar, CallBack, ComboBox, Dialog, Editor, Grid, Menu, MultiPage, NavBar, Rotator, SiteMap, Snap, SpellCheck, Splitter, TreeView, Upload and WebChart Lite. All controls are built on the client-side component model introduced by ASP.NET AJAX, exposing JavaScript APIs that allow full client-side programmatic control over any part of the user interface.

ComponentArt Web.UI controls are designed for and have been tested with all modern browsers like Internet Explorer (IE), Firefox, Mozilla, Opera or Safari.

Crownwood Software

DotNetMagic V6.0

Create Microsoft Office style applications in minutes.

- Provide Visual Studio style docking windows with docking indicators
- TabbedGroups control provides flexible, customizable MDIs
- Includes a high performance, scalable tree control

DotNetMagic

DotNetMagic user interface library provides Office 2007 style rendering including the blue, silver and black Office schemes. It also has a docking window system that offers all the features found in Visual Studio .NET. It mimics the appearance of Visual Studio .NET and features; multiple content in same row or column, multiple content inside same docking window, the ability to restore windows in same row or column and an auto hide capability. The TabbedGroups control provides a similar ability to organize documents as found in Visual Studio .NET. The window docking features include: edge docking, floating, pinnable, sliding auto hide and hide & show. The customizable Tree control includes: none, single or multi-select modes, support for XP Themes, groups & list style and full color customization.

Full source code, 12 months of updates and 12 months email support is included. Visual Studio 2005/2008 compatible. C# and VB.NET samples included.

Compuware

TestPartner V6.1

Build tests without any programming.

- Leverage non-technical as well as experienced testers to test applications more thoroughly in the time available
- Collaborate throughout the software development lifecycle

TestPartner

TestPartner is an automated testing tool that accelerates functional testing and facilitates the delivery of business-critical applications. TestPartner's Visual Navigator makes testing accessible to even novice users, allowing virtually anyone to be immediately productive. Within the Visual Navigator, you access panes that provide a preview of each screen being tested, the pertinent test steps for each one and a storyboard view that ties it all together. As each step is selected, the corresponding control within the screen preview is highlighted, which clearly defines the automation context. Additionally, each test step has related properties that can be modified by the user or even populated via a data file to facilitate fully data-driven testing.

SupportSmith V1.5

Easily add remote support to your applications.

- Access any PC, anywhere
- Extend Microsoft Remote Desktop and Microsoft Remote Assistance
- Multi-viewer presentation

SupportSmith

SupportSmith SDK is a set of ActiveX, .NET ready components to integrate the SupportSmith architecture into your applications. SupportSmith allows you to add live remote customer support to your solutions or create plugins for the SupportSmith client. It also provides you with secure SSH2-enabled firewall/NAT-friendly communication infrastructure suitable for many other peer-to-peer communication scenarios. The program sets up a chat session between you and your customers, without the need for your customers to install software.

Customers download and execute a tiny module that establishes an Internet-based connection.

Data Techniques
ImageMan.Net V1.55

High performance imaging and document management.

- Support for rotation, scaling, antialiasing, sharpening, adjusting color/brightness/gamma, cropping, merging and more
- Includes WinForms viewer and thumbnail control

ImageMan.Net

ImageMan.Net toolkit is a set of 100% managed .NET classes and WinForms controls for building imaging and document management applications in .NET.

ImageMan.Net supports reading and writing many image formats including TIFF, BMP, FAX, DIB, RLE, PCX, DCX, JPG, JPEG2000, PNG, GIF, WMF, EMF and PDF export (Requires optional PDF Export Addon). The object oriented architecture simplifies development and ImageMan.Net includes high and low level functionality for quick development and ultimate control.

ImageMan.Net includes samples in C#, Visual Basic .NET for Visual Studio 2003, 2005 and 2008.

DBI Technologies
Solutions::Schedule for .NET V2.0

Build team management and resource planning solutions.

- Share schedule, appointment, contact, location and task information
- Supports TimeBar linking, cell-level formatting, multi-select TimeBar and more.

Solutions::Schedule for .NET

Solutions::Schedule for .NET allows developers to create scheduling solutions such as those found in the healthcare or services sector. Solutions::Schedule .NET includes intuitive mouse driven scheduling and planning with Gantt-style project management features. Other features include independent cell formatting, timebar overlap, split and linking styles. You can easily add a visual reference point for the current date and time in a schedule by using the Current Time Line feature. Time lines extend vertically through the schedule area and are drawn along the major time segments. Developers can also add zoom-in/out capabilities by programmatically changing the value of the TimeDistance property.

Stylus Studio® XML Enterprise Suite 2008

Comprehensive XML data transformation and aggregation toolset.

- Includes synchronized visual XML editing views, Sense:X, integrated XML validator, XML differencing, and more
- Supports visual XQuery editing, mapping and debugging

Stylus Studio® XML

Stylus Studio XML is an advanced XML integrated development environment (XML IDE) consisting of XML tools and high-performance Java & .NET components for deploying data integration applications.

Stylus Studio XML includes features for working with XML, XQuery, XML Pipeline, XSLT, XSL:FO, EDI, XML Schema/DTD, XPath, XML & databases, XHTML, XML mapping, XML publishing and Web services.

Stylus Studio XML also features Electronic Data Interchange (EDI) integration tools for converting (EDIFACT to XML, X12 to XML), mapping and deploying advanced XML data integration applications which involve read/write access to legacy EDIFACT and X12 data sources. It also lets you create XML Schema files that correspond to the converted EDI documents.

dLSoft
dBarcode.NET 2D Universal V3.1

Add 2D barcodes to your .NET project.

- Supports Aztec, DataMatrix, GS1-Databar, Maxicode, PDF417, Micro PDF and QR code barcodes.
- Barcodes may be printed or passed to any other image-handling component for saving, copying etc.

dBarcode.NET 2D Universal

dBarcode.NET 2D Universal is a fully-managed-code component for generating 2D barcode images in the .NET framework. Barcode images may be displayed on screen, printed on a printer, copied to the clipboard or saved as a graphics file image. The component includes methods for saving graphic images as files or memory streams with a specified resolution in BMP, GIF, JPEG, PNG, TIF or WMF formats, and, for most barcode types, also generates pattern strings for developers who wish to draw their own bars. When creating bitmap images dBarcode.NET 2D Universal may be set to adjust the width of the bars to be an integer number of pixels, ensuring that the resultant barcode is of high quality.

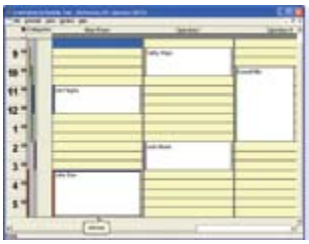
Gravitybox Software
Gravitybox Schedule V7.5

Build custom scheduling functionality into your applications.

- Comes with 10 different view modes
- Perform cross-window and cross-application drags of scheduled appointments
- In-place editing/read-only property for appointments



Gravitybox Schedule

Gravitybox Schedule is a COM-based component that can handle any number of appointments with color coded categories. Gravitybox Schedule supports day, object and combination schedules. It supports any number of days or objects or both on either axis with up to 24 hours per day displayed on the other axis. It allows for drag-and-drop schedule moves or copies and includes conflict resolution routines to determine, eliminate, or disallow conflicting appointments.

The date and time ranges are completely configurable. All appointments are stored in the ScheduleItems collection and can be loaded/saved to a database in one loop. Each appointment can be associated with a color-coded category. All categories are configured with the "Categories" collection. You can add whichever ones you wish and associate a color with each. In addition, each appointment can be associated with a provider.

Global Majic Software
Angular Gauge V3.5

Monitor realtime data in a flexible gauge.

- Provides a full library of preconfigured gauge styles
- Over 100 properties available for the most customized gauge appearance possible

Angular Gauge

Angular Gauge is an ActiveX component that enables you to display data in a graphical gauge. It includes a full library of preconfigured gauge styles to choose from and you can further customize its appearance via its extensive set of properties. Angular Gauge is useful for: factory instruments, gauges, amperage meter, analog clock, compass, VU Meter, automobile instruments, or any application involving the display of realtime data.

Properties are available to provide programmers with full control of scales, needles, fonts, captions, annulars, and tics. It provides optional mouse input. It is even data aware for fast, efficient database connectivity.

Finally, a Documentation Tool that Doesn't Forget the Developers

ComponentOne® Doc-To-Help® is the only tool that helps developers and writers work seamlessly together to create deliverables that include Help, printed manuals, reference documentation and more. Unlike most documentation tools, Doc-To-Help includes technology specifically designed for the developer.

- Embed context-sensitive Help in your applications and allow technical writers to perform topic mapping visually
- Generate automatic reference documentation with Microsoft Sandcastle
- Author documentation in your favorite environment (e.g., Microsoft Word, Adobe Dreamweaver, or Doc-To-Help's new built-in XML-based editor)
- Publish web-based Help, HTML Help, Help 2.0, and more

You get all this in one box! Imagine having one package that makes documentation simple for both the developer and the technical writer.

NETRONIC Software
VARCHART JGantt V2.3

Add interactive Gantt diagrams to your applications.

- User interactions such as create, delete and drag & drop activities, modify time scales are handled by the component
- Includes zooming and scaling of diagrams

VARCHART JGantt

VARCHART JGantt is a component written in Java, that easily lets you integrate Gantt charts into your application. Activities in a chart of VARCHART JGantt can be displayed either by a variety of pre-defined bar shapes, or can be composed from scratch. Any shape and pattern is available, even dynamic bars that actively grow or diminish to indicate the degree of completion of an activity. Bars can also be connected by links of different types. Vertical and horizontal grids can be placed in the Gantt graph. The time scale can be customized by position, scaling, colors and font.

Settings to define the appearance and behavior of the Gantt chart can be defined at design time.

Newtone
ImageKit.NET V1.0

100% native .NET image processing component.

- Load and save images to a variety of image formats
- Apply various imaging effects and transformations and display those images in various controls

ImageKit.NET

ImageKit.NET lets you add image-processing functionality to your .NET applications quickly and easily. You can retrieve images from TWAIN scanners and digital cameras; load and save image files in a variety of formats; apply image filters and transformations to your images; display images in the display, pan window, or thumbnail controls and more. ImageKit.NET supports a variety of raster and vector file formats and compressions. Native .Net support includes: BMP, JPEG, GIF, TIFF, PNG, WMF and EMF.

ImageKit.NET includes many image effects and transformations including: creating or copying images, combining images, layering images, copy and paste images plus numerous effect filters including blur, mosaic, outline, emboss, oilpaint, canvas, glasstile, lens, ripple, whirlpinch, waves and motionblur.

ImageKit.NET contains components for both Windows Forms and Web Forms applications.

O2 Solutions
PDFView4NET V2.1

Add PDF viewing to your .NET applications.

- Supports the displaying and printing of PDF files
- Includes a separate library for converting PDF files to images and for printing PDF files to any Windows printer without any UI

PDFView4NET

PDFView4NET is a .NET toolkit for displaying and printing PDF files in .NET applications. It includes a PDF viewer control for Windows Forms and a .NET library for rendering and printing PDF files from any .NET application.

The PDF viewer control for Windows Forms includes support for annotating PDF files, bookmarks navigation, adding and removing file attachments and other features. The toolkit includes its own PDF rendering engine and it does not rely on any other software for rendering and printing PDF files.

PDFView4NET toolkit has been developed entirely in C#, being 100% managed code.

Data Dynamics

Analysis

Your Data is a Hidden Treasure, Dive In

Data Dynamics Analysis

is the first interactive graphical analysis component for Windows Forms and ASP.NET applications. This tool facilitates real time data analysis and promotes the exploration of relational and multidimensional data sources with simple drag-and-drop operations. Developers can embed cutting edge data visualization functionality directly into any .NET application. Transform raw data into feature-rich charts and pivot tables delivering a powerful and user friendly experience.

Dive Into Your Data

Visually explore large sets of data and obtain new insights that help make informed business decisions.

Empower Your Users

Decision makers have direct access to information they need to answer questions.

Deliver Business Intelligence

Comprehensive chart displays reveal trends and give users a deep understanding of their data.

Go Ahead, Show Off

Data Dynamics Reports

created to handle reports, dashboards, invoices, and other documents. The feature rich package allows authors to focus on creating documents in the intuitive designer instead of writing code.

Dashboards, calendars, XHTML, mail merge, charts, tables, cross-tabs, free-form lists, data visualizations, and report parameters are just some of the features available right out of the box.

Excel/Word/PDF Exports

Take reports with you in any of the supported formats: send them out, print them out, or just analyze the numbers.

Dashboards

Dashboard centric controls make it easy to create dashboard, use the controls anywhere you need to examine numbers and trends at a glance.

XHTML and Mail Merge Support

The Formatted Text report item allows report authors to insert XHTML content into their reports and it has full support for mail merge functionality.

Data Visualizations

Graphical representations make it easy to understand data. Data visualizations create graphics based on your data. Those reading your documents can now easily spot the important numbers.

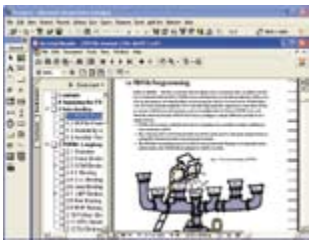
PDFlib
PDFlib V7.0.3

Create PDF files from within server-side or client-side software.

- Includes functions for creating text, graphics, images and links
- Dynamically generate PDF files from Web or database server data
- New table formatter



PDFlib

PDFlib is a component that allows you to programmatically create PDF files from within your own server-side or client-side software. PDFlib doesn't make use of third-party software for generating PDFs, nor does it require any other tools. PDFlib is available for all major operating systems and development environments. It offers a variety of functions, including a table formatter, PDF/A output for longtime archiving, AES encryption, integrated pCOS analyzing tools, a repair and optimization mode for inputing PDFs.

PDFlib can generate PDF data directly in memory (instead of on file), resulting in better performance and avoiding the need for temporary files which speeds up PDF generation.

GTP.NET V3.1

Add interactive Gantt charts and scheduling to your applications.

- Supports AJAX with client-movable and resizable time items
- Features asynchronous collision detection and handling of time items
- Security awareness enables deployment on XBAP or ClickOnce

GTP.NET

GTP.NET is a complete .NET re-write of the best-selling Gantt Time Package. Its overall goal and purpose is to let you visualize and manipulate time based information.

GTP.NET includes a collection of user interface components which handle time blocks. The time blocks are displayed in a Gantt chart or a schema view. The times are connected to an owner, for example a person or an activity in a project. You can also use it to display dependencies and collisions between times, which gives the end user a graphical way to view and modify the project. GTP.NET includes the ability to select and re-assign links and also provides databinding for links between time items.

GTP.NET includes pre-built sample applications for a Project Planner, Resource Booker and Weekly Planner. All three samples are short and to-the-point of the problem they solve.

Pegasus Imaging Corporation
ImagXpress Document V9.0

Add comprehensive document imaging to your applications.

- Image viewing, editing, printing, scanning, file conversion and more
- Includes a wide range of very fast image processing functions
- Sample code for: .NET, VB, Delphi, VC++, C++ Builder, HTML, Access

ImagXpress

ImagXpress Document is ideal for document imaging and forms processing application development. It delivers single and multi-page TIFF support, embedded-image PDF support, TIFF tag handling, EXIF tag handling, file conversion, and support for 1 to 16-bit images. ImagXpress Document provides sophisticated TWAIN scanning support, image editing and clean up (including image binarization, thresholding, anti-aliasing, deskew, despeckle, line removal, hole punch removal, blank page detection, scale to gray, save as grayscale, crop, rotate, scale, zoom), annotation/redaction capabilities and advanced printing capabilities beyond Internet Explorer.

Raize Software

Raize Components V5.0

Build professional-looking Delphi and C++ Builder applications.

- Integrates into CodeGear RAD Studio 2007 IDEs (including Delphi 2007 and C++Builder 2007)
- Component designers simplify the task of creating a user interface
- Designed for reuse and extensibility

Raize Components

Raize Components is a collection of more than 125 native VCL components for use in Delphi and C++Builder. Raize Components includes a large selection of visual components for you to choose from, each designed for complete flexibility via an extensive set of interfaces. In addition to the core set of controls, Raize Components includes more than 100 component designers focused on simplifying user interface development.

Raize Components comes with complete source code for all components, packages, and design editors at no additional charge. Documentation is provided in an extensive context-sensitive online help system.

Resco

Resco MobileBusiness Toolkit 2008 Volume 3

Develop mobile business applications.

- Fully integrated with Microsoft Visual Studio
- Applications can be used on a variety of Windows Mobile-based Pocket PCs and Smartphone devices

Resco MobileBusiness Toolkit

Resco MobileBusiness Toolkit is a Microsoft Visual Studio Add-On that allows developers to easily build mobile business applications, such as Sales Force Automation or Field Service. Applications created with the MobileBusiness Toolkit can be used on a variety of Windows Mobile-based Pocket PCs and Smartphone devices. It allows the user to manage business related information such as customers, contacts, products, services, orders and business meetings. The default application created using the Toolkit can serve as a prototype of a future mobile solution and can also be used as a demo for presentation purposes.

Although most of the customization can be done in Visual Studio Designer, all the business classes and controls are provided with C# source code, so it is possible to fully customize the UI and functionality to meet specific customer requirements.

SlickEdit

SlickEdit for Windows 2008 (V13.0.2)

Create, navigate, modify, build and debug code faster and more accurately.

- Features include auto-completion, automatic comment wrapping, smart line selections and syntax expansion
- Now provides automatic XML/HTML formatting as you edit

SlickEdit

SlickEdit is a multi-platform, multi-language code editor supporting seven platforms, over 40 languages, and 13 editor emulations. It can be used as a standalone development environment or as a complementary editor, providing programmers with a tool to create, navigate, modify, build, and debug code faster and more accurately. SlickEdit's features include Code Navigation, Preview Tool Window, References Tool Window, Syntax Expansion, Surround With, Auto-Completions and many more. Write more code in less time and spend less time waiting for results. Programmers can type fewer characters and make fewer errors using syntax expansion, completions, aliases, and code templates.

SourceGear Corporation

SourceGear Vault V4.1.3

A compelling replacement for Visual SourceSafe.

NEW RELEASE

- Offers full integration into the Visual Studio .NET environment
- Includes an Eclipse client
- Client/Server communication over HTTP or optionally with SSL

SourceGear Vault

SourceGear Vault is a version control system for Windows developers, with complete integration into the Visual Studio .NET environment. SourceGear Vault is implemented entirely in the .NET Framework and uses SQL Server 2000 and 2008 for its repository storage.

SourceGear Vault is designed specifically to offer a seamless transition from Visual SourceSafe and includes an import tool which can be used to migrate data from a SourceSafe database into a Vault repository; every version of every file is imported, including all the history.

SourceGear Vault's basic architecture is a centralized Vault server which manages one or more repositories. It includes several client applications and also provides a way to create custom clients using any .NET language.

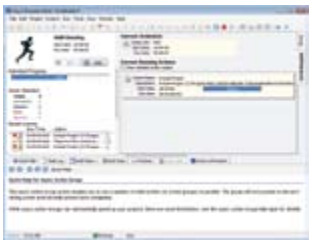
VSoft Technologies

FinalBuilder V6.0

Automated build and release management solution.

- Integration with version control systems/Source code repositories
- Includes a broad range (600+) of action types that cover almost any task you might need to automate



FinalBuilder

FinalBuilder is an automated build and release management solution for Windows software developers and SCM (Software Change Management) professionals. Use FinalBuilder to define, debug, maintain, run and schedule reliable and repeatable build processes. FinalBuilder's user interface has been carefully crafted to make it as easy-to-use as possible. Anyone in your team can use FinalBuilder to automate tasks. You can compile applications from source code, compile setup installer programs, work with version control systems, handle versioning with ease, create and edit INI files and Windows registry keys, burn CDs and DVDs, or create CD/DVD images (ISO images), zip and unzip files and other archive formats, run automated testing, FTP files to/from servers, send emails, post on news servers, handle errors, run multiple tasks in parallel and dynamically change the build flow, iterate over sets of files and other lists and more.
