www.componentsource.com

Write communications, security and e-business applications.

- Includes components for FTP, IMAP, SNMP, SSL, SSH, S/MIME, Digital Certificates, credit card processing and e-business (EDI) transactions
- Also includes Windows WF Activities for transferring files, email and more

/n software Red Carpet Subscription

One developer, multiple workstations, all /n software products.

/n software Red Carpet Subscription gives you components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, Digital Certificates, credit card processing, ZIP compression, Instant Messaging, shipping & tracking, e-business (EDI) transactions and robust Enterprise ready Internet connectivity, secure messaging and file transfer for Windows Workflow Foundation and Sharepoint. There are no licensing restrictions, so you can code on your work machine, your notebook or even your home machine. Plus there are no technology restrictions, so you get everything: .NET, COM, C++, Java, Pocket PC, UNIX, Linux and even

Mac OS X. You receive quarterly update CDs with free updates, upgrades and new releases. It includes more than \$30,000 worth of software including: all /n software products - IP*Works!, SSL, S/MIME, S/Shell, Zip, EDI, Integrators for Amazon, FedEx, UPS, USPS, QuickBooks, Enterprise Adapters, Paymentech, E-Payment, Vital/TSYS, USPS, Workflow Activities etc.

/n software Red Carpet Subscription includes IP*Works! which is a comprehensive framework for Internet development and is the core building block for most /n software products. IP*Works! eliminates the complexity of Internet development by

IP*Works!
Includes IP*Works! which is a comprehensive framework for Internet development.

Integrator Products
Components for Internet payment, accounting, management and other common e-business services.

Internet Communications
ATOM, REST, MX, DNS, RSS, NNTP, SMTP, POP, Rexec, Rshell, SMTP, SOAP, Telnet, Ping, TFTP, FileMailer, NetClock, FTP, HTTP and more.

Secure Components
Subscription includes secure versions of many of the IP*Works! components.

Windows Workflow Foundation Activities
Includes activities that make it easy to integrate Internet capabilities into your workflow packages.

Everything in One Subscription
There are no technology restrictions, so you get everything, .NET, COM, C++, Java, Pocket PC, UNIX, Linux and even Mac OS X.

providing easy-to-use, programmable components that facilitate tasks such as sending email, transferring files, managing networks, browsing the Web, consuming Web services, etc. IP*Works! includes support for all major internet protocols: ATOM, DNS, FileMailer, FTP, HTMLMailer, HTTP, ICMPPort, IMAP, IPDaemon, IPInfo, IPMonitor, IPPort, LDAP, MCast, MIME, MX, NetClock, NetCode, NetDial, NNTP, Ping, POP, RCP, REST, Rexec, Rshell, RSS, SMPP, SMTP, SNPP, SOAP, Syslog, Telnet, TFTP, TraceRoute, UDPport, WebDav, WebForm, WebUpload, Whois, XMLp and XMPP.

Also included in the /n software Red Carpet Subscription is IP*Works! SSL which is a suite of secure, SSL-enabled

drop-in replacements for the "classic" IP*Works! components.

The components are fast, robust, and reliable and consume a minimum of resources. They are small and lightweight with no dependencies on external libraries. Included are native development components for all supported platforms and component technologies. IP*Works! includes a complete unified framework with a common, easy to learn object model and simplified interfaces allowing you to be more productive. The components are rigorously tested having undergone thousands of hours of testing, you also get reference documentation, hundreds of sample applications and fully indexed help files.

SharePoint Web Part™

Integrating data with SharePoint has never been this easy!

The RSSBus SharePoint Web Part enables you to quickly and easily aggregate real time information from the web, databases, and other internal and external systems into SharePoint sites.

The Web Part is configured through simple Wiki-style templates with special markup tags that bring in dynamic information. It is similar in appearance and functionality to the standard Content Editor Web Part, but far more powerful.

USE RSSBUS SHAREPOINT WEB PART TO:

- Access dozens of Enterprise and Internet information sources from SharePoint through an extensive library of data connectors.
- Format and visualize the data output using simple HTML 'Wiki-like' templates.
- Easily download and install dozens of predefined data templates into SharePoint, without server administration or configuration changes.

ACCESS DATA FROM HUNDREDS OF INTERNAL & EXTERNAL SOURCES THROUGH SHAREPOINT INCLUDING:

Web Services

Amazon S3
Amazon SimpleDB
Amazon AWS
Amazon EC2
Amazon SQS
Google Gmail
Google Calendar
Google Search
Google Spreadsheet

NEWS & FEED INTEGRATION

Use The RSSBus SharePoint Web Part to dynamically pull news headlines into your users SharePoint sites. End users define the information filters that they care about directly through the SharePoint Web Part Editor.

ACCESS REMOTE SERVICES

Connecting to remote services is easy with the RSSBus SharePoint Web Part. Pull local weather information from Yahoo, get stock quotes from NASDAQ or NYSE, integrate Yahoo or Google Mapping, mash-up data from different data sources, and much more!

DATABASE CHARTING

Monitor sales, response times, server statistics, or any other measurable data from any source: Excel, text files, databases, etc. Through various RSSBus Connectors, end-users can easily connect, retrieve, and visualize data directly from within their SharePoint sites.

If Software Installations, Deployments, or Virtualization Is Your Job, Acresso Software Has Your Solution

InstallShield® 2010

How the
World Installs
Software on
Microsoft® Windows™

NEW
VERSION!

InstallShield 2010 makes it easy to author reliable MSI and InstallScript installations and App-V™ virtual packages for Windows® platforms.

Optimise Installations for Windows 7

Get a head start on supporting Windows 7 and the new features of Windows Installer 5.

Support the Latest Microsoft Technologies Including App-V, Visual Studio 2008, .NET Framework 3.5, IIS 7.0, SQL Server 2008 SP1, and Windows Server 2008 R2.

Install Software on Any Device

Extend installations to configure database servers, Web services, mobile devices, and more.

What's New in InstallShield 2010

Includes over 400 new and enhanced features from customer requests, including a revamped IDE, superior IIS tools, virtual machine detection, Unicode support, and much more!

InstallAnywhere™ 2009

Install Software on
Multiple Platforms with
One Installation Project

InstallAnywhere gives software developers a quick and easy way to author professional installations for Solaris, HP-UX, AIX, Linux, IBM i, Mac OS X, Windows, and more.

One Project Covers Every Platform

Simplify development by creating a single installation project that works for multiple platforms.

Cut Software Development Time

Get products to market faster by creating reliable installations in minutes.

Impress End Users with Customised Installations

Impress your end users with a professional, branded installation experience.

Lower QA and Support Costs

Cut end-user support costs by significantly improving installation success rates.

One Installation for 31 Languages

Create a single installation that automatically translates setup text into 31 languages.

AdminStudio®

How IT Prepares
Reliable MSI and
Virtual Packages for
Error-Free Deployment

NEW
VERSION!

AdminStudio makes it easy for IT to prepare reliable MSI and virtual packages for deployment. It has automated tools that speed software through the packaging process.

Cut Packaging Time by 70%

Automated tools help you get applications to end users up to 70% faster.

Cut Out 60% of Virtual Application Deployment Time

AdminStudio automatically converts MSIs to Microsoft® App-V™, VMware® ThinApp™* or Microsoft® App-V™ virtual packages, saving up to 60% of implementation time.

Migrate MSIs to Windows Vista™ Automatically

AdminStudio can proactively determine which applications are good candidates for migrating to Windows Vista without a second round of repackaging.

Works with Any Deployment Solution

AdminStudio supports leading deployment tools such as Microsoft® Configuration Manager, Novell® ZENworks®, LANDesk® Management Suite, and much more.

* Requires separate purchase of VMware ThinApp

Acresso Software

InstallShield 2010 Premier

Create high-quality Windows Installer, server and mobile installations.

- Choose from 35 runtime languages to customize your installation
- Supports the latest technologies, including Windows 7, Windows Vista and Windows Installer 5 (MSI 5)

InstallShield

Create flexible installations quickly and easily across all Windows operating systems, including Windows 7.

InstallShield Premier allows you to create flexible installations quickly and easily across all Windows operating systems.

With InstallShield Premier first-time developers find it easy to create installations, while power users find its depth and flexibility perfect for developing complex software installations. InstallShield 2010 Premier supports the latest technologies, including Windows 7, Windows Vista and Windows Installer 5 (MSI 5).

With InstallShield Premier you can expand installations to servers and Web services, including IIS 7.0, Oracle, MySQL, SQL Server 2008 SP1, and Windows Server 2008 R2. InstallShield

Premier also lets you target mobile devices with support for Windows Mobile 6.x, Windows Embedded CE 6.x, SQL Server Compact Edition 3.5 SP1, and PalmOS 3.5 and later.

Support customers around the world by enabling one installation to support 35 runtime languages for Windows installations, including support for Arabic and Hebrew. Multilingual support lets you localize your installations, eliminating hours of installation dialog and message box translation effort. Additional languages can be added easily. Changes and additions to existing translations are made with a three-step process: export all or part of the associated string tables, make the changes, and re-import them.

Multilingual Support
Present installation text in up to 35 languages, eliminating hours of installation dialog and message box translation.

Standalone Build System
Maintain a clean build machine by using only the part of InstallShield that compiles the installations.

Try and Die Functionality
Create a fully functional trial version of your product with a few simple configuration changes.

Hebrew and Arabic Language Support
Expand the reach of your products by presenting installation text and buttons in Hebrew and Arabic.

End-User Dialog Themes for Basic MSI Projects
Refreshed dialog designs give you fresh choices for the look-and-feel of your installation's user interface.

Project Assistant
Jumpstart a project by using a simplified set of views to quickly guide you through the installation process.

InstallShield Premier's multilingual support lets you create installations for different languages from just one installation project.

InstallShield Premier lets you associate prerequisites with features so you can chain multiple MSIs together in a single installation. It ensures that when your end users install a feature, the prerequisite is also installed (if it wasn't already on their machine). Feature prerequisites are useful for applications or components that are used by only some configurations of the installed product and are not used during the installation itself.

You can easily create trial versions of your products without modifying code. With simple configuration changes, you can easily offer potential customers a fully functional trial version of your

product (after the predetermined trial limit has been reached on an end user's machine, the trial version automatically expires).

InstallShield Premier gives developers the ability to add IIS Web applications to IIS Web sites and configure as needed. Plus, you can also create an IIS virtual directory without an application.

The included IIS Scanner analyzes and records IIS data about a Web site's settings – including its virtual directories, applications, and application pools – and imports it into the Internet Information Services view. So instead of having to waste time manually entering data, InstallShield Premier finds it and adds it for you. Developers can then use that view to make any changes to the IIS settings.

ComponentOne

ComponentOne Studio Enterprise 2009 v2

Over 210 components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices.

- Full suite of rich and flexible .NET Windows Forms components
- Rapid development of innovative & demanding Web applications
- Updated RichTextBox and Map Silverlight 3 controls

ComponentOne Studio Enterprise

Create rich user interfaces for Silverlight, WPF, ASP.NET, Windows Forms, Mobile and ActiveX applications.

ComponentOne Studio Enterprise includes over 210 components for Silverlight, WPF, .NET, ASP.NET, ActiveX, iPhone & Mobile Devices. It offers a complete solution that targets all runtime environments and all application layers (data, presentation, reporting and transformation).

New Silverlight 3 controls include: 37 feature packed Silverlight 3 components (grid, chart, menu, treeview, file uploader, layout, data input, gauges, maps, image rotator, navigation and more). You can use expression blend to fully style the Silverlight 3 controls which allows developers to easily create rich graphical interfaces for

their Rich Internet Applications. Built with XAML, the Silverlight controls promote collaboration in your team and fit seamlessly into your developer & designer workflow. Furthermore, you can take XAML from Silverlight and use it in your WPF application. Also available from ComponentOne is the XAP Optimizer which helps you optimize the size of the XAP files within your Silverlight applications.

The WPF toolset includes: Schedule for WPF - a suite of tools delivering scheduling, month calendar and multi-month calendar components for the WPF platform. Chart for WPF - visually stunning 2D/3D bar,

Silverlight Themes
Includes built-in support for the most popular Silverlight themes.

ComponentOne Chart for WPF
Offers advanced features like OnLoad Animation for 3D Charts.

ComponentOne PDF for WinForms
Now supports AcroForms and AcroFields.

WebSchedule
Experience increased client-side interaction, better performance, styling, a smaller footprint and more.

ComponentOne Studio for Silverlight
Advanced data visualization for your Silverlight applications.

Create Responsive Grid Applications with Built-in AJAX
Easily group, sort, filter, resize, and reorder columns at run time, all through simple drag-and-drop.

area, line, pie and column charts. Grid for WPF - a set of controls that allow you to integrate grids into your WPF applications. Reports for WPF - includes a set of WPF reporting tools: the C1Report, C1PrintDocument, and C1DocumentViewer components as well as the C1ReportDesigner stand-alone application.

The ASP.NET toolset includes: more than 35 styled, easy-to-use controls built on Web standards including AJAX, CSS, and XHTML. Components include: eCommerce (PayPal), file format management (PDF, Flash, XLS, ZIP), calendars, charting (2D and 3D), rich text editing, grids, input and mask controls, menus and toolbars, reporting, scheduling and spelling features.

The WinForms toolset includes: over 60 .NET controls featuring two award-winning grids: FlexGrid and True DBGrid. FlexGrid is designed for unbound applications. It is a flexible grid control for creating user-friendly interfaces that display, edit, format, organize, summarize, and print tabular data. The strength of True DBGrid is in its data binding; with an ADO.NET managed database interface, it offers features such as Excel-like split views and built-in hierarchical binding and grouping.

You can also recreate the look and feel of the iPhone and iTouch user interfaces with components (Button, LaunchPad, Calendar, NavigationList, Slider, SwitchButton, ViewPort) that mimic the look and feel of the iPhone and iTouch when rendered in Mobile Safari.

Developer Express

DXperience v2009 vol 2

All Developer Express ASP.NET, WinForms, WPF & Silverlight components & tools.

- User Interface functionality for WinForms, ASP.NET, WPF & Silverlight
- Includes an ASP.NET-AJAX control that displays digital dashboards in your Web based applications

DXperience

All the Visual Studio .NET component suites, libraries and IDE tools produced by Developer Express in one package.

DXperience includes all Developer Express products engineered for Visual Studio and the .NET Framework.

With this subscription, you receive all key technologies by Developer Express including IDE productivity tools, business application frameworks, and components for Windows Forms, ASP.NET, WPF and Silverlight. In addition to the individual tools, you receive complete source code for the Windows Forms and ASP.NET components. With the Universal subscription, you also receive eXpressApp Framework which is an instrument for creating business applications quickly and easily.

WPF products include: DXGrid for WPF - fast server-side data processing and complete support for templates and styles, DXCharts for WPF - clear & compact XAML syntax and element customization via templates, DXCarousel for WPF - stunning navigation and data browsing, DXNavBar for WPF - easy and intuitive navigation.

Silverlight products include: AgDataGrid - fast data manipulations and rich end user experiences, AgRichEdit - Word like text editing features with advanced text formatting capabilities and numerous end-user

XtraBars Suite Ribbon Control and Tabbed MDI interface
With the XtraBars Suite you can easily build Ribbons from scratch.

XtraBars Suite
You can create application menu, galleries and contextual tabs in ribbons.

DXGrid for WPF
Supports both tabular and card display formats and provides facilities for the end-user to sort and group data.

AgRichEdit for Silverlight
Allows you to introduce Microsoft Word like text editing features into your next Silverlight application with ease.

XtraReports End-User Designer
The XtraReports Suite features a fully functional End-User Report Designer.

XtraReports Master-Detail Report
With the XtraReports Suite, you can easily build banded reports and even Master-Detail reports.

options, AgMenu - static menus, toolbars and context menus etc, AgLayoutControl - layout management for Silverlight.

Windows Forms products include:

XtraGrid Suite - a grid control with four data layout options from a simple table to banded multi-line row layout and card views, XtraScheduler Suite - enables you to incorporate the UI found in Office Calendar within your applications, XtraPivotGrid Suite - a data analysis, mining and visual reporting solution, XtraGauges - linear, circular, digital and state indicator gauge types, XtraEditors - a library of over 20 editors that can be used both standalone or embedded, XtraWizard - easily generate multi-step wizard dialogs that conform

to Wizard 97 or Wizard Aero standards. XtraSpellChecker - which provides you with a straightforward way in which to add Office style spell checking capabilities into your next application.

ASP.NET products include:

ASPxGridView and Editors Library - a robust grid and data editors library for ASP.NET, ASPxPivotGrid Suite - a multi-dimensional analysis component, ASPxNavBar Suite - Web navigation bar, ASPxMenu Suite - a lightweight, main and context menu and more.

Also included in Universal and Enterprise Editions: CodeRush, Refactor! Pro and eXpress Persistent Objects. Priority technical support is also included with upgrades for 1 year.

FarPoint Technologies

FarPoint Spread for ASP.NET V4.0

High-performance, fully-customizable ASP.NET spreadsheet component.

- Outlook style grouping allows users to sort data as required
- Conditional formatting enables styling based on cell contents
- Now supports "Load on Demand" paging (virtual mode)

The screenshot displays a web-based spreadsheet application. It features a standard Excel-like interface with a menu bar (File, Edit, Format, Tools, Window, Help), a toolbar, and a worksheet grid. The data is organized into sections like 'Total Media', 'Network & Production', and 'Advertising'. It includes various data types such as currency, percentages, and dates, demonstrating the component's flexibility in handling different data formats.

FarPoint Spread for ASP.NET

Hierarchy
Easily display and edit your hierarchical data. You have full customization at the child level if you want to hide columns etc.

Formulas
Add calculations quickly to your Web applications by using any of over 200 predefined algorithms or add your own custom functions.

Import/export
Import/export Microsoft Excel 97 and higher files and text files. You can also export to Spread XML.

Retrieving data
Retrieve data from bound and unbound sources easily.

Skins
Use any of the 13 predefined skins or save and load your own design. Customized skins can easily be shared within your dev team.

Sorting
Automatically sort any column in ascending or descending order by double clicking on the header.

Easily present, edit and update your ASP.NET data.

FarPoint Spread for ASP.NET is a spreadsheet component that offers intuitive customer usability along with a wealth of grid functionality. With Spread for ASP.NET you have exceptional client-side validation to alert your user of invalid data immediately and simple client-side keyboard navigation. Written from the ground up in C#, Spread for ASP.NET will provide your user with an easy and reliable, feature-rich, user-friendly online experience.

FarPoint Spread for ASP.NET offers excellent design time support for rapid development using the innovative Spread Designer and supports in-cell editing and validation. It supports bound or unbound modes (no dataset needed), AJAX, native Microsoft Excel import/export, in-cell editing, multiple edits on multiple rows without server

round trips, client-side column/row resizing, multiple sheets, searching, filtering, multiple cell types, validations, cell spans, multiple headers, sorting, complete customization at the cell level, over 300 built-in calculation functions, hierarchical display and much more.

The main features of FarPoint Spread for ASP.NET include:

AJAX Support - AJAX allows the component to refresh without refreshing the entire page. This affects several features including expanding and collapsing child sheets in a hierarchical display, column sorting, inserting rows, searching, filtering, paging and formulas.

Grouping - You can set up the display to allow Outlook-style grouping of rows.

For large amounts of data, this is helpful to display the data in the order the user needs. The user selects columns by which to sort and the component then organizes and displays the data in a hierarchy with rows organized accordingly.

Searching - You can search for data in any of the cells in the workbook by specifying the sheet and the string of data for which to search. You also have several searching options you can choose from.

Row Filtering - With row filtering, you can allow the user to filter the data in columns on a sheet and display only the rows of data which meet criteria from a drop-down list or change the appearance of rows based on that filtering.

Frozen Rows and Columns - You can freeze columns and rows and keep them displayed regardless of where the user navigates in the sheet. Frozen rows and frozen columns do not scroll when the user uses the scroll bar or navigation keys in the component.

"Load on Demand" - You can allow the Web page to load on demand - as the user scrolls further down the spreadsheet, the FarPoint Spread component on the client loads another page of rows from the server as needed. This is similar to what was called "virtual mode" in the COM version of the product.

Publish Excel Workbooks Online - You can easily publish your existing or new Excel 97 and higher workbooks online by using Spread's Excel import and export feature.

GrapeCity Data Dynamics

ActiveReports 6

The best selling report writer with no runtimes or royalties.

- Professional Edition features a royalty-free End-User Report Designer.
- Includes filters for exporting to popular formats like PDF, Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications.

ActiveReports

Generate a wide variety of reports from your .NET applications.

ActiveReports 6 is a .NET reporting component for Windows and Web applications. Its key features include customization, fast performance, high quality, and multilanguage features -- all tested in tens of thousands of applications worldwide. ActiveReports features an easy-to-use Visual Studio .NET report designer and a powerful API. It includes multilanguage support that works right out of the box and also offers seamless run-time deployment, royalty free.

It's easy to create reports in ActiveReports 6, the report designer integrates seamlessly into Visual Studio .NET. Once the product has been installed on the developer's machine, adding a report to your project is as easy as adding a class or form.

ActiveReports 6 is easy to deploy - ActiveReports 6 reports are created within Visual Studio .NET and compiled directly into the executable. Therefore,

assemblies can be distributed using XCopy deployment or they can be placed in the global assembly cache (GAC). The object model provides the Reporting Engine as a single, managed, strong named assembly. There are no additional setups on the server or the clients' machine. Since ActiveReports 6 is fully managed, there are no dependencies on 3rd party applications.

ActiveReports 6 can export to any format - it includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications.

ActiveReports 6 contains a built-In charting control which supports common 2D and 3D chart types and provides advanced charting features as well as native exporting to various image formats. Chart types include: vertical and horizontal bar, line, scatter plot, pie, funnel and pyramid, Gantt,

Flash Report Viewer for ASP.NET
Provide a seamless, interactive report viewing experience and no-touch printing using the widely-adopted Adobe Flash Player.

Built-In Charting Control
Supports common 2D and 3D chart types and provides advanced charting features as well as native exporting to various image formats.

Publish Reports on the Web
The ActiveReports Professional WebControl allows you to easily publish simple reports to the Web for viewing in the browser.

Export to Popular Formats
Like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications.

End User Reporting Tools
ActiveReports Professional allows you to host the report designer in your application and distribute it royalty free.

Hyperlinks and Drilldown
You can use hyperlinks and the viewer hyperlink event to simulate drill-down from one report to another.

Kagi, point and figure, renko, three line break and more.

ActiveReports 6 supports the use of Windows Forms-based 3rd party controls with the report designer. Essentially any control that is able to be rendered on a Windows Form is capable of being rendered on an ActiveReports 6 report.

ActiveReports 6 includes a report viewer control and an End-User Report Designer - The Windows Viewer control supports report zooming and previewing, multiple tabs for viewing hyperlinks, split- and multi-page views, a Table of Contents pane, thumbnails, text searches, annotations, and toolbar customization. ActiveReports 6 also features a royalty-free End-User Report Designer control that allows you to host the report designer in your own applications to provide end users with the ability to create and modify reports. The Zoom toolbar item allows users to magnify the design surface of the report for more precise placement and viewing

of report controls. The Professional Edition of ActiveReports 6 also includes a Flash-based Report Viewer that you can use to provide a seamless, interactive report viewing experience and no-touch printing using the widely-adopted Adobe Flash Player. Choose from pre-defined themes (including Office, Windows XP, Vista and Windows Classic) and enhance the viewer experience by controlling the printing, paging, table of contents, thumbnail views and other options.

ActiveReports 6 comes with a Microsoft Access report conversion wizard that makes importing Access reports a breeze. This is a very handy utility for users who have invested a lot of time creating reports within Access databases. Not only will the import help get you up and running with ActiveReports 6, but the banded report architecture is very familiar for developers that have used Microsoft Access' reports.

Protect your applications with a complete, affordable and adaptable security solution for your business.

In today's business world, companies rely on an increasing number of web applications to collect and exchange sensitive data. More applications mean more places where you're vulnerable and knowing where your weaknesses are can be like finding a needle in a haystack. Unless you have IBM Appscan.

IBM Appscan is an automated solution that tests your web application security and then pinpoints your vulnerabilities. It can also help you manage the process of fixing them. With the threat of hackers always growing, IBM Appscan is designed to readily adapt to these ever-changing dangers - so you can be confident that you're totally secure and completely compliant.

IBM Appscan forms part of the IBM Rational range, which can provide you with complete, end-to-end lifecycle development solutions for all of your software. It makes your life easier and the development process run smoother than ever.

Protect your business. Don't let others find your weakness first.

anyone else does.

IBM Rational Software

IBM Rational RequisitePro V7.0.1

Share requirements using familiar document-based methods.

- Uses advanced integration with Microsoft Word to provide a familiar environment for activities such as requirements definition and organization
- Enables detailed attribute customization and filtering

IBM Rational RequisitePro

Enables the creation, analysis and management of requirements and use cases.

IBM Rational RequisitePro keeps project teams on track by enabling the creation, analysis and management of application requirements and use cases. IBM Rational RequisitePro is a powerful and simple-to-use product that promotes better communication, enhances teamwork and reduces project risk. It combines the familiarity and ease of Microsoft Word documents with powerful database capabilities for more effective requirements analysis and interrogation and gives teams the ability to understand the impact of change. IBM Rational RequisitePro ensures everyone on the team remains informed of the most current requirements information to ensure

consistency and provides Web-based access for distributed teams. The result is better communication and management of requirements with the increased likelihood of completing projects on time, within budget and above expectations. Successful projects start with requirements management, the more effective the execution, the greater the resulting quality and customer satisfaction.

IBM Rational RequisitePro includes a powerful requirements engine which is adaptable to your custom process. Team members can easily create views to display the information they need. You can easily set up and track relationships

Project Templates
Create a RequisitePro project based on existing templates.

Views
Use tables or outline trees to display requirements and their relationships between different requirement types.

Requirement Properties
Allows you to view information about the requirement and modify it.

Requirement Documents
Uses Microsoft Word to modify requirement documents which are associated with the project database.

Import Requirements
You can import requirements into Rational RequisitePro from Microsoft Word documents.

Export Requirement
You can export requirements in the following formats: CSV - Attribute Matrix, Traceability Matrix and Traceability Tree or Word document.

between requirements to verify that high-level requirements are represented in the detailed software requirement specs. Anyone with Web access, independent of his or her platform, can view and modify requirements quickly and efficiently without having Rational RequisitePro loaded on their machine.

Requirements information is uniformly accessible and modifiable through products in the IBM Software Development Platform, ensuring the entire team remains in sync. IBM Rational RequisitePro can integrate with IBM Rational Software Architect, IBM Rational Software Modeler, IBM Rational ClearCase, IBM Rational ClearQuest, IBM Rational SoDA, IBM Rational Unified Process and IBM Rational TestManager.

IBM Rational RequisitePro lets you support parallel development in which more than one set of requirements must coexist. You can determine when and where changes occur to reduce team confusion and to clarify the effect of project decisions over time.

IBM Rational RequisitePro includes a graphical display of suspect requirements as a result of requirement modification elsewhere in the project. This includes automatic email notification of stakeholders when requirements change. This provides detailed traceability views that display parent/child relationships and show requirements that may be affected by upstream or downstream change.

Infragistics

Infragistics NetAdvantage for .NET 2009 Volume 2

Create commercial class UIs for Winforms, ASP.NET, WPF & Silverlight applications.

- Comprehensive User Interface control and component toolset for .NET
- Rival desktop user experiences with all new tile views, dialog windows, editing and paging functionality in the Silverlight grid

Infragistics NetAdvantage for .NET

Includes essential User Interface controls for Windows Forms, WPF, Silverlight and ASP.NET, plus application styling.

NetAdvantage for .NET is a presentation layer toolset for quickly and easily building and styling polished application UIs and delivering a great user experience, for WPF, Silverlight, Windows Forms, ASP.NET and Tablet PC. You can deliver user experiences consistent with Microsoft Office and Windows Vista, produce high performance Web applications and create hi-fidelity, cross-platform charts and gauges that instantly provide your audience with a clear understanding of key performance indicators. Designed with the user experience in mind, NetAdvantage for .NET user interface controls give you the ability to focus

on business logic while it takes care of the presentation. Use the modern look and feel of Windows Vista styles and navigation or emulate the Office 2003 and Office 2007 user experiences with predefined color tables and ribbon controls.

NetAdvantage for .NET has what you need to add no-touch AJAX to your Web site with a professionally polished UI. The product includes many Windows Forms and ASP.NET components: grids, charts, combos, desktop alerts, button calculator, dropdown, progress bar, scroll bar, tooltips, editors, gauge, listbar, listview, printing, scheduling,

NetAdvantage for ASP.NET
Gauges and Chart controls let you create an executive dashboard.

NetAdvantage for Windows Forms
Create Outlook style applications with integrated NetAdvantage for Windows Forms controls.

Create applications with Office 2007 Ribbon styling
Also includes grids with conditional formatting, trees, 3D charts, menus, etc.

PDF Export
You can export reports to PDF documents displaying gauges to visually summarize data.

xamDataGrid
NetAdvantage for .NET showing WPF controls xamDataGrid, xamCarouselListBox, xamCarouselPanel.

Ribbon
Display values using columns, pie wedges, cylinders and more using the advanced graphics rendering capabilities in the WPF platform.

spell checker, tabs, toolbars and trees. NetAdvantage for .NET also includes a Document Export Engine for PDF and XPS formats and provides Web crawler optimization, AJAX support and SharePoint integration.

NetAdvantage for .NET includes Silverlight Controls for Line of Business (LOB) Applications which enable you to include islands of richness into your existing Web-based applications, giving end-users an experience that goes beyond what can be accomplished with mere HTML. These controls have been built from the ground-up using the Silverlight 3 platform and take full advantage of its capabilities to help you produce compelling and impactful Web 2.0 applications.

NetAdvantage for .NET includes next generation WPF controls which were designed from the start with an uncompromising attitude toward leveraging its cinematic graphics, rich styling, animation capabilities, and integrated UI virtualization. Embracing templates and exposing numerous styling points gives you complete command over the controls' appearance. A logical, friendly object model makes it easy to take advantage of the WPF platform's potential, whether you choose to do so through declarative UI (XAML) or code.

Multiple volume releases throughout the year continuously add valuable new features ensuring the tools available to you remain leading edge.

ACHIEVE A HIGHER STATE OF DATA VISUALIZATION

To master the art of data visualization, you must seek out the leader. For almost two decades, Software FX has risen above all others by bringing top-of-the-line data visualization tools to enterprise developers working with diverse markets, platforms and environments. This wisdom has evolved into a vast body of products, including a data presentation tool that provides a best-of-breed solution for Windows developers seeking enterprise quality and performance, as well as a professional IT monitoring solution offering incredible features for reporting and monitoring data. For a world of data visualization products that can raise your work to a higher level, depend on the source that's clearly on top.

Our most popular product, **Chart FX** provides charts, gauges and maps with additional vertical visualization functionality for business intelligence (OLAP), geographic data, financial technical analysis, and statistical studies and formulas. Recognized as the innovator and leader of the charting component category for the past 15 years, Chart FX delivers incomparable gallery options, aesthetics and data analysis features.

Grid FX was specifically designed for visual studio developers to take advantage of a powerful design-time experience, integrated Chart FX functionality right in the box, and AJAX to provide robust, run-time functionality in ASP.net applications. The dynamic aesthetic features for data presentation and analysis allow simple adaptation to an existing application or to specific corporate branding guidelines.

PowerGadgets puts powerful IT monitoring on your desktop and in your data sidebar. IT professionals can now create gadgets that consume data from WMI, Exchange, SQL Server and even the Windows Registry. PowerGadgets does not require any development environments, servers or browsers to run real-time gadget components such as charts, gauges and maps.

SoftwareFX

Data visualization for every need, every platform

Software FX

Chart FX for WPF

Data visualization for WPF applications.

- Provides new ways of exploring and analyzing enterprise data in your WPF applications
- Takes advantage of the enhancements in WPF graphic rendering

Chart FX for WPF

Chart FX for WPF combines cutting-edge WPF technology with animations, motifs, layouts, palettes, borders, markers, multiple axes and more.

Chart FX for WPF brings the familiarity and ease of use of Windows and Web Forms Smart Tag wizards to the WPF platform. The Chart FX for WPF design-time experience is fully integrated with Visual Studio to provide users with an intuitive, easy to use way to customize and configure their charts in just minutes. Through the use of this wizard, you can quickly customize your chart without the need of code or the hassle of editing countless properties through the properties pane. Chart FX fully exploits WPF's 3D capabilities to allow developers to support true 3D charts in their applications. This is done by using materials & lighting without sacrificing

the application's performance, scalability, integration or look and feel.

Choose from 20 different chart gallery types including bar, line, area, pie, scatter, Hi-Lo-Close, candlestick, radar and more. You can add markers, borders, tooltips and more to enhance your charts.

Rich content is perhaps the most promising feature in Chart FX for WPF, allowing innovative user interactivity scenarios not previously possible in Win32 or .NET development. For example, Chart FX for WPF can host a more complex set of data associated

3D Charts
Chart FX leverages WPF's 3D engine to allow users to manipulate any of the chart's elements.

Chart Data
Chart FX for WPF is very flexible and will accept data from many different types of sources.

Legends
Chart FX for WPF allows you to place the Legend Box anywhere on the chart, including inside the plot area.

Customization
Utilizing features of the WPF technology such as Data Templating, Chart FX for WPF allows for customization of its charts.

Axis Scaling
When new data is set to the chart, Chart FX for WPF will recalculate the scale values according to the new data set.

Data Analysis
Performing a drill down to focus in on parts of your multilevel information is simple with Chart FX for WPF.

to a series within the chart. It can give users zoom control to inspect this data with closer scrutiny and page through the results.

Chart FX for WPF uses 3D animation to scale, rotate, and move charts within the application in response to user actions and other events. Also, animations are used to draw attention to UI elements or to simply transition an element to a new state (i.e. drill down, rotation, scrolling). Animations are also used with 3D graphics; for example animated 3D surfaces and layering/angling windows.

Chart FX for WPF features robust LINQ functionality. A LINQ-enabled chart helps developers access data in a more intuitive manner. The chart will not be just limited to plotted numbers but

other informational data that can be used to enhance the experience as a response to user actions and other events (rich content). In addition, Chart FX for WPF provides a way for you to specify how you want to group, filter or sort your data items, giving way to new data analysis scenarios.

Chart FX exploits the WPF layout engine to allow chart elements to flow naturally in the chart area; no chart element is absolutely positioned, allowing for more flexible and intelligent resizing within the application.

Chart FX for WPF maintains programmability, developer productivity and IDE integration with both Visual Studio 2008 and Expression Blend.

Get ready for...

the **all-in-one** .Net toolbox

One vendor. The Telerik quality. The Telerik support.

* Telerik WebUI Test Studio and WinUI Test Studio include Automation Design Canvas software, owned and developed by ArtOfTest, Inc.

Build rich Web/desktop user interfaces and design reports.

- Deliver feature-rich, standards-compliant Web applications
- Visually appealing WPF controls let you create engaging user experiences
- Includes 20+ UI controls that can be used in Silverlight 3 applications

Telerik Premium Collection for .NET

This comprehensive toolset allows you to rapidly build commercial-grade interfaces for Web and desktop applications and meet the diverse functional, design and usability requirements of your clients.

Telerik Premium Collection for .NET includes ASP.NET AJAX, Silverlight and robust WinForms & WPF controls, as well as a flexible reporting engine are there to help you quickly create .NET applications on budget and on time.

Telerik Premium Collection for .NET also includes Telerik OpenAccess ORM which lets you simplify the data access plumbing in desktop and Web applications.

What's included (ASP.NET AJAX):

RadCalendar - lightweight calendar control with native AJAX support, multi-view mode, previous/next month and preview panes, RadUpload - AJAX-enabled multi-file upload control which uses a proprietary HttpModule to minimize server memory usage,

RadGrid - designed to eliminate the typical tradeoff associated with ASP.NET grid controls' rich functionality at the expense of weight and performance, RadComboBox - a component for building drop-down interfaces, RadEditor - a WYSIWYG rich-text editor that can replace any TextBox with an intuitive Word-like editor. Plus more ASP.NET AJAX components.

What's included (WinForms):

RadChart - a lightweight, easy-to-use data presentation component that offers support for all popular chart types, RadGridView - outlook style grouping, filtering, sorting and column reordering, RadCalendar - a lightweight yet highly advanced date input control, RadRibbonBar - provides an easy-to-design implementation of the Microsoft

RadControls for ASP.NET AJAX
An innovative and comprehensive toolset for professional Web development.

RadEditor for ASP.NET AJAX
A fast WYSIWYG Web editor, designed upon ASP.NET AJAX, utilizing its client-side framework and programming model.

RadGrid for ASP.NET AJAX
A fast client-rich Datagrid for ASP.NET, designed to provide desktop-like user experiences with minimum HTML footprint.

RadControls for WPF
10+ advanced WPF controls including: Calendar, Carousel, Chart, Gauge, GridView and more.

RadMenu for ASP.NET AJAX
A navigation control for ASP.NET allowing you to build lightweight and search-engine friendly menu systems.

RadControls for Silverlight
20+ Silverlight components including: Calendar, ComboBox, CoverFlow, GridView and more.

Office 2007 "ribbon" user interface. Plus more Windows Forms components.

What's included (WPF): Calendar for WPF - with databinding, different views (month, year, decade), culture awareness, flexible date navigation and transition animation. GridView for WPF - with sorting, grouping, seamless editing, filtering and display of hierarchical data. Gauge for WPF - a rich assortment of circular, linear and numeric gauge types with customization capabilities. Plus more WPF components.

What's included (Silverlight):

RadComboBox for Silverlight - autocomplete, grid-like multiple columns, databinding, rich events, programming models and full customization capabilities. RadGridView for Silverlight - provides outstanding performance and a flexible hierarchy model. RadGridView for Silverlight packs all advanced grid features such as grouping, sorting, filtering and rich

in-place editing all in one place. Plus more Silverlight components.

Telerik Reporting is designed for developers who need a flexible, royalty-free solution to easily design a wide range of reports. The product offers a convenient object model and solid Visual Studio integration which simplifies the generation of Windows, Web and PDF reports.

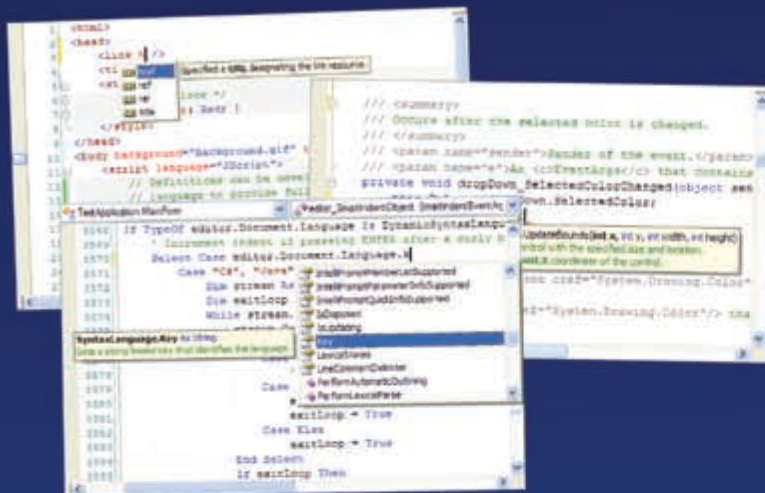

For complete control over viewing reports, Telerik Reporting offers Windows Forms and Web Viewers, which guarantees that you will always get the same look and feel in your reports.

Telerik Premium Collection for .NET also includes comprehensive learning resources with more than 600 demos and 500+ pages of courseware materials and documentation - all available to advance your learning.

The ultimate syntax-highlighting editor control for WinForms

- ◆ Mimics the Visual Studio code editor
- ◆ Create custom language definitions
- ◆ Code outlining and word wrap
- ◆ Indicators (breakpoints, squiggle lines)
- ◆ IntelliPrompt member lists, code snippets, parameter & quick info tips
- ◆ Over 100 stock editing commands

Actipro Icons for Apps / Web Sites

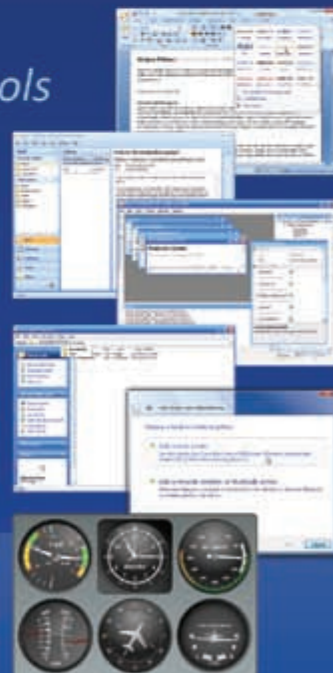

Actipro WPF Studio

Jumpstart your WPF application's UI with over 55 controls

Bundled suite includes all Actipro WPF controls at one low price:

- ◆ **SyntaxEditor** (beta) - Syntax-highlighting code editor control
- ◆ **Ribbon** - Office 2007-like UI that meets all Microsoft requirements
- ◆ **Docking & MDI** - Docking windows, multiple document interface
- ◆ **Navigation** - Navigation and explorer bars, breadcrumbs
- ◆ **PropertyGrid** - Blend and VS-like property grid
- ◆ **Editors** - Part-based & masked editors w/advanced date/time picker
- ◆ **Wizard** - Aero wizard and wizard 97 dialogs
- ◆ **Gauge** - Circular, linear, and digital gauges
- ◆ **Bar Code** - Vector bar codes with many symbologies
- ◆ **Shared Library** - Color pickers, transitions, misc. controls
- ◆ 1 year of support & free upgrades

Actipro Software

Actipro SyntaxEditor V4.0

Powerful code editing control with VS.NET style productivity enhancements.

Actipro SyntaxEditor

Editing C# code
Edit C# code using automated IntelliPrompt for parameter information.

Editing VB code
Edit VB code using automated IntelliPrompt for member lists.

Editing an XML SyntaxEditor language definition file
SyntaxEditor can edit an XML SyntaxEditor language definition file based on an XSD.

- Develop and distribute custom language definitions with your applications
- Supports language merging e.g. HTML calling CSS, VBScript, etc.
- Perform semantic parsing operations in a separate worker thread

Actipro SyntaxEditor was designed to handle advanced language parsing and processing, with phases for performing lexical parsing, semantic parsing (in a worker thread), and automatic outlining. Custom language definitions can be developed and distributed with your applications. SyntaxEditor includes a complete parser generator that helps build

semantic parsers and construct ASTs (abstract syntax trees). Major code editing features of the control include: code outlining, undo redo, word wrap, split views, current line and bracket highlights, virtual space, block selection, macro recording/playback, indicators, extensible rendering, IntelliPrompt code snippets, member lists, smart tags and more.

Aspose

Aspose.Total Q2 2009

Create, manage and convert many popular document formats.

Aspose.Total

Aspose.Cells
Lets you create and manage Excel Spreadsheets without requiring Microsoft Excel.

Aspose.Words
Lets you read, modify and write Word documents without utilizing Microsoft Word.

Aspose.Chart
Business and financial charting for your .NET applications.

- Supports Word, Excel, PowerPoint, Project, PDF and Flash file formats
- Demos written in C# and VB.NET highlight the best practices for implementing many common tasks

Aspose.Total .NET offers every .NET component that Aspose has available as well as all new components released during the annual subscription. Aspose.Total .NET includes a set of components that support the most common document formats like MS Word, MS Excel, MS PowerPoint, MS Project, PDF, RTF, CSV and tab delimited documents allowing

developers to create, manage and convert one format to another.

Aspose.Total .NET also contains components for charting, email, DNS, FTP, ICMP, spell checking, barcode creation, grid and spreadsheet, ad hoc query generation, recurrence patterns and workflow.

Codejock Software

Codejock Xtreme Toolkit Pro 2009 Vol 2

Create Office XP - 2007 and Visual Studio .NET style GUI elements.

Codejock Xtreme Toolkit Pro

Ribbon
Create applications with the latest Microsoft Office 2007 style Ribbon Bar.

Calendar
Provides Windows developers with a sophisticated Outlook style calendar.

Grid sorting
Easily create, group and sort data in a flat or hierarchical format.

- Produce Microsoft style ribbon, toolbars, menus and MDI tabs
- Easily theme your application with SkinFramework for .NET
- Includes an Enterprise class grid component with built in toolbar

Codejock Xtreme Toolkit Pro provides Windows developers with a sophisticated set of components to give applications a professional, modern appearance. Included are nine components: Xtreme Command Bars, Xtreme Docking Pane, Xtreme Property Grid, Xtreme Report Control, Xtreme Calendar, Xtreme Task Panel, Xtreme ShortcutBar, Xtreme SkinFramework

and Xtreme Controls. With Codejock Xtreme Toolkit Pro you can create enterprise class applications that incorporate a full set of customizable user interface components that include Office style toolbars and menus. Several popular visual styles are included such as Office XP, 2003, 2007 and Visual Studio .NET.

Contour Components

ContourCube V4.0

Interactive reporting, data analysis and reports distribution.

ContourCube

Hierarchy Objects
Once defined, a hierarchy object unites multiple fields with their relative positions into a whole, hierarchy as a single dimension.

Export Reports to Excel
ContourCube exports to CSV, HTML, PDF and MS Excel.

Dynamic Data Filtering
Dynamic data filtering, pivoting, drill-down and roll-up are all features offered by ContourCube.

- Comprises many popular business and statistical algorithms
- Supports fast direct data loading from multiple sources
- Includes XP, Classic and Flat appearance styles with text wrapping

ContourCube is a high-performance OLAP component for rapid development of Internet, client-server and desktop business intelligence applications. It provides a highly dynamic interface for interactive data analysis, sophisticated analytical, statistical, reporting and graphing features. ContourCube can get data from any data source via ADO, BDE, ODBC or an unbound data source; just drop it onto a form within your project, link it to your data and get the benefits of OLAP. ContourCube performs OLAP operations on hundreds of thousands

of records without an OLAP server. It allows end users to perform OLAP and statistical analyses using current data from any relational database. You can build and print reports interactively - simply with a click and drag & drop (with sub-second response times), dynamically interact with data: move rows and columns, filter data, drill-down, roll-up, pivot table and get all possible reports from one dataset. ContourCube makes millions of calculations simultaneously and shows new subtotals and totals instantly.

Contour Business Intelligence

Query | Interactive Reporting | Data Analysis | Information Delivery

ContourCube

"Add Business Intelligence functionality to your applications"

ContourCube brings embeddable interactive reporting, data analysis and information delivery technology to Windows and Web based business and statistical solutions. It lets user interact with data; slice and dice, pivot, drill down and roll up; with sub-second response times and without additional OLAP server.

ContourCube offers a rich palette of business-oriented functions, powerful and easy formula language, and a range of new reporting techniques with innovative approach to report distribution.

Contour Publisher

"A powerful and easy-to-use tool for automatic refreshing and delivery of reports"

Contour Publisher is designed to help engineers and managers save time on running queries and updating reports. It can instantly load pre-built reports, feeding these with recent data from your database.

Contour Publisher automatically accesses databases, builds new or updates existing reports in Microcube, HTML, Excel, or Word formats, according to the scripts or templates.

Contour Reporter

"An easy-to-use application for interactive reporting and data analysis"

Contour Reporter allows executives and managers quick access to business intelligence reports and increases productivity through interactive sales reports, stock, marketing, budget, and accounting analysis. Enterprises and banks easily access corporate reports with **Contour Reporter**.

Governmental organizations, statistical agencies, consulting companies use **Contour Reporter** for publishing corporate performance indicators for their departments and the general public.

IP*WORKS!

NEW VERSION 8.0

The latest evolution of the most comprehensive suite of Internet communications components for professional developers is here!

The highly anticipated IP*Works! Version 8.0 release represents a leap forward in design, performance, and new functionality! With more than 40+ components supporting every major Internet protocol and development technology, it is easy to see why IP*Works! is the professional developers #1 choice for connected application development.

Get your copy of IP*Works! V8 as part of our all-inclusive **Red Carpet Subscriptions** - www.componentsource.com

faster than a speeding bullet,
more powerful than a locomotive,
 able to **simplify connectivity** with a single component.

The Professional Developer's #1 Choice for Communications, Security, & E-Business Components

Internet Communications

IP*Works! Products

TCP/IP	Secure SNMP
SSL	Zip
S/MIME	EDI AS2
S/Shell	

Our flagship product line. The result of more than a decade of research and development in building Internet connectivity tools for professional software developers.

Components for: Web and Web Services, Email and News, File Transfer, Sockets and Streaming, Remote Access, Instant Messaging, SSL and Secure Shell Security, Certificate Management & Creation, S/Mime Encryption, SNMP Network Management, File & Streaming Compression, and E-Business (B2B).

Internet Business

IBiz Integrator Products

QuickBooks	First Data
E-Payment	USPS
E-Banking	FedEx
Vital/TSYS	Amazon
Paymentech	PayPal

The IBiz product line provides small and medium-sized companies with enterprise-class software components for Internet business integration. Built on top of our award winning IP*Works! tools, these easy-to-use components enable developers to rapidly integrate common business processes.

Components for: Accounting Integration (QuickBooks), Credit Card Processing, ACH / E-Check Processing, Shipping and Tracking, Banking & Financial Transactions, and Services Integration.

Enterprise Adapters

BizTalk & SQL Server Adapters

AS2 / EDI-INT	GISB / NAESB
SFTP / FTPS	OFTP
XMPP (Jabber)	Secure Shell
SMS Paging	Secure Email
AWS Integration	

The /n software Adapters extend Microsoft BizTalk and SQL Server with advanced Internet communications, security, and e-business capabilities, including robust, highly scalable, fully integrated implementations of B2B messaging and secure communications protocols.

Components for: EDI-INT AS2 Integration, Secure File Transfer, Secure Shell Remote Execution, Secure Email, RosettaNet Connectivity, OFTP Integration, NAESB / GISB Messaging, and more.

Serious Components for Software Professionals

powerTCP for ActiveX and .NET

PowerTCP components are used by thousands of developers and companies throughout the world to increase productivity and shorten time-to-market.

PowerTCP for .NET components are compatible with all .NET Framework versions 1.x, 2.0, and 3.5. PowerTCP for ActiveX components provide legacy platform support, stability and longevity.

With detailed documentation, hundreds of comprehensive sample applications for Windows, ASP, and ASP.NET, and an expert in-house support staff, Dart provides professional assistance from concept to completion.

Email Validation, Secure FTP, Secure Mail, SSH, SFTP, Telnet, Emulation, SSL Sockets, Server Tool, Web Tool, Winsock, Ping, and Zip Compression

powerSNMP for ActiveX and .NET

powerSNMP for .NET

Create custom SNMP Manager, Trap and Agent applications with a set of native .NET classes. Full support for SNMPv1, SNMPv2, SNMPv3 and ASN.1 standards.

powerSNMP for ActiveX

Create custom SNMP Manager, Trap and Agent applications for monitoring and controlling network devices. Full support for SNMPv1, SNMPv2 and ASN.1 standards.

powerWEB for ASP.NET

powerWEB File Upload

Interactive, browser-based file upload with progress bars, stream integration, UI customization, multi-file uploads, low server overhead, and more!

powerWEB LiveControls

An advanced and efficient platform for developing responsive, AJAX-enabled ASP.NET applications. Rapidly develop interfaces with 20 server controls or take advantage of rich client and server APIs for custom client-server communications.

powerWEB Zoom

Provides cross-browser image panning and zooming without plug-ins! Place high-resolution, interactive images in your website and Zoom handles image delivery on-demand.

powerWEB TextBox

Incredibly flexible and customizable WYSIWYG HTML editor. Perfect for content management and distributed editing.

PARTNER

Dart Communications

PowerTCP Mail for .NET V3.1

Add secure email messaging, encoding and decoding to your applications.

PowerTCP Mail for .NET

Construct Messages
You can create a complete message, including attachments.

View Messages
Load a message and the various parts (including headers, attachments, and nested message parts) will be displayed.

POP3
Display information about messages in the mailbox without downloading, all from a POP3 server.

- Send, receive and manage messages with POP, SMTP and IMAP
- Easily create HTML messages with one line of code
- Now includes SSL security features, plus S/MIME support

PowerTCP Mail for .NET includes SMTP, POP, and IMAP components to help create .NET email solutions with absolute flexibility and ease-of-use.

The powerful bi-directional MessageStream technology lets you easily create, send, retrieve, and edit messages while helper classes assist in managing email addresses. Complex

HTML messages can be created with just one line of code.

Extensive MIME support and the stream-based architecture enable messages to be used across components. Plus, multiple WinForm templates with source code are included to help design interactive solutions out-of-the-box.

DEVPIA

DEXTUpload .NET Pro V3.7

Add the ability to upload files to your Web applications.

DEXTUpload .NET Pro

Single and Multiple Uploads
DEXTUpload .NET Pro allows you to upload single and multiple files.

Upload Progress
You can display a custom progress bar during the upload process.

Watermarking and Image Format
You can upload and watermark images and change image formats on the fly.

- Allows uploads of upto 2GB files
- Use of optimized parsing algorithm makes uploading speed even faster
- Able to upload files to a database via a BLOB (Binary Large Object)

DEXTUpload .NET Pro is a component that supports file uploads and downloads between a Web browser and an IIS Web server. It observes Internet standards (RFC 1867) and can be used in Microsoft ASP.NET.

DEXTUpload .NET Pro is HTTP-based and uploads files from a Web browser to a Web server quickly and efficiently. It overcomes the limitations of ASP.NET uploading (inconsistency for high capacity file uploads, server overloads and safety, etc.), is written in C# and provides you with improved

upload speeds and stability. During upload and download you can invoke a progress window automatically without installing any other software. The pop-up progress window shows you uploading speed, file size, uploaded file size and time remaining. It can also be customized by using progress objects. DEXTUpload .NET Pro also allows you to watermark uploaded images and convert uploaded images to thumbnails. It supports various file conversion formats (BMP, JPG, GIF etc.) and provides detailed information about image files.

How Flexible is Your Licensing Solution?

The Desaware Licensing System

The licensing solution you choose should adapt to your licensing needs - you should not have to adapt your needs to the licensing solution.

It should integrate easily into your backend systems and infrastructure, and be flexible enough to allow for changes to the licensing model as your market grows.

Maximize Your Revenues By Maximizing Your Licensing Options

Customize Your Demos & Licensing Scenarios

- Create demos and time trials that expire according to your specifications.
- The Desaware Licensing System uses no secret or hidden files or dongles.
- Verify licensing via the internet or email. Implement tight activation based security or less stringent security scenarios.
- Easily create concurrent licensing scenarios.

TOP 100 PUBLISHER
ComponentSource Awards 2008

TOP 100 PUBLISHER
ComponentSource Awards 2007

Your Product Your Choice

- Sell your software on your terms: single purchase or subscription.
- Fully customize how your software 'recognizes' an install, i.e. network IP address, MAC address, machine name.
- Use the standard .NET component licensing framework or bypass it completely.
- Tie into the database of your choice, or use the automatic defaults.
- Offer FIPS compliancy for government applications.

InfoSoft Global

FusionCharts Bundled Packs

Cross platform charting solution for ASP, ASP.NET & AJAX applications.

FusionCharts Bundled Packs

FusionMaps

Create animated, interactive and data-driven Flash Maps for your dynamic Web applications.

FusionCharts

Interactive and animated charts for ASP and ASP.NET applications.

FusionWidgets

Real-time Financial and Dashboard Charts for the Web.

- Generate interactive and animated flash charts & maps in minutes
- Supports over 75 chart types and 450 maps
- Build cross-browser and cross-platform solutions

FusionCharts Bundle Packs include: FusionCharts, PowerCharts, PowerMaps and FusionGadgets.

The Pack provides developers with a collection of Flash components for creating highly visual Web applications based on the Adobe Flash Platform. Developers can build cross-browser and cross-platform solutions which blend content, application logic and communications delivering an effective end user experience.

FusionCharts delivers interactive and eye catching Flash charts. FusionMaps can plot over 450 maps, including all continents, major countries and all US states. FusionWidgets is a collection of real-time gauges, self-updating charts and financial charts like Gantt charts, funnel/pyramid charts, bullet graphs, sparklines etc.

The product can be used with any Web scripting languages like .NET, ASP, JSP, PHP, ColdFusion, Ruby on Rails etc.

Janus Systems

Janus Web ASP.NET Server Controls Suite V3.0

Add Outlook style interfaces to your .NET Web applications.

Janus Web ASP.NET Server Controls Suite

Janus Web UIPanelManager

Deliver appealing layouts for your ASP.NET applications by using panes that can be arranged in horizontal or vertical tiles.

Outlook Navigation Bar

Advanced navigation panes like Outlook Navigator Bars or Tab Strips are also provided by the Janus Web UIPanelManager.

Janus Web UICommandManager

Provides basic toolbar functionality for your ASP.NET applications with a look similar to Microsoft Office.

- Janus Web GridEx Control provides an Outlook style UI for the Web
- Provides Office style toolbars and pane based layouts
- Supports Microsoft ASP.NET AJAX Framework

Janus Web ASP.NET Server Controls Suite is a comprehensive toolkit of controls designed to provide a rich user interface to your ASP.NET applications.

It includes Janus Web GridEx, Janus Web UIPanelManager for creating professional layouts, Janus UICallbackManager, Janus Web UICommandManager and more.

The main component is Janus Web GridEX for .NET which is a 100% C#

managed ASP.NET control. It is a data-aware, fully editable component that can be bound to any table in a dataset, result set or to any other data source that supports IEnumerable interfaces. The control offers many advanced formatting features that will give the programmer total control over how data is displayed.

Janus Web ASP.NET Server Controls also offers support for the Microsoft ASP.NET AJAX Framework.

The web has evolved.

What about your charts?

FusionCharts Suite helps you build animated charts, gauges and maps to liven up your web applications. Smart, user-friendly and innovative, it lets you add that extra visual edge to your ASP.NET applications.

As our customers say, "It's one thing to shine, another to sizzle".

- ▶ Visually arresting & interactive charts
- ▶ Easy to integrate & deploy
- ▶ Over 75 charts and 500 maps provided
- ▶ AJAX-enabled & drill-down supported
- ▶ Trusted by over 12,000 customers and 250,000 users

Convey better. Convince better.

www.componentsource.com/features/infosoft/index.html

Janus WinForms Controls Suite

Add powerful Outlook style interfaces to your applications

Janus GridEX for .NET

Janus GridEX is a control capable of working in bound fashion with ADO.NET or IList data sources. The control supports hierarchical display of data and permits you to create effective user interfaces similar to Microsoft Outlook®, while easing development and maintenance time. The functionality provided by the control allows you to display, format, edit, sort, group, filter, manipulate, summarize, preview and print your data. Standalone MaskEdit, MultiColumn Combo, and UpDown controls are also included.

Janus Ribbon & Command Manager Controls

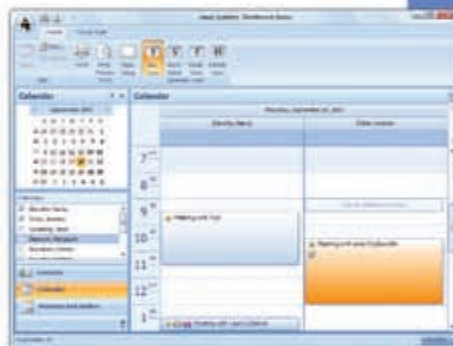

Janus Command Manager and new Ribbon controls are also included in the suite. These controls provide Windows developers with stylish menus and toolbars. The components permit advanced customization of the menus and toolbars of your applications. Use the built in VisualStyles in the controls to easily provide your applications with a look similar to Windows XP, Office 2000, Office XP, Office 2003 or 2007.

Janus Timeline Control for .NET

The Janus Timeline Control is ideal for displaying items in relation to time. Items in the control are arranged in chronological order from left to right on a time scale that can be divided from seconds to years. You can easily load, display, format, group, filter, edit and manipulate items with the functionality available in the control in both bound and unbound modes.

Janus Schedule for .NET

The Janus Schedule control can present appointments and related owners in different Views, representing Days, WorkWeeks, Weeks, and Months. The control also supports working with recurrent appointments. You can easily load, display, format, filter, edit, manipulate, preview, and print appointments with the functionality available in the control in both bound and unbound modes. A stand-alone Janus Calendar Combo Control, used to edit date and time values, is also included.

Windows Forms Controls

A suite of controls designed to provide powerful user interfaces for Microsoft .NET Smart Client applications patterned after Microsoft Outlook®. All of the controls in the suite are 100% C# managed controls designed to be used with Visual Studio® 2005.

Janus WinForms Controls Suite includes the following controls:

Janus GridEx for .NET
(Outlook Grid)

Janus Schedule for .NET
(Outlook Calendar View)

Janus Timeline for .NET
(Outlook Journal)

Janus ButtonBar for .NET
(Outlook Shortcut Bar)

Janus ExplorerBar for .NET
(Outlook Shortcut Bar)

Janus UI CommandManager
(Menus and Toolbars)

Janus PanelManager
(Outlook / Visual Studio .NET panes)

Janus TabControl
(Tab Control)

LEAD Technologies

LEADTOOLS Medical Imaging SDK V16.5

Optimized features to meet the specific needs of medical imaging application development.

LEADTOOLS Medical Imaging SDK

DICOM 3.0 File Specification
Full support for the most up-to-date DICOM file format.

High / Low level file information
Allowing easy navigation of DICOM data.

DICOM VR Table
Edit settings for the DICOM file.

- Use Digital Signature Profiles to ensure data has not been tampered with
- LEADTOOLS Silverlight Image Viewer control supports the load and display of all Silverlight supported image formats

LEADTOOLS Medical Imaging SDK includes full support for 8-16 bit grayscale images, and 12 & 16 bit image processing, image display (with window leveling) and LUT processing. DICOM 3, the industry standard medical imaging format is fully supported (including all standard IOD classes and modalities (CR, CT, MR, NM, US, RF, SC, VL, etc.)

and complete DICOM Basic Directory support) allowing programmers access to medical images retrieved from digital imaging modalities such as CT and MR scanners. Programming interfaces include: .NET class libraries, WCF services, WF activities, WPF XAML controls, Silverlight, C DLL API, C++ class libraries and COM objects.

Nevron

Nevron Chart for .NET Enterprise 2009 Vol.1

A powerful, flexible and extensible charting component for Windows Forms and ASP.NET.

Nevron Chart for .NET (Windows Forms and ASP.NET)

Professional Quality
Support for full set of charting types, advanced lighting, axes customization and more.

Customization and 3D Support
Nevron Chart introduces advanced customization and 3D Charting support.

Nevron Financial Charting
Includes charts for specifically targeted development for financial applications.

- Includes many chart types and circular/radial/linear gauges
- Includes scrollable axes, integrated legend, chart annotations, watermarks and an extensible chart layout manager

Nevron Chart for .NET has been designed to be extensible, efficient and feature rich. It can display virtually any 2D or 3D chart including: bar, line, step line, area, pie, point, bubble, stock, floating bar, radar, polar, high low, mesh surface, grid surface, shape, smooth line, floating bar, Venn and error with many variations (like scatter XY and XYZ line, stacked bars etc.).

The component features full Visual Studio design time support with many advanced features like style editors. It also comes with support for many advanced features including: customizable legends, unlimited axes, zooming and scrolling, grouping, filtering, full set of gauge types, advanced formula support, financial and statistical functions and more.

VERSION
16.5

Document

Medical

Multimedia

Vector

Develop your application with the same robust imaging technologies used by **Microsoft, HP, Sony, Canon, Kodak, GE, Siemens, the US Air Force and Veterans Affairs Hospitals.**

LEADTOOLS provides developers easy access to decades of expertise in color, grayscale, document, medical, vector and multimedia imaging development. Install LEADTOOLS to eliminate months of research and programming time while maintaining high levels of quality, performance and functionality.

- **Image Formats & Compression:** Supports 150+ image formats and compressions including TIFF, EXIF, PDF, JPEG2000, JBIG and CCITT.
- **Display Controls:** ActiveX, COM, Win Forms, Web Forms, WPF and Silverlight.
- **Image Processing:** 200+ filters, transforms, color conversion and drawing functions supporting region of interest and extended grayscale data.
- **OCR/ICR/OMR:** Full page or zonal recognition for multithreaded 32 and 64 bit development.
- **Forms Recognition and Processing:** Automatically identify forms and extract user filled data.
- **Barcode:** Detect, read and write 1D and 2D barcodes for multithreaded 32 and 64 bit development.
- **Document Cleanup/Preprocessing:** Deskew, despeckle, hole punch, line and border removal, inverted text correction and more.
- **PDF and PDF/A:** Read and write searchable PDF with text, images and annotations.
- **Annotations:** Interactive UI for document mark-up, redaction and image measurement (including support for DICOM annotations).
- **Medical Web Viewer Framework:** Plug-in enabled framework to quickly build high-quality, full-featured, web-based medical image delivery and viewer applications.
- **Medical Image Viewer:** High level display control with built-in tools for image mark-up, window level, measurement, zoom/pan, cine, and LUT manipulation.
- **DICOM:** Full support for all IOD classes and modalities defined in the 2008 DICOM standard (including Encapsulated PDF/CDA and Raw Data).
- **PACS Communications:** Full support for DICOM messaging and secure communication enabling quick implementation of any DICOM SCU and SCP services.
- **JPIP:** Client and Server components for interactive streaming of large images and associated image data using the minimum possible bandwidth.
- **Scanning:** TWAIN 2.0 and WIA (32 and 64-bit), autotetect optimum driver settings for high speed scanning.
- **DVD:** Play, create, convert and burn DVD images.
- **Multimedia:** Capture, play, stream and convert MPEG, AVI, WMV, MP4, MP3, OGG, ISO, DVD and more.
- **Enterprise Development:** Includes WCF services and WF activities to create scalable, robust enterprise applications.

The Imaging Source

TX Text Control .NET V15.0

Read, edit and create documents in formats like MS Word DOCX, DOC, RTF, PDF, HTML and XML.

TX Text Control .NET

Character and Paragraph Formatting
TX Text Control .NET offers formatting control over character and paragraph presentation.

Bullets and Numbered Lists
TX Text Control .NET provides comprehensive support for bullets and numbered lists.

Stylesheet Formatting
Supports both paragraph and character based styles, as well as multiple style inheritance.

- Standardized (ASP.NET & WinForms) WYSIWYG interface supports drag and drop
- Supported formats include DOC, DOCX, RTF, TXT, HTML, CSS, XML and PDF
- Create and save ISO conforming PDF/A documents

TX Text Control .NET is available in Standard, Professional and Enterprise editions and is a royalty-free word processing control that offers developers a broad range of word processing features in one reusable component. TX Text Control .NET includes the ability to export all documents to print-ready Adobe PDF documents without any third-party

software. The fully programmable component supports nested tables, document sections, images, text frames, drag and drop, headers and footers, bulleted and numbered lists and MS Word compatible mail merge fields for database applications. Typical applications include mail merge, PDF creation, document conversion or WYSIWYG word processing.

.NETXPERT

InfoScope V2.5

Easily post InfoPath forms to a Web server.

- Interoperable with all kinds of .NET based Enterprise solutions
- Includes Windows SharePoint Services (WSS) support

InfoScope

InfoScope is an InfoPath run time engine that enables users who don't have InfoPath to use InfoPath forms through a Web browser. InfoScope enables inputs and updates of data within InfoPath, and makes the entire process interoperable with a back end system via a Web browser.

InfoScope provides a Service Oriented Architecture (SOA) which meets various different types of complicated business requirements through .NET technology. This enables customers and/or partners to integrate into

your business processes via online electronic forms.

InfoScope also provides an InfoScope SharePoint Web Part Control. It's a real InfoPath form not a Web page. No roundtrip and no modification. Just publish and you are ready to use InfoPath. Since InfoScope is auto-installed to clients, you won't meet deployment issues.

InfoScope also enables Web pages to catch events so that you can develop Web applications using InfoPath forms.

AG-TECH

Btrieve Classes for .NET V3.0

Fast, easy to program access to Pervasive.SQL databases from .NET.

- Provides direct access to Pervasive's transactional interface from within .NET
- Extended class enables maximum performance when searching Pervasive data

Btrieve Classes for .NET

Btrieve Classes for .NET is a set of .NET database access support classes that enable fast, easy to program access from .NET programs to Pervasive.SQL databases via the Btrieve API. As such they greatly help developers looking to write .NET programs accessing data in Pervasive.SQL databases or those looking to migrate existing pre-.NET Btrieve/Pervasive applications to .NET.

Btrieve Classes for .NET performs with greater efficiency and hence is faster than ADO.NET or Pervasive's OLE DB provider.

This product includes two types of class library the first (DDF Class) is specifically designed for the .NET Framework and is composed of classes that enable smart and efficient access to column data and definition of data type conversion code. The second type of class (Native Class) provides Btrieve API level access from .NET managed code.

Btrieve Classes for .NET includes full support for Pervasive PSQL v9 and Visual Studio.

Aurigma

Graphics Mill 5.1

Add advanced Image processing to your .NET applications.

- Load/save images from/to files, apply different transformations and effects, draw lines, curves, shapes and text
- Includes Windows Forms and Web Form controls

Graphics Mill

Graphics Mill for .NET can be used to create photo hosting Websites, applications which apply preprint preparation to images, scripts which generate Web graphics, or any other advanced imaging application you might need. It includes a set of classes (non-visual) which provide various imaging operations (load and save images from and to files,

transformations and effects etc.). Support of various formats: JPEG, PNG, GIF, WBMP, TIFF, BMP (read and write), PCX, PSD (read only) and PDF, SWF (write only) is included. Various vector objects can also be loaded into the control (rectangles, ellipses, text, polylines and polygons) and object appearance (color, fill) can be modified at runtime.

BCGSoft

BCGControlBar Library Professional MFC V10.3

Create Office, Visual Studio and IE style user interfaces.

- Includes a customizable Office 2007 style Ribbon control
- Includes more than 200 well designed, tested MFC extension classes

BCGControlBar Library Professional Edition MFC

BCGControlBar Library Professional MFC has more than 200 (Ribbon, toolbar, menu, calendar, grid, editor, gantt and many others) thoroughly designed, tested and fully documented MFC extension classes which can be easily incorporated into your application to save you hundreds of development and debugging hours. It includes advanced features such as detachable tab panes, auto hide panes,

new docking algorithms (similar to those introduced in Microsoft Visual Studio and Microsoft Visio), a text editor with syntax highlighting and IntelliSense-style support, Office-style calendar, professional grids and much more.

Change Vision

JUDE/Professional V5.5

Business process UML modeling tool.

- Edit model information directly, without opening dialog boxes
- Supported diagram types include Class, UseCase, Sequence, Collaboration, StateChart, Activity, Component and Deployment

JUDE/Professional

JUDE includes basic features to make modeling simple and user friendly. JUDE is suitable for business use, handling large-sized models and document creation. It includes enriched features, such as the ability to change your view freely using a map view, zoom by dragging, unlimited undo/redo, the ability to output project information to a CSV file, automatic generation of class diagrams with model information, diagram creation guidance and more.

JUDE supports basic UML 1.4 diagrams including: UseCase, Sequence, Collaboration, Statechart, Activity and Class (Object/Package/Robustness). You can lock project files from other users, set the font for the whole project file and configure print settings for each diagram. JUDE also lets you display multilingual aliases (e.g. English and Japanese) on diagrams, export diagrams to RTF and HTML documents and generate Class diagrams from Class files.

Chant

Chant Developer Workbench 2008 (3.0.1.3)

Comprehensive development and testing environment for working with speech.

- ActiveX, CDLL, COM, Java, .NET, VCL, Web, Win32 and WinCE libraries
- Supports Dragon, ViaVoice, SAPI, and VoCon recognizers
- Supports Acapela, Cepstral, RealSpeak Solo, & SAPI synthesizers

Chant Developer Workbench

Chant Developer Workbench is comprised of tools and components for developing software that speaks and listens. As an interactive toolset, it provides a development and testing environment for working with the component libraries and the speech technology objects they manage. With component libraries, you can manage grammars, lexicons,

profiles, recognizers, synthesizers, and text-to-speech markup directly within application software you develop and deploy. Within the Chant Developer Workbench interactive environment, you can create, edit, and test grammars, lexicons, profiles, and text-to-speech markup to deploy with your applications.

ComponentArt

ComponentArt Web.UI for ASP.NET AJAX 2009.2

Advanced user interface suite of ASP.NET AJAX controls.

- Delivers fast, lightweight and feature-rich user interfaces
- Client-side API featuring Microsoft AJAX library syntax allows for total control over structure and data, with persistence to the server

ComponentArt Web.UI for ASP.NET AJAX

ComponentArt Web.UI for ASP.NET includes user interface controls for the development of sophisticated Web applications. It includes the following AJAX controls: Calendar, CallBack, ComboBox, Dialog, Editor, Grid, Menu, MultiPage, NavBar, Rotator, SiteMap, Snap, SpellCheck, Splitter, TreeView, Upload and WebChart Lite. All controls are built on the client-side component model introduced by ASP.NET AJAX,

exposing JavaScript APIs that allow full client-side programmatic control over any part of the user interface.

ComponentArt Web.UI navigation controls (Menu, TreeView, NavBar, TabStrip and SiteMap) provide meaningful content to search engines by generating a crawler friendly representation of the navigation.

Data Techniques

ImageMan V8.71

Add image processing and scanner support to your applications.

- Provides load, save, display, print, conversion functionality
- Process images in over 35 popular raster and vector formats
- Filters include emboss, sharpen, blue, edge detection and more

ImageMan

ImageMan components are optimized for Windows and include support for loading, saving, displaying, printing, converting, and processing images in more than 35 of the most common raster and vector formats (FlashPix, Photo CD, JPEG, TIFF, BMP, RLE, DIB, EPS, GIF, PNG, TGA, IMG, DXF, PCX, DCX etc). It also includes built-in database support for writing and reading image

data from memory. ImageMan's API includes functions for writing and reading image data from memory blocks making it ideal for use with databases. And with the low level functions you can even write your own low level I/O handlers. ImageMan is available as an ActiveX OXC, .NET or a DLL for maximum compatibility with your environment.

Crownwood Software

DotNetMagic V6.0

Create Microsoft Office style applications in minutes.

- Provide Visual Studio style docking windows with docking indicators
- TabbedGroups control provides flexible, customizable MDIs
- Includes Windows Media Player style rendering

DotNetMagic

DotNetMagic user interface library provides Office 2007 style rendering including the blue, silver and black Office schemes. It also has a docking window system that offers all the features found in Visual Studio .NET. It mimics the appearance of Visual Studio .NET and features; multiple content in the same row or column, multiple content inside the same docking window, the ability to restore windows in the same row or column and an auto hide capability. The TabbedGroups control provides a similar ability to organize documents

as found in Visual Studio .NET. The window docking features include: edge docking, floating, pinnable, sliding auto hide and hide & show. The customizable Tree control includes: none, single or multi-select modes, support for XP Themes, groups & list style and full color customization.

DotNetMagic is available with full source code, 12 months of updates and 12 months of email support. It is Visual Studio 2005/2008 compatible and comes with C# and VB.NET samples.

Fast Reports

FastReport.Net

Create application independent reports.

- Wide range of report objects available: text, picture, lines, shapes, barcodes, table, rich text, chart, etc
- Contains a visual report designer that supports zooming, undo/redo, guidelines and rulers

FastReport.Net

FastReport.Net is a reporting solution that lets you create application independent reports. You can connect to any database and use any table to get your data. Using built-in scripting, you can manage interaction between the form's controls and perform complex data handling. You can view reports, print them and export to many common formats. FastReport.Net is

a band-oriented report generator with 13 types of bands available. The wide range of band types allows you to create many kinds of report: list, master-detail, group, sub-reports, multi-column, and more. It contains a visual report designer which can be used at run-time, so you can give your users the ability to modify existing reports and create new ones.

DataMatrix Font Kit V4.50

Create DataMatrix barcodes from within your applications.

- Includes TrueType, OpenType and PostScript fonts
- Easily translate data into the text required to produce the barcode in the supplied font

DataMatrix Font Kit

DataMatrix Font Kit provides a versatile way to create DataMatrix barcodes from within any application written in a programming language that supports accessing a DLL, OCX, .NET Class, Java Class or UFL (User Function Library). DataMatrix Font Kit translates data into a form which may be displayed or printed in the barcode fonts, which are provided as TrueType, OpenType

and PostScript fonts in three different weights and five height/width ratios. The component can return the string, copy it to the clipboard, or write it to a named file. DataMatrix Font Kit includes samples for MS Office, VB, VB.NET, C#, Crystal Reports and Delphi. (Crystal Reports barcodes are limited to approximately 100 characters).

Global Majic Software

Strip Chart V3.5

Perform dynamic, two dimensional charting.

- Provides an interface for one or more streams of realtime data
- Can be used as a static two-dimensional charting tool
- Can be configured vertically or horizontally

Strip Chart

Strip Chart is an ActiveX component that provides an interface for one or more streams of realtime data or can be used as a static two-dimensional charting tool. Use it to replace or enhance the plotting utility that comes with Excel. Strip Chart can be configured vertically or horizontally and can automatically scale using time/date or numeric counts. Data

input is flexible and comprehensive with methods to add y-data, x/y data, y array data, or x/y array data.

Pen colors and symbols can easily be modified and variables can be analog, Boolean or discrete. Property pages are available at run-time and provide a tool for designing charts with full control of scales, captions, fonts, and tics.

Inabyte

InaCalc.Net V3.02

Enable advanced calculations in your accounting or spreadsheet application.

- Integrates expression parsing, evaluating, and dependent formula recalculation
- Includes custom function support and multiple formula recalculation

InaCalc.Net

InaCalc.Net supports conventional math operators and functions and is suitable for heavy-duty number crunching. It also supports other data types, such as string, date-time and logical and comes with operators and functions for these data types. It allows defining variables and sets of related formulas that implement spreadsheet-like recalculations. The InaCalc.Net

component integrates expression parsing, evaluating and dependent formula recalculation. It is useful in two general areas; when a formula has to be defined, and evaluated at runtime.

The product supports spreadsheet-like multiple formula recalculation, as well as custom function support and virtual variables.

O2 Solutions

PDF4NET V3.3.6

Add PDF capabilities to your .NET applications.

- Create and edit PDF files and perform automated PDF form filling
- Unlimited pages per document, each with its own size and orientation
- Supports PDF annotations, layers and alpha transparency

PDF4NET

PDF4NET is a .NET library for creating, editing and filling PDF files on the fly from any .NET application. PDF4NET provides a simple API that allows you to create complex PDF documents, or to edit existing PDF files with a few lines of code. Its core functionality can be divided into 3 main areas: PDF creation, PDF editing and PDF forms filling.

Other features include native support for most 1D and 2D barcodes and the ability to create headers, footers, page templates and layers. The library provides support for both standard .NET Framework and .NET Compact Framework. Project costs are reduced when developing with PDF4NET because it can be distributed royalty free.

plexityHide.com

GTP.NET V3.2

Add interactive Gantt charts and scheduling to your applications.

- Supports AJAX with client-movable and resizable time items
- Features asynchronous collision detection and handling of time items
- Security awareness enables deployment on XBAP or ClickOnce

GTP.NET

GTP.NET's overall goal and purpose is to let you visualize and manipulate time based information. GTP.NET includes a collection of user interface components which handle time blocks. The time blocks are displayed in a Gantt chart or a schema view. The times are connected to an owner, for example a person or an activity in a project. You can also use it to display dependencies and collisions between

times, which gives the end user a graphical way to view and modify the project.

GTP.NET includes the ability to select and re-assign links and also provides databinding for links between time items. The components can be delivered via WinForms, AJAX, ASP.NET, and even in reduced trust environments like ClickOnce and XBAP.

PDFlib

PDFlib Personalization Server (PPS) V7.0.4

Create PDF files from within server-side or client-side software.

- Includes functions for creating text, graphics, images and links
- Supports Tagged PDF to leverage accessibility and reflow features
- Includes functions for automatically filling PDFlib blocks

PDFlib Personalization Server (PPS)

PDFlib Personalization Server (PPS) is a development tool for PDF-enabling your software or generating PDFs on your server. PDFlib PPS offers a simple-to-use API for programmatically creating PDF files from within your own server-side or client-side software. PDFlib doesn't make use of third-party software for generating PDFs, nor does it require any other tools.

PDFlib Personalization Server (PPS) can import existing PDF files and includes additional functions for automatically filling PDFlib blocks. PDFlib PPS also includes the PDFlib Block Plugin for creating blocks interactively. PDFlib PSS is available for all major operating systems and development environments.

PureComponents

PureComponents Ultimate Suite

A suite of over 79 user interface components.

- Create application user interfaces with the MS Office 2007 style
- Includes components for navigation, data entry, treeview, listview & Ribbon user interface

PureComponents Ultimate Suite

PureComponents Ultimate Suite is a set of 79 .NET WinForms components including grids, Ribbon, navigation panels, buttons, textboxes, comboboxes, listboxes and much more.

PureComponents Ultimate Suite also includes a set of components designed to show and manipulate date based data and information. It features RichCalendar - displays dates in weeks, DatePicker - Combobox to choose the date, MonthSelector - to select a particular month, TimePicker -

Combobox for displaying and choosing the time of day, Roster - to display events, plus many more.

PureComponents Ultimate Suite is compatible with Visual Studio 2005/2008 and includes VB.NET and C# examples. It comes with a subscription which includes all versions and updates released within 12 months of your purchase, plus free product support. C# source code for all included components is available.

Raize Software

The Ultimate Collection

Build sophisticated user interfaces quickly and easily.

- User interface components for Delphi and C++Builder
- Includes more than 100 component designers focused on simplifying user interface development

The Ultimate Collection

The Ultimate Collection contains CodeSite, Raize Components, DropMaster and ScratchPad.

CodeSite is an add-in for Delphi and C++Builder that enables you to send detailed information (including string lists, objects, even bitmaps) from within your application code to a specialized receiver.

Raize Components includes more than 125 general-purpose native VCL controls for creating user interfaces. DropMaster is a set components that allow developers to add support for drag and drop between applications. ScratchPad is a programming text editor. It allows you to edit multiple files at the same time in a sleek tabbed interface.

Sax.net

Crescent QuickPak V4.5

Visual and performance enhancements for Windows applications.

- Custom calendar, combobox, data entry and presentation controls for ActiveX applications
- Easily access the power of the Windows API

Crescent QuickPak

Crescent QuickPak is a comprehensive collection of 32-bit ActiveX components that can be used to develop applications that will reduce development time and increase productivity. Crescent QuickPak includes the following custom controls; calendar display, caption, enhanced frame and checkbox, extended command button, enhanced combobox, form enhancement, hypertext, frame and option button, data-specific input edit controls, enhanced list

boxes and additional display controls. It also includes functions to open, read, and parse IIS log files, convert log files to HTML tables, and get and set IIS properties in either the local or remote system registry. It has low-level routines for fast performance. Crescent QuickPak also has high-level methods such as financial and statistical routines, file operations: searching and encryption, copying on wild card specifications, file access routines and error-handling.

Resco

Resco MobileForms Toolkit 2009 Volume 2

Suite of .NET CF controls for Pocket PC, Smartphone & Windows CE.NET.

- Includes grid, calendar, listview, input form, zip compression, navigation and touchscreen signature controls
- Features a chart control with five chart types

Resco MobileForms Toolkit

Resco MobileForms Toolkit is a suite of components designed specifically for mobile devices. It includes advanced designers, support of quick data loading, standardized mobile user interface, Enterprise samples and many other features.

Resco MobileForms Toolkit contains Resco AdvancedList .NET, Resco AdvancedTree.NET, Resco CompactChart .NET, Resco DetailView .NET, Resco SmartGrid .NET, Resco Zip .NET and Resco OutlookControls .NET.

All Resco MobileForms Toolkit components have been specifically designed so they fit the small displays of mobile devices perfectly. Special optimizations such as Resco DelayLoad technology ensures performance is optimized even on devices with limited memory and processor capabilities. Resco MobileForms Toolkit is fully integrated with Visual Studio .NET. All UI controls are available from the Visual Studio Toolbox and Help files are integrated into the Visual Studio Help system.

Seekford Solutions

SMTP Wizard SSL V3.0

Give your applications the ability to send emails with file attachments.

- Send HTML and regular plain-text messages
- Send the messages Asynchronously freeing your application to do other work

SMTP Wizard SSL

SMTP Wizard SSL is an ActiveX component that enables you to build a message, add files to it, and send it through a mail server. Your project can send out email notifications, error reports, customer responses, and much more. This control works with any ActiveX container and even works in ActiveX scriptable languages such as VBScript. SMTP Wizard SSL allows you

to access an SMTP server with minimal knowledge of how SMTP works and very little code. There are many features for simplifying the tasks of accessing and utilizing an SMTP server. The control talks directly with the SMTP servers and completely bypasses MAPI and any of the problems that MAPI has (i.e. Security dialogs and other nuisances).

SourceGear Corporation

SourceGear Vault V5

A compelling replacement for Visual SourceSafe.

- Offers full integration into the Visual Studio .NET environment
- Includes an Eclipse client
- Client/Server communication over HTTP or optionally with SSL

SourceGear Vault

SourceGear Vault is a version control system for Windows developers, with complete integration into the Visual Studio .NET environment. SourceGear Vault is implemented entirely in the .NET Framework and uses SQL Server for its repository storage. SourceGear Vault is designed specifically to offer a seamless transition from Visual SourceSafe and includes an import tool which can be used to migrate data from a SourceSafe database into a Vault repository; every version of every file

is imported, including all the history. SourceGear Vault's basic architecture is a centralized Vault server which manages one or more repositories. It includes several client applications and also provides a way to create custom clients using any .NET language.

SourceSafe users can begin using Vault with no learning curve. The terminology is the same, and all major VSS features are present.

VIBlend

VIBlend SuperControls for WinForms 3.3

Collection of high performance .NET WinForms User Interface components.

- 60+ rich functionality, royalty-free WinForms controls
- Includes grid, navigation bars, ribbon, calendar, treeview, combo box and much more

VIBlend SuperControls for WinForms

VIBlend SuperControls for WinForms is a comprehensive library of User Interface controls. Designed and fine-tuned to provide rich functionality, outstanding performance and increase the ROI when building professional Windows applications using the Microsoft .NET framework. VIBlend SuperControls includes grid, navigation bars, ribbon interface, calendar, treeview, combo box, list box, buttons and editors, scroll and progress bars and tab controls.

VIBlend SuperControls for WinForms includes an advanced hierarchical data grid component with powerful features and rich customization. It is easy to integrate and use regardless of whether you want to add functionality to an existing Windows Forms application or planning to start your next project. It is ideal for building data-driven applications and ships with a set of professionally designed themes that can be easily customized and distributed in XML format.

VSoft Technologies

FinalBuilder V6.0

Automated build and release management solution.

- Integrates with version control systems/Source code repositories
- Includes a broad range (600+) of action types that cover almost any task you might need to automate

FinalBuilder

FinalBuilder is an automated build and release management solution for Windows software developers and SCM (Software Change Management) professionals. Use FinalBuilder to define, debug, maintain, run and schedule reliable and repeatable build processes. FinalBuilder's user interface has been carefully crafted to make it as easy-to-use as possible. Anyone in your team can use FinalBuilder to automate tasks. You can compile applications from source code, compile setup

installer programs, work with version control systems, handle versioning with ease, create and edit INI files and Windows registry keys, burn CDs and DVDs, or create CD/DVD images (ISO images), zip and unzip files and other archive formats, run automated testing, FTP files to/from servers, send emails, post on news servers, handle errors, run multiple tasks in parallel and dynamically change the build flow, iterate over sets of files and other lists and more.
