# /n software

## /n software Red Carpet Subscription Q1 2011

### Write communications, security and e-business applications.

- Components for FTP, IMAP, SNMP, SSL, SSH, S/MIME, digital certificates, credit card processing and e-business (EDI) transactions
- Integrate SharePoint Site, List, and Document management functions

/n software Red Carpet Subscription

**IP\*Works!**  
A comprehensive framework for Internet development.

**Internet Communications**  
ATOM, REST, MX, DNS, RSS, NNTP, SMPP, POP, Rexec, Rshell, SMTP, SOAP, Telnet, Ping, TFTP, FileMailer, NetClock, FTP, HTTP and more.

**Secure Components**  
Subscription includes secure versions of many of the IP\*Works! components.

**SharePoint Integrator Products**  
Interface directly with SharePoint Server and provide access to a wide range of SharePoint data access and management capabilities.

**Windows Workflow Foundation Activities**  
Includes activities that make it easy to integrate Internet capabilities into your workflow packages.

**Everything in One Subscription**  
There are no technology restrictions, you get everything. .NET, COM, C++, Java, UNIX, Linux even Mac OS X and iPhone.

### One developer, multiple workstations, all /n software products.

/n software Red Carpet Subscription gives you components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, digital certificates, credit card processing, ZIP compression, shipping & tracking, e-business (EDI) transactions and robust Enterprise ready Internet connectivity, secure messaging and file transfer for Windows Workflow Foundation. There are no licensing restrictions, so you can code on your work machine, your notebook or even your home machine. Plus there are no technology restrictions, so you get everything: .NET, COM, C++, Java, Pocket PC, UNIX, Linux, Mac OS X and iPhone. You receive quarterly update

CDs with free updates, upgrades and new releases. It includes more than \$30,000 worth of software including: all /n software products - IP\*Works!, SSL, S/MIME, S/Shell, Zip, EDI, Amazon Integrators, Shipping Integrators, SharePoint Integrators, Integrators for QuickBooks, Enterprise Adapters, Paymentech, E-Payment, Vital/TSYS, USPS, PaytPal, Workflow Activities etc.

/n software Red Carpet Subscription includes IP\*Works! which is a comprehensive framework for Internet development and is the core building block for most /n software products. IP\*Works! eliminates the complexity of Internet development by

providing easy-to-use, programmable components that facilitate tasks such as sending email, transferring files, managing networks, browsing the Web, consuming Web services, etc.

It includes support for all major internet protocols: ATOM, DNS, FileMailer, FTP, HTMLMailer, HTTP, ICMPport, IMAP, IPDaemon, IPInfo, IPMonitor, IPPort, LDAP, MCast, MIME, MX, NetClock, NetCode, NetDial, NNTP, Ping, POP, RCP, REST, Rexec, Rshell, RSS, SMPP, SMTP, SNMP, SOAP, Syslog, Telnet, TFTP, TraceRoute, UDPPort, WebDav, WebForm, WebUpload, Whois, XMLP and XMPP.

Also included in the /n software Red Carpet Subscription is IP\*Works! SSL

which is a suite of secure, SSL-enabled drop-in replacements for the "classic" IP\*Works! components.

The components are fast, robust, and reliable and consume a minimum of resources. They are small and lightweight with no dependencies on external libraries. Included are native development components for all supported platforms. IP\*Works! includes a complete unified framework with a common, easy to learn object model and simplified interfaces allowing you to be more productive. The components are rigorously tested having undergone thousands of hours of testing, you also get reference documentation, hundreds of sample applications and fully indexed help files.

# Aspose

## Aspose.Total .NET Q1 2011

### Create, manage and convert many popular document formats.

- Supports Word, Excel, PowerPoint, Project, PDF and Flash file formats
- Demos written in C# and VB.NET highlight the best practices for implementing many common tasks

Aspose.Total

Aspose.Total .NET offers every .NET component that Aspose has available as well as all new components released during the annual subscription.

Aspose.Total for .NET offers every .NET component that Aspose has available. With it you will be able to programmatically manage some of the most popular file formats used in business: Word, Excel, PowerPoint, Project, PDF and Flash. Aspose Total .NET also supports mail merge, creating shapes on slides, extracting text from PDF files, creating adhoc reports with graphs and pivot tables and more. Your Aspose Total .NET purchase includes 1 year of maintenance and support so you will obtain all updates and new Aspose Total .NET components released during the year.

**Aspose.Words for .NET** is a class library that enables you to perform a wide range of document processing tasks directly within your .NET applications. Aspose.Words for .NET supports DOC, OOXML, RTF, HTML, OpenDocument, PDF, XPS, EPUB and many other formats. With Aspose.Words you can generate, modify, convert, render and print documents without using Microsoft Word.

**Aspose.Cells for .NET** provides a flexible group of components that enable .NET applications to create and manage Excel Spreadsheets without

**Aspose.Cells**  
Lets you create and manage Excel Spreadsheets without requiring Microsoft Excel.

**Aspose.Words**  
Lets you read, modify and write Word documents without utilizing Microsoft Word.

**Aspose.Pdf**  
Lets you create PDF documents without utilizing Adobe Acrobat.

**Aspose.Slides**  
Enables your application to read and write PowerPoint documents without utilizing Microsoft PowerPoint.

**Aspose.Pdf.Kit**  
Easily manipulation existing PDF documents.

**Aspose.BarCode**  
Barcode generation and recognition component, written in managed C# for your WinForms, ASP.NET and .NET CF applications.

requiring Microsoft Excel to be installed on the server.

**Aspose.Pdf for .NET** is a PDF document creation component that enables your .NET applications to read, write and manipulate PDF documents without using Adobe Acrobat.

**Aspose.Slides for .NET** is a PowerPoint management component that enables .NET applications to read, write and manipulate PowerPoint documents without using Microsoft PowerPoint. Aspose.Slides for .NET supports formats including PPT, PPS, POT and PresentationML (OOXML, PPTX).

**Aspose.BarCode for .NET** is a robust and reliable barcode generation and

recognition component.

**Aspose.Tasks for .NET** enables .NET applications read and write Microsoft Project documents without utilizing Microsoft Project.

**Aspose.Network for .NET** is a suite of components for professional network programming, which includes implementations of most of the major network protocols.

**Aspose.Report for .NET** can be used for a variety of tasks, ranging from creating adhoc reports to building quick and easy search screens and production of a variety of great looking charts.

 **Charting**  **Gauges**  **Maps**  **GridView**  **TimeNavigator**  **CalcEngine**

[www.componentsource.com](http://www.componentsource.com)

"How do I get my data presented like this?" That is typically the first question we get from business users who have seen the interactive power of our technology. Rest assured, ComponentArt dashboards work with any data source. Contact us today to learn how you can start presenting your data in a whole new light.

**ComponentArt**  
Build Something Amazing

# ComponentArt

## ComponentArt Data Visualization for .NET Ultimate 2011

### Controls for digital dashboards and data analysis applications in Silverlight and WPF.

- Enterprise-grade charting, gauges and maps along with state-of-the-art data display and processing components
- Brilliant rendering, interactive drill-downs, zooming & scrolling

ComponentArt Data Visualization for .NET Ultimate

A complete feature set for building next-generation digital dashboards and data analysis applications.

ComponentArt Data Visualization for .NET Ultimate is a suite of Silverlight and WPF controls for the development of digital dashboards and data analysis applications. It includes charting, gauges and maps along with data display and processing components.

**Charting:** A set of charting components (XY, pie, funnel, radar, tree map, legend, drill down manager, WCF data provider, etc) designed to deliver interactive visualization of business data. The components feature brilliant rendering, drill-downs, built-in zooming & scrolling and annotation objects. Enterprise charting features include the ability

to handle very large datasets and CalcEngine integration.

**Gauges:** A wide selection of digital gauge controls (radial linear, numeric, bullet graph, cylinder, half donut, thermometer, etc). The components feature easy KPI (key performance indicator) binding, customizable pointers, scales and ranges, flexible inner layout and smooth animation. All controls include professional skins and themes.

**Maps:** Dynamic, data-driven maps designed to provide visualization of geographic data. The components

**A Highly Interactive Control for Date Range Selections**  
TimeNavigator was designed to enable quick and intuitive date range selections.

**Gauges**  
A wide selection of digital gauge controls, featuring easy KPI binding, customizable pointers, scales & ranges and smooth animation.

**Bar & Column Charts**  
Includes a variety of attractive 2D and 3D bar and column chart shapes.

**Charts**  
Includes a variety of 2D and 3D shapes and the ability to customize data point annotations and popups.

**Effective Spreadsheet and Paged Display of Data**  
Choose between two interfaces for tabular data: a spreadsheet and a traditional paged data grid.

**Effective Visualization of Geographic Data**  
Included is a large collection of over 150 ready-to-use maps of continents, regions and countries.

feature drill-downs, multiple shape layers, tooltip & point templates and flexible projections. Includes over 100 maps covering all world continents & regions, major countries, all US states and custom maps.

**GridView:** A data grid control which delivers a visually rich display of tabular data. The components feature data grouping, sorting, filtering, and operating in "spreadsheet" or "paged grid" modes. Enterprise grid features include handling very large datasets, cell formulas, calculated styles and CalcEngine integration.

**TimeNavigator:** An innovative control that allows quick, interactive and intuitive date range selections. It features hierarchical date and time

drilldowns: decade, year, quarter, month, week, day, hour, minute, second. The component also includes customizable fiscal year offset, list of business days and/or holidays, international calendars and more.

**CalcEngine:** A general purpose data processing engine, used to perform complex operations on a given dataset. It features ComponentArt "Calc", an interpreted expression language for dynamic data transformations on the client. The CalcEngine is loaded with useful & functional libraries including: set operations, statistical & financial functions.

Subscription License includes all minor and major product updates for a period of one year.

# ComponentOne

## ComponentOne Studio Enterprise 2011 v1

### Components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices.

- Full suite of rich and flexible .NET Windows Forms components
- Rapid development of innovative & demanding Web applications
- Includes innovative Silverlight controls

ComponentOne Studio Enterprise

#### Create rich user interfaces for Silverlight, WPF, .NET, ASP.NET, ActiveX, Mobile and Windows Forms applications.

ComponentOne Studio Enterprise includes hundreds of components for Silverlight, WPF, .NET, ASP.NET, ActiveX, iPhone & mobile devices. It offers a complete solution that targets all runtime environments and all application layers (data, presentation, reporting and transformation).

**Silverlight toolset includes:** Feature packed Silverlight components (grid, chart, menu, treeview, uploader, layout, data input, gauges, maps, image rotator, navigation, etc.). You can use expression blend to fully style the Silverlight controls which allows developers to easily create rich graphical interfaces

for their Rich Internet Applications. Built with XAML, the Silverlight controls promote collaboration in your team and fit seamlessly into your developer & designer workflow. Furthermore, you can take XAML from Silverlight and use it in your WPF application. Also available from ComponentOne is the XAP Optimizer which helps you optimize the size of the XAP files within your Silverlight applications.

**WPF toolset includes:** Schedule for WPF - a suite of tools delivering scheduling, month calendar and multi-month calendar components for the WPF platform. Chart for

**Microsoft Outlook-style Scheduler**  
Schedule one-time, all day, or recurring appointments with reminders, labels, etc.

**Advanced Charting for your WPF Applications**  
Brings you powerful rendering, animations and data-binding capabilities.

**ComponentOne PDF for WinForms**  
Supports AcroForms and AcroFields.

**iPhone and iTouch**  
Includes ASP.NET components developed to mimic the look and feel of the native UI of the iPhone and iTouch.

**ComponentOne Book for Silverlight**  
Present UIElement objects as if they were pages in a regular paper book.

**Create Responsive Grid Applications with Built-in AJAX**  
Easily group, sort, filter, resize, and reorder columns at run time, all through simple drag-and-drop.

WPF - visually stunning 2D/3D bar, area, line, pie and column charts. Grid for WPF - a set of controls that allow you to integrate grids into your WPF applications. Reports for WPF - includes a set of WPF reporting tools: the C1Report, C1PrintDocument, and C1DocumentViewer components as well as the C1ReportDesigner stand-alone application.

**ASP.NET toolset includes:** Styled, easy-to-use controls built on Web standards including AJAX, CSS, and XHTML. Components include: eCommerce (PayPal), file format management (PDF, Flash, XLS, ZIP), calendars, charting (2D and 3D), rich text editing, grids, input and mask controls, menus and toolbars, reporting, scheduling and spelling

features. You can also recreate the look & feel of iPhone and iTouch user interfaces using Button, LaunchPad, Calendar, NavigationList & Slider components.

**WinForms toolset includes:** .NET controls featuring two award-winning grids: FlexGrid and True DBGrid. FlexGrid is designed for unbound applications. It is a flexible grid control for creating user-friendly interfaces that display, edit, format, organize, summarize, and print tabular data. The strength of True DBGrid is in its data binding; with an ADO.NET managed database interface, it offers features such as Excel-like split views and built-in hierarchical binding and grouping.

# DevExpress (Developer Express)

## DXperience v2010 vol 2

### All Developer Express ASP.NET, WinForms, WPF & Silverlight components & tools.

- User Interface functionality for WinForms, ASP.NET, WPF & Silverlight
- Display digital dashboards in your Web based applications
- Includes a scheduling/planning/calendar suite for ASP.NET

DXperience

All the .NET component suites, libraries and IDE tools produced by Developer Express in one package.

DXperience includes all Developer Express products engineered for Visual Studio and the .NET Framework. Priority technical support is also included with updates and upgrades for 1 year. With this subscription, you receive key technologies by Developer Express including IDE productivity tools, business application frameworks, and components for Windows Forms, ASP.NET, WPF and Silverlight. In addition to the individual tools, you receive complete source code for the Windows Forms & ASP.NET components. With the Universal subscription, you also receive eXpressApp Framework which is an instrument for creating business

applications quickly and easily.

**WPF products include: DXGrid for WPF** - fast server-side data processing and complete support for templates and styles, **DXCharts for WPF** - clear & compact XAML syntax and element customization via templates, **DXCarousel for WPF** - stunning navigation and data browsing, **DXNavBar for WPF** - easy and intuitive navigation.

**Silverlight products include: AgDataGrid** - fast data manipulations and rich end user experiences, **AgRichEdit** - Word like text editing

**XtraBars Suite Ribbon Control and Tabbed MDI interface**  
With the XtraBars Suite you can easily build Ribbons from scratch.

**XtraBars Suite**  
You can create application menus, galleries and contextual tabs in ribbons.

**DXGrid for WPF**  
Supports both tabular and card display formats and provides facilities for the end-user to sort and group data.

**AgRichEdit for Silverlight**  
Allows you to introduce Microsoft Word like text editing features into your next Silverlight application with ease.

**XtraReports End-User Designer**  
The XtraReports Suite features a fully functional End-User Designer.

**XtraReports Master-Detail Report**  
With the XtraReports Suite, you can easily build banded reports and even Master-Detail reports.

features, **AgMenu** - static menus, toolbars and context menus etc, **AgLayoutControl** - layout management for Silverlight.

**Windows Forms products include: XtraGrid Suite** - a grid control with four data layout options from a simple table to banded multi-line row layout and card views, **XtraScheduler Suite** - enables you to incorporate the UI found in Office Calendar within your applications, **XtraPivotGrid Suite** - a data analysis, mining and visual reporting solution, **XtraGauges** - linear, circular, digital and state indicator gauge types, **XtraEditors** a library of over 20 editors that can be used both standalone or embedded, **XtraWizard** - easily generate multi-step wizard

dialogs that fully conform to Wizard 97 or Aero standards.

**ASP.NET products include: ASPxGridView and Editors Library** - a robust grid and data editors library for ASP.NET, **ASPxPivotGrid Suite** - a multi-dimensional analysis component, **ASPxNavBar Suite** - Web navigation bar with full AJAX support, **ASPxMenu Suite** - an extremely lightweight, customizable main and context menu and more.

Also included in the Universal and Enterprise Editions are Visual Studio productivity add-ins: CodeRush, Refactor! Pro and eXpress Persistent Objects.

# Flexera Software

## AdminStudio Enterprise V9.5

### Prepare application packages for reliable enterprise deployment.

- Convert native Installshield setups into 100% pure MSI packages
- Includes tools to repackage software into Windows 7-ready MSIs
- PackageExpert tool facilitates automated QA testing

AdminStudio

### Quickly prepare reliable MSI and virtual packages for error-free software deployment to any Windows OS, including Windows 7.

AdminStudio lets you customize installations without having to edit Windows Installer database tables, or even write a single line of script. Developed specifically for System Administrators, Desktop Engineers and Corporate IT Project Teams, AdminStudio provides a wizard driven interface to navigate the repackaging process. Repackaging can be done with the standard default options or tailored to meet specific needs via detailed exclusion lists, the option to capture application or system-level changes, output preview, registry settings and more.

For Windows 7 projects AdminStudio's Repackager can convert older packages into MSIs that will run on Windows 7.

AdminStudio helps ensure Windows 7 application compatibility, repackages applications with the flexibility to support many deployment formats, hands off completed packages to popular deployment systems for distribution and manages a repeatable process. AdminStudio also incorporates MSI 5.0, which many organizations will use as a standard for Windows 7 migration.

AdminStudio can prepare applications for deployment on today's leading application virtualization systems: Microsoft App-V and VMware ThinApp. AdminStudio also includes easier packaging of traditionally challenging applications, such as Adobe Creative Suite 3 and 4. AdminStudio is able to

**Application Manager**  
Provides a single, user-friendly view into all the data in the Application Catalog.

**Capture Context Data During Repackaging**  
AdminStudio's Repackager captures context data during the MSI repackaging process.

**Job Manager**  
Schedule conflict testing tasks to run anytime without human intervention.

**Hand Off Packages to Any Deployment Solution**  
AdminStudio makes it easy for you to release software packages to any software deployment solution.

**Eliminate Software Conflicts**  
Automatically detect and eliminate conflicts between Windows Installer packages and installed apps before you deploy.

**Diagnose and Repair Installed Applications**  
Determine if an installed application needs repair, what repair is needed, and why.

create a standard process for creating virtual packages of applications that are challenging to prepare using the native Microsoft App-V Sequencer. Because AdminStudio automatically looks for all of the required information about an installation, there aren't any steps left out in preparing the application for virtual deployment.

The included Application Manager provides a single, user-friendly view into all the data and packages in the Application Catalog. It includes a summary dashboard showing high-level statistics, a list of recently modified packages and recent catalog management activity. You can also run searches on the Application Catalog from anywhere to quickly locate groups of packages, applications, merge modules, patches, and more. Packages in the catalog can be grouped using

the Web-based interface to mirror your baseline systems or any user group and business unit in your environment, making it easier to test new packages before deployment and manage installed applications. You can easily create corporate validation rules that run against every application to ensure your guidelines are always followed - and no programming is needed.

AdminStudio also includes a Process Assistant which takes all the complexity out of preparing applications for deployment. It decreases the time required for new AdminStudio users to prepare software packages for deployment, while also enabling veteran systems administrators to efficiently jumpstart a new packaging project.

# If Software Installations, Deployments, or Virtualization Is Your Job, Flexera Software Has Your Solution

## InstallShield® 2011 – How the World Installs Software on Microsoft® Windows™

Author reliable MSI and InstallScript installations and App-V™ virtual packages for Windows® platforms.

**Optimise Installations for Windows 7**  
Easily configure installations that run reliably on Windows 7 and leverage Windows Installer 5 functionality.

**Support the Latest Microsoft Technologies**  
Including Visual Studio 2010, .NET Framework 4.0, IIS 7.0, SQL Server 2008 SP1, and Windows Server 2008 R2, and App-V.

**Install Software on Any Device**  
Extend installations to configure database servers, Web services, mobile devices, and more.

**What's New in InstallShield**  
Includes over 400 new and enhanced features from customer requests, including a revamped IDE, superior IIS tools, virtual machine detection, Unicode support, and much more!

## InstallAnywhere™ 2010 – Multiplatform Installation Solution to Install Cross-Platform Applications

Deliver a professional and consistent installation experience for Windows, Linux, Mac OS X, Solaris, AIX, HP-UX, IBM iSeries, and more.

**Impress End Users with Reliable Installers**  
Cut your support costs and impress end users with a professional, branded installer that installs software correctly every time.

**One Installation for 31 Languages**  
Installers can be automatically translated into 31 languages to help your applications reach end users around the world.

**Perfect for Complex Desktop and Server Applications**  
Built-in customization tools make quick work of even your most complex installer requirements.

**What's New in InstallAnywhere 2010**  
Breakthrough functionality for managing all phases of the installation lifecycle, including installation, rollback, maintenance, repair, and uninstall. Also expanded platform support for new platforms like Windows 7, Windows Server 2008 R2, SUSE Linux 11.2, Ubuntu 9.10, and Mac OS X 10.6.

## AdminStudio® – How IT Prepares Reliable MSI and Virtual Packages for Error-Free Deployment

Prepare reliable MSI and virtual packages for deployment. It has automated tools that speed software through the packaging process.

**Cut Packaging Time by 70%**  
Automated tools help you get applications to end users up to 70% faster.

**Deploy Virtual Applications 9x Faster**  
AdminStudio automatically converts MSIs to Microsoft® App-V™, VMware® ThinApp™\* or Citrix® XenApp™ virtual packages—9x faster.

**Migrate MSIs to Windows™ 7 Automatically**  
AdminStudio can proactively determine which applications are good candidates for migrating to Windows 7 without a second round of repackaging.

**Works with Any Deployment Solution**  
AdminStudio supports leading deployment tools such as Microsoft® Configuration Manager, Novell® ZENworks®, LANDesk® Management Suite, and much more.

\* Requires separate purchase of VMware ThinApp

# GrapeCity

## ActiveReports 6

### The best selling report writer with no runtimes or royalties.

- Professional Edition features a royalty-free End-User Report Designer
- Includes filters for exporting to popular formats like PDF, Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications

ActiveReports

### Generate a wide variety of reports from your .NET applications.

ActiveReports 6 is a .NET reporting component for Windows and Web applications. Its key features include customization, fast performance and high quality. ActiveReports 6 features an easy-to-use Visual Studio .NET report designer and a powerful API. It includes multilanguage support that works right out of the box and also offers seamless run-time deployment, royalty free. It's easy to create reports in ActiveReports 6, the report designer integrates into Visual Studio .NET. Once the product has been installed on the developer's machine, adding a report to your project is as easy as adding a class or form.

ActiveReports 6 is easy to deploy - ActiveReports 6 reports are created within Visual Studio .NET and compiled directly into the executable. Therefore, assemblies can be distributed using XCopy deployment or they can be placed in the global assembly cache

(GAC). The object model provides the Reporting Engine as a single, managed, strong named assembly. There are no additional setups on the server or the client's machine. Since ActiveReports 6 is fully managed, there are no dependencies on 3rd party applications.

ActiveReports 6 can export to many formats - it includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications.

ActiveReports 6 contains a built-in charting control which supports common 2D and 3D chart types and provides advanced charting features as well as native exporting to various image formats. Chart types include: vertical and horizontal bar, line, scatter plot, pie, funnel and pyramid, Gantt, Kagi, point and figure, renko, and more.

**Viewer Annotations**  
Annotations can be placed on the report to pass notes and special instructions on to users and developers.

**End-User Report Designer Editing**  
Allow end users to edit their reports and save new reports or load old ones.

**Viewing Web Reports**  
The WebViewer control provided in the Professional Edition allows you to write less code and view reports more quickly.

**Built-In Charting Control**  
A chart control is included with ActiveReports that supports common 2D and 3D chart types.

**Export to Any Format**  
ActiveReports includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF.

**Hyperlinks and Drilldown**  
You can use hyperlinks and the viewer hyperlink event to simulate drill-down from one report to another.

ActiveReports 6 supports the use of Windows Forms-based 3rd party controls with the report designer. Essentially any control that is able to be rendered on a Windows Form is capable of being rendered on an ActiveReports 6 report.

ActiveReports 6 includes a report viewer control and an End-User Report Designer - The report viewer control supports report zooming and previewing, multiple tabs for viewing hyperlinks, split- and multi-page views, a table of contents pane, thumbnails, text searches, annotations, and toolbar customization. ActiveReports 6 also features a royalty-free End-User Report Designer control that allows you to host the report designer in your own applications to provide end users with the ability to create and modify reports. The Zoom toolbar item allows users to magnify the design surface of the report for more precise placement and viewing of report controls. The Professional Edition of ActiveReports 6 also includes

a Flash-based Report Viewer that you can use to provide a seamless, interactive report viewing experience and no-touch printing using the widely-adopted Adobe Flash Player. Choose from pre-defined themes (including Office, Windows XP, Vista and Windows Classic) and enhance the viewer experience by controlling the printing, paging, table of contents, thumbnail views and other options.

ActiveReports 6 comes with a Microsoft Access and Crystal report conversion wizard that makes importing Access or Crystal reports a breeze. This is a very handy utility for users who have invested a lot of time creating reports within Access or Crystal. Not only will the import help get you up and running with ActiveReports 6, but the banded report architecture is very familiar for developers that have used Microsoft Access' reports.

## Spread for ASP.NET V5.0

### High-performance, fully-customizable ASP.NET spreadsheet component.

- Outlook style grouping allows users to sort data as required
- Conditional formatting enables styling based on cell contents
- Supports "Load on Demand" paging (virtual mode)

Spread for ASP.NET

#### Easily present, edit and update your ASP.NET data.

FarPoint Spread for ASP.NET is a spreadsheet component that offers intuitive customer usability along with a wealth of grid functionality. With Spread for ASP.NET you have exceptional client-side validation to alert your user of invalid data immediately and simple client-side keyboard navigation. Written from the ground up in C#, Spread for ASP.NET will provide your user with an easy and reliable, feature-rich, user-friendly online experience.

FarPoint Spread for ASP.NET offers excellent design time support for rapid development using the innovative Spread Designer and supports in-cell editing and validation. It supports bound or unbound modes (no dataset needed), AJAX, native Microsoft Excel import/export, in-cell editing, multiple edits on multiple rows without server

round trips, client-side column/row resizing, multiple sheets, searching, filtering, multiple cell types, validations, cell spans, multiple headers, sorting, complete customization at the cell level, over 300 built-in calculation functions, hierarchical display and much more.

The main features of FarPoint Spread for ASP.NET include:

**AJAX Support** - AJAX allows the component to refresh without refreshing the entire page. This affects several features including expanding and collapsing child sheets in a hierarchical display, column sorting, inserting rows, searching, filtering, paging and formulas.

**Grouping** - You can set up the display to allow Outlook-style grouping of rows.

**Hierarchy**  
Easily display and edit your hierarchical data. You have full customization at the child level if you want to hide columns etc.

**Formulas**  
Add calculations quickly to your Web applications by using any of over 200 predefined algorithms or add your own custom functions.

**Import/Export**  
Import/export Microsoft Excel 97 and higher files and text files. You can also export to Spread XML.

**Retrieving data**  
Retrieve data from bound and unbound sources easily.

**Skins**  
Use any of the 13 predefined skins or save and load your own design. Customized skins can easily be shared within your dev team.

**Sorting**  
Automatically sort any column in ascending or descending order by double clicking on the header.

For large amounts of data, this is helpful to display the data in the order the user needs. The user selects columns by which to sort and the component then organizes and displays the data in a hierarchy with rows organized accordingly.

**Searching** - You can search for data in any of the cells in the workbook by specifying the sheet and the string of data for which to search. You also have several searching options you can choose from.

**Row Filtering** - With row filtering, you can allow the user to filter the data in columns on a sheet and display only the rows of data which meet criteria from a drop-down list or change the appearance of rows based on that filtering.

**Frozen Rows and Columns** - You can freeze columns and rows and keep them displayed regardless of where the user navigates in the sheet. Frozen rows and frozen columns do not scroll when the user uses the scroll bar or navigation keys in the component.

**Load on Demand** - You can allow the Web page to load on demand - as the user scrolls further down the spreadsheet, the FarPoint Spread component on the client loads another page of rows from the server as needed. This is similar to what was called "virtual mode" in the COM version of the product.

**Publish Excel Workbooks Online** - You can easily publish your existing or new Excel workbooks online by using Spread's Excel import and export feature.

# IBM ILOG

## IBM ILOG Elixir Standard V3.0

### A collection of innovative display components for Flex user interface developers.

- Market leading data visualization component set for Adobe Flex 4 and Adobe AIR rich Internet application (RIA) developers
- Provides: 3D charts, gauges, maps, calendars, OLAP & pivot charts and more

IBM ILOG Elixir Standard

Data-display components that help turn raw data into clear, actionable information through a highly graphical and interactive user experience.

IBM® ILOG Elixir® Standard provides Flex user interface developers with a collection of innovative display components. It consists of 10 graphical components that present data to users so that they can understand the information more clearly, react faster and make better decisions.

IBM® ILOG Elixir® Standard provides 10 ready-to-use user interface controls: 3D charts, gauges, maps, heat maps, calendars, OLAP and pivot charts, organization charts, treemaps, radar charts, and timelines. IBM® ILOG Elixir® Standard's controls can be used individually or in combination, alongside other Flex components and they integrate with the Adobe Flash Builder 4 IDE.

The professionally documented software development kit (SDK) enables developers to fine tune the look or behaviors of the controls.

Adobe Flex and Adobe AIR form a powerful platform for creating graphically rich and highly interactive applications for the Internet (and desktop). It provides a wide variety of basic user interface components such as buttons, menus and charts. Many applications require user interfaces that are highly graphical, going beyond what is offered natively in the Adobe platform. IBM® ILOG Elixir® Standard enhances the Flex and AIR platforms by adding a set of advanced user interface controls for more intuitive, interactive displays.

Included controls:

**3D Charts** - IBM® ILOG Elixir® Standard comes with a full range of 3D charts that mirror the Adobe 2D charts. Upgrading to the third dimension and creating more appealing dashboards and custom applications has never been so easy.

**Calendar**  
Easily display multiple planning at once together with advance recurrence management.

**Vector Maps**  
Map areas are colored to represent specific data and overlaid with any Flex object, such as charts and labels.

**Charts**  
IBM ILOG Elixir comes with a full range of charts.

**Gauges and Dials**  
Gauges and dials are fully interactive and designed to be connected to real-time data sources.

**Treemaps**  
Visually detect trends and outliers in large data sets.

**OLAP and Pivot Charts**  
Replace OLAP grids with highly dynamic charts for improved insight and analysis in your custom data.

**Gauges and Dials** - Gauges and dials are fully interactive and designed to be connected to real-time data sources. Developers can use them "as is", customize them or easily create new ones with the powerful and open APIs.

**Vector Maps** - Easily add intuitive map displays to your developments. Reuse one of the provided maps or create custom ones from standard maps you already have. You can easily color map areas to represent your data and overlay these areas with any Flex object, such as charts and labels.

**Heatmaps** - Heatmaps help you display how your data is spread over geographies or a Web page for instance. Manipulate either x/y or lat/lon and see your data by density or by value.

**Calendar** - Easily create custom and shared planning applications with the IBM® ILOG Elixir® Standard calendar. Display multiple planning with advanced recurrence management.

**Timeline** - Create easy to read charts displaying a sequence of events

over a span of time. leverage the built-in overview that allows intuitive navigation.

**Organization Charts** - Advanced employee organization charts are easy to create with IBM® ILOG Elixir® Standard. Quickly navigate through peers and management relationships with stunning animations.

**OLAP and Pivot Charts** - Replace OLAP grids with highly dynamic charts for improved insight and analysis in your custom data.

**Radar Charts** - IBM® ILOG Elixir® Standard radar charts are compact dashboard displays that are used to compare different key performance indicators (KPIs) between two or more entities.

**Treemaps** - Treemaps provide an interactive experience that includes dynamic drill down, user-defined clustering and segment coloring and sizing.

# Infragistics

## Infragistics NetAdvantage for .NET 2011 Volume 1

### Create commercial class UIs for Winforms, ASP.NET, WPF & Silverlight applications.

- Comprehensive User Interface control and component toolset for .NET
- Office 2010 File Support for ExcelML files allows you to export the contents of WebDataGrid and WebHierarchicalDataGrid.

Infragistics NetAdvantage for .NET

#### Includes essential User Interface controls for Windows Forms, WPF, Silverlight and ASP.NET, plus application styling.

Infragistics NetAdvantage for .NET is a presentation layer toolset for quickly and easily building and styling polished application UIs and delivering a great user experience, for WPF, Silverlight, Windows Forms, ASP.NET and Tablet PC. You can deliver user experiences consistent with Microsoft Office and Windows, produce high performance Web applications and create hi-fidelity, cross-platform charts and gauges that instantly provide your audience with a clear understanding of key performance indicators. Designed with the user experience in mind, NetAdvantage for .NET user interface controls give you the ability to focus on business logic while

it takes care of the presentation. Use the modern look & feel of Windows 7 styles and navigation or emulate the Office 2003, 2007 and 2010 user experiences with predefined color tables and ribbon controls.

Infragistics NetAdvantage for .NET has what you need to add no-touch AJAX to your Web site with a professionally polished UI. It includes many Windows Forms and ASP.NET components: grids, charts, combos, desktop alerts, buttons, calculator, dropdown, progress bar, scroll bar, tooltips, editors, gauge, listbar, listview, printing, scheduling, spell checker, tabs, toolbars and trees.

**NetAdvantage for ASP.NET**  
Gauges and Chart controls let you create an executive dashboard.

**NetAdvantage for Windows Forms**  
Create Outlook style applications with integrated NetAdvantage for Windows Forms controls.

**Create Applications with Office 2010 Styling**  
Also includes grids with conditional formatting, trees, 3D charts, menus, etc.

**PDF Export**  
You can export reports to PDF documents displaying gauges to visually summarize data.

**DataGrid**  
Create a WPF grid using xamDataGrid, xamCarouselListBox and xamCarouselPanel.

**WPF Charts**  
Display values using columns, pie wedges, cylinders and more using the advanced graphics rendering capabilities in the WPF platform.

Infragistics NetAdvantage for .NET also includes a Document Export Engine for PDF and XPS formats and provides Web crawler optimization, AJAX support and SharePoint integration.

Infragistics NetAdvantage for .NET includes Silverlight Controls for Line of Business (LOB) Applications which enable you to include islands of richness into your existing Web-based applications, giving end-users an experience that goes beyond what can be accomplished with mere HTML. These controls have been built from the ground-up using the Silverlight platform and take full advantage of its capabilities to help you produce compelling Web applications. NetAdvantage for .NET includes

next generation WPF controls which were designed from the start with an uncompromising attitude toward leveraging its cinematic graphics, rich styling, animation capabilities, and integrated UI virtualization. Embracing templates and exposing numerous styling points gives you complete command over the controls' appearance. A logical, friendly object model makes it easy to take advantage of the WPF platform's potential, whether you choose to do so through declarative UI (XAML) or code.

Multiple volume releases throughout the year continuously add valuable new features ensuring the tools available to you remain leading edge.

# Syncfusion

## Syncfusion Essential Studio Enterprise Edition 2011

### Accelerate Silverlight, WinForms, WPF, ASP.NET and ASP.NET MVC development.

- Includes components for grids, docking, charting, diagramming, PDF & Office reporting and scheduling
- Easily build WPF and ASP.NET Business Intelligence applications

Syncfusion Essential Studio Enterprise Edition

Syncfusion Essential Studio Enterprise is a dynamic and feature rich suite that has everything developers need to create Enterprise-class applications.

Syncfusion Essential Studio Enterprise includes all Syncfusion products on all technologies (WPF, Windows Forms, ASP.NET, ASP.NET MVC and Silverlight) Syncfusion Essential Studio Enterprise incorporates a unique debugging support system that allows switching between Debug and Release versions of the library with a single click from inside the Visual Studio.NET IDE. Dynamic and feature-rich, Syncfusion Essential Studio has everything developers need to create enterprise-class applications.

**Essential Grid (ASP.NET, ASP.NET MVC, Silverlight, Windows Forms, WPF)** - Excel-like, cell-oriented,

light-weight, virtual, data-bound grid. Includes extremely detailed customization down to cell level. Multilevel undo/redo, shared scrollbar support, data/view separation, floating cells, multiple cell and more.

**Essential Tools (ASP.NET, ASP.NET MVC, Silverlight, Windows Forms, WPF)** - A rich set of UI controls to let you create rich interactive applications with the latest look and feel.

**Essential Chart (ASP.NET, ASP.NET MVC, Silverlight, Windows Forms, WPF)** - A business-oriented charting component which offers an innovative

**Outlook UI**  
Create ASP.NET and Windows Forms applications that mimic the Outlook user interface.

**Ribbon**  
Silverlight Ribbon is a user interface library that allows users to create UIs similar to Office 2007.

**Numerous Chart Types**  
Includes support for Enterprise quality chart creation capabilities with all the chart types you can think of.

**Support for Financial Charts**  
Create advanced financial charts like the stock-volume chart you see above.

**Static Diagrams**  
Use the Diagramming package to create Visio like diagrams and render them in your applications.

**Dynamic Diagrams**  
You can also create diagrams dynamically based on relationships in the database.

data object model that makes it easy to populate a chart with any kind of data source.

**Essential Diagram (ASP.NET, Silverlight, Windows Forms, WPF)** - An extensible, high-performance .NET diagramming component that can be used for developing Microsoft Visio-like interactive graphics and diagramming applications.

**Essential BI Grid (ASP.NET, Silverlight, WPF)** - Use BI Grid to summarize, analyze, explore, and present summaries of critical data in your enterprise and make informed decisions. Users can easily drill down into all available levels of data and it can even be configured to drill down into relational data.

**Essential BI Gauge (Silverlight, WPF)** - provides users with the ability to display Key Performance Indicators (KPI) from an OLAP cube. KPIs can be displayed with goals and status visualizations to help create executive dashboards.

**Essential BI PivotGrid (WPF)** - A cell-oriented, extensible grid control that simulates the pivot table feature of Excel. It pivots data to organize it in a cross-tabulated form. The major advantage with the pivot grid is that you can extract the desired information from a large list within seconds. Along with presenting the data, the pivot grid also enables you to summarize and group data. It finds its main application in the financial domain, where it is used to organize and analyze business data.

# Actipro SyntaxEditor for WPF, Silverlight & WinForms

The ultimate syntax-highlighting code editor control

- ◆ Mimics the Visual Studio code editor
- ◆ Create custom syntax language definitions
- ◆ Lexing, parsing, AST generation, squiggle lines
- ◆ Code outlining and custom margins
- ◆ IntelliPrompt completion lists, quick info & more
- ◆ Over 100 stock editing commands

## Optional Language Add-ons

- ◆ Advanced C#, VB and XML languages
- ◆ Automated IntelliPrompt & validation
- ◆ Document outlining & auto-complete

## Other Free Add-ons

- ◆ Innovative grammar-based parser framework
- ◆ Easy integration with ANTLR, Irony (WPF only)

# Actipro WPF Studio

Jumpstart your WPF application's UI with over 55 controls

Bundled suite includes all Actipro WPF controls at one low price:

- ◆ **SyntaxEditor** - Syntax-highlighting code editor control like in VS 2010
- ◆ **Ribbon** - Office 2010 ribbon UI with Backstage application menu
- ◆ **Docking & MDI** - Docking windows, multiple document interface
- ◆ **Navigation** - Navigation/explorer bars, breadcrumbs, zoom UI
- ◆ **PropertyGrid** - Blend and VS-like property grid
- ◆ **DataGrid** - Themes, behaviors, editors integration w/MS DataGrid
- ◆ **Editors** - Part-based & masked editors w/advanced date/time picker
- ◆ **Wizard** - Aero wizard and wizard 97 dialogs
- ◆ **Gauge** - Circular, linear, and digital gauges
- ◆ **Bar Code** - Vector bar codes with many symbologies
- ◆ **Views** - Book control and animated panels with fluid transitions
- ◆ 1 year of support & free upgrades

# Actipro Software

## Actipro SyntaxEditor V4.0

Powerful code editing control with VS.NET style productivity enhancements.

Actipro SyntaxEditor

**Editing C# code**  
Edit C# code using automated IntelliPrompt for parameter information.

**Editing VB code**  
Edit VB code using automated IntelliPrompt for member lists.

**Editing an XML language definition file**  
SyntaxEditor can edit an XML language definition file based on an XSD.

- Develop and distribute custom language definitions with your applications
- Supports language merging e.g. HTML calling CSS, VBScript, etc.
- Perform semantic parsing operations in a separate worker thread

Actipro SyntaxEditor was designed to handle advanced language parsing and processing, with phases for performing lexical parsing, semantic parsing (in a worker thread), and automatic outlining. Custom language definitions can be developed and distributed with your applications. SyntaxEditor includes a complete parser generator that helps build

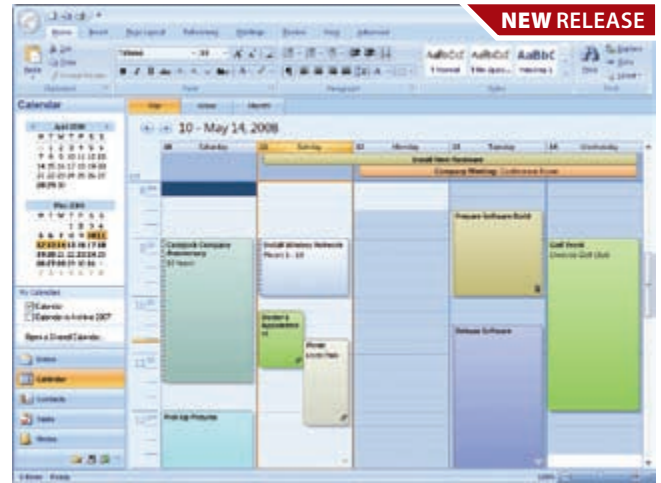

semantic parsers and construct ASTs (abstract syntax trees). Major code editing features of the control include: code outlining, undo redo, word wrap, split views, current line and bracket highlights, virtual space, block selection, macro recording/playback, indicators, extensible rendering, IntelliPrompt code snippets, member lists, smart tags and more.

# Codejock Software

## Codejock Xtreme Toolkit Pro

Create Office and Visual Studio .NET style GUI elements.

Codejock Xtreme Toolkit Pro

**Ribbon**  
Create applications with the Microsoft Office 2007 style Ribbon Bar.

**Calendar**  
Provides Windows developers with a sophisticated Outlook style calendar.

**Grid Sorting**  
Easily create, group and sort data in a flat or hierarchical format.

- Produce Microsoft style ribbon, toolbars, menus and MDI tabs
- Easily theme your application with SkinFramework for .NET
- Includes an Enterprise class grid component with built in toolbar

Codejock Xtreme Toolkit Pro provides Windows developers with a sophisticated set of components to give applications a professional, modern appearance. Included are nine components: Xtreme Command Bars, Xtreme Docking Pane, Xtreme Property Grid, Xtreme Report Control, Xtreme Calendar, Xtreme Task Panel, Xtreme ShortcutBar, Xtreme SkinFramework

and Xtreme Controls. With Codejock Xtreme Toolkit Pro you can create enterprise class applications that incorporate a full set of customizable user interface components that include Office style toolbars and menus. Several popular visual styles are included such as Office XP, 2003, 2007, 2010 and Visual Studio .NET.

# Dart Communications

## PowerSNMP for .NET V4.2

Manage, monitor and control network devices from your .NET applications.

PowerSNMP for .NET

- Agent**  
You can create an application with common SNMP agent functions such as responding to SNMP queries.
- Generate MIB Classes**  
Generate class code for MIBs. This functionality is also built into the Manager and Agent components.
- Trap Catching**  
Create NT services and control them via the Windows services control panel.

- Messages can be constructed using no security, authentication only, or authentication and privacy with SNMPv3
- A Management Information Base compiler dynamically loads MIB files at runtime

PowerSNMP for .NET is a family of .NET classes and components used to manage network devices and remote management information. Full support for SNMPv1, SNMPv2, SNMPv3 and ASN.1 standards provide interoperability with Enterprise devices. The Manager and Agent components provide for message transport and a suite of supporting

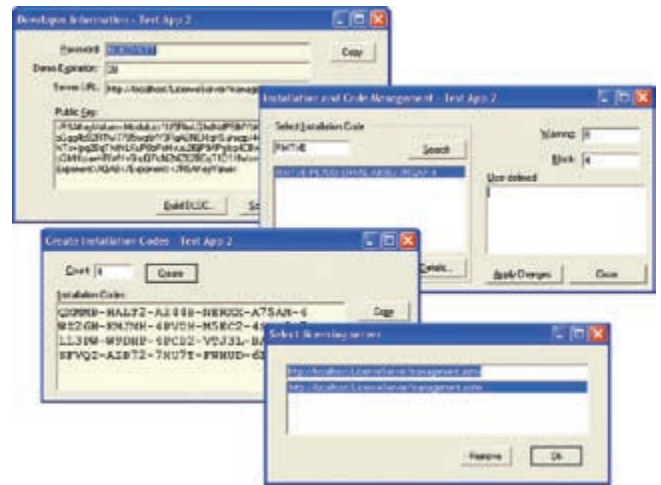

classes provide MIB (Management Information Base) information, encoding & decoding and encryption & decryption. MIB files can be parsed and imported into C# and Visual Basic projects to provide full intellisense support. A MIB compiler dynamically loads MIB files at runtime to generate new classes and objects on demand.

# Desaware

## Desaware Licensing System V2.0

Add a cryptographic licensing system to your .NET applications.

Desaware Licensing System

- Create Installation Codes**  
You can create one or more installation codes. You can copy the codes to the clipboard or save them to disk.
- Assemblies**  
Different types of assemblies across different products, can all be licensed with a single licensing certificate.
- Application select**  
You can select and work on any application from a list of applications defined on the current server.

- Supports timed demo installations and server activation
- No hidden files, registry entries or background services needed
- License an unlimited number of applications at no extra cost

Desaware Licensing System is a cryptographic based licensing system for .NET. It is designed for component licensing per server/machine and is extremely easy to use. It can be configured for both moderate and high security scenarios. Using unique security features in the .NET Framework such as strong named assemblies and XML signatures, the

Desaware Licensing System relies on end to end 128 bit cryptographic techniques, avoiding the use of hidden files, registry entries and other traditional licensing schemes.

Desaware Licensing System also includes an activation Web service, with a management application (with source).

# Sell Your Product the Way You Want

## Maximize Your Revenues By Maximizing Your Licensing Options

### Your Product Your Choice

- ☞ Sell your software on your terms: single purchase or subscription.
- ☞ Fully customize how your software 'recognizes' an install, i.e. network IP address, MAC address, machine name.
- ☞ Use the standard .NET component licensing framework or bypass it completely.
- ☞ Tie into the database of your choice, or use the automatic defaults.
- ☞ Offer FIPS compliancy for government applications.

### Customize Your Demos & Licensing Scenarios

- ☞ Create demos and time trials that expire according to your specifications.
- ☞ The Desaware Licensing System uses no secret or hidden files or dongles.
- ☞ Verify licensing via the internet or email. Implement tight activation based security or less stringent security scenarios.
- ☞ Easily create concurrent licensing scenarios.

## The Desaware Licensing System

The licensing solution you choose should adapt to your licensing needs - you should not have to adapt your needs to the licensing solution.

It should integrate easily into your backend systems and infrastructure, and be flexible enough to allow for changes to the licensing model as your market grows.

Native **WPF** Code Entry Control functionally compatible with the current Windows forms code entry control (.NET 3.5 framework required)

More Flexible Server Licensing  
Use the Desaware Licensing System for **Cloud**/fallback scenarios.

# DEVPIA

## DEXtUpload .NET Pro V4.0

Add the ability to upload files to your Web applications.

DEXtUpload .NET Pro

**Single and Multiple Uploads**  
DEXtUpload .NET Pro allows you to upload single and multiple files.

**Upload Progress**  
You can display a custom progress bar during the upload process.

**Watermarking and Image Format**  
You can upload and watermark images and change image formats on the fly.

- Allows uploads of upto 2GB files
- Use of optimized parsing algorithm makes uploading speed even faster
- Able to upload files to a database via a BLOB (Binary Large Object)

DEXtUpload .NET Pro is a component that supports file uploads and downloads between a Web browser and an IIS Web server. It observes Internet standards (RFC 1867) and can be used in Microsoft ASP.NET.

DEXtUpload .NET Pro is HTTP-based and uploads files from a Web browser to a Web server quickly and efficiently. It overcomes the limitations of ASP.NET uploading (inconsistency for high capacity file uploads, server overloads and safety, etc.), is written in C# and provides you with improved

upload speeds and stability. During upload and download you can invoke a progress window automatically without installing any other software. The pop-up progress window shows you uploading speed, file size, uploaded file size and time remaining. It can also be customized by using progress objects. DEXtUpload .NET Pro allows you to watermark uploaded images and convert uploaded images to thumbnails. It supports various file conversion formats (BMP, JPG, GIF etc.) and provides detailed information about image files.

## FusionCharts Bundle

Cross platform charting solution for ASP, ASP.NET, PHP, JSP & AJAX applications.

FusionCharts Bundle

**FusionMaps**  
Create animated, interactive and data-driven Flash Maps for your dynamic Web applications.

**FusionCharts**  
Interactive and animated charts for ASP and ASP.NET applications.

**FusionWidgets**  
Real-time Financial and Dashboard Charts for the Web.

- Generate interactive and animated flash charts & maps in minutes
- Supports over 75 chart types and 450 maps
- Build cross-browser and cross-platform solutions

FusionCharts Bundled Pack includes: FusionCharts, PowerCharts, PowerMaps and FusionGadgets. The Pack provides developers with a collection of Flash components for creating highly visual Web applications based on the Adobe Flash Platform. Developers can build cross-browser and cross-platform solutions which blend content, application logic and communications delivering an effective end user experience. FusionCharts delivers interactive and

eye catching Flash charts. FusionMaps can plot over 450 maps, including all continents, major countries and all US states. FusionWidgets is a collection of real-time gauges, self-updating charts and financial charts like Gantt charts, funnel/pyramid charts, bullet graphs, sparklines etc.

FusionCharts Bundled Pack can be used with any Web scripting language like .NET, ASP, JSP, PHP, ColdFusion, Ruby on Rails etc.

# Hybrid Installers *without* Rocket Science

 InstallAware

**NEW  
VERSION  
10**

*We still make other tools look like rocket science, and now our Hybrid Installation Technology delivers breakneck speed with unsurpassed flexibility.*

- Easily author smart setups using the visual, human readable MSIcode script
- At compile time, InstallAware automatically converts MSIcode to a Windows 7 Certified MSI database
- At runtime, switch freely between Windows Installer and Native Code setup engines as often as you need
- Save time with the multi-core build engine, save space with the LZMA/BCJ2 compression engine
- HTML/Flash interactive billboards, Partial Web Deployment, One-Click patching and more...

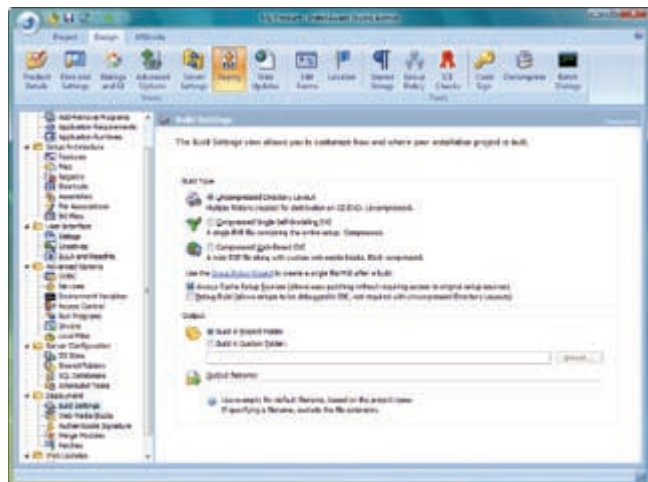

Go to [www.componentsource.com/installaware](http://www.componentsource.com/installaware)

# InstallAware

## InstallAware Studio 10

A setup authoring tool for ISVs and enterprises deploying products, patches and Web updates.

InstallAware Studio

**One-Click Technology**  
Deploy technology modules and runtimes, such as Microsoft SQL Express and Crystal Reports.

**Dialog Designer**  
InstallAware's dialog editor lets you customize the 15 pre-built setup themes, or design your own themes.

**Import .MSI and .MSM Files**  
Directly import MSI and Merge Modules created by other packaging applications, and edit them within InstallAware.

- InstallAware setups are easily distributed through Group Policy Objects, and other software distribution systems
- Deliver setups that display the latest visual themes

InstallAware is a software installation solution for Windows Installer that enables MSIcode scripting for rapid setup development without the high cost and steep learning curve of other setup solutions. With InstallAware you can build sophisticated installations in record time without any programming or scripting skills. InstallAware provides you with the latest features and technology support, with the advantages of true rapid-Windows Installer development productivity.

InstallAware lets you set up 64 Bit and 32 Bit Systems with the Same Installer

by detecting and supporting ia64 and x64 systems including Itanium, AMD64, and EM64T. InstallAware allows you to ship a single hybrid MSI for both your 32 bit and 64 bit customers.

InstallAware can check your target system and detect whether the operating system is running on a virtual machine. A simple checkbox lets you limit distributions to physical machines. It also makes it easy for your users to update their software via the Web, by automating the notification, download, and setup process.

# Janus Systems

## Janus WinForms Controls Suite V3.5

Add Outlook style interfaces to your .NET applications.

Janus WinForms Controls Suite

**Office 2007**  
Janus WinForms Controls Suite offers an Office 2007 visual style for all controls included in the suite.

**Janus Schedule Control for .NET**  
Present appointments and related owners in different views, representing Days, WorkWeeks, Weeks and Months.

**Ribbon Component**  
Janus WinForms Controls Suite includes a Ribbon control.

- Includes an Outlook style grid, calendar view, journal, Ribbon and shortcut bar
- Supports snap lines, base lines, ImageList keys and more
- Unbound mode in GridEX allows you to populate rows using AddItem method

Janus WinForms Controls Suite consists of 100% .NET managed code components that are designed to provide user interfaces for Microsoft .NET applications patterned after Microsoft Outlook. Janus WinForms Controls Suite contains Janus GridEX for .NET (Outlook Grid), Janus Schedule for .NET (Outlook Calendar View), Janus Timeline Control for .NET (Outlook Journal), Janus ButtonBar Control for .NET and ExplorerBar Controls for .NET (Outlook Shortcut

Bar), Janus CommandManager (Menus and Toolbars), Janus PanelManager (Outlook / VS.NET panes), Janus TabControl (tab control) and Janus Ribbon for .NET (Office 2007 style Ribbon bar). Janus GridEX for .NET is a data-aware, fully editable grid component that can be bound to any table in a dataset or to any other data source that supports IList, ITypedList or IBindingList interfaces. Janus GridEX for .NET does not sacrifice any group, sort or filter capabilities, when it is bound.

## Janus WinForms Controls Suite

Add powerful Outlook style interfaces to your applications

### Janus GridEX for .NET

Janus GridEX is a control capable of working in bound fashion with ADO.NET or IList data sources. The control supports hierarchical display of data and permits you to create effective user interfaces similar to Microsoft Outlook®, while easing development and maintenance time. The functionality provided by the control allows you to display, format, edit, sort, group, filter, manipulate, summarize, preview and print your data. Standalone MaskEdit, MultiColumn Combo, and UpDown controls are also included.

### Janus Ribbon & Command Manager Controls

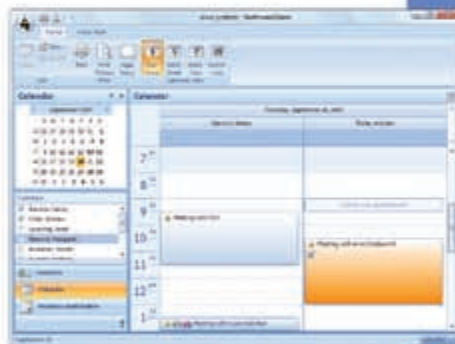

Janus Command Manager and new Ribbon controls are also included in the suite. These controls provide Windows developers with stylish menus and toolbars. The components permit advanced customization of the menus and toolbars of your applications. Use the built in VisualStyles in the controls to easily provide your applications with a look similar to Windows XP, Office 2000, Office XP, Office 2003 or 2007.

### Janus Timeline Control for .NET

The Janus Timeline Control is ideal for displaying items in relation to time. Items in the control are arranged in chronological order from left to right on a time scale that can be divided from seconds to years. You can easily load, display, format, group, filter, edit and manipulate items with the functionality available in the control in both bound and unbound modes.

### Janus Schedule for .NET

The Janus Schedule control can present appointments and related owners in different Views, representing Days, WorkWeeks, Weeks, and Months. The control also supports working with recurrent appointments. You can easily load, display, format, filter, edit, manipulate, preview, and print appointments with the functionality available in the control in both bound and unbound modes. A stand-alone Janus Calendar Combo Control, used to edit date and time values, is also included.

### Windows Forms Controls

A suite of controls designed to provide powerful user interfaces for Microsoft .NET Smart Client applications patterned after Microsoft Outlook®. All of the controls in the suite are 100% C# managed controls designed to be used with Visual Studio® 2005.

Janus WinForms Controls Suite includes the following controls:

**Janus GridEx for .NET**  
(Outlook Grid)

**Janus Schedule for .NET**  
(Outlook Calendar View)

**Janus Timeline for .NET**  
(Outlook Journal)

**Janus ButtonBar for .NET**  
(Outlook Shortcut Bar)

**Janus ExplorerBar for .NET**  
(Outlook Shortcut Bar)

**Janus UI CommandManager**  
(Menus and Toolbars)

**Janus PanelManager**  
(Outlook / Visual Studio .NET panes)

**Janus TabControl**  
(Tab Control)

### NEW!

All controls now feature Office 2007 look & feel plus Ribbon Bar

# LEAD Technologies

## LEADTOOLS Medical Imaging Suite SDK V17.0

Medical imaging libraries for developers.

LEADTOOLS Document Medical Suite SDK

**Image handling**  
Optimized internal core functions to dramatically increase the speed of image handling and processing.

**3D Rendering**  
Construct and view a 3D volume from a set of homogenous 2D medical images.

**Windows and Web development**  
Includes native 32 and 64 bit PACS and medical imaging binaries.

- Develop powerful PACS and Medical imaging applications
- Development tools and components for Silverlight, Win Forms, Web Forms, WPF, C and C++ development

Optimized features to meet the specific needs of medical imaging application development. LEADTOOLS Medical Imaging Suite SDK features Medical Web Viewer Framework, Medical 3D, Medical Multimedia, high and low level PACS SCP and SCU functions and controls, DICOM PACS communication security, comprehensive full DICOM dataset support, 8-16 bit extended

grayscale image support, image annotation, specialized extended grayscale image display such as window level and LUT processing, and specialized medical image processing.

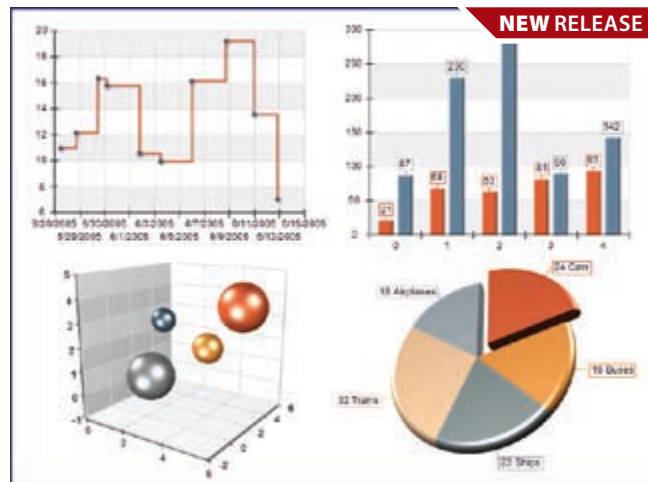

Other features include lossless JPEG compression, JPIP, and signed and unsigned image data processing.

# Neuron

## Neuron Chart for .NET Enterprise 2011

A powerful, flexible and extensible charting component for Windows Forms and ASP.NET.

Neuron Chart for .NET (Windows Forms and ASP.NET)

**Professional Quality**  
Allows you to produce professional presentation quality with stunning visual effects.

**Customization and 3D Support**  
Provides XYZ Scatter Graphs, multiple and controllable axes, scatter stack charts, zooming and scrolling capabilities.

**Neuron Financial Charting**  
Includes charts for specifically targeted software firms: banks, brokerage firms, investment firms and other financial companies.

- Includes many chart types and circular/radial/linear gauges
- Includes scrollable axes, integrated legend, chart annotations, watermarks and an extensible chart layout manager

Neuron Chart for .NET has been designed to be extensible, efficient and feature rich. It can display virtually any 2D or 3D chart including: bar, line, step line, area, pie, point, bubble, stock, floating bar, radar, polar, high low, mesh surface, grid surface, shape, smooth line, floating bar, Venn and error with many variations (like scatter XY and XYZ line, stacked bars etc).

The component features full Visual Studio design time support with many advanced features like style editors. It also comes with support for many advanced features including: customizable legends, unlimited axes, zooming and scrolling, grouping, filtering, full set of gauge types, advanced formula support, financial and statistical functions and more.

# LEADTOOLS®

The World Leader in Imaging SDKs

## Silverlight, .NET, WPF, WCF, WF, C API, C++ Class Lib, COM & more!

Develop your application with the same robust imaging technologies used by **Microsoft, HP, Sony, Canon, Kodak, GE, Siemens, the US Air Force and Veterans Affairs Hospitals.**

LEADTOOLS provides developers easy access to decades of expertise in color, grayscale, document, medical, vector and multimedia imaging development. Install LEADTOOLS to eliminate months of research and programming time while maintaining high levels of quality, performance and functionality.

- Silverlight:** 100% pure Silverlight 3 and 4 Imaging SDK.
- Image Formats & Compression:** Supports 150+ image formats and compressions including TIFF, EXIF, PDF, JPEG2000, JBIG2 and CCITT G3/G4.
- Display Controls:** ActiveX, COM, Win Forms, Web Forms, WPF and Silverlight.
- Image Processing:** 200+ filters, transforms, color conversion and drawing functions supporting region of interest and extended grayscale data.
- OCR/ICR/OMR:** Full page or zonal recognition for multithreaded 32 and 64 bit development with PDF, PDF/A, XPS, DOC, XML and Text output.
- Forms Recognition & Processing:** Automatically identify and classify forms and extract user filled data.
- Barcode:** Auto-detect, read and write 1D and 2D barcodes for multithreaded 32 & 64 bit development.
- Document Cleanup/Preprocessing:** Auto-deskew, despeckle, hole punch, line and border removal, inverted text correction and more for optimum results in OCR and Barcode recognition.
- PDF & PDF/A:** Read, write and view searchable PDF with text, images, bookmarks and annotations.
- Annotations:** Interactive UI for document mark-up, redaction and image measurement (including support for DICOM annotations).
- Medical Web Viewer Framework:** Plug-in enabled framework to quickly build high-quality, full-featured, web-based medical image delivery and viewer applications.
- PACS Workstation Framework:** Set of .NET PACS components that can be used to build a full featured PACS Workstation application.
- Medical Image Viewer:** High level display control with built-in tools for image mark-up, window level, measurement, zoom/pan, cine, and LUT manipulation.
- DICOM:** Full support for all IOD classes and modalities defined in the DICOM standard (including Encapsulated PDF/CDA and Raw Data).
- PACS Communications:** Full support for DICOM messaging and secure communication enabling quick implementation of any DICOM SCU and SCP services.
- 3D:** Construct 3D volumes from 2D DICOM medical images and visualize with a variety of methods including MIP, MinIP, MRP, VRT and SSD.
- Scanning:** TWAIN & WIA (32 & 64-bit), auto-detect optimum driver settings for high speed scanning.
- DVD:** Play, create, convert and burn DVD images.
- DVR:** Pause, rewind and fast-forward live capture and UDP or TCP/IP streams.
- MPEG Transport Stream:** With DVR for UDP and TCP/IP streams & auto-live support.
- Multimedia:** Capture, play, stream and convert MPEG, AVI, WMV, MP4, MP3, OGG, ISO, DVD and more.

# Let us help you visualize your success

Nevron provides the essential components for the creation of advanced digital dashboards, scientific and financial applications, diagrams and MMI interfaces for a variety of .NET centric technologies.

Nevron components integrate seamlessly in web and desktop applications, SQL Server Reporting Services 2005/2008 reports and SharePoint 2007/2010 portals and deliver an unmatched set of enterprise-grade features. That is why Nevron is the trusted vendor by many Fortune 500 companies for their most demanding data visualization needs.

## Developers

**Nevron .NET Vision** incorporates components that help you create enterprise grade digital dashboards, scorecards, diagrams, maps, MMI interfaces and much more.

-  Chart for .NET
-  Diagram for .NET
-  Gauge for .NET
-  Map for .NET
-  User Interface for .NET

## IT Professionals

**Nevron Reporting Services Vision** instantly enhances your SQL Server Reporting Services 2005/2008 reports with the industry leading data visualization technology.

-  Chart for SSRS
-  Gauge for SSRS

**Nevron SharePoint Vision** instantly converts your SharePoint pages into advanced dashboards and reports, that unite powerful data analysis with industry leading data visualization.

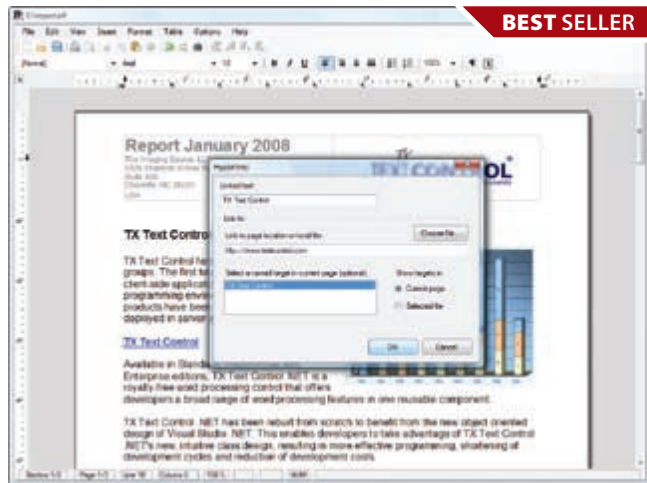

-  Chart for SharePoint
-  Gauge for SharePoint

# Text Control

## TX Text Control .NET V15.1

Read, edit and create documents in formats like MS Word DOCX, DOC, RTF, PDF, HTML and XML.

TX Text Control .NET

**Character and Paragraph Formatting**  
Supports both paragraph and character based styles, as well as multiple style inheritance.

**Bullets and Numbered Lists**  
Provides comprehensive support for bullets and numbered lists.

**Headers and Footers**  
End-users can use the same header and footer throughout a document.

- Standardized (ASP.NET & WinForms) WYSIWYG interface
- Supported formats include DOC, DOCX, RTF, TXT, HTML, CSS, XML and PDF
- Create and save ISO conforming PDF/A documents

TX Text Control .NET is available in Standard, Professional and Enterprise editions and is a royalty-free word processing control that offers developers a broad range of word processing features in one reusable component. TX Text Control .NET includes the ability to export all documents to print-ready Adobe PDF documents without any third-party

software. The fully programmable component supports nested tables, document sections, images, text frames, drag and drop, headers and footers, bulleted and numbered lists and MS Word compatible mail merge fields for database applications. Typical applications include mail merge, PDF creation, document conversion or WYSIWYG word processing.

# Xceed Software

## Xceed Ultimate Suite 2011

65+ advanced UI controls and data manipulation libraries, for COM, .NET, CF, WF, WPF and Silverlight.

Xceed Ultimate Suite

**Xceed Upload for Silverlight**  
Supports uploading multiple files in a single transaction, and supports GZip and Deflate, with controllable compression.

**High-quality, Fast ASP.NET 2D/3D Chart Control**  
Supports 14 major 2D/3D chart types, flexible axes, scaling, legends, drill-down, etc.

**Xceed DataGrid for WPF**  
Features include hierarchical master-detail; 12 flexible, themed editors; an interactive Cardflow 3D view and more.

- Includes all Xceed's .NET, CF, WPF, WF, Silverlight, COM and ActiveX components
- 1 year Vanguard subscription includes free updates, free upgrades, all new Xceed product releases and priority support

Xceed Ultimate Suite offers both User Interface tools for application front-ends and data handling libraries for application back-ends.

(Silverlight, .NET, ASP.NET, CF, ActiveX) and binary encoding (ActiveX).

The Suite includes functionality for compression (Silverlight, .NET, ASP.NET, CF, ActiveX), encryption (ActiveX), user interface (WPF, .NET, ASP.NET, ActiveX) data manipulation (WF), file transfer

Xceed Grid for .NET (included in Xceed Ultimate Suite) comes with 120+ features: grouping, master/detail, Windows and Office theming, fixed rows and columns, Excel export, gradient maps, interactive visual styles and cell UI virtualization.

# Datagrid speed, Xceed style

XCEED  
**DataGrid**  
for Silverlight

## The only Silverlight datagrid that:

- Lets end-users access remote data as fast as local.
- Uses an intelligent background data retrieval system.
- Saves end-users from experiencing lag in the UI.

There's fast and then there's Xceed fast. Going beyond current-generation Silverlight datagrids, Xceed DataGrid for Silverlight is fast where others are slow: when working with remote data. With advanced, background record retrieval from remote sources and a responsive UI that minimizes perceived lag, the control keeps the end-user experience smooth and snappy, no matter where the data is.

Datagrids,  
transformed

**XCEED**  
MULTI-TALENTED COMPONENTS

## .NETXPERT InfoScope V2.5

Easily post InfoPath forms to a Web server.

- Interoperable with all kinds of .NET based Enterprise solutions
- Includes Windows SharePoint Services (WSS) support

InfoScope

InfoScope is an InfoPath runtime engine that enables users who don't have InfoPath to use InfoPath forms through a Web browser. InfoScope enables inputs and updates of data within InfoPath, and makes the entire process interoperable with a back end system via a Web browser.

InfoScope provides a Service Oriented Architecture (SOA) which meets various different types of complicated business requirements through .NET technology. This enables customers and/or partners to integrate into

your business processes via online electronic forms.

InfoScope also provides an InfoScope SharePoint Web Part Control. It's a real InfoPath form not a Web page. No roundtrip and no modification. Just publish and you are ready to use InfoPath. Since InfoScope is auto-installed to clients, you won't meet deployment issues.

InfoScope also enables Web pages to catch events so that you can develop Web applications using InfoPath forms.

## ActsOne BlueOne Components

Add diverse Adobe Flex UI functionality to your Web site.

- Includes grid, grouping, tree, totaling, calculation, input, menus, navigation features and more
- Extends Flex component functions

BlueOne Components

BlueOne Components are custom UI components, developed by ActsOne using Action Script 3.0, with rich functions to make Adobe Flex applications more useful. It showcases many effective, easy-to-use, rich components such as BlueDataGrid, Blue MDI Window and BluePanel. BlueDataGrid in particular has many functions including multi header, data merging, tree datagrid, OLAP grid, Excel export, totaling and sub totaling features. BlueOne Components

includes support for Flex based PDF, Word and Flash reporting and has an integrated Web UI as well as an easy-to-use editing environment. Other features include: skin and interface generation, an extended textbox, easy data grid cell extending, performance implementation, automatic cell calculation, cell drill-down functions, column splits, MDI (Multiple Document Interface Window) and an extended tree & button control.

## Accusoft Pegasus ImageGear for .NET v17

.NET WinForms, ASP.NET and WPF imaging SDK

- Image editing and processing
- Comprehensive OCR capabilities
- Viewing, annotation, and printing

ImageGear for .NET

ImageGear for .NET accelerates .NET imaging application development. Utilizing managed code, it provides support for .NET, ASP.NET, Windows Presentation Foundation (WPF), DirectX 10, and DirectX3D 10.

ImageGear for .NET controls the image capture process and strictly adheres to image compression standards. Your

users will quickly view over 100 image file types through a common interface including raster files such as TIFF and JPEG, and vector files such as PDF and CAD. The annotation support facilitates enterprise collaboration.

For web applications, ASP.NET offers zero footprint deployments and WPF enhances the end user experience.

## AG-TECH Btrieve Classes for .NET V4.0

Fast, easy to program access to Pervasive.SQL databases from .NET.

- Provides direct access to Pervasive's transactional interface from within .NET
- Extended class enables maximum performance when searching Pervasive data

Btrieve Classes for .NET

Btrieve Classes for .NET is a set of .NET database access support classes that enable fast, easy to program access from .NET programs to Pervasive.SQL databases via the Btrieve API. As such they greatly help developers looking to write .NET programs accessing data in Pervasive.SQL databases or those looking to migrate existing pre-.NET Btrieve/Pervasive applications to .NET.

Btrieve Classes for .NET performs with greater efficiency and hence is faster than ADO.NET or Pervasive's OLE DB provider.

This product includes two types of class library, the first (DDF Class) is specifically designed for the .NET Framework and is composed of classes that enable smart and efficient access to column data and definition of data type conversion code. The second type of class (Native Class) provides Btrieve API level access from .NET managed code.

Btrieve Classes for .NET includes full support for Pervasive PSQL v9 and Visual Studio.

## AH XSL Formatter XSL Standard V4.3

Format XML/XSL-FO documents, data and forms at high speed.

- Supports most Unicode languages including Latin, Cyrillic, Greek, Japanese, Chinese, Hangul, Arabic, Hebrew and Thai
- Produces high quality PDF files

AH XSL Formatter

XSL Formatter offers a clear GUI, support for over 50 languages, PDF generation, W3C compliance, extensions and formatting capabilities, unlimited document size and SVG support. In addition XSL Formatter offers vector support for EMF and WMF, CMYK support, and wide ranging output capabilities such as MathML native drawing, WordML

transformation, XSL Report Designer integration and PDF enhancement.

It offers the ability to write in vertical mode, to run the text from right to left as in Arabic and Hebrew and also to create multilingual documents with language mixtures on the same page and even on the same line.

# Aurigma

## Aurigma Image Uploader Flash 1.0

Streamline photo uploads to your website with this flash based upload solution.

- Aurigma Image Uploader Flash lets you upload to any server platform
- User-friendly multiple photo uploader
- Resize photos before upload

Aurigma Image Uploader Flash

Aurigma Image Uploader Flash is ideal for Web 2.0 sites with more casual users, it makes photo uploading quick and user-friendly.

Aurigma Image Uploader Flash allows you to upload any file, anywhere. You can easily upload photos, upload videos and upload documents to social network sites, photo sharing sites and

content management systems. Just add the Image Uploader code to the upload page on your website, write a few lines of server-side code to save files to a folder or database, and that's it. If you are building your site using PHP or ASP.NET, you can use special wrapper classes which reduce the amount of coding to almost nothing.

## LightningChart Ultimate 1.3

High-performance data visualization SDK.

- Renders vast data sets instantly
- Detailed high-capacity 3D Surfaces, with sizes over 2000x2000
- Categorizable and customizable legend boxes, with series show/hide functions

LightningChart

LightningChart Ultimate is a high-performance measurement, engineering and research data visualization SDK for .NET. It is an entirely GPU accelerated (Direct3D) and performance optimized data visualization control for presenting masses of data in 2D, 3D and polar views. It is especially designed for professional measurement applications, such as data acquisition, PC-based oscilloscopes, vibration measurement, signal analyzers,

scientific research, medical and other real-time measurement and signal monitoring applications. Being optimized for high-speed sampled signal data handling with innovative techniques, it is able to handle incredible data rates.

3D views allow high-quality graphics with many series types. 3D surfaces can be presented with height-coloring, wire-framing, contouring and lighting options.

### Performance benchmark 1 - Opening large data set

Opening of 1 million points of data, as a line graph. Result is the delay in seconds before data is fully rendered on the screen (lower delay is better).

Chart A	Chart B	Chart C	LightningChart	Chart D	Chart E	Chart F
13	12	5	0.029	13	12.73	9

LightningChart is **37 201%** faster than average of others

### Performance benchmark 2 - Real-time monitoring

Data is appended to the end of the line series periodically. X axis length is 10 seconds. When 10 seconds elapses, X axis scrolling starts. Test duration is 100 seconds. Result is the point count adding capability / sec, keeping approx. 20 FPS or better refresh rate (higher value is better).

Chart A	Chart B	Chart C	LightningChart	Chart D	Chart E	Chart F
100	100	1000	5000000	10	10	100

LightningChart has **2 272 627%** better capacity than average of others

All .NET chart components were configured to equal appearance and size. Benchmark details and source code project are available from Arction Ltd. LightningChart results apply for Ultimate and Pro editions.

 **Arction**

## Bennet-Tec Information Systems MetaDraw ActiveX V3.1

Give your application support for the creation, editing, and displaying of Metafiles.

- Full support for Object Oriented editing: moving objects, sizing, changing colors and other attributes
- Save/load pictures to/from database fields

MetaDraw

MetaDraw is a special purpose picturebox/image editing component. It is an Object Oriented image component for multimedia, image editing/annotation, etc. MetaDraw allows you to create, edit, display and save pictures built from a set of graphic objects. To your application, it looks like a standard picturebox, but it offers unique support for metafiles - a

graphical format well suited to the drawing and/or moving of graphical objects - including the ability to tag individual graphic objects for HyperGraphic/HotSpot applications.

You can also use MetaDraw as a metafile viewer with support for zoom, scroll and even selective display of individual elements.

## Chant Chant Developer Workbench

Comprehensive development and testing environment for working with speech.

- ActiveX, C DLL, COM, Java, .NET, VCL, Web, Win32, Win64 & WinCE libraries
- Supports Dragon, ViaVoice, SAPI, and VoCon recognizers
- Supports Acapela, Cepstral, RealSpeak Solo, & SAPI synthesizers

Chant Developer Workbench

Chant Developer Workbench is comprised of tools and components for developing software that speaks and listens. As an interactive toolset, it provides a development and testing environment for working with the component libraries and the speech technology objects they manage. It includes a multi-document, interactive, customizable environment,

a powerful editor with color-coded formatting, command line testing and event tracing.

With the component libraries, you can manage grammars, lexicons, profiles, recognizers, synthesizers, and text-to-speech markup directly within application software you develop and deploy.

## Change Vision astah\* professional

Business process UML modeling tool.

- Edit model information directly, without opening dialog boxes
- Supported diagram types include Class, UseCase, Sequence, Collaboration, StateChart, Activity, Component and Deployment

astah\* professional

astah\* professional is a system design tool which supports UML, Entity Relationship Diagrams, flowcharts, CRUD, data flow diagrams, requirements tables and Mind Maps.

astah\* professional includes basic features to make modeling simple and user friendly. astah\* professional is suitable for business use, handling large-sized models and document creation. It includes enriched features, such as the ability to change your

view freely using a map view, zoom by dragging, unlimited undo/redo, the ability to output project information to a CSV file, automatic generation of class diagrams with model information, diagram creation guidance and more.

Exporting to HTML Documents (Javadoc) is also available and enables people who don't have astah\* professional to see models by using a browser.

## Data Techniques FaxMan V4.6

Seamlessly embed fax support into your Windows applications.

- Create faxes from any application using the FaxMan printer driver
- Sophisticated logging keeps track of every fax you schedule
- Supports almost all Class 1, Class 2, and Class 2.0 fax modems

FaxMan

FaxMan is a programmable fax engine for providing fax sending and receiving capability with total control over the faxing process and the user interface. The developer kit includes ActiveX OCV, DLL and managed .NET component interfaces to support virtually any Windows application, and automatically works with almost all Class 1, Class 2, and Class 2.0 fax

modems. FaxMan includes sample source code in Visual Basic and Visual C++.

The FaxMan SDK allows developers to integrate Fax support for industry standard fax modems in hours instead of the months it would take to write support from scratch.

### Stylus Studio® XML Professional Suite 2011

Comprehensive XML data transformation and aggregation toolset.

- Includes synchronized visual XML editing views, Sense:X, integrated XML validator, XML differencing, and more
- Supports visual XQuery editing, mapping and debugging

Stylus Studio® XML

Stylus Studio XML Enterprise Suite is an advanced XML integrated development environment (XML IDE) consisting of XML tools and high-performance Java and .NET components for deploying data integration applications.

Stylus Studio XML Enterprise Suite includes features for working with XML, XQuery, XML Pipeline, XSLT, XSL:FO, EDI, XML Schema/DTD, XPath, XML & databases, XHTML, XML mapping, XML

publishing and Web services.

Stylus Studio XML also features Electronic Data Interchange (EDI) integration tools for converting (EDIFACT to XML, X12 to XML), mapping and deploying advanced XML data integration applications which involve read/write access to legacy EDIFACT and X12 data sources. It also lets you create XML schema files that correspond to the converted EDI documents.

### DataMatrix Font Kit V5.10

Create DataMatrix barcodes from within your applications.

- Includes TrueType, OpenType and PostScript fonts
- Easily translate data into the text required to produce the barcode in the supplied font

DataMatrix Font Kit

DataMatrix Font Kit provides a versatile way to create DataMatrix barcodes from within any application written in a programming language that supports accessing a DLL, OCX, .NET Class, Java Class or UFL (User Function Library). DataMatrix Font Kit translates data into a form which may be displayed or printed in the barcode fonts, which are provided as TrueType, OpenType

and PostScript fonts in three different weights and five height/width ratios. The component can return the string, copy it to the clipboard, or write it to a named file. DataMatrix Font Kit includes samples for MS Office, VB, VB.NET, C#, Crystal Reports and Delphi. (Crystal Reports barcodes are limited to approximately 100 characters).

## DBI Technologies

### Solutions Schedule for .NET V3.1

Build team management and resource planning solutions.

- Share schedule, appointment, contact, location and task information
- Supports timebar linking, cell-level formatting, multi-select timebar and more

Solutions Schedule for .NET

Solutions Schedule for .NET allows developers to create scheduling solutions such as those found in the healthcare or services sector. Solutions Schedule for .NET includes intuitive mouse driven scheduling and planning with Gantt-style project management features. Other features include independent cell formatting, timebar overlap, split and linking

styles. You can easily add a visual reference point for the current date and time in a schedule by using the Current Time Line feature. Time lines extend vertically through the schedule area and are drawn along the major time segments. Developers can also add zoom-in/out capabilities by programmatically changing the value of the TimeDistance property.

## Fast Reports

### FastReport.Net 1.5

Create application independent reports.

- Wide range of report objects available: text, picture, lines, shapes, barcodes, table, checkbox, chart, etc
- You get a full-featured reporting solution with a runtime royalty-free report engine and designer

FastReport.Net

FastReport.Net is a full-featured reporting solution for Windows Forms and ASP.NET that can be used in Visual Studio 2005/2008/2010. With FastReport.Net, you can create application-independent reports or FastReport.Net can be used as a standalone reporting tool. You can connect to any database, use any table or create and use a query to

form your reports. FastReport.Net lets you add dialogue form(s) to your report and using built-in scripting, you can manage interaction between a form's dialogue controls and perform complex data handling. You can view the resulting reports, print them and export to many common document formats.

## FOSS Software

### Prof-UIS V2.90

Create professional, modern user interfaces for your Windows applications.

- Microsoft Office and Visual Studio look-and-feel
- Includes tabbed docking windows, tab containers, data grid and property grid controls

Prof-UIS

Prof-UIS is an easy-to-use MFC extension library that enables you to deliver Windows applications with a professional and user-friendly interface. More than 200 thoroughly tested and documented C++ Classes, templates and interfaces will help you take the time and complexity out of incorporating rich and up-to-date GUI facilities in your projects including: Office and Visual Studio look-and-feel,

ribbons, tabbed docking windows, tab containers with detachable tabs, customizable data grid and property grid controls, customizable menus, toolbars and keyboard accelerators, multi profile GUI persistence and more. Prof-UIS is an extensible, object-oriented framework that enables you to easily customize and extend its functionality.

## Inabyte

### InaCalc.Net V3.02

Enable advanced calculations in your accounting or spreadsheet application.

- Integrates expression parsing, evaluating, and dependent formula recalculation
- Includes custom function support and multiple formula recalculation

InaCalc.Net

InaCalc.Net supports conventional math operators and functions and is suitable for heavy-duty number crunching. It also supports other data types, such as string, date-time and logical and comes with operators and functions for these data types. It allows defining variables and sets of related formulas that implement spreadsheet-like recalculations. The InaCalc.Net

component integrates expression parsing, evaluating and dependent formula recalculation. It is useful in two general areas; when a formula has to be defined, and, evaluated at runtime.

The InaCalc.Net component also supports custom functions and virtual variables.

### Setup Factory V8.2

Create professional installations using a clear visual design environment.

- Wizard based creation of installation packages (no coding needed)
- Code editor for advanced developers to 'fine tune' installations
- Extensive customization through actions library, themes and skins

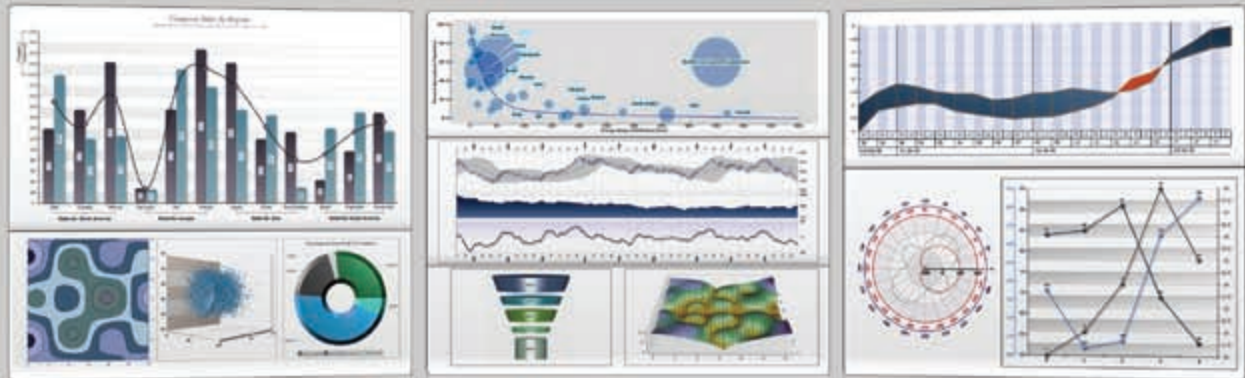

Setup Factory

Setup Factory offers developers a solution for creating flexible installation systems without needing to learn a proprietary scripting language. It further sets itself apart by providing the customization and advanced control features that developers require, all from within the Setup Factory Visual Design Environment. You can even deploy your applications on

Web servers. Setup Factory contains a scripting engine that offers all the usual programming logic such as loops, functions and arrays and more. It includes an action wizard that makes it easy, even for someone with zero programming knowledge to simply click to add actions. Also included is a script editor that makes it easy for advanced users to edit code directly.

**THE NEVRON CHART PRODUCT FAMILY PROVIDES DEVELOPERS AND IT PROFESSIONALS WITH A RICH SET OF FEATURES THAT COVER THE NEEDS FOR ADVANCED BUSINESS, FINANCIAL AND SCIENTIFIC CHARTING.**

The products from the Nevron Chart family are built around a powerful charting engine and share the concepts of usability, performance, visual appeal, ease of data import and openness to customization. This allows for a seamless integration into a wide variety of desktop and server applications and makes Nevron Chart the preferred choice for .NET centric charting and dashboard development.

Developers

IT Professionals

 **Chart for WindowForms**

**Nevron Chart for WinForms** is the leading charting component for desktop applications. It is known for its unmatched set of chart and gauge types, cutting edge performance and remarkable image quality. The component provides useful interactivity features (zooming and scrolling, data panning etc.), hardware accelerated rendering, built-in designer and wizard.

 **Chart for SQL Server Reporting Services**

**Nevron Chart for SSRS (2005/2008)** is an advanced report item that delivers rich 2D and 3D charting features to the SSRS community. It provides an unmatched report design experience with its polished visual editors, exhaustive and refined settings and well-organized structure. The report item is completely programmable, which allows IT professionals to perform complex tasks that go beyond the scope of the visual interface.

 **Chart for WebForms**

**Nevron Chart for WebForms** is the leading charting component for server side applications. The component features a complete set of image export capabilities including PNG, JPEG, PDF, SVG, SWF, XAML, as well as advanced AJAX features. This, combined with the raw power of the Nevron Chart core, makes it the complete server side charting solution.

 **Chart for SharePoint**

**Nevron Chart for SharePoint** instantly complements your SharePoint pages with advanced charting functionality. The state of the art AJAX based user interface provides chart designers with a completely web based, zero footprint design time experience. The innovative Nevron Pivot Data Aggregation engine allows complex data analysis and aggregation to be performed with just a few clicks.

## Keyoti RapidSpell Desktop .NET V4.7

Integrate spell checking functionality into your .NET and WPF applications.

- Interactive dialog checking
- Includes support for 3rd party components
- WPF support includes dialog based checking of WPF's TextBox and RichTextBox controls

RapidSpell Desktop .NET

RapidSpell Desktop .NET allows you to add "as-you-type" spell checking to any textual application (email, word processor etc.) with a couple of lines of code. It can also be used in non GUI contexts using its spell checking API.

RapidSpell Desktop .NET provides 3 spelling components; RapidSpellDialog (dialog based checker control),

RapidSpellAsYouType (as you type check control) and RapidSpellChecker (core spell checker class).

RapidSpell Desktop .NET includes 140,000 word U.S. & U.K. dictionaries (and user dictionary), multi-threaded GUI and a suggestion engine. Additional dictionaries are available for other languages.

## Neodynamic Neodynamic Barcode Professional for RS V70

Add barcode images to your Reporting Services reports.

- Barcode image generation and printing support for 53 Linear/1D & 9 2D Postal barcode symbologies
- Automatically computes checksum or check digits for all symbologies

Neodynamic Barcode Professional for RS

Barcode Professional for Reporting Services is a .NET component which allows you to add barcode images to Reporting Services reports. Barcode Professional for SSRS can be used with both Reporting Services 2000 and 2005 and can generate most popular Linear 1D and 2D barcode symbologies including USPS, Royal Mail, Australia Post, Codabar, Code 11, Code 16k,

Code 39, Code 93, Code 128 (A, B, C), Data Matrix ECC200, EAN 8, EAN 13, JAN, Industrial 2 of 5, Interleaved 2 of 5, ISBN, PDF 417, Postnet, UCC EAN 128, UPC A, UPC E and many more.

Barcode images can be generated in formats such as GIF, JPG/JPEG, BMP, and PNG. You can rotate the barcode image in 90, 180 and 270 degrees.

## Lassalle Technologies AddFlow Suite V5.4

Flowchart/diagram creation and graph drawing algorithms.

- Link autorouting, gradient colors
- OwnerDraw events, custom shapes
- Links can be composed of many segments

AddFlow Suite

AddFlow Suite is a suite of components that includes AddFlow and LayoutFlow, a collection of 4 layout components: HFlow (hierarchical), SFlow (symmetric), TFlow (tree) and OFlow (orthogonal). It lets you create interactive flowcharts and workflow diagrams with graph drawing algorithms. Drawings can be made interactively or programmatically and

features include distinct shapes, styles, pictures, colors, fonts, user data, and so on for each object of the diagram. Metafile support, XML serialization, printing, zooming, custom shapes, link autorouting, scrolling, clipboard management, grid support, multi-selection and customization are also supported.

## NETRONIC Software VARCHART JGantt V2.4

Add interactive Gantt diagrams to your applications.

- User interactions such as create, delete and drag & drop activities are handled by the component
- Includes zooming and scaling of diagrams

VARCHART JGantt

VARCHART JGantt is a component written in Java, that easily lets you integrate Gantt charts into your application. Activities in VARCHART JGantt can be displayed either by a variety of pre-defined bar shapes, or can be composed from scratch. Any shape and pattern is available, even dynamic bars that actively grow or diminish to indicate the degree of

completion of an activity. Bars can also be connected by links of different types. Vertical and horizontal grids can be placed in the Gantt graph and the time scale can be customized by position, scaling, colors and font.

Settings to define the appearance and behavior of the Gantt chart can be defined at design time.

## Newtone ImageKit.NET V2.0

100% native .NET image processing component.

- Load and save images to a variety of image formats
- Apply various imaging effects and transformations and display those images in various controls

ImageKit.NET

ImageKit.NET lets you add image processing to your .NET applications quickly and easily. You can retrieve images from TWAIN scanners and digital cameras; load & save image files in a variety of formats; apply image filters and transformations to your images; display images in the display, pan window or thumbnail controls.

ImageKit.NET supports a variety of raster and vector file formats and compressions. Native .NET support

includes: BMP, JPEG, GIF, TIFF, PNG, WMF and EMF. ImageKit.NET includes many image effects and transformations including: creating or copying images, combining images, layering images, copy and paste images plus numerous effect filters including blur, mosaic, outline, emboss, oilpaint, canvas, glasstile, lens, ripple, whirlpinch, waves and motionblur. ImageKit.NET contains components for both Windows Forms and Web Forms applications.

## O2 Solutions PDFView4NET V3.0

Add PDF viewing to your .NET applications.

- Supports the displaying and printing of PDF files
- Includes a separate library for converting PDF files to images and for printing PDF files to any Windows printer without any UI

PDFView4NET

PDFView4NET is a .NET toolkit for displaying and printing PDF files in .NET applications. It includes a PDF viewer control for Windows Forms and a .NET library for rendering and printing PDF files from any .NET application.

The PDF viewer control for Windows Forms includes support for annotating

PDF files, bookmarks navigation, adding and removing file attachments and other features. The toolkit includes its own PDF rendering engine and it does not rely on any other software for rendering and printing PDF files.

PDFView4NET toolkit has been developed entirely in C#, being 100% managed code.

## Novell MonoTouch 3.0

Create C# and .NET applications for iPhone, iPod Touch and iPad.

- Distribute your applications on the Apple App Store
- Turn .NET executables and libraries into native applications

MonoTouch

MonoTouch from Novell is a software development kit that contains a suite of compilers, libraries and tools for integrating with Apple's iPhone SDK. MonoTouch includes Microsoft .NET base class libraries along with managed libraries for taking advantage of native iPhone APIs. Also included is a cross-compiler that can be used for turning .NET executable files and libraries directly into native applications for distribution on the Apple App Store or for deployment to enterprise iPhone users. In addition,

Xcode integration enables application developers to test on the device or in Apple's iPhone Simulator.

MonoTouch is an SDK that can be used with your favorite editor, be it a fully integrated development environment or a simple text editor. The MonoDevelop integration helps developers get started by providing iPhone application templates that will get you from zero to your device in no time.

## PDFlib PDFlib 8.0

Create PDF files from within server-side or client-side software.

- Includes functions for creating text, graphics, images and links
- Dynamically generate PDF files from Web or database server data
- New table formatter

PDFlib

PDFlib is a component that allows you to programmatically create PDF files from within your own server-side or client-side software. PDFlib doesn't make use of third-party software for generating PDFs, nor does it require any other tools. PDFlib is available for all major operating systems and development environments. It offers a variety of functions, including a table

formatter, PDF/A output for longtime archiving, AES encryption, integrated pCOS analyzing tools, a repair and optimization mode for inputting PDFs.

PDFlib can generate PDF data directly in memory (instead of on file), resulting in better performance and avoiding the need for temporary files which speeds up PDF generation.

### GTP.NET V3.3

Add interactive Gantt charts and scheduling to your applications.

- Supports AJAX with client-movable and resizable time items
- Features asynchronous collision detection and handling of time items
- Security awareness enables deployment on XBAP or ClickOnce

GTP.NET

GTP.NET's overall goal and purpose is to let you visualize and manipulate time based information. GTP.NET includes a collection of user interface components which handle time blocks. The time blocks are displayed in a Gantt chart or a schema view. The times are connected to an owner, for example a person or an activity in a project. You can also use it to display dependencies and collisions between

times, which gives the end user a graphical way to view and modify the project.

GTP.NET includes the ability to select and re-assign links and also provides databinding for links between time items. The components can be delivered via WinForms, AJAX, ASP.NET, and even in reduced trust environments like ClickOnce and XBAP.

## Resco

### Resco MobileForms Toolkit 2011 Volume 1

Suite of .NET CF controls for Pocket PC, Smartphone & Windows CE.NET.

- Includes grid, calendar, listview, input form, zip compression, navigation and touchscreen signature controls
- Features a chart control with five different chart types

Resco MobileForms Toolkit

Resco MobileForms Toolkit is a suite of components designed specifically for mobile devices. It includes advanced designers, support of quick data loading, standardized mobile user interface, Enterprise samples and many other features. It contains AdvancedList, AdvancedTree, CompactChart, DetailView, SmartGrid, Zip and Outlook Controls.

All Resco MobileForms Toolkit components have been specifically designed so they fit the small displays of mobile devices perfectly.

Special optimizations such as Resco DelayLoad technology ensures performance is optimized even on devices with limited memory and processor capabilities.

## Raize Software

### CodeSite V4.5

Locate and eliminate problems in your Delphi and C++Builder code.

- Captures detailed information
- CodeSite messages do not interrupt the flow of your application
- Live logging and file logging can be performed either locally or remotely

CodeSite

CodeSite is an add-in for Delphi and C++Builder that enables you to send detailed information (including string lists, objects, even bitmaps) from within your application code to a specialized receiver. Unlike message boxes and inspecting variables on breakpoints, CodeSite messages are not transient. The resulting log of messages sent to a destination

provides valuable information for locating problem areas in your code. Sending CodeSite messages does not interrupt the flow of your application as happens when message boxes and breakpoints are used. As a result, CodeSite is much more effective in situations where user interactions (e.g. focus changes) and painting issues need to be tracked.

## Seekford Solutions FTP Wizard V3.0

Add FTP support to your Windows applications.

- Add functionality without learning the complexities of FTP or TCP/IP
- Includes samples for Visual Basic, Visual FoxPro, Visual C++, ASP and VBScript

FTP Wizard

Seekford Solutions FTP Wizard allows you to easily upload and download files from an FTP server. Using the File Transfer Protocol, you can get directory listings, make directories, delete files and directories, rename files, upload and download files. The product makes implementation simple. It provides an interface to the File Transfer Protocol, allowing developers to implement

this functionality without learning the complexities of FTP and TCP/IP. Multiple instances of FTP Wizard can be created to talk to multiple FTP sites at a time.

FTP Wizard includes asynchronous operation and allows you to create applications that require no user interaction.

## SyncRO Soft <oXygen/> XML Editor V12

Tools for XML authoring & conversion plus XPath, XSLT and XQuery development.

- Visual WYSIWYG XML editing mode based on W3C CSS stylesheets
- Grid editor allows you to edit repetitive XML content in a special layout similar to a spreadsheet application

<oXygen/> XML Editor

<oXygen/> XML Editor provides the tools for XML authoring, XML conversion, XML Schema, DTD, Relax NG and Schematron development, XPath, XSLT, XQuery debugging, SOAP and WSDL testing.

<oXygen/> XML editor supports the ability to browse, manage and query native XML and relational databases and supports a large number of text encodings including Unicode.

Integration with the XML document repositories is made through WebDAV, Subversion and S/FTP protocols.

<oXygen/> XML editor is also available as an Eclipse IDE plugin, bringing unique XML development features to this widely used Java IDE.

## SWIFT Components SWIFT Framework .NET

Complex SWIFT messaging solution.

- Generic system for loading, storing and validating SWIFT messages
- The object model contains 323 SWIFT Message Types

SWIFT Framework .NET

SWIFT Framework .NET is a system for capturing, validating and processing SWIFT messages within an organization's information systems infrastructure. SWIFT Framework .NET allows seamless integration into existing IT systems and can be a base to build up a clean and fully compatible SWIFT messaging system.

the need to install BizTalk itself). SWIFT Framework .NET enables validation based on message (or message block) properties and validation based on SWIFT tags.

SWIFT Framework .NET includes a generic system for the loading, storing and validation of SWIFT messages. It is also Microsoft BizTalk XML schema and object model compatible (without

These two validation methods can be combined and customized. Default message validation can be extended by your own specification or it can be completely replaced. This enables integrators to create simple business rules being built-in the messaging framework of the solution.
