/n software

/n software Red Carpet Subscription Q2 2011

Write communications, security and e-business applications.

- Includes components for FTP, IMAP, SNMP, SSL, SSH, S/MIME, digital certificates, credit card processing and e-business (EDI) transactions
- Windows WF activities for transferring files, email and more

/n software Red Carpet Subscription

One developer, multiple workstations, all /n software products.

/n software Red Carpet Subscription gives you components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, digital certificates, credit card processing, ZIP compression, shipping & tracking, e-business (EDI) transactions and robust Enterprise ready Internet connectivity, secure messaging and file transfer for Windows Workflow Foundation. There are no licensing restrictions, so you can code on your work machine, your notebook or even your home machine. Plus there are no technology restrictions, so you get everything: .NET, COM, C++, Java, Pocket PC, UNIX, Linux, Mac OS X and iPhone. You receive quarterly update

CDs with free updates, upgrades and new releases. It includes more than \$30,000 worth of software including: all /n software products - IP*Works!, SSL, S/MIME, S/Shell, Zip, EDI, Amazon Integrators, Shipping Integrators, SharePoint Integrators, Integrators for QuickBooks, Enterprise Adapters, Paymentech, E-Payment, Vital/TSYS, USPS, PayPal, Workflow Activities etc.

/n software Red Carpet Subscription includes IP*Works! which is a comprehensive framework for Internet development and is the core building block for most /n software products. IP*Works! eliminates the complexity of Internet development by

IP*Works!
A comprehensive framework for Internet development.

Internet Communications
ATOM, REST, MX, DNS, RSS, NNTP, SMPP, POP, Rexec, Rshell, SMTP, SOAP, Telnet, Ping, TFTP, FileMailer, NetClock, FTP, HTTP and more.

Secure Components
/n software Red Carpet Subscription includes secure versions of many of the IP*Works! components.

SharePoint Integrator Products
Interface directly with SharePoint Server and provide access to a wide range of SharePoint data access and management capabilities.

Windows Workflow Foundation Activities
Includes activities that make it easy to integrate Internet capabilities into your workflow packages.

Everything in One Subscription
There are no technology restrictions, you get everything, .NET, COM, C++, Java, UNIX, Linux even Mac OS X and iPhone.

providing easy-to-use, programmable components that facilitate tasks such as sending email, transferring files, managing networks, browsing the Web, consuming Web services, etc.

It includes support for all major internet protocols: ATOM, DNS, FileMailer, FTP, HTMLMailer, HTTP, ICMPport, IMAP, IPDaemon, IPInfo, IPMonitor, IPPort, LDAP, MCast, MIME, MX, NetClock, NetCode, NetDial, NNTP, Ping, POP, RCP, REST, Rexec, Rshell, RSS, SMPP, SMTP, SNPP, SOAP, Syslog, Telnet, TFTP, TraceRoute, UDPPort, WebDav, WebForm, WebUpload, Whois, XMLP and XMPP.

Also included in the /n software Red Carpet Subscription is IP*Works! SSL

which is a suite of secure, SSL-enabled drop-in replacements for the "classic" IP*Works! components.

The components are fast, robust, and reliable and consume a minimum of resources. They are small and lightweight with no dependencies on external libraries. Included are native development components for all supported platforms. IP*Works! includes a complete unified framework with a common, easy to learn object model and simplified interfaces allowing you to be more productive. The components are rigorously tested having undergone thousands of hours of testing, you also get reference documentation, hundreds of sample applications and fully indexed help files.

We didn't invent the Internet...

...but our components help you power the apps that bring it to business.

applications
powered by 

connectivity
powered by 

The Market Leader in Internet Communications, Security, & E-Business Components

Each day, as you click around the Web or use any connected application, chances are that directly or indirectly some bits are flowing through applications that use our components, on a server, on a device, or right on your desktop. It's your code and our code working together to move data, information, and business. We give you the most robust suite of components for adding Internet Communications, Security, and E-Business Connectivity to

any application, on any platform, anywhere, and you do the rest. Since 1994, we have had one goal: to provide the very best connectivity solutions for our professional developer customers. With more than 100,000 developers worldwide using our software and millions of installations in almost every Fortune 500 and Global 2000 company, our business is to connect business, one application at a time.

Aspose

Aspose.Total .NET

Create, manage and convert many popular document formats.

- Supports Word, Excel, PowerPoint, Project, PDF and Flash file formats
- Demos written in C# and VB.NET highlight the best practices for implementing many common tasks

Aspose.Total

Aspose.Cells
Lets you create and manage Excel Spreadsheets without requiring Microsoft Excel.

Aspose.Words
Lets you read, modify and write Word documents without utilizing Microsoft Word.

Aspose.Pdf
Lets you create PDF documents without utilizing Adobe Acrobat.

Aspose.Slides
Enables your application to read and write PowerPoint documents without utilizing Microsoft PowerPoint.

Aspose.Pdf.Kit
Easy manipulation of existing PDF documents.

Aspose.BarCode
Barcode generation and recognition component, written in managed C# for your WinForms, ASP.NET and .NET CF applications.

Aspose.Total for .NET offers every .NET component that Aspose has available as well as all new components released during the annual subscription.

Aspose.Total for .NET offers every .NET component that Aspose has available. With it you will be able to programmatically manage some of the most popular file formats used in business: Word, Excel, PowerPoint, Project, PDF and Flash.

Aspose Total for .NET also supports mail merge, creating shapes on slides, extracting text from PDF files and more. Your Aspose Total for .NET purchase includes 1 year of maintenance and support so you will obtain all updates and new Aspose Total for .NET components released during the year.

Aspose.Words for .NET is a class library that enables you to perform a wide range of document processing tasks directly within your .NET applications. Aspose.Words for .NET supports DOC, DOCX, DOCM, OOXML, RTF, HTML, OpenDocument, PDF, XPS, EPUB and many other formats. With Aspose.Words for .NET you can generate, modify, convert, render and print documents without using Microsoft Word. It lets you insert and format complex document elements such as images, hyperlinks and fields via a higher-level programming interface.

Aspose.Cells for .NET provides a flexible group of components that enable .NET applications to create and manage Excel Spreadsheets without requiring Microsoft Excel to be installed on the server. It supports all standard chart types like: column, bar, line, pie, scatter, etc.

Aspose.Pdf for .NET is a PDF document creation component that enables your .NET applications to read, write and manipulate PDF documents without using Adobe Acrobat.

Aspose.Slides for .NET is a PowerPoint management component that enables .NET applications to read, write and manipulate PowerPoint documents

without using Microsoft PowerPoint. Aspose.Slides for .NET supports formats including PPT, PPS, POT and PresentationML (OOXML, PPTX).

Aspose.BarCode for .NET is a robust and reliable barcode generation and recognition component.

Aspose.Tasks for .NET enables .NET applications to read and write Microsoft Project documents without utilizing Microsoft Project.

Aspose.Network for .NET is a suite of components for professional network programming, which includes implementations of most of the major network protocols (POP3, DNS, MIME, FTP, ICMP, MSG parsing and more).

The Industry's Most Interactive Dashboards...

...are Now Available for Windows Phone 7!

ComponentArt

Data Visualization for Windows Phone 7

Visit our website to learn about the industry's first complete framework for building mobile dashboards targeting Windows Phone 7. To experience the product in action, simply search for "ComponentArt" in the Windows Phone App Marketplace and install the free ComponentArt Demo application.

www.componentsource.com

ComponentArt's latest Data Visualization technology allows you to present, navigate and visualize your data like never before. Built from the ground up to take advantage of the latest versions of Silverlight, WPF, Windows Phone and Visual Studio, ComponentArt Data Visualization for .NET delivers the complete feature set for building next-generation digital dashboards and data analysis applications.

ComponentArt
Build Something Amazing

ComponentArt

ComponentArt Data Visualization for .NET Ultimate 2011

Controls for digital dashboards and data analysis applications in Silverlight and WPF.

- Enterprise-grade charting, gauges and maps along with state-of-the-art data display and processing components
- Brilliant rendering, interactive drill-downs, zooming & scrolling

ComponentArt Data Visualization for .NET Ultimate

A complete feature set for building next-generation digital dashboards and data analysis applications.

ComponentArt Data Visualization for .NET Ultimate is a suite of Silverlight and WPF controls for the development of digital dashboards and data analysis applications. It includes charting, gauges and maps along with data display and processing components.

Charting: A set of flexible charting components (bar and column, line, area, pie, donut, funnel, radar, tree map, financial and stock, bubble, combination, etc.) designed to deliver interactive visualization of business data. The components feature brilliant rendering, drill-downs, built-in zooming & scrolling and annotation objects. Enterprise charting features include the

ability to handle very large datasets and CalcEngine integration.

Gauges: A wide selection of digital gauge controls (radial linear, numeric, bullet graph, cylinder, half donut, thermometer, etc). The components feature easy KPI (key performance indicator) binding, customizable pointers, scales and ranges, flexible inner layout and smooth animation. All controls include professional skins and themes.

Maps: Dynamic, data-driven maps designed to provide visualization of geographic data. The components feature drill-downs, multiple shape

A Highly Interactive Control for Date Range Selections
TimeNavigator was designed to enable quick and intuitive date range selections.

Gauges
A wide selection of digital gauge controls, featuring easy KPI binding, customizable pointers, scales & ranges and smooth animation.

Bar & Column Charts
Includes a variety of attractive 2D and 3D bar and column chart shapes.

Charts
Includes a variety of 2D and 3D shapes and the ability to customize data point annotations and popups.

Effective Spreadsheet and Paged Display of Data
Choose between two interfaces for tabular data: a spreadsheet and a traditional paged data grid.

Effective Visualization of Geographic Data
Included is a large collection of over 150 ready-to-use maps of continents, regions and countries.

layers, tooltip & point templates and flexible projections. Includes over 100 maps covering all world continents & regions, major countries, all US states and custom maps.

GridView: A data grid control which delivers a visually rich display of tabular data. The components feature data grouping, sorting, filtering, and operating in "spreadsheet" or "paged grid" modes. Enterprise grid features include handling very large datasets, cell formulas, calculated styles and CalcEngine integration.

TimeNavigator: An innovative control that allows quick, interactive and intuitive date range selections. It features hierarchical date and time drilldowns: decade, year, quarter,

month, week, day, hour, minute, second. The component also includes customizable fiscal year offset, list of business days and/or holidays, international calendars and more.

CalcEngine: A general purpose data processing engine, used to perform complex operations on a given dataset. It features ComponentArt "Calc", an interpreted expression language for dynamic data transformations on the client. The CalcEngine is loaded with useful & functional libraries including: set operations, statistical & financial functions.

Subscription License includes all minor and major product updates for a period of one year.

ComponentOne

ComponentOne Studio Enterprise 2011 v2

Components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices.

- Full suite of rich and flexible .NET Windows Forms components
- Rapid development of innovative & demanding Web applications
- Includes many innovative Silverlight controls

ComponentOne Studio Enterprise

Create rich user interfaces for WPF, Silverlight, ASP.NET, Windows Forms, Mobile and ActiveX applications.

ComponentOne Studio Enterprise includes hundreds of components for Silverlight, WPF, .NET, ASP.NET, ActiveX, iPhone & mobile devices. It offers a complete solution that targets all runtime environments and all application layers (data, presentation, reporting and transformation).

Silverlight toolset includes: Feature packed Silverlight components (grid, chart, menu, treeview, uploader, layout, data input, gauges, maps, image rotator, navigation, etc.). You can use expression blend to fully style the Silverlight controls which allows developers to easily create rich graphical interfaces

for their Rich Internet Applications. Built with XAML, the Silverlight controls promote collaboration in your team and fit seamlessly into your developer & designer workflow. Furthermore, you can take XAML from Silverlight and use it in your WPF application. Also available from ComponentOne is the XAP Optimizer which helps you optimize the size of the XAP files within your Silverlight applications.

WPF toolset includes: Schedule for WPF - a suite of tools delivering scheduling, month calendar and multi-month calendar components for the WPF platform. Chart for

Microsoft Outlook-style Scheduler
Schedule one-time, all day, or recurring appointments with reminders, labels, etc.

Advanced Charting for your WPF Applications
Brings you powerful rendering, animations and data-binding capabilities.

ComponentOne PDF for WinForms
Supports AcroForms and AcroFields.

iPhone and iTouch
Includes ASP.NET components developed to mimic the look and feel of the native UI of the iPhone and iTouch.

ComponentOne Book for Silverlight
Present UIElement objects as if they were pages in a regular paper book.

Create Responsive Grid Applications with Built-in AJAX
Easily group, sort, filter, resize, and reorder columns at run time, all through simple drag-and-drop.

WPF - visually stunning 2D/3D bar, area, line, pie and column charts. Grid for WPF - a set of controls that allow you to integrate grids into your WPF applications. Reports for WPF - includes a set of WPF reporting tools: the C1Report, C1PrintDocument, and C1DocumentViewer components as well as the C1ReportDesigner stand-alone application.

ASP.NET toolset includes: Styled, easy-to-use controls built on Web standards including AJAX, CSS, and XHTML. Components include: eCommerce (PayPal), file format management (PDF, Flash, XLS, ZIP), calendars, charting (2D and 3D), rich text editing, grids, input and mask controls, menus and toolbars, reporting, scheduling and spelling

features. You can also recreate the look & feel of iPhone and iTouch user interfaces using Button, LaunchPad, Calendar, NavigationList & Slider components.

WinForms toolset includes: .NET controls featuring two award-winning grids: FlexGrid and True DBGrid. FlexGrid is designed for unbound applications. It is a flexible grid control for creating user-friendly interfaces that display, edit, format, organize, summarize, and print tabular data. The strength of True DBGrid is in its data binding; with an ADO.NET managed database interface, it offers features such as Excel-like split views and built-in hierarchical binding and grouping.

DevExpress (Developer Express)

DXperience v2011 vol 1

All Developer Express ASP.NET, WinForms, WPF, Silverlight & LightSwitch components.

- User Interface functionality for WinForms, ASP.NET, WPF & Silverlight
- Display digital dashboards in your Web based applications
- Includes reporting for LightSwitch

DXperience

All the .NET component suites, libraries and IDE tools produced by Developer Express in one package.

DXperience includes all Developer Express products engineered for Visual Studio and the .NET Framework. Priority technical support is also included with updates and upgrades for 1 year. With this subscription, you receive key technologies by Developer Express including IDE productivity tools, business application frameworks, and components for Windows Forms, ASP.NET, WPF, Silverlight and LightSwitch. With the Universal subscription, you also receive eXpressApp Framework which is an instrument for creating business applications quickly and easily.

WPF products include: DXGrid for WPF - fast server-side data processing and complete support for templates and styles, DXCharts for WPF - clear & compact XAML syntax and element customization via templates, DXCarousel for WPF - stunning navigation and data browsing.

Silverlight products include: AgDataGrid - fast data manipulations and rich end user experiences, AgRichEdit - Word like text editing features, AgMenu - static menus, toolbars and context menus etc, AgLayoutControl - layout management for Silverlight.

XtraBars Suite Ribbon Control and Tabbed MDI interface
With the XtraBars Suite you can easily build Ribbons from scratch.

XtraBars Suite
You can create application menus, galleries and contextual tabs in ribbons.

DXGrid for WPF
Supports both tabular and card display formats and provides facilities for the end-user to sort and group data.

AgRichEdit for Silverlight
Allows you to introduce Microsoft Word like text editing features into your next Silverlight application with ease.

XtraReports End-User Designer
The XtraReports Suite features a fully functional End-User Designer.

XtraReports Master-Detail Report
With the XtraReports Suite, you can easily build banded reports and even Master-Detail reports.

Windows Forms products include:

XtraGrid Suite - a grid control with four data layout options from a simple table to banded multi-line row layout and card views, XtraScheduler Suite - enables you to incorporate the UI found in Office Calendar within your applications, XtraPivotGrid Suite - a data analysis, mining and visual reporting solution, XtraGauges - linear, circular, digital and state indicator gauge types, XtraEditors - a library of over 20 editors that can be used both standalone or embedded.

ASP.NET products include:

ASPxGridView and Editors Library - a robust grid and data editors library, ASPxPivotGrid Suite - a multi-

dimensional analysis component, ASPxNavBar Suite - Web navigation bar with full AJAX support, ASPxMenu Suite - an extremely lightweight, customizable main and context menu and more.

LightSwitch products include:

XtraReports for LightSwitch - seamlessly interacts with entities created within LightSwitch and provides a native and consistent experience when developing reports.

Also included in the Universal and Enterprise Editions are Visual Studio productivity add-ins: CodeRush, Refactor! Pro and eXpress Persistent Objects.

Flexera Software

InstallShield Premier 2012

Create strong, reliable Windows Installers.

- Virtual machine detection and blocking
- Supports the latest technologies, including Windows 7 and Windows Installer 5 (MSI 5)

InstallShield

Create flexible installations quickly and easily across all Windows operating systems.

InstallShield Premier allows you to create flexible installations quickly and easily across all Windows operating systems. First-time developers find it easy to create installations, while power users find its depth and flexibility perfect for developing complex software installations. It supports the latest technologies, including Windows 7 and Windows Installer 5 (MSI 5). It also supports Microsoft's latest products, including Visual Studio 2010, .NET 4, MSBuild, and DirectX 9.0c. With InstallShield Premier you can expand installations to servers and Web services, including IIS 7.0, Oracle, MySQL, SQL Server 2008, and Windows Server 2008. It also lets you

target mobile devices with support for Windows Mobile, Windows Embedded CE, SQL Server Compact Edition, and PalmOS.

InstallShield Premier Features:

Project Assistant - seamlessly guides you through the installation-authoring process, significantly reducing the time required for new users to complete an installation project and enabling veteran software developers to more efficiently jumpstart a new project.

Visual Dialog Editor – easily modify existing dialogs or create new ones from scratch. Create the dialog you need, modify it, and then insert the dialog into

Enhanced Windows 7 Support
Easily make your Windows Installer meet the installation requirements of the "Compatible with Windows 7" logo program.

Try and Die
This type of trialware also enables your prospective customers to evaluate your product before buying it.

Dialog Themes
Dialog themes are predefined sets of images that give your end user dialogs a unified and distinctive look.

Setup Prerequisites
InstallShield manages prerequisites that must be installed on the target machine before your application can be installed.

Install Project Types
You can create many different project types including MSI, InstallScript, Smart Device, .NET Wizard, Web projects and more.

Project Assistant
Significantly reduce the time required for users to complete an installation project.

the installation sequence.

Intuitive Design Environment – the advanced InstallShield Premier design environment makes setup creation more efficient by outlining the major steps involved in the creation of an installation. InstallShield Premier provides separate views for common tasks within each step, and enables drag-and-drop support for files, registry entries, and other project elements. More than 20 task-based wizards simplify your development tasks, from starting VB projects to building custom releases.

MSI Support – supports all projects built with the Microsoft Windows Installer (MSI). MSI simplifies your patch development, allowing you to set patch

metadata in patch packages, configure un-installable patches, and use patch sequencing features.

Patch Creation - Patches created with InstallShield Premier contain updates to a previous installation or set of installations on a file-level or byte-level basis. Distribute on the Internet and save end-user time and server bandwidth.

Virtual Machine Detection - Virtual machines have been a licensing and compliance challenge for software vendors. InstallShield Premier can now build installations that detect when they are being run on virtual machines like Microsoft Hyper-V and Virtual PC or VMware and optionally block the installation.

If Software Installations, Deployments, or Virtualization Is Your Job, Flexera Software Has Your Solution

FLEXERA SOFTWARE™ InstallShield®

NEW! InstallShield® 2012 – *How the World Installs Software on Microsoft® Windows™*

Author reliable MSI and InstallScript installations and App-V™ virtual packages for Windows® platforms.

Support Installations for Windows 7
Easily configure installations that run reliably on Windows 7 and leverage Windows Installer 5 functionality.

Broad Range of Microsoft Technologies
Including Visual Studio 2010, .NET Framework 4.0, IIS 7.0, SQL Server 2008 SP1, and Windows Server 2008 R2, and App-V.

Install Software on Any Device
Extend installations to configure database servers, Web services, mobile devices, and more.

What's New in InstallShield
Includes the ability to bundle multiple products into single suites, installation streaming for an "app store-like" experience, distributed and component-based installation, 64-bit enhancements, application tagging, and much more!

FLEXERA SOFTWARE™ InstallAnywhere®

NEW! InstallAnywhere™ 2011 – *Multiplatform Installation Solution to Install Cross-Platform Applications*

Deliver a professional and consistent installation experience for Windows, Linux, Mac OS X, Solaris, AIX, HP-UX, IBM iSeries, and more.

Impress End Users with Reliable Installers
Cut your support costs and impress end users with a professional, branded installer that installs software correctly every time.

One Installation for 31 Languages
Installers can be automatically translated into 31 languages to help your applications reach end users around the world.

Perfect for Complex Desktop and Server Applications
Built-in customization tools make quick work of even your most complex installer requirements.

What's New in InstallAnywhere 2011
Breakthrough functionality for managing all phases of the installation lifecycle, including installation, rollback, maintenance, repair, a single uninstaller, unified progress bar, and enhanced installation logging. Also expanded support for new platforms like Windows 7, Windows Server 2008 R2, SuSE Linux 11.2 (64-bit x86), 11.3 (32-bit x86), Ubuntu 10.10, and Mac OS X 10.6.

FLEXERA SOFTWARE™ AdminStudio® Suite

NEW! AdminStudio® Suite – *One Solution For Windows® 7 Migration, Application Virtualization and MSI Packaging*

Powers an enterprise's Application Readiness process for migrations to Windows 7, application virtualization and day-to-day packaging operations.

Quickly Migrate Applications to Windows 7
Automatically test and fix Windows 7 compatibility issues.

Support for Application Virtualization
Automate conversion to virtual formats including Microsoft® App-V, VMware® ThinApp™, and Citrix® XenApp™. Customize, test, validate and directly edit Microsoft® App-V packages.

Prepare Reliable MSIs for Error-Free Deployment
Integrated with leading software deployment tools Microsoft® System Center Configuration Manager, Novell® ZENworks®, LANDesk® and support for IBM Tivoli®.

What's New In AdminStudio
Enhanced support for application migration projects. Application Centric Management.

GrapeCity

ActiveReports 6

The best selling report writer with no runtimes or royalties.

- Includes a Silverlight report viewer
- Export to popular formats like PDF, Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications

ActiveReports

Generate a wide variety of reports from your .NET applications.

ActiveReports 6 is a .NET reporting component for Windows and Web applications. Its key features include customization, fast performance and high quality. ActiveReports 6 features an easy-to-use Visual Studio .NET report designer and a powerful API. It includes multilanguage support that works right out of the box and also offers seamless run-time deployment, royalty free. It's easy to create reports in ActiveReports 6, the report designer integrates into Visual Studio .NET (including Visual Studio 2010). Once the product has been installed on the developer's machine, adding a report to your project is as easy as adding a class or form.

ActiveReports 6 is easy to deploy - reports are created within Visual Studio .NET and compiled directly into the executable. Therefore, assemblies can be distributed using XCopy deployment or they can be

placed in the global assembly cache (GAC). The object model provides the Reporting Engine as a single, managed, strong named assembly. There are no additional setups on the server or the client's machine. Since ActiveReports 6 is fully managed, there aren't any dependencies on 3rd party applications.

ActiveReports 6 can export to many formats - it includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications.

ActiveReports 6 contains a built-in charting control which supports common 2D and 3D chart types and provides advanced charting features as well as native exporting to various image formats. Chart types include: vertical and horizontal bar, line, scatter plot, pie, funnel and pyramid, Gantt, Kagi, point and figure, renko, and more.

Viewer Annotations
Annotations can be placed on the report to pass notes and special instructions on to users and developers.

End-User Report Designer Editing
Allow end users to edit their reports and save new reports or load old ones.

Viewing Web Reports
The WebViewer control provided in the Professional Edition allows you to write less code and view reports more quickly.

Built-In Charting Control
A chart control is included with ActiveReports that supports common 2D and 3D chart types.

Export to Any Format
ActiveReports includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF.

Hyperlinks and Drilldown
You can use hyperlinks and the viewer hyperlink event to simulate drill-down from one report to another.

ActiveReports 6 supports the use of Windows Forms-based 3rd party controls with the report designer. Essentially any control that is able to be rendered on a Windows Form is capable of being rendered on an ActiveReports 6 report.

ActiveReports 6 includes a report viewer control which supports report zooming and previewing, multiple tabs for viewing hyperlinks, split- and multi-page views, a table of contents pane, thumbnails, text searches, annotations, and toolbar customization.

ActiveReports 6 also features a royalty-free End-User Report Designer control that allows you to host the report designer in your own applications to provide end users with the ability to create and modify reports. The Zoom toolbar item allows users to magnify the design surface of the report for more precise placement and viewing of report controls.

The Professional Edition of ActiveReports 6 also includes a Flash-based and Silverlight Report Viewer that you can use to provide a seamless, interactive report viewing experience and no-touch printing using the widely-adopted Adobe Flash Player. Choose from pre-defined themes (including Office, Windows XP, Vista and Windows Classic) and enhance the viewer experience by controlling the printing, paging, table of contents, thumbnail views and other options.

ActiveReports 6 comes with a Microsoft Access report conversion wizard that makes importing Access reports a breeze. This is a very handy utility for users who have invested a lot of time creating reports within Access databases. Not only will the import help get you up and running with ActiveReports 6, but the banded report architecture is very familiar for developers that have used Microsoft Access' reports.

ACTIVE REPORTS⁶

The de facto standard reporting tool
for Microsoft Visual Studio

- Fast and flexible reporting engine
- Flexible event-driven API to completely control the rendering of reports
- Wide range of export and preview formats including Windows Forms viewer, Web viewer, Adobe Flash and PDF
- XCopy deployment
- Royalty-free licensing for Web and Windows applications
- Support for Azure

Start building
smarter applications

WE ARE
REPORTING

Allow users to easily present, edit and update their tabular data.

- Features Outlook style grouping, right-to-left support, export to HTML/XML and more
- New cell types include list box, multi-column combobox and more

Spread .NET

Easily present, edit and update tabular data.

Spread.NET is an embedded Microsoft Excel spreadsheet platform for .NET development. Spread.NET is the combination of Spread for Windows Forms and Spread for ASP.NET provided as a single, multi-platform toolkit.

Whether developing client applications, Web sites, or Web applications, the mission of Spread is to allow developers to embed complete spreadsheet functionality into applications - without requiring Microsoft Excel.

Effective and productive user experiences are the result of providing familiar, logical, intuitive, and consistent interactions with data. Spread is designed with this in mind. Through built-in support for Excel document import and export, Spread allows you to apply complete programmatic control of user interactions with data

in Excel documents - allowing you to maintain business rules, security, and data integrity.

With Spread.NET you can import Microsoft Excel documents and preserve complete formatting. Interact with the data within your application, then export your spreadsheets to Microsoft Excel for portability and distribution to your external customers. Spread.NET supports multiple Excel file formats, including Excel (2007-2010 xlsx), Excel 97 (xls), comma-delimited (csv), and text (txt).

Spread.NET lets you create full-featured 2D and 3D charts within your spreadsheets. Chart types include column, line, pie, bar, area, XY, bubble, stock, XYZ, doughnut, radar and polar. You can add charts through code by using the comprehensive chart object

Formulas
Spread includes over 300 built-in functions and gives you the ability to define your own.

Cell Types
Spread includes many different cell types including: barcode, button, checkbox, color picker, combobox, currency, date time and hyperlink.

Frozen Rows and Columns
With Spread you can freeze both columns and rows at the end or beginning of the sheet.

Sorting
Spread allows the user to click on column headers to perform an alternating ascending/descending sort of the rows in that column.

Grouping
You can group rows or columns into outlines as you do in Excel.

Desktop Spreadsheet
Use Spread to create your own desktop spreadsheet application.

model, or without writing code, at design time by accessing the Spread Designer and Chart Designer.

Charts can be bound to external data sources, and you can allow end users to make changes to the chart formatting at run time. Spread.NET features built-in design dialogs that you can make available in your applications to allow your end users to create and modify charts in Spread.NET - just as in Microsoft Excel.

Spread.NET has an extensive and robust object model, and provides the ability for developers to customize many elements of the user interface and control behavior by extending built-in classes and assigning custom objects. You can use Spread.NET to embed advanced Microsoft Excel-compatible spreadsheet features into .NET applications - features that would

otherwise be considered difficult to achieve.

Spread.NET can bind to any .NET data source, including support for displaying relational datasets. Run-time support for unbound rows and columns within bound data allows for inclusion of aggregation information, or for performing what-if scenario analysis. Spread.NET also supports binding a range of cells to a data source, and can provide a range of cells as a data source.

You can customize the printing of your spreadsheets with a wide range of printing options. Spread.NET also supports printing to a PDF (Portable Document Format) file. You can even take ultimate control of the printing in your code using the owner print drawing support.

IBM ILOG

IBM ILOG Elixir Standard V3.0

A collection of innovative display components for Flex user interface developers.

- Market leading data visualization component set for Adobe Flex 4 and Adobe AIR rich Internet application (RIA) developers
- Provides: 3D charts, gauges, maps, calendars, OLAP & pivot charts and more

IBM ILOG Elixir Standard

Data-display components that help turn raw data into clear, actionable information through a highly graphical and interactive user experience.

IBM® ILOG Elixir® Standard provides Flex user interface developers with a collection of innovative display components. It consists of 10 graphical components that present data to users so that they can understand the information more clearly, react faster and make better decisions.

IBM® ILOG Elixir® Standard provides 10 ready-to-use user interface controls: 3D charts, gauges, maps, heat maps, calendars, OLAP and pivot charts, organization charts, treemaps, radar charts and timelines. IBM® ILOG Elixir® Standard's controls can be used individually or in combination, alongside other Flex components and they integrate with the Adobe Flash Builder 4 IDE.

The professionally documented software development kit (SDK) enables developers to fine tune the look or behaviors of the controls.

Adobe Flex and Adobe AIR form a powerful platform for creating graphically rich and highly interactive applications for the Internet (and desktop). It provides a wide variety of basic user interface components such as buttons, menus and charts. Many applications require user interfaces that are highly graphical, going beyond what is offered natively in the Adobe platform. IBM® ILOG Elixir® Standard enhances the Flex and AIR platforms by adding a set of advanced user interface controls for more intuitive, interactive displays.

Included controls:

3D Charts - IBM® ILOG Elixir® Standard comes with a full range of 3D charts that mirror the Adobe 2D charts. Upgrading to the third dimension and creating more appealing dashboards and custom applications has never been so easy.

Data Visualization
Create rich Internet applications (RIA) using Adobe Flex 4 and Adobe AIR.

3D Charts
IBM ILOG Elixir comes with a full range of 3D charts that parallel the Adobe 2D charts.

Gauges and Dials
Gauges and dials are fully interactive and designed to be connected to real-time data sources.

Heatmaps
Heatmaps help you display how your data is spread over geographies.

Calendar
Easily create custom and shared planning applications with the powerful calendar component.

Vector Maps
Map areas are colored to represent specific data and overlaid with any Flex object, such as charts and labels.

Gauges and Dials - Gauges and dials are fully interactive and designed to be connected to real-time data sources. Developers can use them "as is", customize them or easily create new ones with the powerful and open APIs.

Vector Maps - Easily add intuitive map displays to your developments. Reuse one of the provided maps or create custom ones from standard maps you already have. You can easily color map areas to represent your data and overlay these areas with any Flex object, such as charts and labels.

Heatmaps - Heatmaps help you display how your data is spread over geographies or a Web page for instance. Manipulate either x/y or lat/lon and see your data by density or by value.

Calendar - Easily create custom and shared planning applications with the IBM® ILOG Elixir® Standard calendar. Display multiple planning with advanced recurrence management.

Timeline - Create easy to read charts displaying a sequence of events

over a span of time. Leverage the built-in overview that allows intuitive navigation.

Organization Charts - Advanced employee organization charts are easy to create with IBM® ILOG Elixir® Standard. Quickly navigate through peers and management relationships with stunning animations.

OLAP and Pivot Charts - Replace OLAP grids with highly dynamic charts for improved insight and analysis in your custom data.

Radar Charts - IBM® ILOG Elixir® Standard radar charts are compact dashboard displays that are used to compare different key performance indicators (KPIs) between two or more entities.

Treemaps - Treemaps provide an interactive experience that includes dynamic drill down, user-defined clustering and segment coloring and sizing.

Infragistics

NetAdvantage Ultimate 2011 Volume 1

Create high performance UIs - whether on the desktop, Web or mobile platforms.

- Includes ASP.NET, Windows Forms, Silverlight, WPF and jQuery UI control toolsets in one robust package
- Features include charting, grids, data visualization, navigation and more.

NetAdvantage Ultimate

NetAdvantage Ultimate provides developers with flexible, advanced controls to rapidly build and style high-fidelity line of business application user interfaces.

NetAdvantage Ultimate includes components for every .NET platform – jQuery, Windows Forms, ASP.NET, WPF and Silverlight. With NetAdvantage Ultimate you receive every control (data grids, trees, ribbons, toolbars, tabs, calendars, editors, charts, maps, OLAP Pivot Grids and more) needed to create user experiences across every platform with stability, performance and robustness. NetAdvantage Ultimate includes line of business controls for jQuery, ASP.NET, Windows Forms, WPF and Silverlight, plus advanced data visualization for WPF and Silverlight. NetAdvantage Ultimate offers high

quality controls built on superior architecture for peak performance. The anchors of all of the toolsets are fast grids that have been architected to bind to data sources containing millions of rows of data, displaying the first screen of data within milliseconds.

The ASP.NET toolset includes grids, charts, calendars, menus, trees, tabs, rich HTML editing, integrated and standalone spell checking, CAPTCHA, explorer bars and data entry editors. You can build Web applications with the richness and performance users expect to find only in desktop applications.

Floor Plan Sample
Shape files used to present patient health status and equipment location. Filters are also used to allow specific views of the data.

xamMap
Present end users with geospatial data featuring panning, zooming, image tiling, mouseover effects and tooltips.

WebDataGrid
High performance, scalable ASP.NET AJAX data grid that excels at rapidly displaying and editing flat, tabular information.

xamTimeline
Complete control template support allows you to design timelines that have both compelling styling and interactivity.

xamWebChart
Communicate business data clearly over the Web with charts that embrace the rich animation and interactivity of Silverlight.

WebGauge
Radial gauges simulate instrumentation dials, clockfaces, speedometers with any number of hands and insets.

Based on emerging Web technologies including CSS3, HTML5 and streaming video, the jQuery suite of lightweight, high performance ASP.NET MVC and client-side jQuery controls can create compelling user experiences across all Web browsers and devices. Microsoft Office integration in this jQuery toolset enables you to create and work with Word documents, Microsoft Excel spreadsheets, and PDF/XPS files from within jQuery Web applications running on .NET.

You can move between WPF and Silverlight Line of Business platforms with clear and consistent APIs. The unified XAML product strategy offers you cross-platform controls with the quality and performance needed to

create innovative experiences. Create Microsoft Office-centric applications with both WPF and Silverlight, and take advantage of XAML scheduling and grid control features, as well as a calendar control that mimics the Windows 7 system calendar.

The Data Visualization controls include the Motion Framework™ which empowers you to show your end users the immersive and animated “story” of their data, as it unfolds over time.

Create mobile applications full of vivid visualizations with touch and gesture support optimized for mobile devices. Get started today in creating your own rich and vivid Microsoft Windows Phone 7 applications.

Accelerate Silverlight, WinForms, WPF, ASP.NET and ASP.NET MVC development.

- Includes components for grids, docking, charting, diagramming, PDF & Office reporting and scheduling
- Easily build WPF and ASP.NET Business Intelligence applications

Syncfusion Essential Studio Enterprise Edition

Syncfusion Essential Studio Enterprise is a dynamic and feature rich suite that has everything developers need to create Enterprise-class applications.

Syncfusion Essential Studio Enterprise includes all Syncfusion products on all technologies (WPF, Windows Forms, ASP.NET, ASP.NET MVC and Silverlight) Syncfusion Essential Studio Enterprise incorporates a unique debugging support system that allows switching between Debug and Release versions of the library with a single click from inside the Visual Studio.NET IDE. Dynamic and feature-rich, Syncfusion Essential Studio has everything developers need to create Enterprise-class applications.

Essential Edit (Win Forms, WPF) - Enhanced edit with great features such

as syntax highlighting and multi-level undo/redo.

Essential Grid (ASP.NET, ASP.NET MVC, Silverlight, Win Forms, WPF) - Excel-like, cell-oriented, light-weight, virtual, data-bound grid. It includes detailed customization down to cell level. Multilevel undo/redo, shared scrollbar support, data/view separation, floating cells, multiple cell and more.

Essential BI PivotGrid (WPF) - A grid control that simulates the pivot table feature of Excel. It pivots data to organize it in a cross-tabulated form.

Outlook UI
Create ASP.NET and Windows Forms applications that mimic the Outlook user interface.

Ribbon
Silverlight Ribbon is a user interface library that allows users to create UIs similar to Office 2007/2010.

Numerous Chart Types
Includes support for Enterprise quality chart creation capabilities with all the chart types you can think of.

Support for Financial Charts
Create advanced financial charts like the stock-volume chart you see above.

Static Diagrams
Use the Diagramming package to create Visio like diagrams and render them in your applications.

Dynamic Diagrams
You can also create diagrams dynamically based on relationships in the database.

The major advantage with the pivot grid is that you can extract the desired information from a large list within seconds. Along with presenting the data, the pivot grid also enables you to summarize and group data. It finds its main application in the financial domain, where it is used to organize and analyze business data.

Essential BI Gauge (Silverlight, WPF) - provides users with the ability to display Key Performance Indicators (KPI) from an OLAP cube. KPIs can be displayed with goals and status visualizations to help create executive dashboards.

Essential BI Grid (ASP.NET, Silverlight, WPF) - Use Essential BI Grid to summarize, analyze, explore,

and present summaries of data in your Enterprise and make informed decisions. Users can easily drill down into all levels of data and it can even be configured to drill down into relational data.

Essential Chart (ASP.NET, ASP.NET MVC, Silverlight, Win Forms, WPF) - A business-oriented charting component which offers an innovative data object model that makes it easy to populate a chart with any kind of data source.

Essential Diagram (ASP.NET, Silverlight, Win Forms, WPF) - An extensible, .NET diagramming component that can be used for developing Visio-like interactive graphics and diagramming applications.

Actipro SyntaxEditor for WPF, Silverlight & WinForms

The ultimate syntax-highlighting code editor control

- ◆ Mimics the Visual Studio code editor
- ◆ Create custom syntax language definitions
- ◆ Lexing, parsing, AST generation, squiggle lines
- ◆ Code outlining and custom margins
- ◆ IntelliPrompt completion lists, quick info & more
- ◆ Over 100 stock editing commands

Optional Language Add-ons

- ◆ Advanced C#, VB and XML languages
- ◆ Automated IntelliPrompt & validation
- ◆ Document outlining & auto-complete

Other Free Add-ons

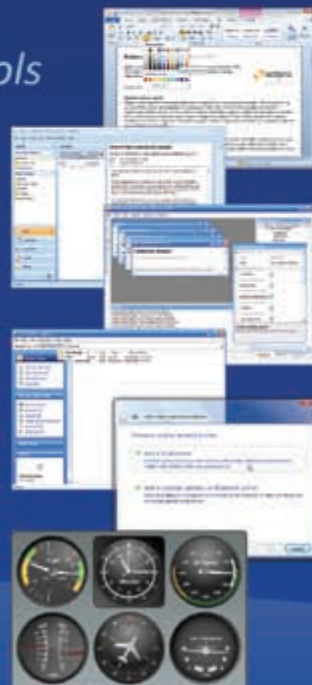

- ◆ Innovative grammar-based parser framework
- ◆ Easy integration with ANTLR, Irony (WPF only)

Actipro WPF Studio

Jumpstart your WPF application's UI with over 55 controls

Bundled suite includes all Actipro WPF controls at one low price:

- ◆ SyntaxEditor - Syntax-highlighting code editor control like in VS 2010
- ◆ Ribbon - Office 2010 ribbon UI with Backstage application menu
- ◆ Docking & MDI - Docking windows and MDI with full MVVM support
- ◆ Navigation - Navigation/explorer bars, breadcrumbs, zoom UI
- ◆ PropertyGrid - Blend and VS-like property grid
- ◆ DataGrid - Themes, behaviors, editors integration w/MS DataGrid
- ◆ Editors - Part-based & masked editors w/advanced date/time picker
- ◆ Wizard - Aero wizard and wizard 97 dialogs
- ◆ Gauge - Circular, linear, and digital gauges
- ◆ Bar Code - Vector bar codes with 2D and linear symbologies
- ◆ Views - Book control and animated panels with fluid transitions
- ◆ 1 year of support & free upgrades

Actipro Software

Actipro WPF Essentials 2011.1

A suite of professional user interface controls and components for WPF.

Actipro WPF Essentials

Actipro Docking & MDI
A complete solution for easily adding a docking tool window and/or multiple document interface to your WPF applications.

Actipro Wizard
An advanced component for building wizard dialogs in Windows Presentation Foundation (WPF).

Breadcrumb
Provides all the functionality found in the Windows explorer addressbar control and more.

- Enhancements, editors integration, and themes for the MS WPF DataGrid
- A complete docking tool window and multiple document interface solution
- Everything you need to quickly create wizard dialogs in your WPF applications

Actipro WPF Essentials includes the most popular WPF components produced by Actipro Software including: Docking & MDI, Editors, DataGrid, Navigation, Ribbon, and Wizard. Actipro Wizard is a control for building wizard dialogs that conform to the Aero Wizard and Wizard97 specifications. Actipro Editors is a control suite that implements data

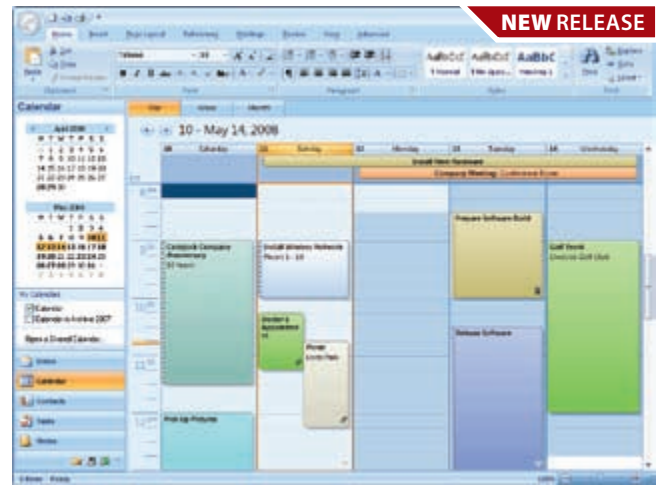

entry controls including a masked textbox and parts-based editors. Each control has numerous options available and allows for more intuitive data entry. Actipro Docking & MDI is a solution for adding a docking window or multiple document interface to your applications. Actipro WPF Essentials includes one year subscription and is run time royalty free.

DEVPIA

DEXTUpload .NET Pro V4.0

Add the ability to upload files to your Web applications.

DEXTUpload .NET Pro

Single and Multiple Uploads
DEXTUpload .NET Pro allows you to upload single and multiple files.

Upload Progress
You can display a custom progress bar during the upload process.

Image Size
You can upload images and extract the dimensions of the image.

- Allows uploads of upto 2GB in size
- Use of optimized parsing algorithm makes uploading speed even faster
- Able to upload files to a database via a BLOB (Binary Large Object)

DEXTUpload .NET Pro is a component that supports file uploads and downloads between a Web browser and an IIS Web server. It observes Internet standards (RFC 1867) and can be used in Microsoft ASP.NET.

DEXTUpload .NET Pro is HTTP-based and uploads files from a Web browser to a Web server quickly and efficiently. It overcomes the limitations of ASP.NET uploading (inconsistency for high capacity file uploads, server overloads and safety, etc.), is written in C# and provides you with improved

upload speeds and stability. During upload and download you can invoke a progress window automatically without installing any other software. The pop-up progress window shows you uploading speed, file size, uploaded file size and time remaining. It can also be customized by using progress objects. DEXTUpload .NET Pro allows you to watermark uploaded images and convert uploaded images to thumbnails. It supports various file conversion formats (BMP, JPG, GIF etc.) and provides detailed information about image files.

FusionCharts Bundle

Cross platform charting solution for ASP, ASP.NET, PHP, JSP & AJAX applications.

FusionCharts Bundle

FusionMaps
Create animated, interactive and data-driven Flash Maps for your dynamic Web applications.

FusionCharts
Interactive and animated charts for ASP and ASP.NET applications.

FusionWidgets
Real-time Financial and Dashboard Charts for the Web.

- Generate interactive and animated flash charts & maps in minutes
- Supports over 75 chart types and 450 maps
- Build cross-browser and cross-platform solutions

FusionCharts Bundled Pack includes: FusionCharts, PowerCharts, PowerMaps and FusionGadgets. The Pack provides developers with a collection of Flash components for creating highly visual Web applications based on the Adobe Flash Platform. Developers can build cross-browser solutions which blend content, application logic and communications delivering an effective end user experience.

FusionCharts delivers interactive and eye catching Flash charts. FusionMaps can plot over 450 maps, including all continents, major countries and all US states. FusionWidgets is a collection of gauges, self-updating charts and financial charts, funnel/pyramid charts, bullet graphs, sparklines etc. The product can be used with any Web scripting language: ASP, .NET, JSP, PHP, ColdFusion & Ruby on Rails etc.

InstallAware

InstallAware Studio 12

A setup authoring tool for ISVs and Enterprises deploying products, patches and Web updates.

InstallAware Studio

One-Click Technology
Deploy technology modules and runtimes, such as Microsoft SQL Express and Crystal Reports.

Dialog Designer
InstallAware's dialog editor lets you customize the 15 pre-built setup themes, or design your own themes.

Import .MSI and .MSM Files
Directly import MSI and Merge Modules created by other packaging applications, and edit them within InstallAware.

- InstallAware setups are easily distributed through Group Policy Objects and other software distribution systems
- Deliver setups that display the latest visual themes

InstallAware is a software installation solution for Windows Installer that enables MSI code scripting for rapid setup development without the high cost and steep learning curve of other setup solutions. With InstallAware you can build sophisticated installations in record time without any programming or scripting skills.

InstallAware provides you with the latest features and technology support, with the advantages of true rapid-Windows Installer development productivity. InstallAware allows you

to ship a single hybrid MSI for both your 32 bit and 64 bit customers by detecting and supporting ia64 and x64 systems including Itanium, AMD64, and EM64T.

InstallAware can check your target system and detect whether the operating system is running on a virtual machine. A simple checkbox lets you limit distributions to physical machines. It also makes it easy for your users to update their software via the Web, by automating the notification, download, and setup process.

Janus Systems

Janus WinForms Controls Suite V4.0

Add Outlook style interfaces to your .NET applications.

Janus WinForms Controls Suite

Office 2010
Janus WinForms Controls Suite offers an Office 2010 visual style for all controls included in the suite.

Janus Schedule Control for .NET
Present appointments and related owners in different views, representing Days, WorkWeeks, Weeks and Months.

Ribbon Component
Janus WinForms Controls Suite includes a Ribbon control.

- Includes an Outlook style grid, calendar view, journal, Ribbon and shortcut bar
- Supports snap lines, base lines, ImageList keys and more
- Unbound mode in GridEX allows you to populate rows using AddItem method

Janus WinForms Controls Suite consists of 100% .NET managed code components that are designed to provide user interfaces for .NET applications patterned after Microsoft Outlook. Janus WinForms Controls Suite contains: Janus GridEX for .NET (Outlook Grid - with new support for multiple cell selection), Janus Schedule for .NET (Outlook Calendar View), Janus Timeline Control for .NET (Outlook Journal), Janus ButtonBar Control for .NET and ExplorerBar Controls for .NET (Outlook Shortcut

Bar), Janus CommandManager (Menus and Toolbars), Janus PanelManager (Outlook/VS.NET panes), Janus TabControl (tab features) and Janus Ribbon for .NET (Office style Ribbon bar with Backstage menu and tab functionality). Janus Winforms Controls Suite includes an Office 2010 Visual Style for all controls along with support for Visual Studio 2010 and .NET Framework client profiles. Included are complete sample applications so you can add an Outlook 2010 look and feel to your applications in no time.

Neuron

Neuron Chart for .NET Enterprise 2011.1

A powerful, flexible and extensible charting component for Windows Forms and ASP.NET.

Neuron Chart for .NET

Professional Quality
Allows you to produce professional presentation quality with stunning visual effects.

Customization and 3D Support
Provides XYZ scatter graphs, multiple and controllable axes, scatter stack charts, zooming and scrolling capabilities.

Neuron Financial Charting
Includes charts for specifically targeted software firms: banks, brokerage firms, investment firms and other financial companies.

- Includes many chart types and circular/radial/linear gauges
- Includes scrollable axes, integrated legend, chart annotations, watermarks and an extensible chart layout manager

Neuron Chart for .NET has been designed to be extensible, efficient and feature rich. It can display virtually any 2D or 3D chart including: bar, line, step line, area, pie, point, bubble, stock, floating bar, radar, polar, high low, mesh surface, grid surface, shape, smooth line, floating bar, Venn and error with many variations (like scatter XY and XYZ line, stacked bars etc.).

The component features full Visual Studio design time support with many advanced features like style editors. It also comes with support for many advanced features including: customizable legends, unlimited axes, zooming and scrolling, grouping, filtering, full set of gauge types, advanced formula support, financial and statistical functions and more.

Text Control

TX Text Control .NET for Windows Forms V16

Read, edit and create documents in formats like MS Word DOCX, DOC, RTF, PDF, HTML and XML.

TX Text Control .NET for Windows Forms

Character and Paragraph Formatting
Offers formatting control over character and paragraph presentation.

Bullets and Numbered Lists
Provides support for bulleted and numbered lists. Lists can be incremented and numbered automatically.

Headers and Footers
End-users can use the same header and footer throughout a document.

- Standardized WYSIWYG interface for ASP.NET & WinForms
- Supported formats include DOC, DOCX, RTF, TXT, HTML, CSS, XML and PDF
- Create and save ISO conforming PDF/A documents

TX Text Control .NET for Windows Forms is a royalty-free word processing control that offers developers a broad range of word processing features in one reusable component. It gives your application the ability to read, edit and create documents in most popular formats such as RTF, Microsoft Word, HTML, CSS and XML. In addition, TX Text Control .NET for Windows Forms can convert these file formats to PDF without any third-party software.

The fully programmable component supports nested tables, document sections, images, text frames, drag and drop, headers and footers, bulleted and numbered lists and MS Word compatible mail merge fields for database applications.

Typical applications include mail merge, PDF creation, document conversion or WYSIWYG word processing.

Xceed Software

Xceed Ultimate Suite 2011 v2

Advanced UI controls and data manipulation libraries, for COM, .NET, CF, WF, WPF and Silverlight.

Xceed Ultimate Suite

Xceed Upload for Silverlight
Supports uploading multiple files in a single transaction, and supports GZip and Deflate, with controllable compression.

High-quality, Fast ASP.NET 2D/3D Chart Control
Supports 14 major 2D/3D chart types, flexible axes, scaling, legends, drill-down, etc.

Xceed DataGrid for WPF
Features include hierarchical master-detail; 12 flexible, themed editors; an interactive Cardflow 3D view and more.

- All Xceed's .NET, CF, WPF, WF, Silverlight, COM and ActiveX components
- 1 year Vanguard subscription includes free updates, free upgrades, all new Xceed product releases and priority support

Xceed Ultimate Suite offers both User Interface tools for application front-ends and data handling libraries for application back-ends.

(Silverlight, .NET, ASP.NET, CF, ActiveX) and binary encoding (ActiveX).

The Suite includes functionality for compression (Silverlight, .NET, ASP.NET, CF, ActiveX), encryption (ActiveX), user interface (WPF, .NET, ASP.NET, ActiveX) data manipulation (WF), file transfer

Xceed Grid for .NET (included in Xceed Ultimate Suite) comes with 120+ features: grouping, master/detail, Windows and Office theming, fixed rows and columns, Excel export, gradient maps, interactive visual styles and cell UI virtualization.

Accusoft Pegasus Barcode Xpress 70

Add robust barcode recognition & creation to your applications.

- Tools include mirroring, flipping, zooming, rotating, negating and more
- Supports 21 1D barcodes including Code 39/128/93 and EAN-8/13

Barcode Xpress

Barcode Xpress allows you to create applications to read 1D (linear) and 2D barcodes. It provides many preprocessing functions that let you manipulate and clean up your image prior to barcode analysis including mirroring, flipping, zooming, rotating, negating, and more. Barcode Xpress supports 21 1D barcodes including Code 39/128/93, EAN-8/13, and

2D barcodes including PDF417. It is designed to support document capture, indexing, archiving and process automation applications. Available as both a .NET and ActiveX toolkit, it locates barcodes anywhere on a page, decodes barcodes, reports the content, reports recognition confidence values, and also writes barcodes.

AG-TECH Btrieve Classes for .NET V4.0

Fast, easy to program access to Pervasive.SQL databases from .NET.

- Provides direct access to Pervasive's transactional interface from within .NET
- Extended class enables maximum performance when searching Pervasive data

Btrieve Classes for .NET

Btrieve Classes for .NET is a set of .NET database access support classes that enable fast, easy to program access from .NET programs to Pervasive.SQL databases via the Btrieve API. As such they greatly help developers looking to write .NET programs accessing data in Pervasive.SQL databases or those looking to migrate existing pre-.NET Btrieve/Pervasive applications to .NET.

This product includes two types of class library the first (DDF Class) is specifically designed for the .NET Framework and is composed of classes that enable smart and efficient access to column data and definition of data type conversion code. The second type of class (Native Class) provides Btrieve API level access from .NET managed code.

Btrieve Classes for .NET performs with greater efficiency and hence is faster than ADO.NET or Pervasive's OLE DB provider.

Btrieve Classes for .NET includes full support for Pervasive PSQL v9 and Visual Studio.

Change Vision

astah* professional V6.4

Business process UML modeling tool.

- Edit model information directly, without opening dialog boxes
- Supported diagram types include Class, UseCase, Sequence, Collaboration, StateChart, Activity, Component and Deployment

astah* professional

astah* professional is a system design tool which supports UML, Entity Relationship Diagrams, flowcharts, CRUD, data flow diagrams, requirements tables and Mind Maps.

astah* includes basic features to make modeling simple and user friendly. astah* is suitable for business use, handling large-sized models and document creation. It includes enriched features, such as the ability to change your view freely using a map

view, zoom by dragging, unlimited undo/redo, the ability to output project information to a CSV file, automatic generation of class diagrams with model information, diagram creation guidance and more. astah* supports basic UML 1.4 diagrams including: UseCase, Sequence, Collaboration, Statechart, Activity and Class. You can lock project files from other users, set the font for the whole project file and configure print settings for each diagram.

MetaDraw ActiveX V3.1

Give your application support for the creation, editing, and displaying of Metafiles.

- Full support for Object Oriented editing: moving objects, sizing, changing colors and other attributes
- Save/load pictures to/from database fields

MetaDraw

MetaDraw is a special purpose picturebox/image editing component. It is an Object Oriented image component for multimedia, image editing/annotation, etc. MetaDraw allows you to create, edit, display and save pictures built from a set of graphic objects. To your application, it looks like a standard picturebox, but it offers unique support for metafiles - a

graphical format well suited to the drawing and/or moving of graphical objects - including the ability to tag individual graphic objects for HyperGraphic/HotSpot applications.

You can also use MetaDraw as a metafile viewer with support for zoom, scroll and even selective display of individual elements.

Chant

Chant Developer Workbench 2011

Comprehensive development and testing environment for working with speech.

- ActiveX, C DLL, COM, Java, .NET, VCL, Web, Win32, Win64 & WinCE libraries
- Supports Dragon, ViaVoice, SAPI, and VoCon recognizers
- Supports Acapela, Cepstral, RealSpeak Solo, & SAPI synthesizers

Chant Developer Workbench

Chant Developer Workbench is comprised of tools and components for developing software that speaks and listens. As an interactive toolset, it provides a development and testing environment for working with the component libraries and the speech technology objects they manage. It includes a multi-document, interactive, customizable environment,

a powerful editor with color-coded formatting, command line testing and event tracing.

With the component libraries, you can manage grammars, lexicons, profiles, recognizers, synthesizers, and text-to-speech markup directly within application software you develop and deploy.

All these data sources at your fingertips – and that is just a start.

RSSBus Data Providers [ADO.NET]

Build cutting-edge .NET applications that connect to any data source with ease.

- Easily "databind" to applications, databases, and services using standard Visual Studio wizards.
- Comprehensive support for CRUD (Create, Read, Update, and Delete operations).
- Industry standard ADO.NET Data Provider, fully integrated with Visual Studio (2008 and 2010).

Databind to the Web...

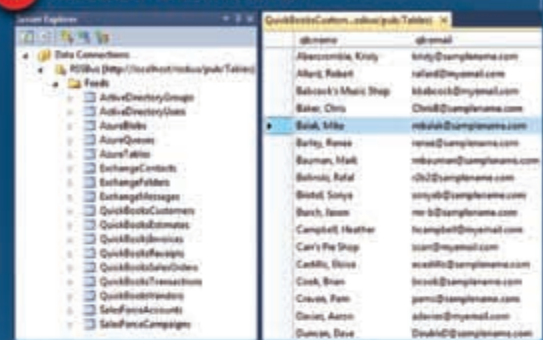

The RSSBus Data Providers give your .NET applications the power to databind (just like SQL) to Amazon, PayPal, eBay, QuickBooks, FedEx, Salesforce, MS-CRM, Twitter, SharePoint, Windows Azure, and much more! Leverage your existing knowledge to deliver cutting-edge WinForms, ASP.NET, and Windows Mobile solutions with full readwrite functionality quickly and easily.

Databind to Local Apps...

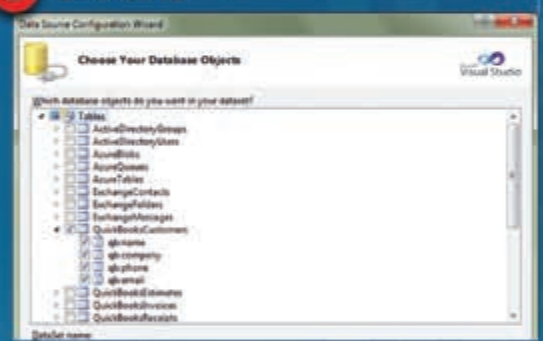

The RSSBus Data Providers make everything look like a SQL table, even local application data. Using the RSSBus Data Providers your .NET applications interact with local applications, databases, and services in the same way you work with SQL Tables and Stored Procedures. No code required. It simply doesn't get any easier!

Data Techniques

FaxMan V4.6

Seamlessly embed fax support into your Windows applications.

- Create faxes from any application using the FaxMan printer driver
- Sophisticated logging keeps track of every fax you schedule
- Supports almost all Class 1, Class 2, and Class 2.0 fax modems

FaxMan

FaxMan is a programmable fax engine for providing fax sending and receiving capability with total control over the faxing process and the user interface. The developer kit includes ActiveX OXC, DLL and managed .NET component interfaces to support virtually any Windows application, and automatically works with almost all Class 1, Class 2, and Class 2.0 fax

modems. FaxMan includes sample source code in Visual Basic and Visual C++.

The FaxMan SDK allows developers to integrate Fax support for industry standard fax modems in hours instead of the months it would take to write support from scratch.

Barcode Tools for Crystal Reports V2.0

Add barcodes to your Crystal Reports.

- Works with Crystal Reports 8.5-XI
- Supports most common barcodes, including 2 of 5, 3 of 9, Code 11, Code 39, Code 93, Code 128, Code B, Deutschen Post, EAN-13, EAN-14, GS1/EAN/UCC-128 and many more

Barcode Tools for Crystal Reports

Barcode Tools for Crystal Reports provides the tools needed to include most common barcodes within Crystal Reports, either as graphic images or as font-based barcodes. A local machine server is included for embedding picture barcodes in Crystal Reports XI or later. Server versions include servlets for IIS and Java for use on a remote machine or a company server.

A User Function Library (UFL) is also included for creating font-based barcodes in Crystal Report 8 or later. Barcode Tools for Crystal Reports also includes an OLE server for use with the Report Designer Component for VB6 supplied with Crystal Reports 8-9. Sample reports are included for Crystal Reports 8.5, 9, X and XI.

Fast Reports

FastReport 4 Enterprise

Efficient report generator for Delphi.

- Export filters allow you to export your report to PDF, RTF, XLS, XML, HTML, JPG, BMP, GIF, TIFF, TXT, CSV and Open Document Format
- Built-in script engine lets you perform complex data handling

FastReport

FastReport Edition is a VCL component that allows applications to generate reports quickly and efficiently.

It is a band-oriented report generator which comes with a wide range of band types allowing you to create any kind of report. Reports can consist of several design pages so you can build a report that consists of a cover,

data and a back cover - all in one file. FastReport includes a visual report designer that supports zooming, undo, redo, guidelines, rulers and more. You can also give your users the ability to modify reports and create new ones. FastReport can be used in Delphi 4-2010, C++Builder 6-2010 and RAD Studio environments.

Setup Factory V9.0

Create professional installations using a clear visual design environment.

- Wizard based creation of installation packages (no coding needed)
- Code editor for advanced developers to 'fine tune' installations
- Extensive customization through actions library, themes and skins

Setup Factory

Setup Factory offers developers a solution for creating flexible installation systems without needing to learn a proprietary scripting language. It further sets itself apart by providing the customization and advanced control features that developers require, all from within the Setup Factory Visual Design Environment. You can even deploy your applications on

Web servers. Setup Factory contains a scripting engine that offers all the usual programming logic such as loops, functions and arrays and more. It includes an action wizard that makes it easy, even for someone with zero programming knowledge to simply click to add actions. Also included is a script editor that makes it easy for advanced users to edit code directly.

VARCHART XGantt .NET V4.4

Gantt charts for adding visual scheduling to your .NET applications.

- Represent data as bars, symbols or bitmaps with individual labels
- Summarize and sort data by groups - allows multi-level grouping
- Excellent runtime performance - handles in excess of 20,000 records

VARCHART XGantt

VARCHART XGantt is a graphical charting software component for visualizing critical business activities. It offers clear, concise and detailed process flows and identification, tracking, scheduling and allocation of tasks and resources over time is also possible. You can create intuitive interactions that allow your customers to adapt the diagram without

editing the data. The data exchange between VARCHART XGantt and your application is performed via a file or via the application programming interface. You can supply the data as a complete record or field by field. VARCHART XGantt may be used for in-house applications as well as for products or applications to be sold to third parties.

Newton

ImageKit7

Create, edit and manipulate a variety of image types to enhance your applications.

- Display Vector Data (DXF(2D), WMF, EMF, SVG, SXF)
- Images are resized to fit the dimensions of the ImageKit Control
- Multi-layer functionality

ImageKit7

ImageKit7 allows you to add image processing functionality to your applications quickly and easily. ImageKit7 lets you load and save image files; edit, display, and print images; draw shapes and text on images; display images as thumbnails or in slideshows. It supports JPEG2000, SVG, SXF and other new file formats. It can load and save image data directly from memory and can stream image data directly to a browser. It can read BLOB data from and save

BLOB data to databases and can convert raster image data to vector image data. ImageKit7 can retrieve images from TWAIN scanning devices and can automatically detect paper when scanning. ImageKit7 is a multi-threaded component that can be used for Web server application development. Included are methods that support variant type parameters for use in ASP and other scripting languages that require variant types.

O2 Solutions PDFBundle4NET V1.0

Create, edit and view PDF's in your .NET applications.

- Create PDF files from any .NET compatible language, like C# or VB.NET
- PDF Viewer includes: documents, pages, bookmarks, annotations and attachments viewer

PDFBundle4NET

PDFBundle4NET includes PDF4NET and PDFView4NET. PDF4NET is a .NET library for creating, editing and filling PDF files on the fly from any .NET application. The library provides a simple API that allows you to create complex PDF documents, or to edit existing PDF files with a few lines of code. Its core functionality can be divided into 3 main areas: PDF

creation, PDF editing and PDF forms filling. PDFView4NET is a .NET toolkit for displaying and printing PDF files in .NET applications. It includes a PDF viewer control for Windows Forms and a .NET library for rendering and printing PDF files from any .NET application. The PDF viewer control includes support for annotating PDF files, bookmarks, attachments & more.

plexityHide.com GTP.NET V3.3

Add interactive Gantt charts and scheduling to your applications.

- Supports AJAX with client-movable and resizable time items
- Features asynchronous collision detection and handling of time items
- Security awareness enables deployment on XBAP or ClickOnce

GTP.NET

GTP.NET's overall goal and purpose is to let you visualize and manipulate time based information. GTP.NET includes a collection of user interface components which handle time blocks. The time blocks are displayed in a Gantt chart or a schema view. The times are connected to an owner, for example a person or an activity in a project. You can also use it to display dependencies and collisions between

times, which gives the end user a graphical way to view and modify the project.

GTP.NET includes the ability to select and re-assign links and also provides databinding for links between time items. The components can be delivered via WinForms, AJAX, ASP.NET, and even in reduced trust environments like ClickOnce and XBAP.

PDFlib PDFlib 8

Create PDF files from within server-side or client-side software.

- Includes functions for creating text, graphics, images and links
- Dynamically generate PDF files from Web or database server data
- New table formatter

PDFlib

PDFlib is a component that allows you to programmatically create PDF files from within your own server-side or client-side software. PDFlib doesn't make use of third-party software for generating PDFs, nor does it require any other tools. PDFlib is available for all major operating systems and development environments. It offers a variety of functions, including a table

formatter, PDF/A output for longtime archiving, AES encryption, integrated pCOS analyzing tools and a repair and optimization mode for inputting PDFs.

PDFlib can generate PDF data directly in memory (instead of on file), resulting in better performance and avoiding the need for temporary files which speeds up PDF generation.

Raize Software CodeSite V4.6

Locate and eliminate problems in your Delphi and C++Builder code.

- Captures detailed information
- CodeSite messages do not interrupt the flow of your application
- Live logging and file logging can be performed either locally or remotely

CodeSite

CodeSite is an add-in for Delphi and C++Builder that enables you to send detailed information (including string lists, objects, even bitmaps) from within your application code to a specialized receiver. Unlike message boxes and inspecting variables on breakpoints, CodeSite messages are not transient. The resulting log of messages sent to a destination

provides valuable information for locating problem areas in your code. Sending CodeSite messages does not interrupt the flow of your application as happens when message boxes and breakpoints are used. As a result, CodeSite is much more effective in situations where user interactions (e.g. focus changes) and painting issues need to be tracked.

Resco

Resco MobileForms Toolkit 2011

Develop advanced UIs for mobile device applications.

- Includes grid, calendar, listview, input form, zip compression, navigation and touchscreen signature controls
- All controls now support touch functionality

Resco MobileForms Toolkit

Resco MobileForms Toolkit is a suite of components designed specifically for mobile devices. It includes advanced designers, support of quick data loading, standardized mobile user interfaces, Enterprise samples and many other features. It contains AdvancedList, AdvancedTree, CompactChart, DetailView, SmartGrid, Zip and Outlook Controls.

All Resco MobileForms Toolkit components have been specifically designed so they fit the small displays of mobile devices perfectly.

Special optimizations such as Resco DelayLoad technology ensures performance is optimized even on devices with limited memory and processor capabilities.

SyncRO Soft

<oxygen/> XML Editor Enterprise V12.2

Tools for XML authoring & conversion plus XPath, XSLT and XQuery development.

- Visual WYSIWYG XML editing mode based on W3C CSS stylesheets
- Grid editor allows you to edit repetitive XML content in a special layout similar to a spreadsheet application

<oxygen/> XML Editor

<oxygen/> XML Editor provides the tools for XML authoring, XML conversion, XML Schema, DTD, Relax NG and Schematron development, XPath, XSLT, XQuery debugging, SOAP and WSDL testing.

<oxygen/> XML editor supports the ability to browse, manage and query native XML and relational databases and supports a large number of text encodings including Unicode.

Integration with XML document repositories is made through WebDAV, Subversion and S/FTP protocols.

<oxygen/> XML editor is also available as an Eclipse IDE plugin, bringing unique XML development features to this widely used Java IDE.

Sax.net

Crescent QuickPak V4.5

Visual and performance enhancements for Windows applications.

- Custom calendar, combobox, data entry and presentation controls for ActiveX applications
- Easily access the power of the Windows API

Crescent QuickPak

Crescent QuickPak is a comprehensive collection of ActiveX components that can be used to develop applications that will reduce development time and increase productivity. Crescent QuickPak includes the following custom controls; calendar display, caption, enhanced frame and checkbox, extended command button, enhanced combo box, form enhancement, hypertext, frame and option button, data-specific input edit controls, enhanced list boxes

and additional display controls. It also includes functions to open, read, and parse IIS log files, convert log files to HTML tables, and get and set IIS properties in either the local or remote system registry. It has low-level routines for fast performance. Crescent QuickPak also has high-level methods such as financial and statistical routines, file operations: searching and encryption, copying on wild card specifications, file access routines and error-handling.

FinalBuilder 7.0

Automated build and release management solution.

- Integrates with version control systems/Source code repositories
- Includes a broad range (600+) of action types that cover almost any task you might need to automate

FinalBuilder

FinalBuilder is an automated build and release management solution for Windows software developers and SCM (Software Change Management) professionals. Use FinalBuilder to define, debug, maintain, run and schedule reliable and repeatable build processes. FinalBuilder's user interface has been carefully crafted to make it as easy-to-use as possible. Anyone in your team can use FinalBuilder to automate tasks. You can compile applications from source code, compile setup

installer programs, work with version control systems, handle versioning with ease, create and edit INI files and Windows registry keys, burn CDs and DVDs, or create CD/DVD images (ISO images), zip and unzip files and other archive formats, run automated testing, FTP files to/from servers, send emails, post on news servers, handle errors, run multiple tasks in parallel and dynamically change the build flow, iterate over sets of files and other lists and more.

Syncfusion: Facts in Black & White

We concentrate on stability and reliability. It is no secret. With a quiet commitment to customers and code, you may not be aware that we're the backbone of many applications. The reason: While others concentrate on flash-in-the-pan, we put sustenance on the table.

Time Tested

We've been with .NET since its beginning, and in that sense, we're proud to have some age on us. It means that our controls have been brought to maturity. Stability and reliability are their earmarks. When you drop one of our components in your application, you can be confident it's been tested not only by our QA, but also within the context of the real world.

Vast Offering

We've created one of the largest arrays of components on the market. Count the number of discrete controls, and you'll see. The breadth of our offering provides the flexibility to change all aspects of your application fully without relearning the differing minds of multiple vendors. With Syncfusion, all you need to know is one.

Forward Looking

With an eye on the horizon, we advance in HTML5, ASP.NET MVC, and Silverlight for web and Windows Phone 7. We possess a passion for the new. A thirst for progress. And we invite you to come see all we are doing, and all we will do, in the new frontiers of development.

what we mean by 360° transformation

Syncfusion is your development partner—a helping hand outreached. In one ad, we couldn't possibly sell you on all our products; with one magazine, we couldn't possibly convince you of our commitment to service. But we can show you. We invite you to test our full 30-day evaluation—we are confident it is enough. During the trial, please utilize our support to see what we mean by 360° transformation.
