The Market Leader in Internet Communications, Security, & E-Business Components

Each day, as you click around the Web or use any connected application, chances are that directly or indirectly some bits are flowing through applications that use our components, on a server, on a device, or right on your desktop. It's your code and our code working together to move data, information, and business. We give you the most robust suite of components for adding Internet Communications, Security, and E-Business Connectivity to

any application, on any platform, anywhere, and you do the rest. Since 1994, we have had one goal: to provide the very best connectivity solutions for our professional developer customers. With more than 100,000 developers worldwide using our software and millions of installations in almost every Fortune 500 and Global 2000 company, our business is to connect business, one application at a time.

/n software

/n software Red Carpet Subscription Q1 2012

Write communications, security and e-business applications.

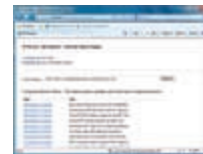

- Includes components for FTP, IMAP, SNMP, SSL, SSH, S/MIME, digital certificates, credit card processing and e-business (EDI) transactions
- Windows WF activities for transferring files, email and more

/n software Red Carpet Subscription

IP*Works!
A comprehensive framework for Internet development.

Internet Communications
ATOM, REST, MX, DNS, RSS, NNTP, SMTP, POP, Rexec, Rshell, SMTP, SOAP, Telnet, Ping, TFTP, FileMailer, NetClock, FTP, HTTP and more.

Secure Components
/n software Red Carpet Subscription includes secure versions of many of the IP*Works! components.

SharePoint Integrator Products
Interface directly with SharePoint Server and provide access to a wide range of SharePoint data access and management capabilities.

Windows Workflow Foundation Activities
Includes activities that make it easy to integrate Internet capabilities into your workflow packages.

Everything in One Subscription
There are no technology restrictions, you get everything. .NET, COM, C++, Java, UNIX, Linux even Mac OS X and iPhone.

One developer, multiple workstations, all /n software products.

/n software Red Carpet Subscription gives you components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, digital certificates, credit card processing, ZIP compression, shipping & tracking, e-business (EDI) transactions, robust Enterprise ready Internet connectivity, secure messaging and file transfer for Windows Workflow Foundation. There are no licensing restrictions, so you can code on your work machine, your notebook or even your home machine. Plus there are no technology restrictions, so you get everything: .NET, COM, C++, Java, Pocket PC, UNIX, Linux, Mac OS X and iPhone. You receive quarterly update

CDs with free updates, upgrades and new releases. It includes more than \$30,000 worth of software including: all /n software products - IP*Works!, SSL, S/MIME, S/Shell, Zip, EDI, Amazon Integrators, Shipping Integrators, SharePoint Integrators, Integrators for QuickBooks, Enterprise Adapters, Paymentech, E-Payment, Vital/TSYS, USPS, PayPal, Workflow Activities etc.

/n software Red Carpet Subscription includes IP*Works! which is a comprehensive framework for Internet development and is the core building block for most /n software products. IP*Works! eliminates the complexity of Internet development by

providing easy-to-use, programmable components that facilitate tasks such as sending email, transferring files, managing networks, browsing the Web, consuming Web services, etc.

It includes support for all major internet protocols: ATOM, DNS, FileMailer, FTP, HTMLMailer, HTTP, ICMP, IMAP, IPDaemon, IPInfo, IPMonitor, IPPort, LDAP, MCast, MIME, MX, NetClock, NetCode, NetDial, NNTP, Ping, POP, RCP, REST, Rexec, Rshell, RSS, SMPP, SMTP, SNMP, SOAP, Syslog, Telnet, TFTP, TraceRoute, UDPPort, WebDav, WebForm, WebUpload, Whois, XMLP and XMPP.

Also included in the /n software Red Carpet Subscription is IP*Works! SSL

which is a suite of secure, SSL-enabled drop-in replacements for the "classic" IP*Works! components.

/n software components are fast, robust, and reliable and consume a minimum of resources. They are small and lightweight with no dependencies on external libraries. Included are native development components for all supported platforms. IP*Works! includes a complete unified framework with a common, easy to learn object model and simplified interfaces allowing you to be more productive. The components are rigorously tested having undergone thousands of hours of testing, you also get reference documentation, hundreds of sample applications and fully indexed help files.

RSSBUS DATA PROVIDERS *for ADO.NET*

DATABIND TO ANYTHING JUST LIKE YOU DO WITH SQL

Build cutting-edge applications that connect to any data source with ease!

- Databind to Applications, Databases, and Services
- Full Create, Read, Update, and Delete (CRUD) Support
- Royalty-Free Licensing
- No Coding Required
- Fully Integrated with Visual Studio (2008 and 2010).

Databind to Applications & Services

The RSSBus Data Providers give your .NET applications the power to databind (just like SQL) to Salesforce, MS-CRM, SAP NetWeaver, QuickBooks, Amazon AWS, Google Apps, SharePoint, Oracle, Windows Azure, and much more! Leverage your existing knowledge to deliver cutting-edge WinForms, ASP.NET, and Windows Mobile solutions with full readwrite functionality quickly and easily.

Just Like Working with SQL Server

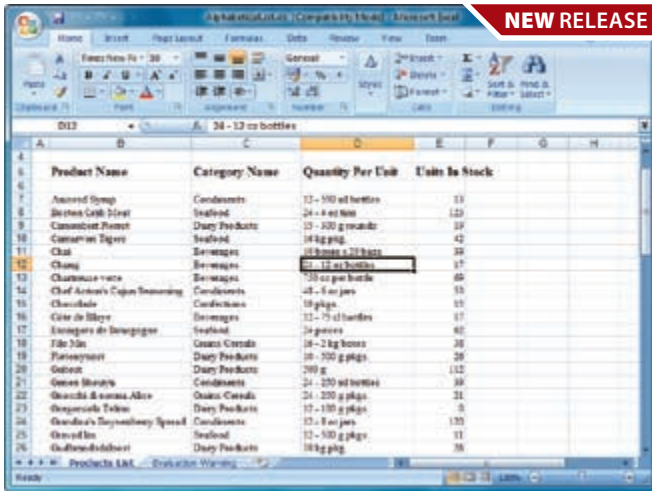

With RSSBus Data Providers everything looks like a SQL table, even local application data. It is a one-stop tool for easily connecting to virtually any data source. Using the RSSBus Data Provider your .NET applications interact with local applications, databases, and services in the same way you work with SQL Tables and Stored Procedures. No code required. It simply doesn't get any easier!

Aspose

Aspose.Total 2012

Create, manage and convert many popular document formats.

- Supports Word, Excel, PowerPoint, Project, PDF and Flash file formats
- Demos written in C# and VB.NET highlight the best practices for implementing many common tasks

Aspose.Total

Aspose.Total for .NET offers every .NET component that Aspose has available as well as all new components released during the annual subscription.

Aspose.Total for .NET offers every .NET component that Aspose has available. With it you will be able to programmatically manage some of the most popular file formats used in business: Word, Excel, PowerPoint, Project, PDF and Flash.

Aspose Total for .NET also supports mail merge, creating shapes on slides, extracting text from PDF files and more. Your Aspose Total for .NET purchase includes 1 year of maintenance and support so you will obtain all updates and new Aspose Total for .NET components released during the year.

Aspose.Words for .NET is a class library that enables you to perform a wide range of document processing tasks directly within your .NET applications. It supports DOC, DOCX, DOCM, OOXML, RTF, HTML, OpenDocument, PDF, XPS, EPUB and many other formats. With Aspose.Words for .NET you can generate, modify, convert, render and print documents without using Microsoft Word. It lets you insert and format complex document elements such as images, hyperlinks and fields via a higher-level programming interface.

Aspose.Cells
Lets you create and manage Excel Spreadsheets without requiring Microsoft Excel.

Aspose.Words
Lets you read, modify and write Word documents without utilizing Microsoft Word.

Aspose.Pdf
Lets you create PDF documents without utilizing Adobe Acrobat.

Aspose.Slides
Enables your application to read and write PowerPoint documents without utilizing Microsoft PowerPoint.

Aspose.Pdf.Kit
Easy manipulation of existing PDF documents.

Aspose.Barcode
Barcode generation and recognition component, written in managed C# for your WinForms, ASP.NET and .NET CF applications.

Aspose.Cells for .NET provides a flexible group of components that enable .NET applications to create and manage Excel Spreadsheets without requiring Microsoft Excel to be installed on the server. It supports all standard chart types like: column, bar, line, pie, scatter, etc.

Aspose.Pdf for .NET is a PDF document creation component that enables your .NET applications to read, write and manipulate PDF documents without using Adobe Acrobat.

Aspose.Slides for .NET is a PowerPoint management component that enables .NET applications to read, write and manipulate PowerPoint documents without using Microsoft PowerPoint.

Aspose.Slides for .NET supports formats including PPT, PPS, POT and PresentationML (OOXML, PPTX).

Aspose.BarCode for .NET is a robust and reliable barcode generation and recognition component.

Aspose.Tasks for .NET enables .NET applications to read and write Microsoft Project documents without utilizing Microsoft Project.

Aspose.Network for .NET is a suite of components for professional network programming, which includes implementations of most of the major network protocols (POP3, DNS, MIME, FTP, ICMP, MSG parsing and more).

ComponentArt

ComponentArt Data Visualization for .NET Ultimate 2012

Controls for digital dashboards and data analysis applications in Silverlight and WPF.

- Enterprise-grade charting, gauges and maps along with state-of-the-art data display and processing components
- Brilliant rendering, interactive drill-downs, zooming & scrolling

ComponentArt Data Visualization for .NET Ultimate

A complete feature set for building next-generation digital dashboards and data analysis applications.

ComponentArt Data Visualization for .NET Ultimate is a suite of Silverlight and WPF controls for the development of digital dashboards and data analysis applications. It includes charting, gauges and maps along with data display and processing components.

Charting: A set of charting components (XY, pie, funnel, radar, tree map, legend, drill down manager, WCF data provider, etc.) designed to deliver interactive visualization of business data. The components feature brilliant rendering, drill-downs, built-in zooming & scrolling and annotation objects. Enterprise charting features include the ability to handle very large datasets and

CalcEngine integration.

Gauges: A wide selection of digital gauge controls (radial linear, numeric, bullet graph, cylinder, half donut, thermometer, etc). The components feature easy KPI (key performance indicator) binding, customizable pointers, scales and ranges, flexible inner layout and smooth animation. All controls include professional skins and themes.

Maps: Dynamic, data-driven maps designed to provide visualization of geographic data. The components feature drill-downs, multiple shape layers, tooltip & point templates and

A Highly Interactive Control for Date Range Selections
TimeNavigator was designed to enable quick and intuitive date range selections.

Gauges
A wide selection of digital gauge controls, featuring easy KPI binding, customizable pointers, scales & ranges and smooth animation.

Bar & Column Charts
Includes a variety of attractive 2D and 3D bar and column chart shapes.

Charts
Includes a variety of 2D and 3D shapes and the ability to customize data point annotations and popups.

Effective Spreadsheet and Paged Display of Data
Choose between two interfaces for tabular data: a spreadsheet and a traditional paged data grid.

Effective Visualization of Geographic Data
Included is a large collection of over 150 ready-to-use maps of continents, regions and countries.

flexible projections. Includes over 100 maps covering all world continents & regions, major countries, all US states and custom maps.

GridView: A data grid control which delivers a visually rich display of tabular data. The components feature data grouping, sorting, filtering, and operating in "spreadsheet" or "paged grid" modes. Enterprise grid features include handling very large datasets, cell formulas, calculated styles and CalcEngine integration.

TimeNavigator: An innovative control that allows quick, interactive and intuitive date range selections. It features hierarchical date and time drilldowns: decade, year, quarter, month, week, day, hour, minute and

second. The component also includes customizable fiscal year offset, list of business days and/or holidays, international calendars and more.

CalcEngine: A general purpose data processing engine, used to perform complex operations on a given dataset. It features ComponentArt "Calc", an interpreted expression language for dynamic data transformations on the client. The CalcEngine is loaded with useful and functional libraries including: set operations, statistical and financial functions.

The subscription license includes all minor and major product updates for a period of one year.

Develop Once, Deploy Anywhere.

ComponentArt's unique technology targets the widest range of devices with a single code base.
Develop once in Visual Studio and XAML, deploy anywhere in a variety of formats.

HTML5

HTML5 is supported by virtually any device: Apple iPad & iPhone, Android Tablets & Phones, Windows Tablets & Phones, Blackberry Playbook & Phones, and any PC or Mac.

XAML/WinRT

Windows 8 features native XAML support and a new WinRT library. Deploy immersive Metro XAML apps through ComponentArt Data Visualization for XAML/WinRT.

Silverlight & WPF

Classic Windows interface continues to be supported through mature .NET development tools: ComponentArt Data Visualization for Silverlight & WPF.

Single code base. Any output format.

Sounds unbelievable?

ComponentOne Ultimate™ delivers the tools and resources to build everything ... everywhere. Whether you're a Windows, Web, or XAML developer, this ultimate dev tool collection delivers. Inside you'll find: 100s of .NET controls, OLAP data analysis controls, SharePoint Web Parts, documentation tools, LightSwitch extensions, and tools for ADO.NET Entity Framework and RIA Services. No job is too big. Bring speed, style, and functionality to all your applications ...it is your destiny.

BUILD EVERYTHING EVERYWHERE

THE GALAXY IS YOURS: 100S OF .NET CONTROLS & TOOLS

ComponentOne

ComponentOne Studio Enterprise 2011 v2

Components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices.

- Full suite of rich and flexible .NET Windows Forms components
- Rapid development of innovative & demanding Web applications
- Includes many innovative Silverlight controls

ComponentOne Studio Enterprise

Create rich user interfaces for WPF, Silverlight, ASP.NET, Windows Forms, Mobile and ActiveX applications.

ComponentOne Studio Enterprise includes hundreds of components for Silverlight, WPF, .NET, ASP.NET, ActiveX, iPhone & mobile devices. It offers a complete solution that targets all runtime environments and all application layers (data, presentation, reporting and transformation).

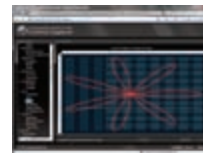

Silverlight toolset includes: Feature packed Silverlight components (grid, chart, menu, treeview, uploader, layout, data input, gauges, maps, image rotator, navigation, etc.). You can use expression blend to fully style the Silverlight controls which allows developers to easily create rich graphical interfaces

for their Rich Internet Applications. Built with XAML, the Silverlight controls promote collaboration in your team and fit seamlessly into your developer & designer workflow. Furthermore, you can take XAML from Silverlight and use it in your WPF application. Also available from ComponentOne is the XAP Optimizer which helps you optimize the size of the XAP files within your Silverlight applications.

WPF toolset includes: Schedule for WPF - a suite of tools delivering scheduling, month calendar and multi-month calendar components for the WPF platform.

Microsoft Outlook-style Scheduler
Schedule one-time, all day, or recurring appointments with reminders, labels, etc.

Advanced Charting for your WPF Applications
Brings you powerful rendering, animations and data-binding capabilities.

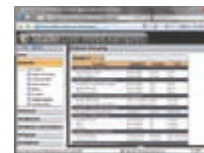

ComponentOne PDF for WinForms
Supports AcroForms and AcroFields.

iPhone and iTouch
Includes ASP.NET components developed to mimic the look and feel of the native UI of the iPhone and iTouch.

ComponentOne Book for Silverlight
Present UIElement objects as if they were pages in a regular paper book.

Create Responsive Grid Applications with Built-in AJAX
Easily group, sort, filter, resize, and reorder columns at run time, all through simple drag-and-drop.

Chart for WPF - visually stunning 2D/3D bar, area, line, pie and column charts. Grid for WPF - a set of controls that allow you to integrate grids into your WPF applications. Reports for WPF - includes a set of WPF reporting tools: the C1Report, C1PrintDocument, and C1DocumentViewer components as well as the C1ReportDesigner stand-alone application.

ASP.NET toolset includes: Styled, easy-to-use controls built on Web standards including AJAX, CSS, and XHTML. Components include: eCommerce (PayPal), file format management (PDF, Flash, XLS, ZIP), calendars, charting (2D and 3D), rich text editing, grids, input and mask controls, menus and toolbars, reporting, scheduling and spelling

features. You can also recreate the look & feel of iPhone and iPod user interfaces using Button, LaunchPad, Calendar, NavigationList & Slider components.

WinForms toolset includes: .NET controls featuring two award-winning grids: FlexGrid and True DBGrid. FlexGrid is designed for unbound applications. It is a flexible grid control for creating user-friendly interfaces that display, edit, format, organize, summarize, and print tabular data. The strength of True DBGrid is in its data binding; with an ADO.NET managed database interface, it offers features such as Excel-like split views and built-in hierarchical binding and grouping.

DevExpress (Developer Express)

DXperience DXv2 v2011 vol 2

All Developer Express ASP.NET, WinForms, WPF & Silverlight components & tools.

- User Interface functionality for WinForms, ASP.NET, WPF & Silverlight
- Display digital dashboards in your Web based applications
- Includes a scheduling/planning/calendar suite for ASP.NET

DXperience

All the .NET component suites, libraries and IDE tools produced by Developer Express in one package.

DXperience includes all Developer Express products engineered for Visual Studio and the .NET Framework. Priority technical support is also included with updates and upgrades for 1 year. With this subscription, you receive key technologies by Developer Express including IDE productivity tools, business application frameworks, and components for Windows Forms, ASP.NET, WPF and Silverlight. In addition to the individual tools, you receive complete source code for the Windows Forms & ASP.NET components. With the Universal subscription, you also receive eXpressApp Framework which is an instrument for creating business

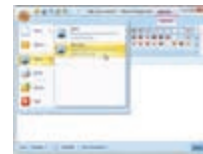

applications quickly and easily.

WPF products include: DXGrid for WPF - fast server-side data processing and complete support for templates and styles, DXCharts for WPF - clear & compact XAML syntax and element customization via templates, DXCarousel for WPF - stunning navigation and data browsing, DXNavBar for WPF - easy and intuitive navigation.

Silverlight products include: AgDataGrid - fast data manipulations and rich end user experiences, AgRichEdit - Word like text editing

XtraBars Suite Ribbon Control and Tabbed MDI interface
With the XtraBars Suite you can easily build Ribbons from scratch.

XtraBars Suite
You can create application menus, galleries and contextual tabs in ribbons.

DXGrid for WPF
Supports both tabular and card display formats and provides facilities for the end-user to sort and group data.

AgRichEdit for Silverlight
Allows you to introduce Microsoft Word like text editing features into your next Silverlight application with ease.

XtraReports End-User Designer
The XtraReports Suite features a fully functional End-User Designer.

XtraReports Master-Detail Report
With the XtraReports Suite, you can easily build banded reports and even Master-Detail reports.

features, AgMenu - static menus, toolbars and context menus etc, AgLayoutControl - layout management for Silverlight.

Windows Forms products include: XtraGrid Suite - a grid control with four data layout options from a simple table to banded multi-line row layout and card views, XtraScheduler Suite - enables you to incorporate the UI found in Office Calendar within your applications, XtraPivotGrid Suite - a data analysis, mining and visual reporting solution, XtraGauges - linear, circular, digital and state indicator gauge types, XtraEditors - a library of over 20 editors that can be used both standalone or embedded, XtraWizard - easily generate multi-step wizard dialogs that fully

conform to Wizard 97 or Aero standards.

ASP.NET products include: ASPxGridView and Editors Library - a robust grid and data editors library, ASPxPivotGrid Suite - a multi-dimensional analysis component, ASPxNavBar Suite - Web navigation bar with full AJAX support, ASPxMenu Suite - an extremely lightweight, customizable main and context menu and more.

Also included in the Universal and Enterprise Editions are Visual Studio productivity add-ins: CodeRush, Refactor! Pro and eXpress Persistent Objects.

FLEXERA SOFTWARE

If Software Installations, Deployments, or Virtualization Is Your Job, Flexera Software Has Your Solution

FLEXERA SOFTWARE™ InstallShield®

NEW! InstallShield® 2012 – *How the World Installs Software on Microsoft® Windows™*

Author reliable MSI and InstallScript installations and App-V™ virtual packages for Windows® platforms.

Support Installations for Windows 7
Easily configure installations that run reliably on Windows 7 and leverage Windows Installer 5 functionality.

Broad Range of Microsoft Technologies
Including Visual Studio 2010, .NET Framework 4.0, IIS 7.0, SQL Server 2008 SP1, and Windows Server 2008 R2, and App-V.

Install Software on Any Device
Extend installations to configure database servers, Web services, mobile devices, and more.

What's New in InstallShield
Includes the ability to bundle multiple products into single suites, installation streaming for an "app store-like" experience, distributed and component-based installation, 64-bit enhancements, application tagging, and much more!

FLEXERA SOFTWARE™ InstallAnywhere®

NEW! InstallAnywhere™ 2011 – *Multiplatform Installation Solution to Install Cross-Platform Applications*

Deliver a professional and consistent installation experience for Windows, Linux, Mac OS X, Solaris, AIX, HP-UX, IBM iSeries, and more.

Impress End Users with Reliable Installers
Cut your support costs and impress end users with a professional, branded installer that installs software correctly every time.

One Installation for 31 Languages
Installers can be automatically translated into 31 languages to help your applications reach end users around the world.

Perfect for Complex Desktop and Server Applications
Built-in customization tools make quick work of even your most complex installer requirements.

What's New in InstallAnywhere 2011
Breakthrough functionality for managing all phases of the installation lifecycle, including installation, rollback, maintenance, repair, a single uninstaller, unified progress bar, and enhanced installation logging. Also expanded support for new platforms like Windows 7, Windows Server 2008 R2, SuSE Linux 11.2 (64-bit x86), 11.3 (32-bit x86), Ubuntu 10.10, and Mac OS X 10.6.

FLEXERA SOFTWARE™ AdminStudio® Suite

NEW! AdminStudio® Suite – *One Solution For Windows® 7 Migration, Application Virtualization and MSI Packaging*

Powers an enterprise's Application Readiness process for migrations to Windows 7, application virtualization and day-to-day packaging operations.

Quickly Migrate Applications to Windows 7
Automatically test and fix Windows 7 compatibility issues.

Support for Application Virtualization
Automate conversion to virtual formats including Microsoft® App-V, VMware® ThinApp™, and Citrix® XenApp™. Customize, test, validate and directly edit Microsoft® App-V packages.

Prepare Reliable MSIs for Error-Free Deployment
Integrated with leading software deployment tools Microsoft® System Center Configuration Manager, Novell® ZENworks®, LANDesk® and support for IBM Tivoli®.

What's New In AdminStudio
Enhanced support for application migration projects. Application Centric Management.

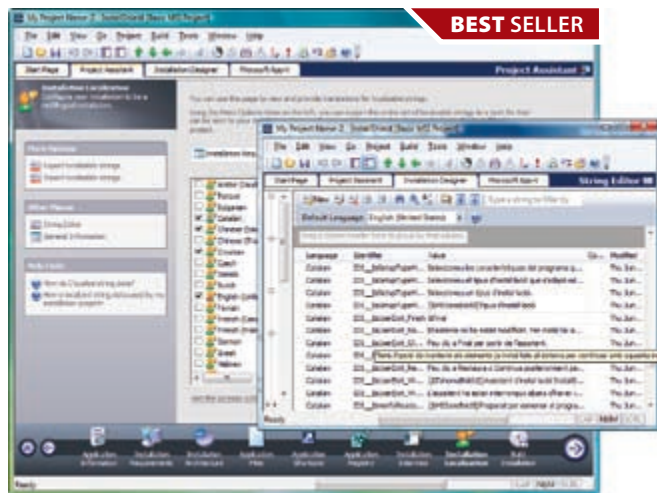

Flexera Software

InstallShield Premier 2012

Create strong, reliable Windows Installers.

- Virtual machine detection and blocking
- Supports the latest technologies, including Windows 7 and Windows Installer 5 (MSI 5)

InstallShield

Create flexible installations quickly and easily across all Windows operating systems.

InstallShield Premier allows you to create flexible installations quickly and easily across all Windows operating systems. First-time developers find it easy to create installations, while power users find its depth and flexibility perfect for developing complex software installations. It supports the latest technologies, including Windows 7 and Windows Installer 5 (MSI 5). It also supports Microsoft's latest products, including Visual Studio 2010, .NET 4, MSBuild, and DirectX 9.0c. With InstallShield Premier you can expand installations to servers and Web services, including IIS 7.0, Oracle, MySQL, SQL Server 2008 SP1, and Windows Server 2008. It also lets you

target mobile devices with support for Windows Mobile 6.x, Windows Embedded CE 6.x, SQL Server Compact Edition 3.5 SP1, and PalmOS 3.5+.

InstallShield Premier Features:
Project Assistant - seamlessly guides you through the installation-authoring process, significantly reducing the time required for new users to complete an installation project and enabling veteran software developers to more efficiently jumpstart a new project.

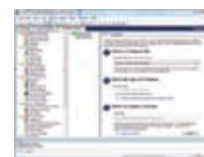

Visual Dialog Editor - easily modify existing dialogs or create new ones from scratch. Select the dialog you need, modify it, and then insert the dialog into

Multilingual Support
 Present installation text in up to 35 languages, eliminating hours of installation dialog and message box translation.

Standalone Build System
 Maintain a clean build machine by using only the part of InstallShield that compiles the installations.

Try and Die Functionality
 Create a fully functional trial version of your product with a few simple configuration changes.

Hebrew and Arabic Language Support
 Expand the reach of your products by presenting installation text and buttons in Hebrew and Arabic.

End-User Dialog Themes for Basic MSI Projects
 Refreshed dialog designs give you fresh choices for the look-and-feel of your installation's user interface.

Suite Installations
 Multiple products can be easily bundled together into a single, unified suite installation.

the installation sequence.

Intuitive Design Environment - the advanced InstallShield Premier design environment makes setup creation more efficient by outlining the major steps involved in the creation of an installation. InstallShield Premier provides separate views for common tasks within each step, and enables drag-and-drop support for files, registry entries, and other project elements. More than 20 task-based wizards simplify your development tasks, from starting VB projects to building custom releases.

MSI Support - supports all projects built with the Microsoft Windows Installer (MSI). MSI simplifies your patch development, allowing you to set patch

metadata in patch packages, configure un-installable patches, and use patch sequencing features.

Patch Creation - Patches created with InstallShield Premier contain updates to a previous installation or set of installations on a file-level or byte-level basis. Distribute on the Internet and save end-user time and server bandwidth.

Virtual Machine Detection - Virtual machines have been a licensing and compliance challenge for software vendors. InstallShield Premier can now build installations that detect when they are being run on virtual machines like Microsoft Hyper-V and Virtual PC or VMware and optionally block the installation.

GrapeCity

ActiveReports 6

The best selling report writer with no runtimes or royalties.

- Includes a Silverlight report viewer
- Export to popular formats like PDF, Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications

ActiveReports

Generate a wide variety of reports from your .NET applications.

ActiveReports 6 is a .NET reporting component for Windows and Web applications. Its key features include customization, fast performance and high quality. ActiveReports 6 features an easy-to-use Visual Studio .NET report designer and a powerful API. It includes multilanguage support that works right out of the box and also offers seamless run-time deployment, royalty free. It's easy to create reports in ActiveReports 6, the report designer integrates into Visual Studio .NET (including Visual Studio 2010). Once the product has been installed on the developer's machine, adding a report to your project is as easy as adding a class or form.

ActiveReports 6 is easy to deploy - reports are created within Visual Studio .NET and compiled directly into the executable. Therefore, assemblies can be distributed using XCopy deployment or they can be

placed in the global assembly cache (GAC). The object model provides the Reporting Engine as a single, managed, strong named assembly. There are no additional setups on the server or the client's machine. Since ActiveReports 6 is fully managed, there aren't any dependencies on 3rd party applications.

ActiveReports 6 includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF in both Windows- and Web-based applications.

ActiveReports 6 contains a built-in charting control which supports common 2D and 3D chart types and provides advanced charting features as well as native exporting to various image formats. Chart types include: vertical and horizontal bar, line, scatter plot, pie, funnel and pyramid, Gantt, Kagi, point and figure, renko, and more.

Viewer Annotations
Annotations can be placed on the report to pass notes and special instructions on to users and developers.

End-User Report Designer Editing
Allow end users to edit their reports and save new reports or load old ones.

Viewing Web Reports
The WebViewer control provided in the Professional Edition allows you to write less code and view reports more quickly.

Built-In Charting Control
A chart control is included with ActiveReports that supports common 2D and 3D chart types.

Export to Any Format
ActiveReports includes filters for exporting to popular formats like Adobe PDF, Microsoft Excel, RTF, HTML, Text and TIFF.

Hyperlinks and Drilldown
You can use hyperlinks and the viewer hyperlink event to simulate drill-down from one report to another.

ActiveReports 6 supports the use of Windows Forms-based 3rd party controls with the report designer. Essentially any control that is able to be rendered on a Windows Form is capable of being rendered on an ActiveReports 6 report.

ActiveReports 6 includes a report viewer control which supports report zooming and previewing, multiple tabs for viewing hyperlinks, split- and multi-page views, a table of contents pane, thumbnails, text searches, annotations, and toolbar customization.

ActiveReports 6 also features a royalty-free End-User Report Designer control that allows you to host the report designer in your own applications to provide end users with the ability to create and modify reports. The Zoom toolbar item allows users to magnify the design surface of the report for more precise placement and viewing of report controls.

The Professional Edition also includes a Flash-based and Silverlight Report Viewer that you can use to provide a seamless, interactive report viewing experience and no-touch printing using the widely-adopted Adobe Flash Player. Choose from pre-defined themes (including Office, Windows XP, Vista and Windows Classic) and enhance the viewer experience by controlling the printing, paging, table of contents, thumbnail views and other options.

ActiveReports 6 comes with a Microsoft Access report conversion wizard that makes importing Access reports a breeze. This is a very handy utility for users who have invested a lot of time creating reports within Access databases. Not only will the import help get you up and running with ActiveReports 6, but the banded report architecture is very familiar for developers that have used Microsoft Access' reports.

INSTALLAWARE 2012

InstallAware

Instantly Build App-V Packages

for Only **\$989**

App-V for the Masses

App-V Builder:

Compiles any existing InstallAware project as an App-V Package

App-V Viewer:

Opens and inspects the contents of any pre-existing App-V Package

Hybrid 32 bit & 64 bit:

Combine 32+64 bit applications inside a single package

MSI Deployment:

Creates an MSI file to silently push your App-V Packages

Command Line Support:

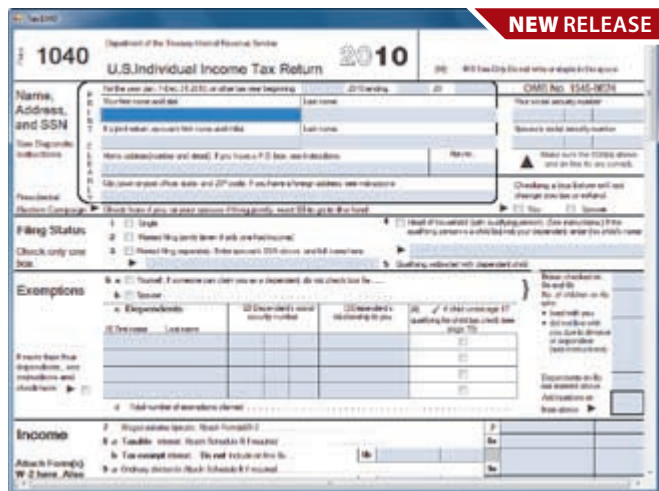

Automates your App-V Build process through the command line

NOW WITH SUPPORT FOR WINDOWS 8

Embedded spreadsheet platform for advanced business applications.

- Create Financial Modeling, Statistical Analysis, Scientific and Engineering Models, Sales Analysis, Budgeting, native Microsoft Excel IO applications
- Access built-in functions to create complex formula evaluations

Spread.NET Professional

Quickly add data visualization, formula calculations and layout options to your applications.

Spread.NET Professional is an embedded Microsoft Excel spreadsheet platform for .NET development.

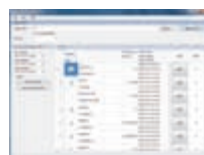

Whether developing client applications, Web sites, or Web applications, the mission of Spread.NET Professional is to allow developers to embed complete spreadsheet functionality into applications - without requiring Microsoft Excel.

Effective and productive user experiences are the result of providing familiar, logical, intuitive, and consistent interactions with data. It is designed with this in mind. Through built-in support for Excel document import and export, Spread.NET Professional allows you to apply complete programmatic control of user interactions with data

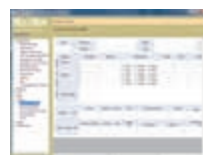

in Excel documents - allowing you to maintain business rules, security, and data integrity.

You can import Microsoft Excel documents and preserve complete formatting. Interact with the data within your application, then export your spreadsheets to Microsoft Excel for portability and distribution to your external customers. Spread.NET Professional supports multiple Excel file formats, including Excel (2007-2010 xlsx), Excel 97 (xls), comma-delimited (csv), and text (txt).

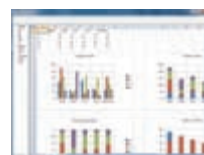

Spread.NET Professional lets you create full-featured 2D and 3D charts within your spreadsheets. Chart types include column, line, pie, bar, area, XY, bubble, stock, XYZ, doughnut, radar and polar.

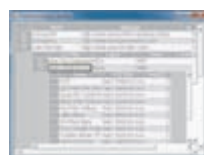

MultiRow
Logically present data in templated layouts that you design.

FormulaTextBox
Includes color-coded cell and range references and mouse and keyboard selection support.

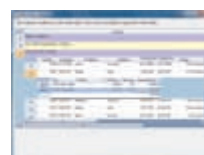

Charts
The Chart component allows you to develop and customize visual representations of connected data.

Extensive Customization Options
Provides the ability for developers to customize many elements of the user interface and control behavior.

Formulas
Includes over 300 built-in functions and supports cross-sheet formula referencing.

Microsoft Excel Platform
Import Microsoft Excel documents and preserve complete formatting.

You can add charts through code by using the comprehensive chart object model, or without writing code, at design time by accessing the Spread Designer and Chart Designer.

Charts can be bound to external data sources, and you can allow end users to make changes to the chart formatting at run time. Spread.NET Professional features built-in design dialogs that you can make available in your applications to allow your end users to create and modify charts in Spread.NET Professional - just as in Microsoft Excel.

Spread.NET Professional has an extensive and robust object model, and provides the ability for developers to customize many elements of the user interface and control behavior by extending built-in classes and assigning custom objects. You can use it to embed advanced Microsoft

Excel-compatible spreadsheet features into .NET applications - features that would otherwise be considered difficult to achieve.

Spread.NET Professional can bind to any .NET data source, including support for displaying relational datasets. Run-time support for unbound rows and columns within bound data allows for inclusion of aggregation information, or for performing what-if scenario analysis. Spread.NET also supports binding a range of cells to a data source, and can provide a range of cells as a data source.

Spread.NET Professional includes MultiRow which is a Windows Forms grid component for logically presenting data in templated layouts that you design.

IBM ILOG

IBM ILOG Elixir Standard V3.0

A collection of innovative display components for Flex user interface developers.

- Market leading data visualization component set for Adobe Flex 4 and Adobe AIR rich Internet application (RIA) developers
- Provides: 3D charts, gauges, maps, calendars, OLAP & pivot charts and more

IBM ILOG Elixir Standard

Data-display components that help turn raw data into clear, actionable information through a highly graphical and interactive user experience.

IBM® ILOG Elixir® Standard provides Flex user interface developers with a collection of innovative display components. It consists of 10 graphical components that present data to users so that they can understand the information more clearly, react faster and make better decisions.

IBM® ILOG Elixir® Standard provides 10 ready-to-use user interface controls: 3D charts, gauges, maps, heat maps, calendars, OLAP and pivot charts, organization charts, treemaps, radar charts and timelines. IBM® ILOG Elixir® Standard's controls can be used individually or in combination, alongside other Flex components and they integrate with the Adobe Flash Builder 4 IDE.

The professionally documented software development kit (SDK) enables developers to fine tune the look or behaviors of the controls.

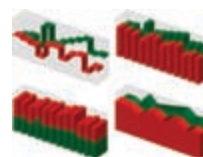

Adobe Flex and Adobe AIR form a powerful platform for creating graphically rich and highly interactive applications for the Internet (and desktop). It provides a wide variety of basic user interface components such as buttons, menus and charts. Many applications require user interfaces that are highly graphical, going beyond what is offered natively in the Adobe platform. IBM® ILOG Elixir® Standard enhances the Flex and AIR platforms by adding a set of advanced user interface controls for more intuitive, interactive displays.

Included controls:

3D Charts - IBM® ILOG Elixir® Standard comes with a full range of 3D charts that mirror the Adobe 2D charts. Upgrading to the third dimension and creating more appealing dashboards and custom applications has never been so easy.

Data Visualization
Create rich Internet applications (RIA) using Adobe Flex 4 and Adobe AIR.

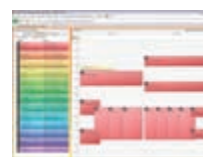

3D Charts
IBM ILOG Elixir comes with a full range of 3D charts that parallel the Adobe 2D charts.

Gauges and Dials
Gauges and dials are fully interactive and designed to be connected to real-time data sources.

Heatmaps
Heatmaps help you display how your data is spread over geographies.

Calendar
Easily create custom and shared planning applications with the powerful calendar component.

Vector Maps
Map areas are colored to represent specific data and overlaid with any Flex object, such as charts and labels.

Gauges and Dials - Gauges and dials are fully interactive and designed to be connected to real-time data sources. Developers can use them "as is", customize them or easily create new ones with the powerful and open APIs.

Vector Maps - Easily add intuitive map displays to your developments. Reuse one of the provided maps or create custom ones from standard maps you already have. You can easily color map areas to represent your data and overlay these areas with any Flex object, such as charts and labels.

Heatmaps - Heatmaps help you display how your data is spread over geographies or a Web page for instance. Manipulate either x/y or lat/lon and see your data by density or by value.

Calendar - Easily create custom and shared planning applications with the IBM® ILOG Elixir® Standard calendar. Display multiple planning with advanced recurrence management.

Timeline - Create easy to read charts displaying a sequence of events

over a span of time. Leverage the built-in overview that allows intuitive navigation.

Organization Charts - Advanced employee organization charts are easy to create with IBM® ILOG Elixir® Standard. Quickly navigate through peers and management relationships with stunning animations.

OLAP and Pivot Charts - Replace OLAP grids with highly dynamic charts for improved insight and analysis in your custom data.

Radar Charts - IBM® ILOG Elixir® Standard radar charts are compact dashboard displays that are used to compare different key performance indicators (KPIs) between two or more entities.

Treemaps - Treemaps provide an interactive experience that includes dynamic drill down, user-defined clustering and segment coloring and sizing.

Infragistics

Infragistics NetAdvantage for jQuery 2011 Volume 2

ASP.NET MVC and jQuery controls for Web developers.

- Standards-compliant controls for accessibility from any device
- A client-side JavaScript and HTML5-based toolset that includes interactive charts in HTML5

Infragistics NetAdvantage for jQuery

Infragistics NetAdvantage for jQuery includes standards-compliant ASP.NET MVC and jQuery controls for HTML5, streaming video and CSS3 Web technologies.

Infragistics NetAdvantage for jQuery is not tied to the ASP.NET platform and is server-agnostic. This means that your applications can capitalize on emerging Web-based technologies and solutions. It offers standards-compliant controls for accessibility from any device. It includes the following controls:

jQuery Grid - Get more interactivity out of your static HTML tables and data.

jQuery Hierarchical Grid - Show multiple parent-child relationships in an expandable, hierarchical data grid. Users can drill down, as well as add, edit,

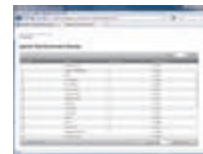

delete, select, sort, group and filter rows using their mouse or keyboard.

jQuery Tree - Simplify the look of your hierarchical data into a Web-based tree, depicting familiar parent-child relationships between nodes of information. It features checkbox selection, node templates and more.

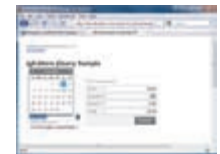

HTML5 Charts - A broad range of interactive, high-performance HTML5 data charts that include support for business, scientific and financial charting scenarios, as well as animation and trend line capabilities.

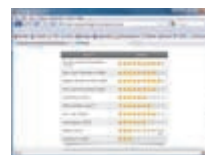

Filtering
Add filtering to HTML tables so users can narrow down the data that they see.

Sorting
Allow your application's end users to sort data in ascending or descending order at will.

Editing
Validations can be done real-time within the grid cell.

Rating
Customize rating images, tooltips and styles for different control states.

Video Player
Perform online streaming, video playback, bookmarking and embed advertisements.

HTML5 Charting
Full set of dynamic charts including bar, line, polar, range, step, spline, OHLC and candlestick.

HTML5 Video Player - It works in both ASP.NET MVC and Web Forms applications.

ASP.NET MVC Helper Controls - A full set of extensions to the client controls are provided, so you can build full-blown ASP.NET MVC applications. The design allows ASP.NET MVC applications to take full advantage of Microsoft Visual Studio features, including: LINQ data binding, Fluent syntax support, paging, sorting and filtering.

Word Library - Easily integrate Microsoft Word documents into your Web applications. You can write styled text, hyperlinks, images, tables and shapes. You can also specify page size, margins, page breaks, and more.

Excel Library - Create and work with Microsoft Excel files in ExcelML and BIFF8 (.XLS) formats. The object model mirrors the layout, formatting and behavior of Excel spreadsheets. As a result, you can easily work with worksheets, formulas, frozen panes, formatting strings and much more.

Documents Library - Support the creation of Adobe PDF documents and Microsoft XPS documents. The object model allows you to abstract away low-level document format details, so you can write PDF and XPS files with a professional layout.

IG Theme - Change the look and feel of your applications controls, as well as their individual elements.

InstallAware

InstallAware Studio Admin 2012

A setup authoring tool for deploying products, patches and Web updates.

- InstallAware setups are easily distributed through Group Policy Objects and other software distribution systems
- Deliver setups that display the latest visual themes

InstallAware Studio Admin

A software installation solution for Windows Installer that enables MSI code scripting for rapid setup development without the high cost and steep learning curve of other setup solutions.

InstallAware's powerful MSI code simplifies setup development by transparently managing all of your Windows Installer conditions, installation sequences and parameters using a concise and human-readable setup language. Drop-in setup actions are configured using dialogs, without requiring programming skills. MSIcode builds a standard Windows Installer database package that fully supports advertising, install-on-demand, elevated privilege installation, and resiliency.

You can detect and support ia64 and x64 systems including Itanium, AMD64, and EM64T. InstallAware allows you to ship a single hybrid MSI for both your 32-bit and 64-bit customers. You can also directly import MSI databases and Merge Modules created by other packaging applications, and edit them

within InstallAware. All InstallAware setups fully support industry-standard Windows Installer technology, and Group Policy management features. No proprietary runtime packages or dependencies are ever required. All packages are built to comply with Microsoft's Designed for Windows Logo certification specifications for application setup.

All the code necessary to build different configurations of your product is included in your project, plus compiler variables allow you to specify different output media, product names, compression settings, even different feature sets from the same source. You can debug your setups visually with the integrated debugger. Set variable watches, step through code line by line, override variable values.

Five Minutes to an Installer
Build setups in minutes using wizards, templates, and samples. Then make refinements using InstallAware's task-based views.

Custom Programs
Run any program as part of your setup, without requiring a particular location or having to install the program.

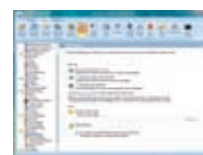

Refined User Interface
Deliver setups that display the latest visual themes. Several dialog themes make your setups more interesting and more interactive.

Reusable Scripts
Reference separate blocks of MSIcode using the Include Scripts command.

Detect and Manage Setups on Virtual Machines
A simple checkbox lets you limit distributions to physical machines.

One-Click Technology Preinstalls
Deploy technology modules and runtimes, such as Microsoft SQL Express, from your setup in a single step.

InstallAware's advanced development tools include wizards, templates, drag-and-drop editing, and refined task views—with the added benefit of immediate MSIcode generation. Start a project in seconds with visual tools, then switch to the Code View to add branching logic, variables, and advanced configuration options.

You can reduce download size by removing technology dependencies (such as the .NET Framework) or rarely used features from your main setup file. The main setup will download them seamlessly from the Web as needed. Files required by the minimum configuration are included in the main package, which installs without a Web connection.

InstallAware's dialog editor lets you customize the pre-built setup themes, or design your own themes. A full range of visual controls are available, including Explorer-style browse functionality, and HTML/Flash containers.

Make it easy for your users to update their software, by automating the notification, download, and setup process. Deliver unlimited updates without additional usage fees. Plus the update client source code is provided within your project for complete customizability.

InstallAware setups launch without having to install dependencies or script engines. Still, you can completely customize your setup even if you don't have a computer science degree, or advanced Windows Installer knowledge.

The included App-V Package tool builds existing InstallAware projects as App-V virtualized packages, either interactively or from the command line. Hybrid 32-bit/64 bit App-V packages are supported. Also included is an App-V Viewer tool which can view the contents of any existing App-V virtualized package, including those that were not built from InstallAware projects.

Syncfusion

Syncfusion Essential Studio Enterprise Edition 2012

Accelerate Silverlight, WinForms, WPF, ASP.NET and ASP.NET MVC development.

- Includes components for grids, docking, charting, diagramming, PDF & Office reporting and scheduling
- Easily build WPF and ASP.NET Business Intelligence applications

Syncfusion Essential Studio Enterprise Edition

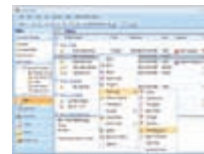

Syncfusion Essential Studio Enterprise is a dynamic and feature rich suite that has everything developers need to create Enterprise-class applications.

Syncfusion Essential Studio Enterprise includes all Syncfusion products on all technologies (WPF, Windows Forms, ASP.NET, ASP.NET MVC and Silverlight) It incorporates a unique debugging support system that allows switching between Debug and Release versions of the library with a single click from inside the Visual Studio.NET IDE. Dynamic and feature-rich, Syncfusion Essential Studio has everything developers need to create Enterprise-class applications.

Essential Grid (ASP.NET, ASP.NET MVC, Silverlight, Windows Forms, WPF) - Excel-like, cell-oriented, light-weight, virtual, data-bound

grid. Includes extremely detailed customization down to cell level. Multilevel undo/redo, shared scrollbar support, data/view separation, floating cells, multiple cell and more.

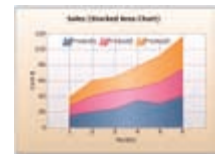

Essential BI PivotGrid (WPF) - A cell-oriented, extensible grid control that simulates the pivot table feature of Excel. It pivots data to organize it in a cross-tabulated form. The major advantage with the pivot grid is that you can extract the desired information from a large list within seconds. Along with presenting the data, the pivot grid also enables you to summarize and group data. It finds its main application

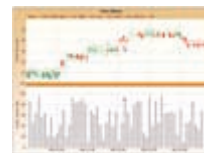

Outlook UI
Create ASP.NET and Windows Forms applications that mimic the Outlook user interface.

Ribbon
Silverlight Ribbon is a user interface library that allows users to create UIs similar to Office 2007/2010.

Numerous Chart Types
Includes support for Enterprise quality chart creation capabilities with all the chart types you can think of.

Support for Financial Charts
Create advanced financial charts like the stock-volume chart you see above.

Static Diagrams
Use the Diagramming package to create Visio like diagrams and render them in your applications.

Dynamic Diagrams
You can also create diagrams dynamically based on relationships in the database.

in the financial domain, where it is used to organize and analyze business data.

Essential BI Gauge (Silverlight, WPF) - provides users with the ability to display Key Performance Indicators (KPI) from an OLAP cube. KPIs can be displayed with goals and status visualizations to help create executive dashboards.

Essential BI Grid (ASP.NET, Silverlight, WPF) - Use Essential BI Grid to summarize, analyze, explore, and present summaries of critical data in your Enterprise and make informed decisions. Users can easily drill down into all available levels of data and it can even be configured to drill down into relational data.

Essential Chart (ASP.NET, ASP.NET MVC, Silverlight, Windows Forms, WPF) - A business-oriented charting component which offers an innovative data object model that makes it easy to populate a chart with any kind of data source.

Essential Diagram (ASP.NET, Silverlight, Windows Forms, WPF) - An extensible, high-performance .NET diagramming component that can be used for developing Microsoft Visio-like interactive graphics and diagramming applications.

Essential Tools (ASP.NET, ASP.NET MVC, Silverlight, Windows Forms, WPF) - A rich set of UI controls to let you create rich interactive applications with the latest look and feel.

Actipro SyntaxEditor for WPF, Silverlight & WinForms

The ultimate syntax-highlighting code editor control

- ◆ Mimics the Visual Studio code editor
 - ◆ Create custom syntax language definitions
 - ◆ Lexing, parsing, AST generation, squiggle lines
 - ◆ Code outlining and custom margins
 - ◆ IntelliPrompt completion lists, quick info & more
 - ◆ Over 100 stock editing commands
- ### Optional Language Add-ons
- ◆ Advanced C#, VB and XML languages
 - ◆ Automated IntelliPrompt & validation
 - ◆ Document outlining & auto-complete
- ### Other Free Add-ons
- ◆ Innovative grammar-based parser framework
 - ◆ Easy integration with ANTLR, Irony (WPF only)

Actipro WPF Studio

Jumpstart your WPF application's UI with over 55 controls

Bundled suite includes all Actipro WPF controls at one low price:

- ◆ SyntaxEditor - Syntax-highlighting code editor control like in VS 2010
- ◆ Ribbon - Office 2010 ribbon UI with Backstage application menu
- ◆ Docking & MDI - Docking windows and MDI with full MVVM support
- ◆ Navigation - Navigation/explorer bars, breadcrumbs, zoom UI
- ◆ PropertyGrid - Blend and VS-like property grid
- ◆ DataGrid - Themes, behaviors, editors integration w/MS DataGrid
- ◆ Editors - Part-based & masked editors w/advanced date/time picker
- ◆ Wizard - Aero wizard and wizard 97 dialogs
- ◆ Gauge - Circular, linear, and digital gauges
- ◆ Bar Code - Vector bar codes with 2D and linear symbologies
- ◆ Views - Book control and animated panels with fluid transitions
- ◆ 1 year of support & free upgrades

Actipro Software

Actipro SyntaxEditor V4.0

Powerful code editing control with VS.NET style productivity enhancements.

Actipro SyntaxEditor

Editing C# code
Edit C# code using automated IntelliPrompt for parameter information.

Editing VB code
Edit VB code using automated IntelliPrompt for member lists.

Editing an XML SyntaxEditor language definition file
SyntaxEditor can edit an XML SyntaxEditor language definition file based on an XSD.

- Develop and distribute custom language definitions with your applications
- Supports language merging e.g. HTML calling CSS, VBScript, etc.
- Perform semantic parsing operations in a separate worker thread

Actipro SyntaxEditor was designed to handle advanced language parsing and processing, with phases for performing lexical parsing, semantic parsing (in a worker thread), and automatic outlining. Custom language definitions can be developed and distributed with your applications. SyntaxEditor includes a complete parser generator that helps build

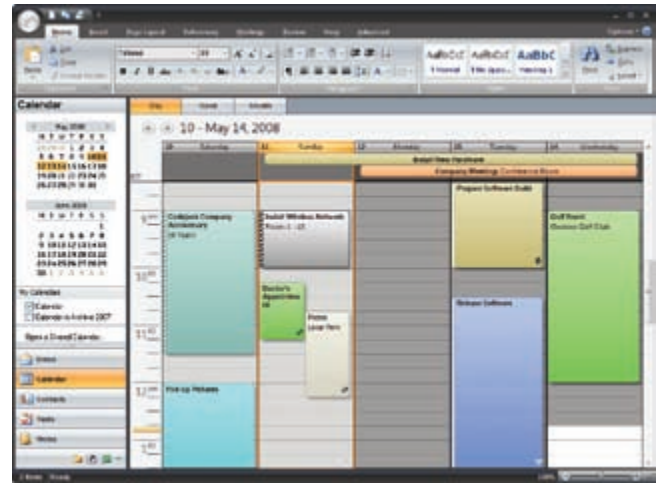

semantic parsers and construct ASTs (abstract syntax trees). Major code editing features of the control include: code outlining, undo redo, word wrap, split views, current line and bracket highlights, virtual space, block selection, macro recording/playback, indicators, extensible rendering, IntelliPrompt code snippets, member lists, smart tags and more.

Codejock Software

Codejock Xtreme Suite Pro 2012

Create Office XP - 2010 and Visual Studio .NET style GUI elements.

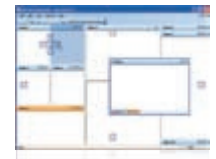

Codejock Xtreme Suite Pro

Office Style Controls
Complete set of Office controls including shortcut bar and report grid.

Visual Studio .NET Docking
Popular design and visual styles are available including Visual Studio .NET style docking stickers.

Enhanced Docking Logic
Sophisticated docking algorithms provide endless layouts and possibilities for presenting data and organizing desktops.

- Xtreme Command Bars features an Office 2010 style ribbon bar
- Easily theme your application with SkinFramework for .NET
- Includes task dialog functionality

Codejock Xtreme Suite Pro provides Windows developers with a sophisticated set of components to give your application a professional, modern appearance. Codejock Xtreme Suite Pro combines eight components, Xtreme CommandBars, Xtreme Docking Pane, Xtreme SkinFramework, Xtreme Property Grid, Xtreme Report Control, Xtreme Calendar,

Xtreme ShortcutBar and Xtreme Task Panel. With Codejock Xtreme Suite Pro you can create Enterprise class applications that incorporate a full set of highly customizable user interface components that include Office style toolbars and menus. Several popular visual styles are included such as Office XP, 2003, 2007, 2010 and Visual Studio .NET.

DEVPIA

DEXTUpload .NET Pro V4.1

Add the ability to upload files to your Web applications.

DEXTUpload .NET Pro

Single and Multiple Uploads
DEXTUpload .NET Pro allows you to upload single and multiple files.

Upload Progress
You can display a custom progress bar during the upload process.

Watermarking and Image Format
You can upload and watermark images and change image formats on the fly.

- Allows uploads of upto 2GB in size
- Use of optimized parsing algorithm makes uploading speed even faster
- Able to upload files to a database via a BLOB (Binary Large Object)

DEXTUpload .NET Pro is a component that supports file uploads and downloads between a Web browser and an IIS Web server. It observes Internet standards (RFC 1867) and can be used in Microsoft ASP.NET.

DEXTUpload .NET Pro is HTTP-based and uploads files from a Web browser to a Web server quickly and efficiently. It overcomes the limitations of ASP.NET uploading (inconsistency for high capacity file uploads, server overloads and safety, etc.), is written in C# and provides you with improved

upload speeds and stability. During upload and download you can invoke a progress window automatically without installing any other software. The pop-up progress window shows you uploading speed, file size, uploaded file size and time remaining. It can also be customized by using progress objects. DEXTUpload .NET Pro allows you to watermark uploaded images and convert uploaded images to thumbnails. It supports various file conversion formats (BMP, JPG, GIF etc.) and provides detailed information about image files.

FusionCharts Bundle

Cross platform charting solution for ASP, ASP.NET, PHP, JSP & AJAX applications.

FusionCharts Bundle

FusionMaps
Create animated, interactive and data-driven Flash Maps for your dynamic Web applications.

FusionCharts
Interactive and animated charts for ASP and ASP.NET applications.

FusionWidgets
Real-time Financial and Dashboard Charts for the Web.

- Generate interactive and animated flash charts & maps in minutes
- Supports over 75 chart types and 450 maps
- Build cross-browser and cross-platform solutions

FusionCharts Bundled Pack includes: FusionCharts, PowerCharts, PowerMaps and FusionWidgets. The Pack provides developers with a collection of Flash components for creating highly visual Web applications based on the Adobe Flash Platform. Developers can build cross-browser solutions which blend content, application logic and communications, delivering an effective end user experience.

FusionCharts delivers interactive and eye catching Flash charts. FusionMaps can plot over 450 maps, including all continents, major countries and all US states. FusionWidgets is a collection of gauges, self-updating charts and financial charts, funnel/pyramid charts, bullet graphs, sparklines etc. The product can be used with any Web scripting language: ASP, .NET, JSP, PHP, ColdFusion & Ruby on Rails etc.

Janus WinForms Controls Suite v4

Add powerful Outlook 2010 style interfaces to your applications

Janus WinForms Controls Suite enhances your applications with a powerful user interface that features the familiar Outlook visual style. All controls are 100% .NET managed code, 64-bit compatible and support Visual Studio 2010 and .NET Framework Client Profiles.

Janus WinForms Controls Suite includes sample applications that let you quickly add the latest Outlook 2010 look and feel to your applications.

What's included in Janus WinForms Controls Suite?

- Janus GridEx for .NET – Outlook style grid
- Janus Schedule for .NET – Outlook style calendar view
- Janus Timeline for .NET – Outlook style journal
- Janus ButtonBar for .NET – Outlook style shortcut bar
- Janus ExplorerBar for .NET – Outlook style shortcut bar
- Janus UI CommandManager – Menus and toolbars
- Janus PanelManager – Outlook / Visual Studio panes
- Janus TabControl – Tab control
- Janus Ribbon – Office style ribbon bar

WHAT'S NEW IN VERSION 4?

- **Office 2010 Visual Style**
All Janus WinForms controls now feature the modern visual style of Office 2010.
- **VS2010 and .NET Framework Client Profiles**
Janus controls can now be used in projects targeting .NET Framework client profiles.
- **Janus Ribbon v4**
New Backstage menus and Backstage Tab functionality as in Office 2010 applications.

Janus Systems

Janus WinForms Controls Suite V4.0

Add Outlook style interfaces to your .NET applications.

Janus WinForms Controls Suite

Office 2010
Janus WinForms Controls Suite offers an Office 2010 visual style for all controls included in the suite.

Janus Schedule Control for .NET
Present appointments and related owners in different views, representing Days, WorkWeeks, Weeks and Months.

Ribbon Component
Janus WinForms Controls Suite includes a Ribbon control.

- Includes an Outlook style grid, calendar view, journal, Ribbon and shortcut bar
- Supports snap lines, base lines, ImageList keys and more
- Unbound mode in GridEX allows you to populate rows using AddItem method

Janus WinForms Controls Suite consists of 100% .NET managed code components that are designed to provide user interfaces for .NET applications patterned after Microsoft Outlook. The Suite contains: Janus GridEX for .NET (Outlook Grid - with new support for multiple cell selection), Janus Schedule for .NET (Outlook Calendar View), Janus Timeline Control for .NET (Outlook Journal), Janus ButtonBar Control for .NET and ExplorerBar Controls for .NET (Outlook Shortcut

Bar), Janus CommandManager (Menus and Toolbars), Janus PanelManager (Outlook/VS.NET panes), Janus TabControl (Tab features) and Janus Ribbon for .NET (Office style Ribbon bar with Backstage menu and tab functionality). Janus Winforms Controls Suite includes an Office 2010 visual style for all controls along with support for Visual Studio 2010 and .NET Framework client profiles. Included are complete sample applications so you can add an Outlook 2010 look and feel to your applications in no time.

Neuron

Neuron Chart for .NET Enterprise 2012

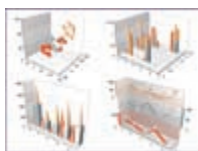

A powerful, flexible and extensible charting component for Windows Forms and ASP.NET.

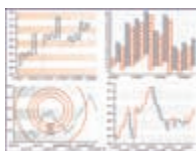

Neuron Chart for .NET

Professional Quality
Allows you to produce professional presentation quality with stunning visual effects.

Customization and 3D Support
Provides XYZ scatter graphs, multiple and controllable axes, scatter stack charts, zooming and scrolling capabilities.

Neuron Financial Charting
Includes charts for specifically targeted software firms: banks, brokerage firms, investment firms and other financial companies.

- Includes many chart types and circular/radial/linear gauges
- Includes scrollable axes, integrated legend, chart annotations, watermarks and an extensible chart layout manager

Neuron Chart for .NET has been designed to be extensible, efficient and feature rich. It can display virtually any 2D or 3D chart including: bar, line, step line, area, pie, point, bubble, stock, floating bar, radar, polar, high low, mesh surface, grid surface, shape, smooth line, floating bar, Venn and error with many variations (like scatter XY and XYZ line, stacked bars etc.).

The component features full Visual Studio design time support with many advanced features like style editors. It also comes with support for many advanced features including: customizable legends, unlimited axes, zooming and scrolling, grouping, filtering, full set of gauge types, advanced formula support, financial and statistical functions and more.

Software FX

Chart FX 7

Add interactive charts and images to your Web and Windows applications.

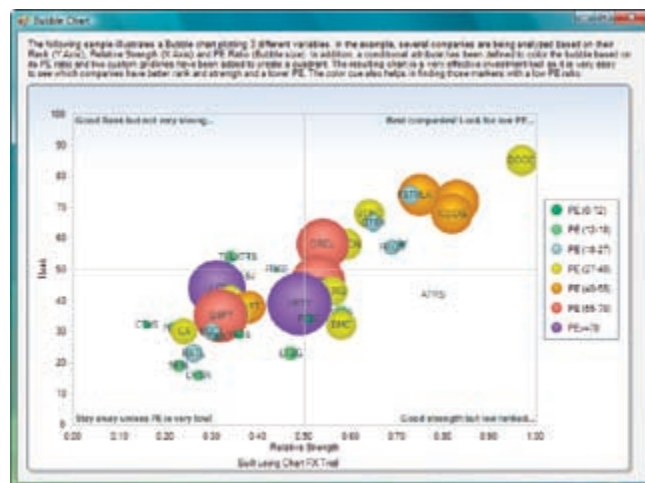

Chart FX 7

Chart Types
Choose from over 20 different chart types including 3DBar, Area, Bar, Bubble, Financial, Gantt, Line, Pareto, Pie, Radar-Polar etc

Printing
Using the Printer Object, you will have control over margins, paper orientation, color or pattern printing, etc.

End User Experience
Toolbar, context sensitive menus and dialogs provide an easy way for the End User to change visual attributes of any chart element.

- Totally rewritten to take advantage of Visual Studio enhancements
- Smart Tag Wizard provides a powerful yet familiar interface
- Redesigned UI integrates into Smart Client and ASP.NET applications

Chart FX 7 integrates seamlessly into Visual Studio to provide developers with Enterprise level data visualization capabilities. It takes full advantage of the .NET Framework to create visually-rich, lightweight and secure charts that will enhance your Enterprise application's display layer. Chart FX 7 is compatible with Visual Studio Themes; any changes that you make to a Theme

are extended to the Chart FX 7 controls on the page. Developers can also add Chart FX 7 functionality to their Silverlight-based Web applications. Chart FX 7 can bit-stream directly to a browser and includes a DHTML rendering engine that uses AJAX to produce chart images that allow full interactivity in Web applications.

5 YEARS OF EXCELLENCE

XCEED
DataGrid
for WPF

Mature, feature-packed, and lightning-fast. The most adopted and trusted WPF datagrid.

IBM[®]
U2 SystemBuilder[™]

"IBM U2 researched existing third-party solutions and identified Xceed DataGrid for WPF as the most suitable tool. The datagrid's performance and solid foundation take true advantage of WPF and provide the extensibility required for IBM U2 customers to take their applications to the next level in presentation design and styling."

Vincent Smith
U2 Tools Product Manager at IBM

Microsoft[®]
Visual Studio[®] Team System 2010

"Using Xceed DataGrid for WPF in Microsoft Visual Studio System 2010 helped us greatly reduce the time and resources necessary for developing all the data presentation feature we needed. Working with Xceed has been a pleasure."

Norman Guadagno
Director of Product Marketing
for Microsoft Visual Studio Team System

XCEED
Professional Themes
for WPF

Theme your entire app in minutes. Flawless styles for all official WPF controls.

XCEED
DataGrid
for Silverlight

Incredible streaming technology. Speed up your app and say goodbye to paging.

XCEED
Ultimate ListBox
for WPF

The world's first streaming listbox. Simple, drop-in upgrade to the WPF listbox.

XCEED
Ultimate ListBox
for Silverlight

Fast and fluid, with ground-breaking streaming technology.

XCEED
MULTI-TALENTED COMPONENTS

Text Control

TX Text Control .NET for Windows Forms V17

Read, edit and create documents in formats like MS Word DOCX, DOC, RTF, PDF, HTML and XML.

TX Text Control .NET

Character and Paragraph Formatting
Supports both paragraph and character based styles, as well as multiple style inheritance.

Bullets and Numbered Lists
Provides comprehensive support for bullets and numbered lists.

Headers and Footers
End-users can use the same header and footer throughout a document.

- Standardized WYSIWYG interface for ASP.NET & WinForms
- Supported formats include DOC, DOCX, RTF, TXT, HTML, CSS, XML and PDF
- Create and save ISO conforming PDF/A documents

TX Text Control .NET for Windows Forms is available in Standard, Professional and Enterprise editions and is a royalty-free word processing control that offers developers a broad range of word processing features in one reusable component. It includes the ability to export all documents to print-ready Adobe PDF documents without any third-party software. The fully programmable component supports nested tables, document

sections, images, text frames, drag and drop, headers and footers, bulleted and numbered lists and MS Word compatible mail merge fields for database applications.

TX Text Control .NET lets you generate paper-based mail shots, e-mail newsletters, quote generation and form letters with ease.

Xceed Software

Xceed DataGrid for WPF v4.2

Widely adopted, mature, powerful and fast WPF datagrid.

Xceed DataGrid for WPF

Validation
Includes built-in data validation, at the cell or row level. Validation error display is integrated with the included view.

3D View
The included Cardflow 3D view, delivers a linear presentation of the kind of flowing item animation that can be seen in a carousel.

Custom Views
Xceed DataGrid for WPF includes a Project template for Visual Studio that sets up a new theme project so you can create your own.

- Includes: hierarchical master-detail; 12 flexible editors; column stretching; custom sorting; automatic Excel-like end-user filtering and fixed columns
- Complete source code is available in the Blueprint Edition

Xceed DataGrid for WPF (Windows Presentation Foundation) is a grid control that in addition to traditional table and card views, allows you to present and edit data in 3D layouts. Features include: hierarchical master-detail; 12 flexible, themed/themable editors; an interactive Cardflow 3D view; column stretching and column widths supporting star values; custom

sorting; statistics rows and functions; automatic Excel-like end-user filtering; and fixed columns.

Xceed DataGrid for WPF supports UI virtualization, even when grouping data, so only elements currently in view are created and kept, meaning faster loading time which uses less memory.

Syncfusion: Facts in Black & White

We concentrate on stability and reliability. It is no secret. With a quiet commitment to customers and code, you may not be aware that we're the backbone of many applications. The reason: While others concentrate on flash-in-the-pan, we put sustenance on the table.

Time Tested

We've been with .NET since its beginning, and in that sense, we're proud to have some age on us. It means that our controls have been brought to maturity. Stability and reliability are their earmarks. When you drop one of our components in your application, you can be confident it's been tested not only by our QA, but also within the context of the real world.

Vast Offering

We've created one of the largest arrays of components on the market. Count the number of discrete controls, and you'll see. The breadth of our offering provides the flexibility to change all aspects of your application fully without relearning the differing minds of multiple vendors. With Syncfusion, all you need to know is one.

Forward Looking

With an eye on the horizon, we advance in HTML5, ASP.NET MVC, and Silverlight for web and Windows Phone 7. We possess a passion for the new. A thirst for progress. And we invite you to come see all we are doing, and all we will do, in the new frontiers of development.

what we mean by 360° transformation

Syncfusion is your development partner—a helping hand outreached. In one ad, we couldn't possibly sell you on all our products; with one magazine, we couldn't possibly convince you of our commitment to service. But we can show you. We invite you to test our full 30-day evaluation—we are confident it is enough. During the trial, please utilize our support to see what we mean by 360° transformation.
