Text Control

Powerful Rich Text Editing Component

- NEW!** Available as ActiveX and .NET/WinForms Component
- NEW!** XML/Enterprise Version
- NEW!** Now Shipping Version 10
 - New PDF Export
 - New XP Style Button Bar
 - Improved HTML Filter with Stylesheets and Image Export

Text Control Features

- Royalty-Free Word Processor Control
- NET / WinForms Component for VB .NET and C#
- ActiveX Control for VBB, Delphi and HTML / VBScript
- Class Library for Visual C++
- File Formats: HTML, RTF, Word 6 to XP, XML, PDF, ANSI and Unicode
- Image Formats: TIFF, BMP, JPEG, WMF, PNG
- Tables, Headers & Footers
- Bullets & Numbered Lists
- Text Flow Around Embedded Images, OLE Objects & Controls
- Undo-Redo
- Transparent Mode
- Read-only Mode
- Hyperlinks
- Macro Fields
- Connect to Any Type of Database
- Unlimited File Size
- Runs in Internet Explorer
- Ready-to-Use Toolbars and Dialogs
- True WYSIWYG Page View
- Print Preview
- Zoom 10% - 400% in Steps of 1%
- Text Color and Background Color Adjustable per Character
- Localized for English, French, Spanish, Italian, German and Japanese. Can be Translated to Other Languages.

Virtually all applications can make use of powerful word processing functions. TX Text Control gives you that power and delivers it in a reusable component form. With TX Text Control, you get hands-on access to the most comprehensive set of word processing features available in a development toolkit.

Office Applications

With Text Control you can easily create contemporary office applications which combine the paper and fax based office world with web technologies. Send faxes as email, or emails as fax, deploy and run the complete application over the Internet. No more setup programs, no more separate address books for mail, fax, and email.

- Use tables and macro fields for calculations.
- Exchange .DOC files with MS Word
- Insert graphics or spreadsheets as OLE objects

Database Applications

Text Control can be connected to any type of database, and store formatted text as binary data, RTF or HTML. You can store a complete document as a record, or load text from a database into table cells and macro fields. Typical applications which can be created are mail merge, report generators, formatted data entry masks, and all types of business apps, where documents are created from information stored in a database.

Web Applications

The included WebApps toolkit (ActiveX version only) gives you all you need to deploy and run your application on the Internet.

- Code-signed CAB file for automated download, no setup required
- Enhanced printing and print preview functions for Internet Explorer
- Hyperlinks
- Create User Controls with Visual Basic 6
- Run Text Control in a web page with HTML/VBScript
- Use with FrontPage, Visual Interdev, Visual Basic, or directly in HTML code

The most powerful Text Control yet is available at:

INTRODUCTION WELCOME TO COMPONENTSOURCE

Dear Customer and Fellow Developer,

Welcome to Issue 49 of the ComponentSource® paper catalog. This catalog acts as a desktop companion to the world's largest online selection of commercial-quality software components and tools for all platforms. If you are receiving this for the first time, it offers a snapshot view of our searchable online marketplace at www.componentsource.com, which is updated with newly published and tested software components weekly.

By using the ComponentSource paper catalog in conjunction with our advanced online catalog, you are assured access to one single source to find, try, and purchase software components 24 hours a day, 7 days a week. Download what you need, when you need it. Today we offer an ever growing supply of components, listed in over 110 business categories.

In December we revamped our website making navigation of the site even easier, so you can find the components you are looking for much faster. If you haven't taken a look at the new site yet, please do. Our search engine continues to evolve and we have enhanced it further using similar technology to that which Google® uses. Multiple word searches are now very accurate, so enter as many words as needed to narrow down your selections. Contexts are kept across the site, and the quote/purchasing process has also been streamlined.

ComponentSource is committed to being your preferred site for components and development tools. If you can't find something you need, or find a better price that you want matched, feel free to contact us via our toll-free numbers, or email to sales@componentsource.com.

Microsoft® .NET™ components continue to grow in popularity as developers start building and deploying their applications on Microsoft's platform. Many of the .NET component products are on their 4th generation, with new tools like El Tabelle from GrapeCity, Janus Controls for .NET, CodeRush from Developer Express, Farpoint Spread for .NET, and we have added the full line of Compuware products. On the Java™ front, we continually are expanding our collection of Java components and tools. We also are hosting BEA™ galleries and have added updated sections to our catalog for the BEA WebLogic Platform™ components and tools.

You may have recently tried or participated in our expanded "May I Help" service. This proactive ComponentSource service helps you find the exact component you are looking for, that meets your requirements, many times without the hassle of downloading and trying multiple components to get the one that closest fits your specification or need. Call any of our 31 free-phone/toll-free numbers around the world, and just ask for one of our support specialists. They can help you find exactly what you are looking for, in a short amount of time. Don't want to call? You can also send email with your specs or questions to sales@componentsource.com. Questions are answered promptly 24 hours a day, 5 days a week.

Thank you for your continued support of ComponentSource! We are glad to be able to not only serve you, but also to continually add new features and services to help you get your job done faster and more easily.

Sam Patterson
CEO, ComponentSource

VISIT US EACH WEEK...

Every week we publish the best sellers, top downloads plus a full breakdown of the latest products which hit the market. At the time of press, the following products were featured as our latest new release, best seller and top download.

NEW! PowerWEB TextBox for ASP.NET: Replace the HTML TextArea element with an HTML-editing textbox

BEST SELLER: INFRAAGISTICS NETADVANTAGE 2003: Add grid, scheduling, toolbars, menus, listbars, tree, UI and editing functionality to your .NET and COM applications.

TOP DOWNLOAD: PURECOMPONENTS NAVIGATOR: Add structured navigation functionality to your applications

ABOUT US

ComponentSource is the world's largest marketplace and community for reusable software components for all platforms, and is first to market as a Software Asset Value Provider with the launch of SAVE-IT, Software Asset Value Engineering in Information Technology. With eight years' experience at the helm of the component industry, ComponentSource is able to transfer its experience in running the world's largest reuse center on its public marketplace to the corporate environment. SAVE-IT is a mature three-pronged approach that establishes effective enterprise-scale software reuse and is the backbone technology for the National Software Component Exchange and private sector customers worldwide. The respected barometer for the component industry, ComponentSource pioneered the open market for reusable software components in 1995, and continues to drive the market through its award-winning e-business model and groundbreaking work to establish the first widely accepted reusable component standard. A global e-business with customers in over 110 countries, ComponentSource is headquartered in Atlanta and has offices in Reading, England, and Tokyo, Japan. For more information, please visit www.componentsource.com.

SALES & SUPPORT USING THIS CATALOG

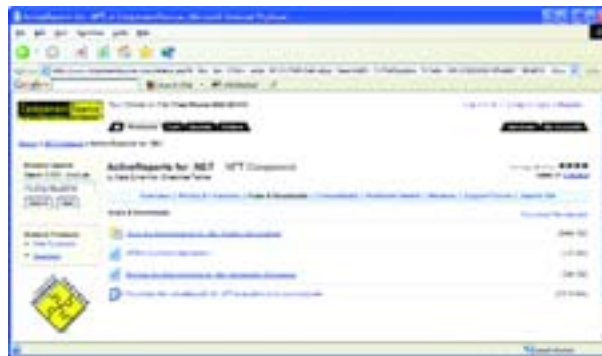

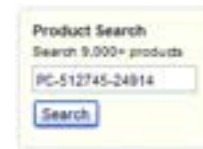

Follow the simple steps below to locate and purchase the product you need.

1

LOCATE PRODUCT

Browse to www.componentsource.com and enter the Part Number in the search box.

2

EVALUATE THE PRODUCT

ComponentSource provides a variety of information that will allow you to thoroughly assess each product you are interested in and select the appropriate solution:

- Demos
- Help Files
- HTML Documents
- PDF Manuals
- Powerpoint Shows
- Word Documents
- Evaluations

3

BUY AND DOWNLOAD INSTANTLY

You can download your product 24/7 and use it immediately. All your orders are automatically backed-up on our website and available from the "My Account" area. Alternatively, you can order a backup CD or order a boxed product version which we will ship to you. Note: coupons may be available to you on this page.

OUR VALUE PROPOSITION

DOWNLOAD YOUR PRODUCTS IMMEDIATELY 24/7

We know that many customers want their products immediately, that's why we have invested heavily in our award winning Web site. You can download thousands of products immediately from ComponentSource day or night, 7 days a week. Just visit www.componentsource.com

FOR THOSE THAT PREFER PHYSICAL MEDIA OR THE BOXED PRODUCT

If your company policy means you need to receive the physical media or if you prefer not to download it immediately from our Web site, we will be happy to ship you a backup CD or the boxed product. Just select the option when buying from our Web site or telephone us and we will process your order.

INSTANTLY GET A QUOTE FOR THE PRODUCTS YOU WANT

Need a quote first? No problem, you can create, save, retrieve and email as many quotes as you like. Just visit www.componentsource.com, fill your shopping cart with everything you need and select the "Create a Quote" option. Alternatively, call us and we will be happy to give you a quote over the telephone.

VOLUME DISCOUNT

The more you buy, the more you save. Price breaks start at just five licenses. Our price guarantee ensures that we offer the best price anywhere.

Discount Bands are based on your previous spend with ComponentSource, so now the more you spend with us, the bigger the discount you will receive. As you get nearer to qualifying for the next Discount Band, we will contact you to explain the new discount structure available in that Discount Band and how you can become eligible for entry. If you have any questions regarding this, please contact us or call us toll free.

HELP IS AT HAND IN 6 LANGUAGES

If you have a question about any of the components in this catalog or you cannot see the product you are looking for, our Customer Service representatives are ready to help you. To discuss any pre and post-sales requirements, please contact one of our multilingual Customer Service representatives.

PAYMENT

BY CREDIT CARD/DEBIT CARD

We accept Mastercard, Eurocard, Visa, American Express, and Diners Club in US Dollars, Euros, Pounds Sterling and Japanese Yen. We also accept Switch, Solo and Delta in Pounds Sterling only.

BY BANK TRANSFER OR CHECK

Please note that unless you have a Corporate Account, we cannot allow download of products until we have received your payment. For immediate purchase, please use our credit card/debit card option.

BY PURCHASE ORDER

We accept authorized purchase orders from corporate customers, government agencies and educational establishments. Please fax or mail purchase orders to ComponentSource:

US Fax:	+1 (770) 250 6199
Europe Fax:	+44 (0) 118 958 9999
Japan Fax:	+81 3 3433 8102

Post your purchase order:

CORPORATE ACCOUNT

Our Corporate Account service aims to increase productivity within the development environments of corporate and software house businesses by offering the widest choice of software components efficiently and cost effectively worldwide.

By co-ordinating demand through a single ComponentSource account you can:

- Reduce duplicated time and effort across your developer teams locating software components
- Ensure your business is always buying quality products that have been tested for viruses, completeness, installation and de-installation
- Benefit from a guaranteed high level of service from a dedicated account manager
- Save money through our corporate discount scheme (the more your business uses our service, the more it saves)
- Receive important, relevant upgrade alerts and new product information

AUTOMATIC UPDATES

ActivePatch V1.2

Conserve bandwidth and speed update time for your applications.

ActivePatch software development toolkit enables your application to reduce the size of updated files as much as 90%, significantly reducing network load and file download time. Use it to provide automatic updates for your software over the Internet, distribute modified databases over a corporate WAN, or reduce the storage requirements for archived files. ActivePatch does not depend on external tools or complicated batch files and proprietary scripting languages.

FROM \$240.⁸³

Catalyst Development Corporation
Part#: PC-511806-22530

BARCODES

dBarcode DLL - Universal V2.1

Create most common barcodes from within your applications.

dBarcode DLL Universal allows developers to generate barcodes directly from within a variety of development environments. Supports Code 39 and Extended 39 barcodes, and allows bar thickness, bearer bars, margin indicators, human readable text and text position to be adjusted. Supports over 50 major barcode types including Code 128, Code 39, EAN, UPC, etc. Barcodes can be rotated left or right, or inverted, and check digits can be automatically calculated.

FROM \$448.⁹⁵

dLSoft
Part#: PC-512838-27061

AUTOMATIC UPDATES

TrueUpdate V1.0

Add live updating capabilities to your software.

TrueUpdate is a Windows application that provides a sophisticated framework for determining required updates and then retrieving and applying the necessary patch or installation files via the Internet, intranet or LAN. It was designed to meet the demand for a complete, web-enabled updating solution that can be integrated into new and existing software products, regardless of the installation and deployment methods used.

BARCODES

dFont Barcode Fonts for Windows - Code 128/EAN 128

Create barcodes within any Windows application.

Barcode Fonts for Windows font packages contain TrueType, OpenType and PostScript fonts for creating barcodes in any Windows application that supports font selection. Provided as individual packages for each barcode type, each also includes DLL, OXC and UFL tools for calculating check digits etc. from within programming environments, and the source of a VB application which can be used for customising your application. Includes samples for MS Office, VB, VB.NET, C#, Crystal Reports, Delphi, Visual Foxpro.

FROM \$152.⁴⁶

dLSoft
Part#: PC-512935-27216

BARCODES

Active Barcode Component - Universal V3.0

Create and print industry-standard barcodes from your Windows applications.

Active Barcode Component - Universal is an ActiveX barcode image creation component which supports over 50 major barcode types including EAN 8/13/14, UCC, ISBN, Code 39, Code 128, and many more. It allows bar thickness and the wide/narrow ratio to be adjusted. Barcodes can be rotated left or right, or inverted, and check digits can be automatically calculated and either shown or hidden. Includes source code samples for MS Office, VB, VB.NET, C#, Delphi, C++ Builder, etc.

FROM \$223.⁷²

dLSoft
Part#: PC-510116-36926

BARCODES

Universal Barcode Font V3.5

Create Universal Barcodes from a wide range of applications.

The Universal Barcode Font Kit provides a versatile way to create barcodes from within any application written in a programming language that supports accessing a DLL, OXC or UFL, and supports most barcode types including 2 of 5, Code 39, Code 128, EAN, UPC, ISBN, PostNet, RM4SCC and more. The tools translate data into a form which may be displayed or printed in the barcode fonts, which are provided as TrueType, OpenType and PostScript fonts in three different weights and five height/width ratios. Includes samples for MS Office, VB, VB.NET, C#, Crystal Reports and Delphi.

ComponentOne

NEW VERSION

Studio Enterprise.

Rapidly build cutting-edge Microsoft® Windows®, Web-based, and Mobile applications.

ComponentOne® Studio Enterprise™ is the only component subscription offering best-of-breed grid, reporting, charting, data, user interface and eCommerce components for .NET, ASP.NET, Mobile, and ActiveX.

ComponentOne Studio Enterprise is more than a set of components for presentation layer design, it is a truly comprehensive and integrated toolkit for developing cutting-edge, enterprise-style .NET, ASP.NET, Mobile, and COM applications. Leveraging more than ten years of component development experience, we've created a solution that minimizes development time and costs, and maximizes ROI as well as developer and end-user productivity. Plus, with the substantial new product and feature upgrades you receive through your Studio Enterprise subscription, you'll never miss out on the latest ComponentOne technology.

Q4 2003 RELEASE

**NOW

CALENDAR / SCHEDULE

Solutions::PIM Professional V3.0

Build Personal Information Management (PIM) applications.

Solutions::PIM Professional delivers the tools Windows Developers need for creative calendaring, appointment scheduling, and personal information management applications. These powerful ActiveX components are designed to work together using common properties and events for simple and seamless integration by Windows Developers into any application. Build appointment based applications that manage time as you see it.

FROM **\$494¹⁰**

DBI Technologies
Part#: PC-505802-29083

CALENDAR / SCHEDULE

ScheduleX V9.0

Build complete scheduling and task management applications.

The ScheduleX combines three powerful, lightweight (ATL) components for calendar, task management and scheduling applications. Using the advanced Calendar, DayView and TaskPad components, create Personal Information Management (PIM) software, project management and tracking, or any application that requires advanced scheduling. All components default to the familiar Outlook user interfaces.

FROM **\$385¹³**

Infragistics
Part#: PC-50999400-S

CALENDAR / SCHEDULE

Calendar Objx V3.0

Display or select date and/or time values in your application.

Calendar Objx is an ActiveX component that allows you to create calendar and scheduling applications that can be bound to external databases. It includes Daily PlanIt to provide complete scheduling functionality including: Appointments - recurring, specific, etc., Calendar Display - by day, month, year, or single date, configurable display including color, background, alternate font color, and much more.

FROM **\$223²⁸**

FarPoint Technologies
Part#: PC-51029300-E

CALENDAR / SCHEDULE

UltraWinSchedule V3.0

Provide the familiar look and feel of Microsoft's Outlook.

Infragistics' UltraWinSchedule contains 5 advanced calendaring components two of which are non-visual UltraCalendarLook and UltraCalendarInfo. Together they act as a centralized repository of information, providing automatic synchronization of that information across all UltraWinSchedule controls, such as appointments, notes, holidays, etc., and appearances such as a standard look for holidays.

FROM **\$385¹³**

Infragistics
Part#: PC-512132-36115

CALENDAR / SCHEDULE

GbSchedule V7.0

Build custom scheduling functionality into your applications.

GbSchedule is a COM-based component that can handle any number of appointments with color-coded categories. Any number of days or rooms can be displayed with 24-hour days. It allows for drag-and-drop schedule moves or copies and can be displayed in any of six ways or modes. There are even conflict resolution routines to determine, eliminate, or disallow conflicting appointments.

FROM **\$349²⁰**

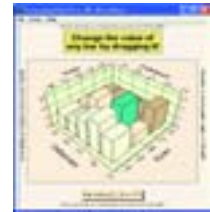

Gravitybox Software
Part#: PC-51042000-D

CHARTING AND GRAPHING

ComponentOne Chart V8.0 Q4 2003

Create and customize virtually any type of chart.

ComponentOne Chart provides hundreds of properties and methods to create an unlimited variety of charts with variations of color, style annotations, and perspectives, including: Bar, Pie, Area, Line, Polar, Ribbon, Bubble, 3D Scatter, and many more. It supports data binding to any data source, allows you to use bitmap or metafiles as background images, and even supports exporting the charts in JPG and PNG formats.

FROM **\$425⁴⁵**

ComponentOne
Part#: PC-511228-36084

CALENDAR / SCHEDULE

GbSchedule.NET V2.1

Add scheduling to your .NET applications.

Gravitybox Schedule.NET is a fully enabled, scheduling component for the enterprise. Data may be viewed in 15 different view modes. You may also associate rooms, people, or categories to appointments. Numerous built-in dialogs provide the default user prompts. You can also bind directly to a database with datasets. An optional web service allows you to coordinate multiple schedules components to handle concurrency and database updating.

FROM **\$389⁰³**

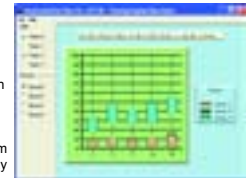

Gravitybox Software
Part#: PC-514029-34868

CHARTING AND GRAPHING

ComponentOne Chart for .NET V1.0 Q4 2003

Create a wide variety of 2D and 3D charts.

ComponentOne Chart for .NET includes a 2D and a 3D chart control for use in your Windows applications. Use the 2D Chart to display data as a bar, X-Y plot, area, pie, radar, polar, candle, or combination chart. The ComponentOne Chart for .NET 2DChart control is optimized for real-time applications giving you the ability to display rapidly changing data. Use the 3D Chart to create 3D surface, contour, or bar charts that end-users can easily rotate, scale, or zoom interactively. The ComponentOne Chart for .NET 3DChart can display 3D data in 15 basic surface or bar appearances and automatically generate contours and zones from the data.

IronWorks V1.0

Automatically generate database interaction solutions.

IronWorks is a template-based tool for the automatic generation of programs and components that interact with database systems. It comes with a set of core template libraries that generate n-tier solutions in either C# or VB.NET, including stored procedures and advanced web forms for the user interface. Users may also create their own templates, which are programs in C# or VB.NET that access the IronWorks Object Model.

The Best Tools for Software Development

DevPartner™ Studio Professional Edition

DevPartner Studio Professional Edition lets you debug, tune and test Microsoft Visual Studio 6 and .NET apps at the same time, so you can deliver reliable applications quickly and more efficiently. What else?

- Source code analysis quickly identifies coding errors in Visual Basic, Visual Basic .NET, C# and ASP.NET. Details and suggestions help you make corrections early, which reduces costs.
- Automated error detection spots runtime errors in development, monitors execution of C++ apps and monitors calls between managed and unmanaged code.
- Memory analysis provides multiple views of memory usage in .NET objects and classes in real time.
- Performance analysis pinpoints the exact location of slow code and bottlenecks.
- Code coverage analysis helps you locate unexecuted code by measuring and tracking the stability of code.

The optional DevPartner Studio Server license extends memory, performance, code coverage and distributed transaction analysis across all components of a distributed application, even if they reside on different computers.

DevPartner Studio memory analysis provides a live, interactive view of how .NET applications use memory, helping developers identify excessive object use and memory leaks.

Call graphs not only show the calling relationships between the functions, but also provide performance and memory use details.

DEVELOPMENT

COM-X-RAY V1.20

See inside COM objects, understand, debug and optimize your programs.

COM-X-RAY is a complete solution for analysing and documenting any COM object. Allowing one to retrace and understand quickly the way a COM-based component of an application works and depends on other components. Browse through the internal structure of a COM object, create printable classification and dependency diagrams that show internal and external relationships of COM objects and generate documentation for any COM object in various file formats.

FLOW DIAGRAMMING

AddFlow V4.2

Create interactive flowcharts and workflow diagrams.

AddFlow is an ActiveX component that is useful each time you need to display and use relationships between objects in your application. Drawings can be made interactively or programmatically. Features include distinct shapes, styles, pictures, colors, fonts, user data, and so on for each object of the diagram, metafile support, serialization, printing, zooming, customization and more. Runtime Royalty free.

FROM \$484.⁰³

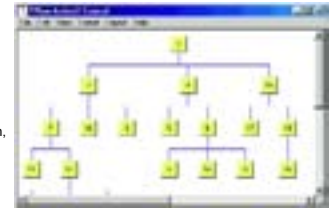

Lusselle Technologies
Part#: PC-50461420-Q

FLOW DIAGRAMMING

TFlow V1.1

Perform a tree layout on your AddFlow graphs.

TFlow ActiveX Control performs a layout automatically, positioning its vertices and edges on forms containing both the AddFlow and the TFlow ActiveX Controls. You create the graph in AddFlow, then apply the TFlow layout to this graph. The tree layout applies only to a specific subset of graphs: rooted trees. In such a graph, no vertex may have more than one parent. Vertices at the same level of the tree are placed on the same line and a parent is centered over its child. Runtime Royalty free.

FROM \$218.⁴⁰

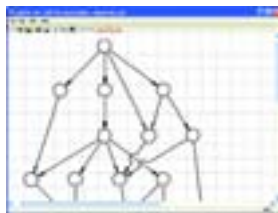

Lusselle Technologies
Part#: PC-51113000-A

FLOW DIAGRAMMING

AddFlow for .NET V1.1

Create interactive .NET flowcharts and workflow diagrams.

AddFlow for .NET provides approximately the same flowcharting/diagramming features as the ActiveX version and also some new features, more flexibility and a simpler and more powerful object model. It has been completely rewritten in C# to take advantage of the infrastructure provided by .NET. It is 100% Managed Code. The installation package includes a beta version of HFlow for .NET, SFlow for .NET and TFlow for .NET. A demonstration of each of these products is available in the afEdit sample.

FROM \$486.⁵³

Lusselle Technologies
Part#: PC-513273-34753

FLOW DIAGRAMMING

FlowChartX V2.0

Add work flow diagrams to your applications.

FlowChartX helps you create and present work flow, algorithm, and process diagrams, database entity-relationship diagrams, object hierarchy and relationship charts, graphs and trees. Its basic types of objects - boxes, tables and arrows can be grouped and attached one to another, and combined in complex structures. The control provides more than 50 predefined box shapes, as well as user designated and custom-painted boxes.

FROM \$250.⁰⁰

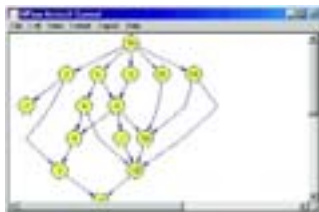

MindFusion Group
Part#: PC-513482-35580

FLOW DIAGRAMMING

HFlow V1.1

Perform a hierarchical layout on your AddFlow graphs.

HFlow ActiveX Control performs a layout automatically, positioning its vertices (also called nodes) and edges (also called links) on forms containing both the AddFlow component and the HFlow ActiveX Control. You create the graph in AddFlow, then apply the HFlow layout to this graph. The hierarchical layout arranges vertices in horizontal layers. The orders of the vertices are chosen so that the number of crossings is kept small. Runtime Royalty free.

WebGrid.NET™ Discover more exciting features and download your trial copy today for ASP.NET

Displays and manipulates enterprise data, allowing your users to interactively work with the information, while saving your developer's time with easy to use and comprehensive Designer. WebGrid.NET™ Enterprise edition sets a new standard in performance, user interactions and experiences for ASP.NET-based grid component, allowing users to work more productively in web-based environment using Windows-like user interface that they are already familiar with.

The Enterprise edition is the only ASP.NET grid component equipped with a broad range of powerful built-in functionalities and advanced core architecture such as OnTheFly™ powered editing and data manipulation, rich edit controls including WebCombo.NET™ integration and Calendar popup selection, full .NET globalization support, grid exporting, comprehensive Designer support for Microsoft® Visual Studio.NET™ and much more — it helps you to easily build enterprise-level, highly professional data presentation's applications in much less time and codes, thus reducing costs as well as faster time to market.

Key Features

- Built-in Editing.**
Enabling developers to make the grid editable with a few mouse clicks. The uniqueness of the editing functionality is its new concept in delivering changes such as row addition, changes and deletion without full page refresh and full data rebinding. The feature utilizing the OnTheFly™ postback architecture to make changes to server and deliver the changes transparently in almost realtime.
- Edit Types.**
With the capability of built-in editing, rich edit controls are necessary to allow end-users input information more conveniently and effectively. It provides 6 built-in edit controls which you can easily specify for each Column in the Designer. It includes Textbox, MultilineTextbox, Checkbox, DropdownList, CalendarDropdown/Combo.
- WebCombo.NET™ Integration.**
Integration with WebCombo.NET as edit type resulting in sophisticated editing functionality provides extremely smooth and convenient user interface when selecting large picklist. The integration greatly surpasses any other grid products available on the market by delivering performance and efficiency that was never possible before.
- Validations and Masked Display.**
With the advanced built-in editing and rich edit controls in a box, the Enterprise edition makes the final touch in the Editing functionality by including powerful and comprehensive validations and display masks capability. The client input validations not only validates basic data types, it is a completely rewritten Microsoft's .NET data formatting capability to clientside which is capable to parse and validate input that contains formatted string and format it as specified in DataFormatString.
- Globalization.**
The Enterprise edition is designed with full globalization support as one of its key features. Developers can specify which Culture should the WebGrid use to display formatted string. The Culture setting will then be automatically applied by validation and masked display core engine during editing, without requiring developers to write additional codes.

LEADTOOLS Document Imaging V14.0

Build powerful document imaging systems.

LEADTOOLS Document Imaging allows you to develop document imaging software applications with features that include comprehensive annotations (RTF Text, highlights, sticky notes, stamps, and more), TWAIN/ISIS support, specialized bitonal image display and processing such as scale-to-gray and favor-black. Also features performance and memory optimizations, document image clean-up including hole-punch, line and staple removal, as well as general imaging functionality like image processing, compression, file format support and more.

LEADTOOLS 14

Welcome to

THE WORLD OF IMAGE PROGRAMMING

200+ Image Processing Filters
Client/Server Imaging Support
Huge Set of Image Annotations
High Performance Display
OCR/OMR/ICR & Barcode
Document Clean-up
Fast TWAIN Scanning
150+ Image Formats

For the last fourteen years, LEADTOOLS has powered the imaging engines of the most well known software such as Microsoft Front Page, and the internal systems of the fortune 500 companies like Ford Motor Company, Reuters, Boeing, NCR, Adidas, and many more. Thousands of programmers have relied on LEADTOOLS for their imaging needs, but tens of millions of end-users use LEADTOOLS powered applications daily.

RASTER IMAGING

Support for Over 150 raster file formats including TIFF, JPG, J2K, PDF & GIF using various compression schemes like JPEG, JPEG2000, LZW, CCITT G3/G4 & CMP. Scan, Capture, 200+ image processing filters, high speed display (resize, rotate, quality controls), and much more.

MEDICAL IMAGING

Advanced DICOM Support (DICOM Media, Dataset manipulation, Display (8, 12, 16 bit Grayscale & Color), Communication, Security, Printing, Modality Work List). Medical Image processing, Grayscale Softcopy Presentation including Modality LUT, VOI LUT, Overlay display, manipulation, DICOM Annotations and much more.

DOCUMENT IMAGING

Comprehensive Annotations, specialized bitonal image display and processing, image clean-up, high-speed scanning, OCR/ICR/OMR (Character, Hand-Print, and FORM Recognition), Barcode Recognition and much more.

VECTOR IMAGING

2D and 3D vector image formats, including DWG, DWF, DXF and DRW. Convert vector files to raster images, convert between vector formats, scale, rotate, change camera and lighting, edit vector objects. OpenGL, DirectX or GDI rendering engines and much more.

MULTIMEDIA IMAGING

Audio/Video capture including DV, playback and convert using DirectShow® technologies. Support for AVI, WMV, WMA, ASF, MPEG, MP3, WAV, MIDI, SND, AIF files, Video and Audio processing filters (rotate, resize, deinterlace, much more). Create your own Juke Box application.

INTERNET IMAGING

Controls for the Microsoft .NET Framework, .NET services, small COM objects, Client/Server support, remote image processing, reduced redistribution requirements, HTTP/FTP functionality, and much more!

LEADTOOLS

IMAGING

LEADTOOLS JPEG2000 Plug-in V13.0

Add JPEG2000 compression to your LEADTOOLS components.

LEADTOOLS JPEG2000 Plug-in is an add-on module for all LEADTOOLS Windows Toolkits. JPEG2000 is a wavelet-based compression stored in a hierarchical format, which contains several stored resolutions of the image in the same file without duplication. For that reason, a JPEG2000 compressed image can then be sent to a device in the resolution that best fits without additional storage overhead.

IMAGING

LEADTOOLS ePrint V4.0

Convert PDF, Doc, TIFF, JPEG and more.

LEADTOOLS ePrint is a Imagefile converter that allows you to convert your images or documents from any Windows application to over 140 file types including searchable PDF, DOC, TIFF, JPEG etc, as easy as printing the file. Other features include broadcast printing to print to more than one printer at a time, enhanced printing to add advanced printing features, and for developers a free SDK to customize applications in development. Also included with ePrint is a free Screen Capture utility that sits on your Explorer toolbar. With LEADTOOLS ePrint, your file conversion possibilities are infinite because as long as you have a windows application that prints, LEADTOOLS ePrint can save the format that you specify.

IMAGING

LEADTOOLS MRC Module V13.0

Add support for raster color documents containing mixed image and text components.

LEADTOOLS MRC Module enables optimized compression for mixed content images, whilst retaining a high level of detail. Compression is achieved through a splitting of the image into three layers. JPEG compression is applied to color layer, black and white areas are compressed more intensely. Manual optimization of this process is possible. Excellent for the compression of adverts and marketing materials, or any mixed image/text documents that require optimum quality and compression. Adds on to LEADTOOLS Document Imaging.

Developer Tools for
the new millenium

DynamiCube—Internet-Enabled ActiveX Control

For professional Windows developers integrating data analysis into DSS/EIS applications. DynamiCube is a lightweight ActiveX control that provides flexible analytical interaction with large databases, giving users the advantage of multi-dimensioned databases without creating one. Unlike any other OLAP solution, DynamiCube enables you to easily add data analysis to websites.

Data In, Insight Out.

SharpGrid—Comprehensive ActiveX Grid Control

For professional Windows developers, SharpGrid is a full-featured, database-aware ActiveX grid control. It can be used in bound (both OLEDB and ICursor), unbound, and virtual data modes. SharpGrid has all features expected from a modern grid control and unique features such as group calculations, row filtering, preview pane, stage-driven custom draw model, XML and CSV import/export, persistable XML layouts, HTML export, scroll tips, cell tips, frozen columns and rows, and Alpha blending.

Show Your Sharper Edge

SharpUI for .NET—Visual Studio .NET UI Tools

SharpUI presents a complete toolkit of user interface controls to give your Visual Studio .NET® applications a sharp and consistent look and feel. It provides all the components you need to match today's modern applications. The components include XP-like toolbars, menus and dockable tool windows, a comprehensive set of databound input controls, a complete set of panel controls, and a StyleManager to provide a uniform look and feel.

**Sweet Controls...
Sharper Applications**

ActiveReports—Advanced Report Designer

For VB and Visual Studio .NET developers who need to generate a wide variety of reports from their applications, ActiveReports from Data Dynamics is a powerful and easy to learn designer. Unlike any other report writer, ActiveReports takes full advantage of the design environment's powerful, familiar language and data binding capabilities.

Got Data? Show It!

ActiveSizer—Form Fitness Control

For professional Windows developers who need to provide automatic form sizing, splitting, scrolling, and form hosting within their business applications, ActiveSizer delivers complete functionality in an easy-to-use designer. Unlike other controls, ActiveSizer combines these four popular control functions into one.

Stretching Your Form's Limits

ActiveBar 2.0—Premier Toolbars & Menu Control

ActiveBar 2.0 delivers complete Microsoft Office and Visual Studio toolbars, menus, and dockable windows emulation in a small and easy-to-use ActiveX control. ActiveBar 2.0 removes the limitations of the system menus and toolbars and allows you to provide complete run-time customization and personalized environments in your applications.

Everything Docks!

DATA DYNAMICS

DATA DYNAMICS

Every project I've ever worked on that uses Crystal has the end result of having the developers run away screaming in horror whenever a new report is needed or a current report needs to be updated.

Every project I've ever worked on that uses ActiveReports has the end result of having the developers being able to write and maintain reports with very little pain and discomfort.

Jason Bock
Best Buy Co., Inc.

We switched from Crystal Reports to Active Reports about 2 years ago and have been extremely pleased with the results. With the tight and stable design-er integration of ActiveReports with the Visual Basic IDE, our production and maintenance time was drastically reduced. More importantly, our customers - Army, Navy, Air Force, Marines - have been pleased with our ability to mirror their existing paper based forms.

Roger M. Scott
Project Manager
MAXIMUS Intelligent Technologies Div
Williamsburg, VA

After struggling with Crystal Reports for over a year, I tried out the demo of ActiveReports for a weekend. On Monday I placed my order, and within 2 weeks I had converted all my old reports, and I was creating better reports than I ever could with Crystal Reports.

ActiveReports works just like a VB form in connecting to data, allowing you to use data controls, recordsets, and any other means to connect to the data. Working with ActiveReports is just like working with Visual Basic, and that's what makes it so easy."

Mike Williams
VB Programmer
Las Vegas, NV

Easy to Use

ActiveReports features an easy-to-use, banded, fully integrated report designer with built-in wizards and converters, integrated toolbars, report and field explorer window, and detailed help instructions. The designer makes it easy to create the kinds of reports you need—from the most basic to the most complicated reports.

Easy to License

Licensing with ActiveReports for .NET is straightforward and easy to understand. There are no hidden costs, extra licensing fees, or royalties charged for end users. Once you apply the key received when you purchase, you are free to create and deploy your reports as needed.

Easy to Deploy

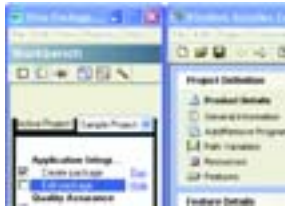

ActiveReports makes deploying your reports and end-user reporting capabilities easy. The reporting engine is provided as a single managed, strongnamed assembly. ActiveReports allows assemblies to be distributed using XCopy or placed in the Global Assembly Cache (GAC).

INSTALLATION

Wise Package Studio V5.0

Distribute your software installations with ease.

Wise Package Studio is designed for system administrators to streamline the process of preparing software applications for deployment. It combines best practice methodologies with the latest software installation technology, giving system administrators complete control over installations. You can easily migrate applications to Windows Installer (.MSI) through project and application management, repackaging, customization, validation, testing and disbursing to distribution systems. In return you receive error-free, reliable deployments that cut your packaging efforts by 50%

INSTALLATION

Xceed Absolute Packager V1.1

Create high-quality, self-extracting Zip files.

Xceed Absolute Packager is an application that creates what Xceed calls "Smart Zip Files" because they are more than just self-extracting Zip files. Unlike most self-extracting zip files, which offer a cluttered, user-unfriendly look, Absolute Packager's smart zip files offer a rich, polished interface. Use Absolute Packager to create Smart Zip Files that inspire confidence and maximize end-user convenience.

INSTRUMENTATION

Aircraft Instruments V3.2

Build detailed instrumentation displays for your aircraft simulation application.

Aircraft Instruments displays 12 small aircraft flight instruments including air speed, altimeter, artificial horizon, automatic direction finder, climb rate indicator, compass, course indicator, heading indicator, horizontal situation indicator, omni-bearing indicator, radio magnetic indicator, and turn coordinator. It utilizes dynamic property pages and is self-registering. The control is so powerful and easy to use, even the hobbyist can create professional, commercial quality applications with little effort.

IP*WORKS! RED CARPET™ SUBSCRIPTIONS. NO BOUNDARIES.

Today's deadlines are brutal and you almost never know what your next project will be . When your deliverable is due yesterday, the last thing you want to do is search around for that Internet component you are missing. That's why we give you EVERYTHING in one package: components for every major protocol, from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, Digital Certificates, Credit Card Processing, ZIP compression, Instant Messaging, and even e-business (EDI) transactions. No licensing restrictions, so you can code on your work machine, your notebook, or even your home machine. No technology restrictions, so you get everything. .NET, COM, C++, Java, and even Pocket PC, Linux and Mac OS X. Plus quarterly update CDs with free product updates, free upgrades, and new releases so you always stay on the leading edge. Last but not least, one low price your manager will love. For more information, please visit www.componentsource.com

INSTRUMENTATION

Strip Chart V3.5

Perform dynamic, two-dimensional charting.

Strip Chart is an ActiveX component that provides an interface for one or more streams of realtime data or as a static two-dimensional charting tool. Use it to replace or enhance the plotting utility that comes with Excel. Other possible uses include: Factory Trending or Feedback, Vertical Plotting or Drilling Operations, Static Plotting, Virtual Oscilloscope, and more. Strip Chart is a dynamic two-dimensional charting component that provides an ideal interface for viewing one or more streams of real-time data. Variables can be placed on one or more "tracks" for convenient, sensible viewing of data.

NETWORK ADMINISTRATION

IP*Works! Secure Tunnel V1.0

Add SSL functionality to any server.

IP*Works! Secure Tunnel is designed to upgrade any existing server to a secure server with minimal effort and time. Clients connect securely (via SSL or TLS) to IP*Works! Secure Tunnel. Secure Tunnel then handles any necessary encryption or decryption, and then forwards the data stream to your existing server. Your existing systems remain unchanged. Server authentication based on digital certificates used to bind a servers identity to its public keys.

JANUS GridEX for .NET

THE POPULAR GRID COMPONENT

.NET VERSION NOW AVAILABLE AT WWW.COMPONENTSOURCE.COM

Develop data manipulation tools within the .NET environment. Janus GridEX for .NET is a data-aware, fully editable component that hooks directly to databases. The control implements its own data binding mechanism in order to perform sophisticated data manipulations. Janus GridEX for .NET also has a powerful unbound mode for managing data in any format without sacrificing any group or sort capabilities. The control also offers an innovative "card view," which provides an easy means of browsing through data.

CELL, COLUMN AND ROW LEVEL FORMATTING

You can now format individual cells, columns or rows, using notifications and criteria. In order to facilitate formatting tasks, a new tool has been added: FormatStyles. FormatStyles are discrete objects that hold formatting information, such as fonts, colors, images and so on.

SUPPORT FOR WORD WRAPPED CELLS AND PREVIOUS ROWS

We know your data doesn't always come in one neat size. That's why we've added word-wrapping to individual cells, so you won't have to resort to other controls to show all your data. The Preview Rows are also an exciting interface addition. Using them, you can "preview" one of your data columns below each row, much like Microsoft Outlook does.

GRIDEX LAYOUTS

Also new is the capability to save and load complete layout definitions for a GridEX to a file or to a formatted string, and even load layouts from URLs, for web-based applications! You can now easily circumvent the problem of persistence within the browser context and create fully capable and user-interface rich web applications.

WYSIWYG PRINT AND PRINT PREVIEW

Showing the data to the user and editing it is not enough. That's why Janus has added WYSIWYG (What-You-See-Is-What-You-Get) previewing and printing to the GridEX. Using a completely encapsulated control, you can design preview forms that include localizable toolbars for report navigation and printing. In effect, we have added a reporting engine to the GridEX. Sharing your data has never been easier!

AGGREGATE FUNCTIONS FOR GROUPS AND GROUP FOOTERS

The Janus GridEX has been recognized since its initial release for its advanced grouping and sorting capability. Ability to display footers for individual groups, and to calculate column values using predefined aggregate functions, much like a report designer.

MULTICOLUMN COMBO BOXES WITH AUTOFILL FUNCTIONALITY

A much-requested user interface enhancement is the ability to have multicolumn drop-down combo boxes as "pick-lists" for the GridEX's columns. Autofill function that helps the user find list entries quickly. Taking the combo box concept a bit further, you can now use a separate GridEX control to display column lists. Place an additional GridEX on your form, set a few properties, and you have an advanced value picker for any or all of your bound or unbound columns, complete with headers, formatting and almost anything else a standard GridEX can do. And no need to use an additional OCK library.

FROZEN COLUMNS AND AUTOMATIC COLUMN SIZING

You can now optimize the display of your data and the user's interaction with it using these new features. You can freeze individual columns as needed, and you can also have columns resize automatically to their contents.

ABILITY TO HIDE EMPTY FIELDS IN CARD VIEW

The much-praised card view mode of the GridEX control now has the ability to hide or show individual fields that are empty, thus leaving you with more space to show additional cards.

TOOL TIPS

Another feature of new user interfaces are the ubiquitous tool tips, which allow the user to get immediate feedback and information on the task at hand. Tool tip feature that displays cell text hidden by column or row boundaries in a familiar floating window that automatically disappears when the mouse leaves the cell area.

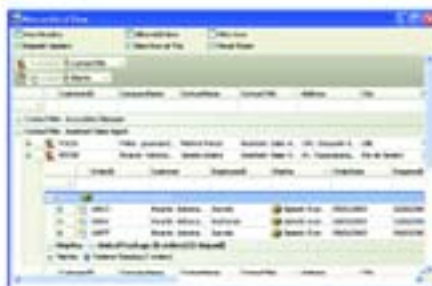

SIMPLE GRIDEX CONTROL

Drag a column header and drop it into the "Group by" box, and the control automatically presents your data, grouped by the chosen field.

CARD COLUMN SETS

Besides presenting the records as lines in a grid, you can also show each record as a card, making it easier for the user to look for the data.

HIERARCHICAL VIEW

The hierarchical view allows you to sort and display your data in a tree like structure.

PREVIEW ROWS

Using the new "Preview Row" feature you can "preview" one of your data columns below each row, much like Microsoft Outlook does.

ALPHA BLENDING

Add background images to your grid and set the transparency level.

TABLE COLUMN SETS

Customize the way your data is displayed.

PRODUCTIVITY

Select Scope Manager 2003

Add automated process management for Extreme Programming (XP).

Select Scope Manager helps developers automate their XP development, speeding the delivery of business critical applications. Using XP (Extreme Programming) significantly reduces development cycle time and costs. It enables stories, ideas, documents and analysis to be logged. This then allows development teams to estimate and detail the tasks required. Stories can then be selected and assigned to releases, based on resources and risks. Each Story then follows its own (defined) development process (each development process is defined on a project by project basis). During the development, progress is monitored and scope is adjusted accordingly. Task sheets, project plans, timesheets, velocities, work breakdown charts and project roadmaps are all generated automatically.

Yes, You are Right... Creating Reports is a Royal Pain in the Neck!

Tedious - Boring - Unfulfilling - Repetitious - Time Consuming are all adjectives that describe how most developers think of reporting. Let's face it, creating reports is not fun and can drive even the sanest among us mad. Worse yet are the high prices and runtime deployment fees associated with some of today's most popular reporting tools. It is for these reasons that we set out to break the mold and deliver a reporting platform that is affordable, royalty free, easy-to-use and does not box you into a corner.

Introducing **XtraReports** by **Developer Express**

XtraReports is a new generation Reporting platform for Windows® Forms and ASP.NET developers, and is fully integrated into the Visual Studio® .NET IDE. With the XtraReports designer you will be able to build a report in exactly the same way that you might build a typical Windows® Form application in Visual Studio® .NET. XtraReports uses the same code editor (C#, VB.NET or J#), the same Property Grid, the same component Toolbox, the same alignment toolbar, and all the other Visual Studio® .NET IDE resources. XtraReports classes persist in exactly the same way your Windows.NET classes do - so there is no need for fancy external file types just regular code files, which makes deployment a breeze.

XtraReports uses the same data binding as Windows .NET controls and even understands sources that support the IList interface. You can feel free to drop onto your XtraReport any traditional .NET data controls like Datasets, Connections, Adapters and so on and begin using them immediately. If you are writing an application that works with Oracle or any other SQL server, then you simply use the appropriate adapter for a .NET dataset. There are no limits here; you use it just like you use the Microsoft® Windows .NET designer.

Of course, like anything else in life - seeing is believing. If you are sick of building reports and want a new approach that will make you and your team more productive from day one, visit componentsource.com and search for XtraReports today.

RESIZING

ElasticLight V6.0**Perform automatic resizing of forms in your Windows applications.**

ElasticLight is an ActiveX component that adds elasticity to your forms. Just add the new ElasticLight control to your existing applications, and your forms automatically become resolution independent. When you resize your form, the ElasticLight control automatically resizes all the controls contained in it. No code is required. Version 6.0 has a small footprint and it doesn't require additional DLLs to be distributed.

**FROM \$97.⁴⁵**ComponentOne
Part#: PC-51002300-A

RESIZING

ReSize OCX/.NET V4.x**Give your applications resolution independence.**

ReSize alters the sizes, font sizes, and positions of controls on Visual Basic forms as they are sized, without requiring you to write any code - simply place ReSize on the form. It can even handle controls that are nested inside other container controls. ReSize allows you to specify a minimum form size - both height and width, insuring that the controls on your form will always be visible.

**FROM \$89.¹⁰**Larcom and Young
Part#: PC-504576-21969 

RESIZING

SizerOne V8.0 Q4 2003**Add resizing, tabbing, and parsing to your applications with this four-in-one component collection.**

SizerOne is the newest version of VS-OCX that includes two resizing components to handle both simple and complex sizing, a tabbing component to create notebook-style and Outlook-style tabs, and a parsing component to automatically parse strings. Other features let you design grids and forms faster, add frames to child controls, scale pictures, and more.

Take control of your mobile messaging applications with the ActiveXMS Mobile Messaging SDKs.

- Smart Messaging® Edition**
The ActiveXMS Mobile Messaging SDK (Smart Messaging® Edition) is a lightweight ATL.COM DLL for wireless developers building content for SMS Text Messaging devices. The SDK provides a rich set of functions to encode and decode the User Data strings for all types of short messages (Text, Flash, Picture, Ringtone [RTTTL, RTX], vCard, vCalendar, Operator Logo, CLI Icon), allowing interaction with GSM/CDMA Modems, SMPP connections, and cell phone-cable connections. Included is Unicode support for foreign character sets, smart disk caching for decoding, multi-format image support and much more. Smart Messaging® is a registered trademark of the Nokia corporation.
- EMS (Enhanced Messaging Services) Edition**
The ActiveXMS Mobile Messaging SDK (EMS Edition) is targeted at developers creating content for EMS enabled mobile phones. The SDK provides a rich set of functions to encode and decode the User Data strings for Animations, Pictures, Melodies, Sounds and Formatted Text. ODI and UPI support is included. Compatible with GSM/CDMA Modems, SMPP connections, and cell phone-cable connections.
- WAP Edition**
The ActiveXMS Mobile Messaging SDK (WAP Edition) is a lightweight DLL for developers building applications to configure mobile handsets remotely and to programmatically generate WAP Push (Service Loading and Service Indication) messages to deliver color pictures, polyphonic ringtones, Java applications and other content to mobile handsets. Deliver WML content links through WAP Bookmarks, and compose 'Over The Air' (OTA) provisioning messages for easy setup of mobile phones for WAP, MMS, GPRS, CSD and SyncML.

Includes extensive documentation and tutorials, with sample code for C#, Visual Basic .NET, Visual Basic 6.0, Visual C++ and ASP. For delivering messages, we recommend the message master™ suite of GSM Modem and SMSC SDKs from Denslack (www.denslack.com).

Find out for yourself why PureComponents Navigator is so successful!

NAVIGATOR

BE IN CONTROL OF BOTH... CODE AND APPLICATION

Navigator is a new and completely unique type of component. In principle, it is based on the now familiar Outlook bar that has become the de-facto standard for user interface functionality. Navigator has extended this concept by integrating several sophisticated functions, including: An extensive WYSIWYG designer that allows you to create a fully functional model of the application navigator within minutes; Configurable colors and styles that allow you to modify Navigator to a consistent, yet customized look-and-feel; and much more.

Three great reasons to buy Navigator

1. Has no steep learning curve

The Object model and event model is designed with ease of use in mind, and because it is based on the conventions of the .NET Framework, you will be familiar with the object model and can start to customize the behavior without the need to learn hundreds of functions and complicated constructions.

2. Has sophisticated functions

Navigator has built in functions for more complicated tasks, like runtime rebuilding of the tree structure or appearance style management. Because such tasks are time-consuming to develop, we have prepared them for you and therefore it saves your time and money.

3. Has extensive inplace designer

It is important that you are able to build your Navigator panel within minutes. With an extensive, cutting edge, in place designer which makes the design process of Navigation panel a snap, you can achieve just that! Be productive within a few moments!

Features Include

- ▶ Set color and font for each Group and Node.
- ▶ Groups and Nodes are individual entities within Navigator, you can set their properties directly in the Properties Window.
- ▶ The Navigator structure can be created from text stored in the clipboard.
- ▶ Use drag-and-drop to arrange nodes within the Navigator, changing the order and indent level of nodes.
- ▶ Advanced functions for the node position change: MoveUp, MoveDown, MoveLeft and MoveRight.
- ▶ Use Color Schemes from the predefined fine tuned set of combinations.
- ▶ Take advantage of the style inheritance in the hierarchical structure.

PureComponents TreeView - an excellent alternative to the standard .NET TreeView

TREEVIEW

BE AT THE TOP OF THE TREE... WITHOUT COMPROMISES

PureComponents TreeView is based on the object model of the standard .NET Framework TreeView but it includes much more useful functions which make it an excellent component to show and represent hierarchical data. Using an In place designer you are able to build an information tree without writing a single line of code. In the runtime mode each node in the hierarchy can be edited and moved around using built-in drag&drop. There are several ways to highlight specific information and you will find it useful that every node can have its own image associated with it.

Features Include

- ▶ Customization of visual style is very flexible and with the help of a rich set of features like fade effects, individual styles and colors for tree lines, checkboxes and other parts of the TreeView you can achieve an amazing look and feel.
- ▶ Content and style of your TreeView can be saved to the common XML file using the SaveXML function, using LoadXML you can create your TreeView structure at any time you wish.
- ▶ Every node object can have its own font, style, color and it can be set differently for its normal, selected and hover state.
- ▶ Using flags and markers you can explicitly mark some TreeView nodes, you can set any color you wish and choose from five different flag styles.
- ▶ TreeView supports several styles for checkboxes and you can define individual checkbox styles for any node you wish.

Developer Express XtraEditors .NET V2.0.1.0

Build rich user interfaces for your .NET applications without writing a single line of code.

The XtraEditors Library is a 100% C# based component suite designed and optimized for Visual Studio .NET and all .NET languages. It includes 15 data edit controls. Every editor in the suite is available in both unbound and data-aware mode. With built-in Windows XP Theme support, you can easily enable the newest look and feel standards in your next .NET application. Like all Developer Express .NET controls, you can also purchase the full C# source code for this library.

If you would like to advertise in this catalog please join our partner program by contacting
publishers@componentsource.com

Details can be seen on our web site at
www.componentsource.com/newarprogram

BECOME A COMMUNITY PARTNER

By partnering with ComponentSource, Community Partners can take advantage of the following benefits:

1. Your own component and tool store, filtered according to your target audience, giving developers one more reason to visit your site. Our catalog lists thousands of components and tools, along with free evaluations, demonstrations, help files and other technical information. Developers can purchase in a number of currencies and receive pre and post sales service and technical support for free from ComponentSource. You earn 3% commission on sales made through your store.

2. Featured on the ComponentSource Web site, under the Community Partners page in the Resource section for each relevant store and in the "Our Partners" section. Our Web site is visited by over half a million developers.

3. Included as part of a "Developer Communities" one-page feature in the ComponentSource Paper Catalog which has a circulation of 100,000, twice a year. A one-page advert in our catalog is worth over \$4,000.

4. Opportunity to appear in the ComponentSource customer newsletter which is sent to 160,000 subscribers worldwide, translated into 5 languages. This space is valued at \$1,500 - as a ComponentSource Community Partner you receive this exposure for free.

In return, ComponentSource asks all its partners to work with us to create promotions of the store and the components and tools in it, to their developer community. ComponentSource will provide full marketing support in these efforts.

CONTACT US

If you are interested in becoming a ComponentSource Community Partner please email communitypartner@componentsource.com

COMMUNITY PARTNERS

ComponentSource works with a growing network of developer community partners. These companies leverage ComponentSource's powerful electronic software distribution and ecommerce infrastructure, as well as our customer fulfillment services and product content to offer their audiences thousands of components and tools, via the establishment of their own customized, integrated stores hosted by ComponentSource. Please see below a showcase of companies who are part of our Community Partner Program. Our community partners offer an abundance of useful online resources such as forums, articles, tutorials, training, technical services and newsletters via their own Web sites.

ACTIVE-X.COM

Active-X.COM is an online library of downloadable, ActiveX components. The site allows developers to search for components by keyword, category, or publisher name. Active-X.COM also offers registration of companies' products, as well as newsletters developers can subscribe to for free. <http://www.active-x.com>

INETA

INETA (The International .NET Association) is an organization focused on growing the worldwide community of Microsoft .NET user groups. The company provides no-cost, structured, peer-based organizational, educational, and promotional support to their international member base. <http://www.ineta.org>

DEV.CITY.NET

devCity.NET is a developer community dedicated to .NET where developers can read experts' articles on real life problems, as well as learn Microsoft .NET. Developers receive answers on their forums and are rewarded for helping other members of the community. <http://www.devcity.net>

PINNACLE PUBLISHING

Pinnacle Publishing is a publisher of newsletters, eNewsletters and special reports on a variety of programming and database packages. Pinnacle publishes content for serious users of Visual Studio.NET, ASP.NET, Access, FoxPro, SQL Server, Oracle, XML, Visual Basic and Delphi. <http://www.pinnaclepublishing.com>

DEVELOPER FUSION

Developer Fusion is an online content provider, with development tutorials, articles, sample code, product reviews, components as well as a discussion forum. The Web site lists thousands of resources covering topics on ASP, Visual Basic, PHP, XML, C#, C++, VB.NET and ASP.NET. All members get the chance to win almost \$1,000 worth of prizes each month. <http://www.developerfusion.com>

VB.CITY.COM

vbCity.com is an online developer community providing resources such as experts' articles on real life problems and forums. Members are rewarded for helping other members of the community. <http://www.vbcity.com>

DEVELOPERSDEX

Developersdex is a large online resource for finding articles and tutorials on ASP.NET, C#, ADO.NET, and VB.NET. Developersdex indexes over 100 ASP, C#, SQL, VB and XML sites including 50 USENET newsgroups bringing in nearly 5,000 new resources every day. <http://www.developersdex.com>

VISUALBUILDER

VisualBuilder.com is an interactive community site for multi-skilled developers and IT staff. Developers can submit and share components, source code, articles and Web sites. VisualBuilder.com also features a discussion forum covering topics such as .NET, Java, JSP, ASP, PHP, C++, VB, XML, Oracle, SQL server, project management, and UML. <http://www.visualbuilder.com>

DEVX

DevX is a provider of technical information and services that enable corporate IT development teams to conquer development challenges and keep projects moving. DevX's resources are available through their public Web site covering development topics such as .NET, Web Development, Java, XML, C/C++, Visual Basic, and SQL. <http://www.devx.com>

VooJoo

VooJoo.com is a Web site dedicated to Java technology. It features products and services for and from the Java community as well as training, testing, recruitment, visa services for Java developers, product and service evaluation, and marketing services. <http://www.voojoo.com>

The Fastest and Easiest Way to Deliver Feature-Rich .NET Framework Solutions to Your Customers

Developer Express technologies help you build your best, reduce the amount of code you write, increase your productivity, and create stunning applications for Windows® and the Web in the shortest possible time...

To learn more about our tools and how they can significantly impact your bottom-line, visit us online at componentsource.com and search for Developer Express.

● Productivity Tools

CodeRush is a powerful editor add-in for Visual Studio® .NET. Create more code with fewer keystrokes, see complex software with clarity, and design forms with ease. Say goodbye to drudgery and get ready to become the programming superhero that you always knew you could be.

● Reporting

A comprehensive reporting platform for Windows® and the Web, XtraReports is fully integrated into the Visual Studio® .NET IDE and sets the standard for ease-of-use and flexibility. With XtraReports, you never have to cringe at the thought of having to design a report again!

● Visual Components

To build stunning and flexible applications, you need feature complete components... Ones that work as expected, each and every time. Our complete range of visual components will help you emulate today's most popular UIs without hassles or aggravation. Like all of our tools, our components were written in Visual C#™ and fully optimized for the .NET Framework and all .NET languages.

● Application Development Framework

XPO represents a powerful bridge between the true object world and relational databases. It gives developers the freedom to build true business objects without having to deal with the tedious complexities of mapping them onto individual database tables.

Developer
EXPRESS

Microsoft, Visual Studio .NET, Windows, and Visual C# are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.

El Tabbelle for .NET

High Performance Spreadsheet Component

Product Overview

In this age of information overload, the most challenging theme in business today is how to efficiently gather complex and diversified information and analyze this data instantly.

El Tabbelle provides over 200 types of rich spreadsheet functions and its own calculation engine. It offers fast and powerful spreadsheet features and displays data optimally, as required by business applications today. It offers 13 types of borders, 53 types of background patterns, and advanced features such as cell merge and multi-sheet, among others. It supports ADO.NET binding and helps create rich-user interfaces, thus making it an ideal choice for creating front-end for database applications.

The powerful calculation feature and its ability to create rich presentations make El Tabbelle the choice for providing the optimal solution to create .NET applications for the new generation.

Excellent Design Environment

El Tabbelle comes with a special designer that can be launched independently or from a control pasted on a form. Settings such as cell type, background color, borders etc. can be changed easily and such changes can be reflected by the control and these settings can be saved in a file.

Auto-Source Code Generation Feature

El Tabbelle displays the source code of contents set by the Designer. Due to this, not only can you quickly determine the coding method, you can also learn the product quickly thus minimizing the development time-frame. The auto-generation feature allows generation of code in both VB.NET and C#.

Powerful Spreadsheet Calculation Performance

Using its fast calculation engine containing 223 types of rich functions, El Tabbelle calculates data quickly and helps in analyzing the results.

Colorful Cell Types and Powerful Input Control

El Tabbelle uses El Inputte for .NET technology to provide powerful input handling for the cells.

Rich Cell Types

Supports 11 types of cells, including Text and Date.

Data Analysis Using Multi-Sheet Display

Multiple sheets can be handled within a single control. Efficient statistics and analysis is made possible by performing monthly total in each sheet, giving the year total in the last sheet.

Functions

12 types of Database functions / 15 types of Financial functions / 17 types of Information functions / 6 types of Logic functions / 11 types of Lookup and Reference / 55 types of Math functions / 75 types of Statistical functions / 32 types of Data and Text functions / Total - 223 types.

Easy Designing Using a Dialog-box

Everything related to design can be set through a visual interface. Whether it is a complex interface or applying 13 types of border or 53 types of rich background patterns, all this and more can be done without any coding.

Cell Format Settings

Edit the format settings for each cell, select from Date, Time, Number or a customized Input Mask.

Data Binding

Cells can be bound to entries in a database, ADO.NET functionality allows inheritance of column and row sizes.
